# Actualización del perfil

## ¿Actualización automática?

### Actualizar perfil

- Usaremos un modelo estadístico de autoría para identificar los nuevos artículos que escribas. También puede que actualicemos la información bibliográfica de los artículos de tu perfil o que identifiquemos las entradas de artículos duplicados, que se podrán combinar o eliminar. Indica cómo prefieres que se administren estos cambios.
  - Actualizar automáticamente la lista de artículos de mi perfil (*recomendado*)
  - No actualizar mi perfil automáticamente. Enviarme un mensaje de correo electrónico para revisar y confirmar las actualizaciones
- También puedes añadir y eliminar artículos de forma individual, actualizar sus datos bibliográficos y combinar registros duplicados. Las actualizaciones automáticas guardarán tus cambios y no los anularán.
- Google recopilará y mostrará todas las citas sobre tus artículos incluidas en Google Académico. Las citas se actualizarán automáticamente para reflejar los cambios que se produzcan en tu perfil y en Google Académico.

### Does anyone have experience with using alt metrics for assessing impact?

Promotion is increasingly dependent upon measuring research quality and research impact. We have seen the standard approaches such as citations, journal ranking and the h-index. But what about other ways of measuring impact, such as your work being discussed in blogs, on twitter, in community newspapers and on other forms of social media?

#### METHODOLOGY

Are the tools and methods appropriately applied, and are the data correct? No

The methods for generating STAP cells and their maintenance as reported in the paper are very novel. However, the readers would find it difficult to validate some of the findings.

For instant, there are some confusing steps in the procedures and the same confusion was also observed in their recent follow-up publication in "Protocol Exchange" dated 5th March 2014.

### Search Tips

You can find researchers who have registered with ResearcherID.

To search for a researcher, enter their name. For a first name, try entering either just an initial or the entire first name. Check the "other names" checkbox to search the Other Names field for either the last name or first name search terms.

Use the wildcard character \* at the end of a word to find matches with any ending (for example, Penn\*).

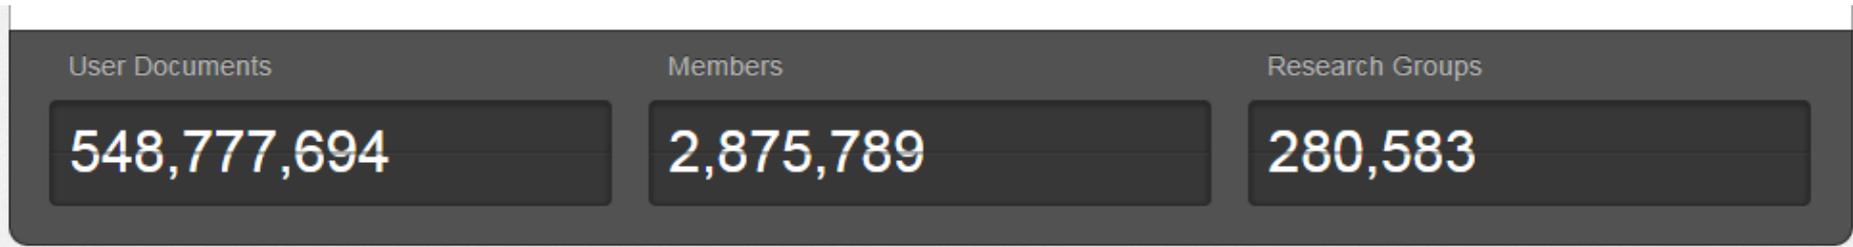

Or, if you know it, you can enter just the researcher's ResearcherID.
