

Appendix S2. List of the 221 articles used in the manuscript: A systematic review and meta-analysis on urban arthropod diversity by Sanllorrente et al. 2023

Abbate A, Campbell JW, Kimmel CB, Kern WH (2019) Urban development decreases bee abundance and diversity within coastal dune systems. *Global Ecology and Conservation*, 20, e00711.

Abdel-Dayem MS, Sharaf MR, Majer JD, Al-Sadoon MK, Aldawood AS, Aldhafer HM, Orabi GM (2021) Ant diversity and composition patterns along the urbanization gradients in an arid city. *Journal of Natural History*, 55(39-40), 2521-2547.

Aguilera G, Ekroos J, Persson AS, Pettersson LB, Ockinger E (2019) Intensive management reduces butterfly diversity over time in urban green spaces. *Urban Ecosystems*, 22, 335-344.

Arganaraz CI, Gleiser RM (2017) Does urbanization have positive or negative effects on Crab spider (Araneae: Thomisidae) diversity? *Zoologia (Curitiba)*, 34.

Arganaraz CI, Gleiser RM (2021) Are spider communities influenced by urbanisation? An approach using species and guilds resolutions and their interaction with the anthropogenic environment. *Journal of Natural History*, 54(41-42), 2687-2702

Arganaraz CI, Rubio GD, Gleiser RM (2018) Spider communities in urban green patches and their relation to local and landscape traits. *Biodiversity and Conservation*, 27, 981-1009.

Avondet JL, Blair RB, Berg DJ, Ebbert MA (2003) *Drosophila* (Diptera: Drosophilidae) response to changes in ecological parameters across an urban gradient. *Environmental Entomology*, 32(2), 347-358.

Bachvarova D, Doychinov A, Deltchev C, Stoev P (2015) Habitat distribution of myriapods (Chilopoda, Diplopoda) in the town of Shumen and the Shumen Plateau (NE Bulgaria). *Arthropoda Selecta*, 24(2), 169-184

Baena ML, Escobar F, Valenzuela JE (2020) Diversity snapshot of green-gray space ants in two Mexican cities. *International journal of tropical insect science*, 40(2), 239-250.

Baldock KCR, Goddard MA, Hicks DM, Kunin WE, Mitschunas N, Osgathorpe LM, Potts SG, Robertson KM, Scott AV, Stone GN, Vaughan IP, Memmott, J (2015) Where is the UK's pollinator biodiversity? The importance of urban areas for flower-visiting insects. *Proceedings of the Royal Society B: Biological Sciences*, 282(1803), 20142849.

Ball-Damerow JE, M'Gonigle LK, Resh VH (2014) Changes in occurrence, richness, and biological traits of dragonflies and damselflies (Odonata) in California and Nevada over the past century. *Biodiversity and Conservation*, 23, 2107-2126.

Banaszak-Cibicka W, Dylewski L (2021) Species and functional diversity - A better understanding of the impact of urbanization on bee communities. *Science of the Total Environment*, 774, 145729.

Banaszak-Cibicka W, Twerd L, Fliszkiwicz M, Giejdasz K, Langowska A (2018) City parks vs. natural areas - is it possible to preserve a natural level of bee richness and abundance in a city park? *Urban Ecosystems*, 21, 599-613.

- Barbosa AM, Fontaneto D, Marini L, Pautasso M (2010) Is the human population a large-scale indicator of the species richness of ground beetles? *Animal Conservation*, 13(5), 432-441.
- Barroso MS, da Silva BJ, Montes MJF, Santos PJP (2018) Anthropogenic Impacts on Coral Reef Harpacticoid Copepods. *Diversity*, 10(2), 32.
- Battan-Horenstein, M, Mulieri PR, Gleiser RM (2021) Evaluation of environmental and local factors on urban sarcosaprophagous Diptera: a case study with Sarcophagidae. *Medical and Veterinary Entomology*, 35(2), 158-168
- Bazinet NL, Gilbert BM, Wallace AM (2010) A Comparison of Urbanization Effects on Stream Benthic Macroinvertebrates and Water Chemistry in an Urban and an Urbanizing Basin in Southern Ontario, Canada. *Water Quality Research Journal*, 45(3), 327-341.
- Beaulieu MRS, Hopperstad K, Dunn RR, Reiskind MH (2019) Simplification of vector communities during suburban succession. *PLoS one*, 14(5), e0215485
- Belskaya E, Zolotarev M, Zinovyev E (2020) Carabidae assemblages in pine forests with different recreation regimes within and outside a megalopolis. *Urban Ecosystems*, 23, 27-38.
- Bennett AB, Lovell S (2019) Landscape and local site variables differentially influence pollinators and pollination services in urban agricultural sites. *PLoS One*, 14(2), e0212034.
