EPIGRAMMA. XLII. DE ARIA, ET PAETO.

ASTA SVO GLADIVM. Pulcherrimum tetraſtichon de Aria patauina Pæti uxore. Quæ damnato uiro, propterea quod in Claudiũ coniurauerat, ad illum profecta, prius ſeſe, ne poſt eũ uiueret, gladio perfodit, tũ uulnere extractum uiro, ut idẽ faceret porrexit. De hac ſic ſcribit Plynius Secundus in epiſtolis. Præclarum illud quidem Ariæ ferrum ſtringere. perfodere pectus, extrahere pugionem, porrigere marito. Addere uocẽ immortalem, ac penè diuinam, Pæte non dolet. CASTA. Honeſta. fidem ſeruans uiro, nullam turpitudinis notam habens. Caſtum proprie dicimus pudicum, & immaculatum, quaſi caſtratum. Nã caſtrare proprie eſt pudenda amputare. Qui autem ſine pudendis eſt, neceſſario caſtus eſt. Virg. Caſta pudicitiam ſeruat domus. Per metaphoram tamen caſtum pro honeſto, & continenti accipimus. unde & in antiquiſſimis epigrãmatibus aliquando legimus uxori caſtiſſimæ. & caſtum cantum dicimus, in quo nihil eſt laſciui. Varro. Demittis acreis pectore luctus, cantuq; caſto corda relaxas. Item caſtam manum. quæ ſe à furtis, & rapinis continet. Idem, nec manus uiſco tenaci tinxerat uiri caſtas. Item pro pio, & religioſo. Virgilius, Quiq; ſacerdotes caſti, dum uita maneret. Idem, Nulli fas caſto ſceleratum inſiſtere limen. Hinc caſtitas, hoc eſt pudicitia deducitur, quam ueteres etiã caſtitudinem dixere. Acci. ibi fas. ibi cunctam antiquam caſtitudinem. & caſte aduerbium, hoc eſt pudice. honeſte. & comparatiua, ac ſuperlatiua eorum caſtior. caſtiſſimus. caſtius. caſtiſſime. & inceſtum, ſiue maſculino genere, inceſtus (utroque enim modo dicitur) quaſi non caſtus. eſt autem crimen, qđ committitur cum ea, cum qua illicitum alioquin matrimoniũ fuiſſet, utputa cum matre. ſorore. ſacris uirginibus. aut alijs huiuſmodi. & inceſto uerbum, quod ſignificat fœdo. polluo. Virg. totamq; inceſtat funere claſſem. ab inceſto inceſtuoſus dicitur, qui inceſtum commiſit. Stuprum aliquando pro inceſtu ponitur. Proprie tamen ſtuprũ eſt coitus lege uetitus, qui duplex eſt. unus cum nupta, quod & adulteriũ dicitur, aut cum puero, aut cum ſanguine coniunctis, ſiue ſacris uirginibus. alter cum uim afferimus cuilibet perſonæ, etiam ſi ancilla ſit. Vnde ſtuprare in utrũq; ſenſum accipitur. Quint. Vxor marito dicit appellatã ſe de ſtupro à priuigno. item furtiua ſtupra, raptoſq; concubitus obijciat. uel falſò maritus. Stuprũ quoq; pro turpitudine ueteres uſurparunt. Enni. Fœde, ſtupréq; caſtigor quotidie. Stupre inquit, hoc eſt turpiter. ſecundũ quoſdam caſtra, quod in ijs caſte, & ſine mulieribus uiueretur. quamuis alij à caſtrando dicta malint, quod in ijs libido caſtraretur. nos à caſa potius origiñẽ habere dixerimus. & caſtigo, quod proprie eſt increpo. reprehendo, & quaſi caſtum, hoc eſt honeſtum ago. Cic. Omnis autem animaduerſio, & caſtigatio contumelia uacare debet, neq; ad eius, qui puniat aliquem, aut uerbis caſtiget, ſed ad Reip. utilitatem referri. idem. Et quoniam de impudentia diximus, caſtigemus & ſegnitatem, atq; inertiam. Virg. His grauis Entellũ dictis caſtigat Aceſtes. idem.

Caſtigatq́; moras, opere omnis ſemita feruet. Aliqñ tamen caſtigo pro punio accipitur. Idem, Caſtigatq́;, auditq́; dolos, ſubigitq́; fateri. hinc caſtigatum dicimus correctum. emendatũ. probum. honeſtum. à quo caſtigatior. caſtigatiſſimus. caſtigate. caſtigatius. caſtigatiſſime. & caſtigatio, cuius diminutiuum eſt caſtigatiuncula. Caſta mola à ueteribus uocabatur ſacrificij genus, quod ueſtales uirgines faciebant. & caſtula, palliolum præcinctum, quo nude uirgines infra papillas præcinguntur, id & perizonium, & præcinctorium appellatur. Caſteria uero primogenium eſt, & ſignificat locum, ubi cum nauigatio conquieſcit, remi, & gubernacula reponuntur. Plau. Quin ſi pol repoſui remum ſola ego in caſteria, ubi quieſco, omnis familiæ cauſa conſiſtit tibi. caſtanea nõ à caſto deducitur, ſed græca uox eſt, quippe græci κάστανον uocant, ē nucum genere eſt. Virgil. Caſtaneasq́; nuces, mea quas Amaryllis amabat. armatũ huic echinato calice uallum eſt, terni quibuſdam partus ex uno calice, cortexq́; lentus. proxima uero corpori membrana niſi detrahatur, ſaporem infeſtat. Torrentur in cibis gratius. Sardibus, hæ principio prouenere. ideo apud græcos ſardiani balani appellantur. Plura earum genera. Tarentinæ planæ figura, facillime mundantur, facilius balanitis, quæ rotundior eſt, pura maxime ſalariana. laudatior coreliana, & ex ea per inſitionem facta meterea. uulgatiores, quæ coctiuæ uocantur. Patria laudatiſſimus Tarentum & in Campania Neapolis. Cæteræ ſuum pabulo gignuntur. A` caſtro uero caſtratio deriuatur, quæ proprie eſt uirilium amputatio. ponitur tamen pro quacunq; truncatione, ſiue priuatione. Pacuuius. Vt eſſet aliquis, qui linguam eius caſtraret. Quidam ſpadones. caſtratos, & eunuchos ita diſtinguunt, ut caſtrati ſint, quibus teſtes naturaliter deſunt. Spadones quibus uiolenter detracta eſt uirilitas. Eunuchi, qui ſe ſponte caſtrauerunt. unde ſunt illi uerſus. Caſtratos natura facit, uiolenta ſpadones Mangonum improbitas, eunuchos ſola uoluntas. Vlpianus tamen iuriſconſultus ſpadonum nomen generale eſſe affirmat, & eo omne genus euiratorum comprehendi. Ab eunuchus fit eunucho uerbum, quod ſignificat caſtro, cuius paſſiuum eſt eunuchor. Varro. Siquis patriam maiorem parentem extinguit, in eo eſt culpa, quod facit pro ſua parte is, q̃ ſe eunuchat. Afranius. itaq; eunuchatus in medium prodit. Eſt autem græca uox εὐνοῦχος, unde εὐνουχιστὴς caſtrator dicitur. εὐνουχίζω caſtro. TRAXERAT. Leuauerat. extraxerat. Trahere enim aliquando ſignificat per uim ducere. Auide, atque inuide. procax. rapax. trahax. tracentis uerſibus tuas impuritates loqui nemo poteſt. & tractim, quod ſignificat trahendo ſine intermiſſione. iugiter. Virgilius. Tum ſonus auditur grauior, tractimq́; ſuſurrat. & tractus, quod modo pro regione, & plaga accipitur. Idem. In dicio eſt tractu ſurgens oleaſter eodem, modo ſignificat apud dialecticos quicquid conſtituimus uerum eſſe, & falſum reperitur. Quod & antiſtrephon, & reciprocum argumentum uocatur, de quo ſuperius diximus. & tragula genus teli, quod ſcuto infixa trahatur. item rete, quod uulgo nunc tractam uocant. Plynius, Vſus ſuberis anchoralibus maxime nauium, piſcantiumq́; tragulis, & cadorum obturamentis, præterea hyberno fœminarum calceatu. Et trabs, quod in altum trahatur. Trabes enim uocamus duo tigna ædificij gratia ſimul compacta. nam cum ſimplicia ſunt, non trabes, ſed tigna uocantur, quamuis tigni appellatione materia omnis, quæ ædificio neceſſaria eſt, contineatur. item quæ uineis adhibetur, ut perticæ. & pedamenta. à trabe trabica nauis dicta, quod ſit trabibus confixa, quales ſunt, quibus germani in Rheno, ac Danubio utuntur. Pacuuius, Labitur trabica in alueos. & tracto frequentatiuum. à quo attrecto, & contrecto, quæ proprie ſignificant frequenter tango. Ponitur tamen tracto aliquando pro mereor, ut bene tracto te, pro eo, quod eſt bene mereor de te. Vnde fit detrecto, quod ſignificat male tracto. item recuſo. Iuſtinus. Nec ipſe detrectauit certamen. item pro diſſero. Nam ea, de quibus diſſerimus, frequenter tangere uidemur. Hinc tractatus deducitur. item à traho compoſita fiunt attraho. circuntraho. intertraho. pertraho notæ ſignificationis. item detraho, quod proprie ſignificat tollo. extraho. Terẽtius, Aſſideo, occurrunt ſerui. ſoccos detrahunt. Cicero, Poſtremo ſicui ciuitati ſociæ tantum detraxit, quantum commodum fuit. Ponitur tamen frequenter pro derogo. Vnde detractores dicuntur, qui famæ alicuius derogare nituntur. Cicero, Et ſi quæritis, ut ipſe de me detraham, illos ego accuſatores peto. Extraho, extra traho. Varro. Metium Sufetium propter perfidiam interemit penè imperioſius, quàm humanius. Nam equis ueluti curriculum ex utraque parte deligatum diſtraxit. interdum uendo, etenim quæ uendimus, à nobis ſeparamus. Lucilius, Diuidant, diſſipent, diſtrahant. Retraho retro traho, ſiue rurſus traho, ſiue reuoco. à quo retracto eiuſdem ſignificationis. unde Aurelius librum retractationum appellauit, in quo multa retractat, hoc eſt reprobat, reuocat, ex ijs, quæ antea ſcripſerat. item obtrecto, hoc eſt detraho. maledico, quaſi aduerſus aliquem tracto. à quo obtrectatores detractores dicuntur, atq; maledici. & obtrectatio maledicentia. A` contraho quando colligo ſignificat, contractio dicitur. unde neruorum contractionem appellamus, cum nerui rigore quodam colliguntur, nec poſſunt extendi. Cuius morbi peſſimum genus eſt, cum uel caput ſcapulis, uel mentum pectori, uel rectam & immobilem ceruicem intendit, primum græci epiſthotonon, ſequentem emproſthotonon, Vltimum tetanon appellant. Contractioni contraria eſt reſolutio neruorum, quæ modo tota corpora, modo partes infeſtat. illam apoplexian, hanc paralyſin nominamus. à qua paralitici, ſicut ab apoplexia apopletici. DE VISCERIBVS. De uulnere in uiſcere porrecto. Viſcera enim ut ſupra diximus, interiora omnia dicuntur. ut iecur. cor. pulmo. præcordia. ilia. & reliqua, quæ pelle teguntur. Ex ijs exta ſunt, quæ dijs ſacrificantur, & ex quibus aruſpices futura prænoſcunt, ut ſupra diximus. Cor, quod animalibus cæteris in medio pectore eſt, homini infra læuam papillam ita palpitat, ut admota manu duo eſſe uideantur. hoc primum naſcentibus formari in utero tradunt deinde cerebrũ, ſicut tardiſſime oculus, ſed oculos primum mori, cor nouiſſime. in hoc mens habitat. ſolum hoc uiſcerum uitijs non maceratur, nec ſupplicia uitæ trahit, ſed læſum mortem ilico aufert. audacia animalia exiſtimantur, quibus paruum cor eſt, pauida quibus prægrande. Cuius rei hanc eſſe

rationem Ariſtoteles tradit, quod grandiora corda minus caloris, q̃ pro ſua magnitudine neceſſarium ſit, obtinent. ut enim in paruo, & magno domicilio tantumdem ignis non æque calefacit, ſed minus caloris ſentitur in magno, ſic in ampliori corde calor naturalis minus agit, q̃ in mediocri, quo fit, ut ſanguis frigidior ſit, ex quo prouenit metus, maximũ cor eſſe tradũt portione muribus, lepori. aſino. ceruo. & oĩbus timidis, aut propter metũ maleficas. in Paphlagonia bina ꝑdicibus corda ſunt. Aegyptij, quibus mos eſt cadauera medicata ſeruare, tradunt cor in homine ꝑ ſingulos annos ad binas drachmas põderis accedere. Ab eo detrahi tantũdẽ, & ideo ultra centeſimũ annũ, defectu cordis nõ uiuere hominem. Hirto corde gigni quoſdam homines produnt, & hos fortiſſimos eſſe induſtria, ut Ariſtomenem Meſſeniũ, q trecentos occidit Lacedæmonios, ipſe cõ uulneratus, & captus ſemel, ꝑ cauernam latomiarũ anguſtias euaſit uulpiũ aditus ſecutus. iterũ captus ſopitis cuſtodibus ad ignẽ aduolutus lora cum corpore exuſſit. Tertio capto Lacedæmonij diſſecuere pectus cauſa uidẽdi, & hirſutũ in eo cor reperunt. Cæſari dictatori quo die primũ ueſte purpurea proceſſit, atq; in ſella aurea inſedit, bis ſacrificanti in extis defuit cor. unde quæſtio magna de diuinatione argumẽtantibus orta eſt. Potueritne ſine illo uiſcere hoſtia uiuere, an ad tempus amiſerit. Negatur cremari cor poſſe in ijs, q cardiaco morbo obierint. item in ijs, qui ueneno fuerint interempti. Hinc Vitellius reũ Piſonem eleganti oratione huius ſceleris coarguit hoc uſus argumẽto, palamq́; teſtatus non potuiſſe ob uenenũ cor Germanici Cæſaris cremari. E contrario innocentiam ſuam tutatus eſt Piſo, qđ princeps cardiaco morbo obijſſet. Cardiaci nomen ἀπὸ τῆς καρδίας, hoc eſt à corde deducitur. unde & ipſum cordis uocabulũ deriuatur, atq; inſaniæ proprie cõtrarius eſt hic morbus, quãuis ſæpe ad eũ phrenetici tranſeunt. Siqdem mens in illis labat, in hoc conſtat. id aũt nihil aliud eſt, q̃ nimia imbecillitas corꝑis, qđ ſtomacho lãguente in modico ſudore digeritur. licetq; protinus ſcire id eſſe ubi uenarũ exigui, imbecilliq; pulſus ſunt. Sudor aũt ſupra conſuetudinẽ, & modo, & tempore ex toto thorace ceruicibus, ac etiã capite prorũpit. A` corde cordatus deducitur, qđ ueteres pro ingenioſo uſurpabant. & bonã mentem habente. Nam & cor pro ipſa mente accipitur. Vnde cordire dixerunt pro eo, qđ eſt animo ſedere, quãuis cordi eſſe, & in animo eſſe differunt. Nã in animo eſt idẽ ſignificat, qđ in animo habeo, uel animus eſt mihi, ſeu uolo, ſiue cõſtituo. Ci. Nã mihi erat in animo mittere ad Dolabellã. Cordi uero eſt, accipitur pro eo, qđ eſt delectat, & placet. Ter. Si tibi hæ nuptiæ ſunt cordi. idem. Quia uterq; utriq; eſt cordi. i. ſi nuptiæ iucundæ ſunt tibi, et uterq; utrũq; amat. item à corde corculũ, hoc eſt paruũ cor. Pl. Meum corculũ, meus molliculus caſeus. et cordoliũ, hoc eſt cõmiſeratio, & quaſi dolor cordis. idẽ, at mihi cordoliũ eſt. Quid id, unde eſt cordoliũ tibi? et corculus maſculino genere acutus. & coragiũ inſtrumentũ ſcænicum ab agendo corde, hoc eſt per uoluptatẽ ducendo. & cura, quaſi corura, de quo, & eius deriuatiuis ſuperius locuti ſumus. & corgo aduerbiũ, quo ueteres pro profecto utebãtur, quaſi ex corde ago, ideſt loquor. & recordor. quaſi in cor, hoc eſt in mentẽ reuoco, à quo recordatio. & ſocors ignauus, quaſi ſine corde, à quo ſocordia ignauia. et ſocordes ab antiqs dicti agni, qui poſt Cal. Nam poſt id tempus concepti inualidi ſunt. & concors, q unius mentis, ſiue unius animi eſt. à quo concordia, et qđ apud ueteres in uſu fuit, concorditas. Pac. Cõcorditatẽ hoſpitio adiunctã perpetuã conſeruetis. & concordo uerbũ, hoc eſt conuenio, & aduerbium concorditer. & e contrario diſcors, qui corde, hoc eſt animo diſſidet. à quo diſcordia, pro qua ueteres ẽt diſcorditatẽ dixere. Pacu. Quãtaſq́; nec diſcorditas clades importet familiæ. & diſcordo uerbum, hoc eſt diſſideo, & aduerbiũ diſcorditer, quãuis hæc aliq nõ à corde, ſed à chorda deducta exiſtimẽt. & uecors turbati, ac mali cordis. à quo uecordia ſtultitia. interdum ẽt uecors pro ſtultus. et uecordia pro ſtultitia uſurpatur. & excors, exanimis. Cic. At unde magna diſſenſio eſt aliis cor ipſum animus uidetur. unde excordes, uecordes, concordesq́; dicuntur. A` qbuſdam ẽt duricors, & grauicors, pro eo, qui eſt duri, & grauis cordis. & præcordia mẽbranæ, quæ exta ſeparant ab inferiore uiſcerũ parte, ideo ſic uocata, quia cordi prætenduntur. græci phrenas appellant. hæc natura prouidens ob id præcipue fecit, ne ꝑ uicinitatẽ alui cibis animus ſupprimeretur. Propterea ad hanc membranã ſubtilitatem referunt mẽtis. unde phrena græci ἀπὸ τοῦ φέρειν ὄνησιν. i. à ferẽda utilitate nuncupauerunt, hinc φρόνιμος prudens dicitur, & φρόνησις prudentia. item e contrario phreneſis inſania. & phrenetis, qui ex morbo inſanus eſt. ideo nulla eſt præcordijs caro, ſed neruoſa quædã ſubtilitas, in qua eſt præcipua ſedes hilaritatis, qđ titillatione alarũ maxime intelligitur. Paulus iuriſconſultus. Item urnæ areæ. & congiaria ſextaria. modo ſignificat munus, quod à principe in populum datur. Quintil. Vt Fabius maximus incuſans Auguſtæ congiariorum, quæ amicis dabantur, exiguitatem, heminam eſſe dixit. nam congiarium commune eſt liberalitatis, atq; menſuræ. & tribus, quoniam ager Romanus primo diuiſus in treis parteis fuit, & tres ptes populi factæ. una Tatientium à Tito rege Sabinorũ amico populi Romani. alia Rãnium, ſiue Rãnenſium à Romulo. tertia Lucernum à Lucumone, ſed poſtea aliæ quoq; partes urbis factæ, quæ ſimiliter tribus appellatæ ſunt, & hoc uocabulum tam pro loco, quàm pro iure, atq; hominibus uſurpari cœptum. hinc tribules dicti, qui ex tribu ſunt, & contribules, qui ex eadem tribu. & tributim aduerbium, hoc eſt per tribus. & tribuni ærarij, quibus tributa ſoluebantur, quamuis poſtea tribuni etiam uocati ſint, qui magiſtratum gerebant. ut regum tempore tribuni celerum, qui centurijs præerant. poſtea facti ſunt tribuni militares in caſtris, qui parem ferè cum conſulibus haberent poteſtatẽ, & in diſſenſione plebis à patribus facti ſunt tribuni plebis, quibus maxima eſt tradita poteſtas. quippe & prouocabatur ad eos & omnia ſenatuſconſulta niſi per eos approbata, et ſubſcriptione. Item à tribubus tribunal locus excelſus, in quo qui ius tribubus redderet conſidebat. & tributum, quod ea pecunia, quæ populo imperata erat, tributim ſoluebatur. magis enim hoc placet, quàm quod tribus à tributo dicatur, ut Liuius ſentit. ſumi poſtea cœpit hoc uocabulum largus pro omni munere, quod à ſubditis ſoluitur, à quo qui ita ſoluunt tributarij uocantur, & ab hoc tribuo deriuatum, quaſi tributum pendo. ponitur tamen pro eo, quod eſt do, concedo. Cicero. Sed hoc beneuolentiæ eius tribuendum eſt. ab hoc fit compoſitum attribuo. à quo apud Rhetores attributa dicuntur perſonis, & rebus. & retribuo pro eo, quod eſt remunero, et cõtribuo ſimul tribuo, à quo contributum. contributor. contributio. & diſtribuo, quod eſt res ſeparatim diſpono, et ſuum cuiq; tribuo. à quo diſtributio apud Rhetores dicitur figura, quæ à græcis Meryſmos uocatur, magnæ plerunq; gratiæ, & utilitatis, cum ſingulas res ſeparatim proferimus, ſuum cuiq; proprium tribuentes. Ariſtoteles. Alexandro enim Macedoni, neq; in deliberando conſilium, neq; in præliando uirtus, neq; in præſtando beneficio benignitas deerat, ſed duntaxat in ſupplicio crudelitas, nam cum aliqua res dubia accidiſſet, apparebat ſapientiſſimus, cum aut confligendum eſſet cum hoſtibus, fortiſſimus, cum uero præmium dignis tribuendum, liberaliſſimus, & cum animaduertendũ clementiſſimus. præterea à tris trieteris deducitur, hoc eſt trium annorum ſpatium, τρεῖς enim græci tres, ἔτη annos uocant. Martialis,

Aſpicis, ut paruus, nec adhuc trieteride plena

Hinc trieterica appellata ſunt ſacra Liberi patris, quæ ex In-

Tertius qui tertiã. quartus qui quartam. tertio conſul, & tertiũ conſul eo modo differunt, quo quarto conſul, & quartum conſul differre ſupra oſtendimus. treis numero collegium facere exiſtimauit Horatius priſcus, q̄d magis ſequendum affirmat Marcellus, quàm quod pleriq; ſcripſerunt maiorem ad id numerum neceſſarium eſſe.

EPIGRAMMA XLIX. AD CAECILIANVM.

d IC MIHI QVIS FVROR EST. Cæciliani gulã execratur, qui uocatis ad cœnam amicis, ſolus ipſe boletos uorabat. QVIS FVROR. Quæ inſania, uel quæ tanta ira in conuiuas? Furor enim aliquando pro inſania ponitur, unde furioſum inſanum dicimus, aliquando pro nimia ira inflammatus. à quo fit furibunde aduerbium. Lucanus. Quis furor o ciues? quæ tanta licentia ferri? Quid inter furorem, inſaniamq; proprie interſit, præclare oſtendit Cicero, cum inquit. itaque non eſt ſcriptum ſi inſanus, ſed ſi furioſus eſſe incipit. inſaniam enim cenſuerunt inconſtantiam, ideſt ſanitate uacantem, quæ tamen poſſet tueri officiorum, & uitæ communem cultum, atque uſitatum. furorem autem rati ſunt mentis ad omnia cæcitatem, quod cum maius eſſe uideatur, quàm inſania, tamen eiuſmodi eſt, ut furor in ſapientem cadere poſſit, non poſſit inſania. fit enim furor aliquando uitio ualetudinis, ut in ijs, qui melancholici appellantur, quos tamen Ariſtoteles cenſuit habere aliquid in animis præſagiens, atq; diuinũ. Aliquando mente uim quadam diuina concitata, qualis eſt furor poëtarum. negat qppe Democritus quenquam poëtam magnum eſſe poſſe ſine furore, quod idem Plato in Phædro facit. maxima inquit bona nobis per furorem eueniunt diuino munere conceſſum. Nam & quæ in Delphis futura prædicit uates, & quæ in Dodona ſacerdotes, furore quodam effunduntur. Tum illa, quæ à muſis fit occupatio mentis furor eſt. Vnde tam præclara poëtarum carmina oriuntur. qui uero ſine furore muſarum ad poeſis fores accedunt ſperantes arte, atq; doctrina poëtas ſe bonos euaſuros, inanes & ipſi, & eorũ opera ſunt comparatione eorũ, qui furore agitantur. huiuſmodi furorem definire poſſumus animi à corpore abſtractionem diuino quodam inſtinctu prouenientem. Cicero. Ineſt igitur in animis præſagatio extrinſecus iniecta, atq; incluſa diuinitus, ea ſi exarſit acrius, furor appellatur. cum à corpore animus abſtractus diuino inſtructu concitatur. à furor furo uerbum deducitur, quod aliquando ſignificat ira exagitor. Apuleius. Furit, enſem corripit, fertur in eum præceps, nil tale timentem aggreditur. aliquando inſanio. Plau. Is planè furit, quid agat non uidet. ab hoc fit furiatus, quod quidã à furioſo ita ſeparant, ut furioſus ſit, à quo furor nunquam recedit, furiatus autem qui furit. Virgi. Non tulit hanc ſpeciem furiata mente Corœbus. Item à furor furiæ dicuntur, quæ deæ ſunt furoris, & Acherontis, noctiſq; filiæ fuiſſe produntur. quidam duas eſſe dicunt. Item à uoro fit compoſitum deuoro, quod proprie ſignificat abſorbeo, abſumo. irripio. transfertur tamen etiam ad alios ſenſus. Martia. oculis deuorantibus draucos. Plau. Quid tibi uis dipyrum qui Phaëthonta facis?

Plyn. Figulinum opus Encauſto pinxit. Vitruuius. Quod facere ab encauſte didicerat. Apul. Encauſticen oppido exercens ſe, & duos filios ſuſtentabat. hoc autem in cera, tabulis, eboreue fieri ſolebat. cæſtro primo, quod & ab urendo uriculum dicitur cauata materia. Procedente uero tempore cera punica cum oleo liquefacta candenti ſetis inducta ſupra tabulas, iterumq; admotis Gallæ carbonibus aduſta ad ſudorem uſq;. Poſtea candelis ſubigebatur. deinde linteis puris ita ut quaſi marmora niteſcerent, quæ pictura in nauibus, nec ſole, nec ſale, uentiſq;

corrumpitur. Dici autem encauſtum latine inuſtum poteſt. καυστὸν enim græci uſtum dicunt. καῦσιν ardorem καυστὴν uſtorem. unde ἔγκαυστον inuſtum. ἔγκαυσιν inuſtionem. ἐγκαύστην inuſtorem. ἐγκαυστικὴν inuſtariam, hoc eſt inurendi ſcientiam uocant. ſic enim nos dicere inuſtariam poſſumus, quemadmodum ſtatuariam, artem faciendi ſtatuas. & figlinam, artem fingendi imagines ex argilla, quam græca uoce, ſed apud latinos uſitata, plaſticen appellamus, ἀπὸ τοῦ πλάσσειν, quod fingere eſt. Vnde & plaſtes dicitur, qui eam artem exercet, hoc eſt fictor. et opus ipſum plaſma, à quo recentiores quidam plaſmare uerbum deducunt. id latine figlinum appellatur. Plynius. Aliqui in crudis fictilibus urunt, donec figlinum decoquatur. À plaſtice proplaſtice dicitur. ars faciendi typos, hoc eſt formas, quibus formandis figlinis operibus utuntur. τύπος enim græce forma dicitur. unde protypa dicta ſunt opera, quæ ante typos facta ſunt. Ectypa uero, quæ ex ipſis ſunt formata. & archetypus prima, et principalis forma. Iuuenalis. Et iubet archetypos pluteum ſeruare cloantas. Plyn. Dibutades primus perſonas tegularum extremis imbricibus impoſuit, quæ inter initia protypa uocauit. poſtea idem ectypa fecit, propter hoc Plaſtes appellatus. Proplaſtice etiam pro ipſa forma aliquando ponitur, quam ad formanda alia opera adhibent. Idẽ Archeſilai proplaſticen pluris uenire ſolitam conſtat ab artificibus ipſis, quã aliorum opera. Effigiem è proplaſtice formare primus inuenit Lyſiſtratus Sicyonius frater Lyſippi, creuitq; res in tantũ, ut nulla ſigna, ſtatuæue ſine typis argyllæ fierent. idem hominis imaginem gypſo è facie ipſa primus omnium expreſſit, ceraq; in eam formam gypſi infuſa emendare inſtituit. Plaſticen uero conſtat primum inuentam à Dibutade Sicyonio figulino Corinthi, filiæ opera, quæ capta amore iuuenis illo abeunte peregre, umbram è facie eius ad lucernam in pariete lineis circunſcripſit, quibus pater eius impreſſa argilla formã fecit, & cum cæteris fictilibus induratum igni propoſuit. item picturam artem pingendi, quæ graphice uocatur ἀπὸ τοῦ γράφειν, quod pingere eſt item toreuticen artem cælandi. unde toreumata opera cælata. & toreutes artifex cælãdi dicitur ἀπὸ τοῦ τορεύειν, quod cælare eſt. item anaglypticen artem ſcalpendi. unde & anaglyptes ſcalptor dicitur. & anaglypta uaſa ſcalpta ἀπὸ τοῦ ἀναγλύφειν, quod excalpere eſt. Plyn. Nũc anaglypta, in aſperitatemq; inciſa circunlita auro, & picta quærimus. Martialis.

Nec deſunt tibi uera graniana,
Nec quæ callaico linuntur auro,
Nec menſis anaglypta de paternis.

Poſtea tamen inualuit uſus, ut inurere pro pingere uſurpetur, Vnde Niſias clariſſimus pictor ſupra tabulam, quã diligentiſſime pinxerat, ſcripſit inuſiſſe ſeſe, hoc eſt pinxiſſe. quẽadmodum Lyſippus Aeginæ picturæ ſuæ inſcripſit Enetein, hoc eſt ἐνέτην ideſt inſitum ἀπὸ τοῦ ἐνιέναι, qđ inſerere eſt à ſimilitudine. ſ. Encauſtice, in qua ceræ tabellis inſeruntur. item per metaphorã inurere pro pingere capimus. Varro. Inuſta ei macula eſt, quã delere haud facile erit. Ab uro etiã buris deducitur curua pars aratri poſterior, qđ, ut curuari poſſit, ante peruritur. Virgilius. Continuo in ſyluis magna ui inflexa domatur In burim. ueteres etiam buram uſurparunt. Varro. Et ſæpe fracta bura relinquunt bouem in agro. Et buſtũ, qđ proprie locus dicitur, in quo mortuus combuſtus, ac ſepultus fuit, quaſi bene uſtum. Nam quando alibi ſepultus mortuus erat, locus, in quo erat combuſtus, uſtrina dicebatur. Nunc uulgo buſtum appellamus ſepulchrum, quamuis cadauera non urantur. à quo buſtuarij dicti ſunt gladiatores. nam cum

mos eſſet in ſepulchris uirorum fortium captiuos necari, id poſtea crudele uiſum foret, placuit, ut eo morte ſublato, introducerentur gladiatores, qui ante ſepulchra dimicarent. à quo buſtuarij ſunt appellati. MAIOR DECEPTAE. Ordo eſt. Fama dextræ deceptæ eſt tibi minor gloria, quàm. s. ſi non fuiſſet decepta. MINVS. Quàm. s. fecit. Minus aliquando comparatiuum eſt, à paruum neutri generis. ſicut minor maſculini, & fœminini aliquando à parum. Dicimus enim parum pecuniæ habeo. non autem paruum. itaq; cum ita loquimur, minus pecuniæ habeo, certum eſt id minus non à paruū, ſed à parum deduci. Capitur etiam minus frequenter pro nō, præſertim cum ſin, aut cum quo, quando ut ſignificat, ut ſin minus. i. ſi. non. & quo minus. i. non. ſicut quo ſecius etiam pro ut non. A minus quando nomen eſt, fit ſuperlatiuum minimus. quando uero aduerbium, minime. item minuo uerbū, quod aliquando ſignificat minorem reddo. Plyn. Radix commanducata dentium dolorem minuit. aliquando tollo. unde minui apud ueteres populo luctus dicebatur ædis dedicatione, cum à cenſoribus luſtrum condebatur, cum uotum publice ſuſceptum ſoluebatur. Priuatis autem cum liberi naſcebantur, aut uir, aut frater ab hoſte captus domum redibat, cum puella deſponſabatur, cum propriore quis cognatione, quàm is, qui lugebatur, natus erat. A minuo fit compoſitum comminuo, & minutum, quod modo participium eſt, & ſignificat comminutum, hoc eſt minus factum. modo nomen, & aliquando pro breui accipitur. Cicero. Reticulum ad nares admouebat tenuiſſimo lino, minutis maculis, plenum roſæ. Aliquando pro obſcuro, & ſcrupuloſo. idem. Ecce autem mali minuti anguſti, & omnia ſemper deſperantes. aut maleuoli. inuidi. difficiles. lucifugi. malefici monſtroſi. item minutal genus edulij, qđ ex conciſis minutatim oleribus fit. & minutatim aduerbium, hoc eſt in minutiſſimas partes. & minutia, hoc eſt contemptibilis paruitas cuiuſcunque rei. & Minutius cognomen uiri. à quo minutia porta Romæ, quod Minutij ſacello proxima eſſet. Mintius uero fluuius eſt in agro mantuano notiſſimus.

In Leſbiam inuehitur, cui non ſatis erat adulterari, niſi id etiam in propatulo faceret, gauderetq; in adulterio deprehendi, ac conſpici. in quo temporum ſuorum laſciuiam notat, quibus nullus pudori, aut uerecundiæ locus erat relictus. PECCAS. Cum adultero cois. peccare enim proprie eſt adulterium committere, dictum quaſi pelliccare, hoc eſt cum pellice coire. & peccatus ipſum adulterium, quaſi pelliccatus. à ueteribus enim non peccatum neutro genere, & ſecunda declinatione, ſed peccatus maſculino genere, & quarta declinatione proferebatur, quod uſq; ad Ciceronis ætatem durauit. Cicero, Nemo ita uiuebat, ut nulla eius uitæ pars ſummæ turpitudinis eſſet expers, nemo ita in manifeſto peccatu tenebatur, ut cum impudens fuiſſet in facto, tum impudẽtior uideretur, ſi negaret. Poſtea inualuit uſus, ut peccatum tantum neutro genere proferatur, & tam peccatum, quàm pecco generaliter de omnibus delictis, atque erroribus dicantur. à pecco fit peccator, & fœmininum eius peccatrix. LIMINIBUS. Oſtijs. limen enim omnem ingreſſum ſignificat, ut ſuperius diximus. INCUSTODITIS. In quibus nemo obſeruat, nequis repente ingrediatur, aut uideat, quæ intus geruntur. FURTA. Adulteria. Arcu. teſtudine. fornix proprie arcum ſignificat, & quodcunq; opus concameratum, à furuo hoc eſt obſcuro, q̃d eiuſmodi opera obſcura ſint. Martialis, Conuiua quiſq; Zoili poteſt eſſe Summœnianas cœnet inter uxores. DISCE. Apprehẽde, aſſequere. diſcere enim proprie eſt rem ignotam aſſequi, quod uel meditando fit, uel ab alio docendo, unde qui docet doctor, qui diſcit diſcipulus dicitur. à quo diſciplinæ ipſæ artes appellantur, & diſciplinoſi, qui tam bonas, quàm malas artes facile diſcunt. ERSVS SCRIBERE. Excuſat laſciuiã carminis, ſimulq; tempora ſua notat, in quibus libri nihil laſciui habẽtes nõ poterant placere, qua cauſa inductum fuiſſe hunc poëtam exiſtimandum eſt, ut laſciua operi ſuo frequenter inſereret, quo. s. libentius legeretur, & lectores pudore ducti, à uitijs ſe retraherent. Vnde ſcholaſticam diſciplinam dicimus, ſcholaſticos etiam uocamus diſcipulos, qui diſcendi gratia ſcholas frequentant. eundem locum etiam Gymnaſium uocamus, quamuis proprie gymnaſium ſchola ſit palæſtritarũ, hoc eſt locus, in quo athletæ nudi exercebantur. græci enim γυμνὸν nudum dicunt. à gymnaſio gymnaſiarches dicitur, qui gymnaſio præeſt. Carmen nuptiale ita dictum à uoce, quã in nuptijs efferebant, quæ erat Talaſſius, quemadmodum hymen quoq; dicitur à uoce, qua græci utebantur, quæ erat Hymenæus. idem carmen & feſcenninum appellatur, qđ primũ ex urbe Feſcennina Romam allatum fuit, ſiue q͂a faſcinum putabatur arcere. ita enim ad arcendum faſcinum inſtitutum quidam exiſtimant, ut feſcennini uerſus canerentur in nuptijs, quẽadmodum ut nuces ſpargerentur, non quia cadẽdo tripudium facerent (ut uulgus putat) ſed quod bonum omen uiderentur afferre, cum munere quodam naturæ gemino protectæ ſint operimento, puluinati primum calicis, deinde lignei putaminis. erat autem talaſſio, ſiue feſcenninum carmen, ſiue hymen, quale ſcri-

T. Liuius ſcribit Romæ in raptu Sabinarum uirginem unam lõge ante alias ſpecie, & pulchritudine inſignem à Globo Talaſſij cuiuſdam raptam fuiſſe, multiſq; ſciſcitantibus, cuinam eam ducerent, identidem nequis eam uiolaret, Talaſſio ferri clamitatum. propter quod nuptialem hanc uocem factam. Plutarchus uero eandem puellam refert, cum à cœtu uilliſſimorũ hominum duceretur, motos pulchritudine illius quoſdam ingenuos adoleſcentes rapere uoluiſſe. ſed cum illi Talaſſio duci affirmaſſent, qui tum & generis claritate, & uirtutis præſtantia inſignis habebatur, abſtinuiſſe, illius, ad quẽ ducebatur, fortunam laudantes, quoſdam etiam uſq; ad illius ædes proſecutos puellam fuiſſe, Talaſſio nomen alta uoce proclamantes. hinc ortam conſuetudinem in memoriam tantæ fœlicitatis, Romani ſemper in nuptijs talaſſium, quemadmodum græci hymena uocarent. alij hoc nomen pro ſigno rapiendarum uirginum datum à Romulo exiſtimant, propter quod puellas deinde ducentes talaſſium clamabant, ex quo eam conſuetudinem putant ad poſteros emanaſſe. ſunt qui in nuptijs hanc uocem primo uſurpatam cenſeant non alia ratione, niſi ut nuptæ ad opera, & labores, in primiſq; ad lanificia prouocarentur. quippe Varro Talaſſionem in nuptijs ſcribit ſignum lanificij eſſe. ita enim uocabant calathum, uas utiq; lanificijs aptum unde & græci ταλασιουργίαν lanificium uocant, propter quod non defuerunt, qui hanc conſuetudinem ex eo potius bello fluxiſſe uoluerunt, quod poſtea cum Romanis Sabini geſſere. Nam cum ſedato tandem belli furore pacem inter ſe fecíſſent, hoc inter ſe fœdus percuſſiſſe memorantur, ut raptæ mulieres nullam aliam operã, quàm lanificij tenerentur uiris impendere, ex quo conſuetudo emanauit, ut in nuptijs quoq; ruſticorum talaſſius uocaretur. uerum ut cunq; ſe res habeat, certum eſt hanc conſuetudinem à raptu Sabinarum ortum habuiſſe, quẽadmodum illæ quoq; habuerunt, ut nouæ nuptæ maritalis domus limen non attingerent, ſed ſublatæ à præſentibus repente intromitterentur ad teſtificandã uim, quæ Sabinis fuerat illata. item ut ſtilo acuto ad diſcriminandos crines uterẽtur, quo tale inſtrumentum acerbiſſimæ illius pugnæ monimentum poſteris foret. Hymenis uero nomen apud græcos ex eo defluxit, quod Hymenæus deus nuptiarum eſſe exiſtimatur, dictus ἀπὸ τοῦ ὑμένος, hoc eſt à membrana, quæ cum ſit clauſtrum uirginitatis, in nuptijs rũpitur. alij dicunt Hymenæum quendam iuuenem fuiſſe, qui die nuptiarum ruina oppreſſus interijt, unde poſtea inſtitutum, ut expiationis gratia nominaretur in nuptijs. illud nobis magis placet hoc nomen ab Hymenæo quodam deductum, qui apud Athenas inter ſæuiſſima bella uirgines liberauit, quam ob cauſam nubentes eum inuocare cœperunt, tandemq; quaſi deum nuptijs præſidentem coluere. ſunt tamen qui Hymenæum Veneris, & Bacchi filium fuiſſe affirment, cuius officium ſit pſallere in nuptijs, cantare ad thalamos, & limina fertis coronare. QVIS FLORALIA VESTIT? Quis in floralibus nudas meretrices uelare nititur? Plautus, Neque ego unquam niſi hodie ad bacchas ueni in bacchanal coquinatum. & coctito frequentatiuum, pro quo Plautus frequenter etiam coquito uſurpat. & cocta aqua, de qua ſupius diximus. Fundata tumeat facilis tibi culcitra pluma, Non uenit ad duros pallida cura toros. Sed hæc genera mattæ potius, quàm culcitræ. nam culcitræ generali nomine uocari poſſunt omne ſtragulũ, in quo aliquid quieſcendi gratia, inculcatum ſit. mattæ uero duntaxat in quibus ſtuppa, uel fœnum, uel lanæ rudiores, aut aliud aliquid ſimile ſit inſertum, fiuntq; interdum è canabi, aut ſcirpo. Cur uero parentem non alligas? atque in uinculis tenes? Sed nihil agis mihi crede. Neque enim mihi ad mortem, cum ita ſtatuero, opus eſt enſe. Cygnos, latine enim olores dicuntur, græce κύκνοι. à cygno cygneus. ab olere olorinus deducuntur, quæ aliquando ſignificant, quod cygni ſiue oloris eſt, ut cygnea, ſiue olorina uox. modo ponitur pro candidus. Eſt enim olor candidiſſima auis, anſere maior, uocem habens argutam, mutua carne ueſcitur. moritura flebilem cantum emittit, fixa prius in cerebro penna, quod miror Ariſtotelem, ac Plynium uel ignoraſſe, uel ſi ſciuerint, non tradidiſſe. Ouidius. Dulcia defecta modulatur carmina lingua Cantator cygnus funeris ipſe ſui. Commeant Cygni anſerum more, ſed in uolatu eorum liburniorum more roſtrato impetu feruntur, facilius hoc modo ſcindentes aerem, quàm ſi recta fronte impellerent, colla imponunt præcedentibus, feſſos duces ad terga recipiunt. Olor licet latina uox ſit, quidam tamen à græco deriuatum putant. quaſi ὅλος ὀρῶος, hoc eſt totus candidus. ὅλος totus dicitur hinc holographum uocatur teſtamentum, quod totum teſtatoris manu ſcriptum eſt. & holoſchenos, de quo ſuperius diximus. & holocauſtum hoſtia, quæ detractis extis integra aræ imponebatur, quaſi ὅλον καυστόν, hoc eſt totum combuſtum. Virgilius. Et ſolida imponit taurorum uiſcera flāmis LEDAEOS. Ledæi dicuntur cygni, quia iupiter, ut ſuperius diximus, in forma cygni cum Leda concubuit. Ob eandem rationem & amyclæi dicuntur, hoc eſt lacones. Papinius. Amyclæos ad frena citauit olores. Amyclæ Laconiæ ciuitas fuit. unde Caſtor, & Pollux amyclæi dicuntur. Virgilius. Talis Amyclæi domitus Pollucis habenis Cyllarus, & quorum graij meminere poëtæ. aliæ quoq; Amyclæ fuerunt in Italia inter Gaietam & Tarracinam conditæ, à Laconibus, q Caſtoris et Pollucis comites fuere. Virgilius. Tacitis regnauit amyclis. Tacitas uocauit, uel quod hæc urbs Pythagoreæ ſectæ fuit, et ab eſu, carnium, atque omnium animalium cæde abſtinuit, propter quod ſerpentes in uicinis paludibus natas occidere nefas putantes ab ipſis interempti ſunt. Plynius. Iuxta Tarracinam fuere Amyclæ à ſerpentibus deletæ, uel quod ijs aduerſus finitimos bellum gerentibus, cum frequenter aduentare hoſtes falsò nunciaretur, & ob id ciuitas uano terrore quaſſaretur, cautum fuit ne quis deinde hoſtium aduentum nuntiaret. itaque poſtea cum hoſtes nullo nuntiante aduenissent, ex improuiſo capta ciuitas fuit. & ob id Tacitæ dictæ. Lucilius. Mihi neceſſe eſt loqui. Nā non neſcio amyclas tacendo periſſe. Amyclas in ſingulari proprium nomen fuit nautæ in epeiro pauperrimi. ERRAT. Vel paſcitur, uel uagatur. CAYSRI. Cayſter fluuius eſt Aſiæ, qui multos ſecum amnes deferens præter Aſiam paludem labitur, & abluit Epheſum. Multi circa hunc amnē cygni uerſantur. Virgilius. atque Aſia circūm Dulcibus in ſtagnis rimantur prata Cayſtri. IMPROBA. Vel propter inuidiam, quia luſciniæ cantum impedit, uel propter calliditatem. Eſt enim pica natura ſagax, ut monedula quemadmodum ſuperius diximus, et ipſa quoq; humanam uocem imitatur. Perſius. Picasq; docuit noſtra uerba conari. OFFENDIT. Impedit. lædit. Offendere & defendere proprie contraria ſunt. nam offendere eſt incurrere in aliquid, atque incidere. Terentius. Offendi adueniens quēdam mei loci hinc atque ordinis hominem haud impurum, hoc eſt incidi. Defende-

re uero eſt impellere. Virgilius. Solſtitium pecori defendite. Enni. Serua ciues. defende hoſtes. Quoniam uero qui incidunt in aliquid, lædere ſæpe ſolent id, in quod incidunt, & econtrario qui depellunt, tuentur factum eſt, ut offendere frequentiſſime pro lædere uſurpetur. & defendere pro tueri, & quaſi uim depellere. Cicero. Cum iſte cum pallio purpureo, pariq; tunica uerſaretur in conuiuijs cum mulieribus. non offendebantur homines in eo, neq; moleſte ferebant. Quintilianus. Qui nullum uitæ diſcrimen refugit, quo me ab hoſtium crudelitate defenderet. Offendere etiam aliquando pro inuenire accipitur. Cicero. Sed imitor Architam illum tarentinum, qui cum ad uillam ueniſſent, & omnia aliter offendiſſet. Varro. Romam regreſſus, ibi nihil offendi, quod ante annos quinquaginta reliquerim. ab offendo fit offendiculum, quod ſignificat impedimentum. obſtaculum. & offenſio, atque offenſa, que ita differunt, quod offenſio ſemper paſſiue accipitur. offenſa uero actiue. Cicero. in corpore ægro odioſa eſt omnis offenſio. ideſt omnis moleſtia. omnis paſſio. idem. Cum tot eius offenſas pati non poſſem, inde diſceſſi. Offendices etiam ueteres uocabant ligaturæ nodos, quibus apex retinebatur, id cum perueniſſet ad mentum dicebatur offendimentum. à defendo defenſor. & defenſio deriuantur. CECROPIAS QVERELAS. Cantus Luſciniæ, de quo ſupra dictum eſt. FERVET. Ardet. frequentatur. ATTIDE. Philomela, ſiue Luſcinia quemadmodum ſupra diximus. MVLTISONA. Multam & uariam uocem habente. INDICE NON OPVS EST. Non eſt neceſſarius accuſator, qui affirmet libros eſſe meos, neq; index, qui ſententia id definiat. nam ſcripta à te contra te indicant.

Rogare enim interdum petere eſt. Plautus. Spectandus, ne cui illam det, neque roget. interdum quærere ſciſcitari. Terentius. Accedo ad pediſequas, quæ ſit rogo. Nonnunquam orare, deprecari. Virgilius. littusq; rogamus Innocuum, quandoque etiam ſtatuere. Cicero. Ego ad eam bellici ciuilis cauſam attuli. Ego leges pernicioſas rogaui. hinc legis rogatio dicitur, quoniam rogare populum magiſtratus ſolebant, an id placeret, quod ſtatuerāt. hinc etiam derogare legi. & abrogare legem dicimus. Eſt autem derogare legi aliquid ex ea detrahere. abrogare legem. irritare eam, atq; infringere. Modeſtinus. Derogatur legi, cum pars detrahitur. abrogatur lex, cum prorſus tollitur. ab his derogatio, atq; abrogatio deducuntur. A` rogo fit etiam rogito frequentatiuum, quod interdum ſignificat precor. Plynius. Patrem adit. rogitat ut ſui miſereatur. interdum ſciſcitor. Plautus. Quæ ſit rogitas. & rogamen, quod poëtæ pro prece frequenter uſurpant. & rogatarij, hoc eſt tabelliones, qui rogant quod quiſq; ſtipuletur, hoc eſt promittat. & rogus (ut quidam putant)

putant) quod in eo dij manes rogentur. eſt enim rogus ſtrues lignorum ad cremanda cadauera, in qua ſimul atq; impoſita corpora ſunt, & ignis adhibitus Pyra dicitur ἀπὸ τοῦ πυρὸς hoc eſt ab igne. Buſtum poſtquam cadauer crematum eſt, quaſi bene uſtum. Funus, dum uritur cadauer ipſum, ſeu pompa ipſa exequiarum. Exequiæ celebratio funeris, dum corpus effertur. Sepulchrum, in quo oſſa conduntur. Arrogantia eſt per quam temeritas, atque impudentia uanam ſibi comparat authoritatem. Modeſtia autem, per quam pudor honeſtus puram, ac ſtabilem authoritatem acquirit. Item arroganter aduerbium, modo arrogo ſignificat in filium ac familiam mihi aſciſco. à quo fit arrogatio, quæ ita ab adoptione differt, quod adoptamus eos, qui filij familias ſunt, Arrogamus, qui ſunt ſui iuris. ideo autem arrogatio dicitur, quia is, qui aſciſcit aliquem in filium, interrogatur an uelit illum iuſtum ſibi filium eſſe & is, qui aſciſcitur, rogatur an id fieri patiatur. uel quod arrogatio per populi rogationem fit, cuius uerba hæc ſunt. Velitis iubeatis. ut L. Valerius L. Titio tam iure, legeq; filius ſiet, quàm ſi ex eo patre, matreq; familias eius natus eſſet utiq; ei uitæ, neciſq; in eum poteſtas ſiet, uti pariendo filio eſt, hoc ita ut dixi, ita uos quirites rogo. Adoptio per prætorem fit. arrogatio per populum. Interrogo, peto. à quo interrogatiuum. interrogatorium. & interrogatio deducuntur. Erogo. diſtribuo. & quaſi rogatoribus effundo. Rogatores enim poſtulatores dicuntur. Obrogo, prioris legis infirmandæ gratia legem aliam fero. Prorogo. ante impendo. à quo prærogata beneficia dicuntur, quæ ante ſunt impenſa. unde prærogatiua excellentia & antelatio uocatur. Paulus iuriſconſul. EPIGRAMMA LXXXIIII. AD FRONTONEM.

OTA TVI BREVITER. Laudat hoc epigrammate uitam ruſticanam otio præditam, & quiete, eamq; anteponit uitæ urbanæ anxiæ ſemper atq; ſolicitæ. FRONTO. Iulius Fronto Iulij Grati frater tribunus militaris fuit ſub Othone, uixitq; uſq; ad Domitiani tempora doctus in primis, & poëtis fauens. Iuuenalis. Frontonis platani conuulſaq; marmora clamant Semper & aſſiduo ruptæ lectore columnæ. CLARVM DECVS MILITIAE, ET TOGAE. Clarus & belli & pacis artibus. Toga pro pace uſurpatur, quoniam hoc habitu utuntur intra urbem, quemadmodum arma pro bello, quoniam in expeditionem depoſita toga armati incedunt. Cicero. Cedant arma togæ, concedat laurea linguæ. ARATOR. Cultor. Arare proprie eſt terram iam proſciſſam rurſus uomere euertere. Plynius. In

arando magnopere ſeruandum eſt Catonis oraculum. Quid eſt primum? agrum bene colere. Quid ſecundum? bene arare. Quid tertium? ſtercorare. idem. Si inter arbores, uitesq; aretur fiſcellis capiſtrari boues oportet, ne gerrninum tenera præcerpant. ab hoc arator deducitur, quod tam de boue, quàm de homine bouem ducente dicitur. idem, arator niſi incuruus præuaricatur. & aratio. idem. Arationem per tranſuerſum iterata occatio ſequitur. & aratrum inſtrumētum, quo aratur, quod quando duas rotulas additas habet, quali in Gallia utuntur. Planaratrum appellatur, in quo cuſpis uomeris palæ effigiem habet, & manica eius ſtiua dicitur. Cicero. Ab ſtiua eius me cum homines loquebantur. & artro uerbum, quod ſignificat ſegetes iam natas rurſus arando proſcindo, quod impinguandi agri cauſa fit, uel incipiente culmo, uel cum bina, ternaq; emiſerit folia. dictum autem artrare eſt quaſi aratrare, qđ inuentum à Salaſſis proditur Tauriſcæ gentis populis, qui cum ſubiectos alpibus depopularentur agros panicum, miliumq; iam excreſcens tentauere, poſtquam natura reſpuebant, inararunt ex quo meſſes duplicatæ fuere. Idem. Et in treueri co agro contigiſſe memoratur. Nam cum hyeme prægelida captæ ſegetes fuiſſent, reſecuerunt reſarcientes campos menſe Martio, & uberrimas meſſes habuerunt. Ab aro præterea compoſita fiunt inaro eiuſdem cum ſuo ſimplici ſignificationis. Plynius. Sunt qui iam natas inarant ſegetes. item dearo. peraro. ſubaro. eiuſdem ferè ſignificationis. item exaro, quod accipitur pro eo, quod eſt ſcribo, quod à quadam arandi ſimilitudine tractum uidetur. unde fit exaratio pro conſcriptione. SORDIDA. Villica, non urbana. OTIA. Quietem. Otium proprie dicitur uacatio à labore, ſed quia ij, qui ſtudijs literarum operam intendunt, neceſſe eſt, ut cæteris negotijs uacui ſint, factum eſt ut otium pro literario ſtudio accipiatur. Cicero quid dulcius otio literato. ideſt ſtudio & (ut ita dicam) negotioſo otio. unde dicere ſolitum Scipionem legimus, nunquam ſe minus otioſum eſſe, quàm cum eſſet otioſus. Ab otium fit otioſus. otioſior. otioſiſſimus. & otioſe aduerbium. ideſt cum otio. à quo otioſius. otioſiſſime. & otior uerbum, quod ſignificat in otio ſum. Ocyor uero comparatiuum pro celerior accipitur. fitq; à poſitiuo græco ὠκύς, quod ſignificat celer & ſuperlatiuum habet ocyſſimus. item aduerbia ocyus et ocyſſime. hinc ocynum appellatur herba ad boum pabulum ſata, qua ciebant aluum bobus. id erat huiuſmodi. Fabæ modios decem, uiciæ duos. tantundem & eruiliæ in iugero autumno miſcebant, ac ſerebant, admiſta etiam auena græca, cui non cadit. ſemen. Hoc ocynum (ut Varro ſcribit) dicebatur à celeritate naſcendi boum cauſa fieri ſolitum. nam ocymum herba longe ab hac diuerſa eſt, uulgo baſilicum uocant. odoris optimi. Chryſippus eam grauiter increpuit, tanquā inutilem ſtomacho & inſaniam facientem. alij tradunt ſi tritum operiatur lapide, ſcorpionem gignere. Commanducatumq; & in ſole poſitum uermes producere. Sunt etiam qui dicunt manipulo ocymi cum cancris decem marinis, uel fluuialibus trito conuenire ad eum ſcorpiones è proximo omnes. Sed contrarium eſſe ſecuta ætas comperit. nam & ſcorpionum uenenis medetur cum uino addito exiguo aceto roſaceo. ſtomacho confers. inflationes & rutum diſſoluit ex aceto ſumptum. aluum ſiſtit impoſitum urinam cit. Verucas miſto atramento ſutorio tollit, multis præterea medicamentis adhibetur, hoc uno noxium quod uenerem ſtimulat. ideoq; equis etiam, aſinisq; admiſſuræ tempore ingeritur. ab eodem etiam oceanus deducitur, quia oceanus mira celeritate in maria interiora diffunditur per fauces, in quibus ſunt columnæ Herculis, qua de cauſa limen interni maris multi eum locum appellauere. eſt autem proprie

oceanus mare quod uniuerſam arcuit terram, & à litoribus, plerunque accipit nomen. nam ad dextram, ubi primum terram intrat, Atlanticus dicitur. ad ſiniſtram Gaditanus, illinc Arabicus. Perſicus. Indicus. Hinc Britānicus. Germanicus. Scyticus. Poſtquam uero terras intrauit, primo ab Iberia, hoc eſt Hiſpania Ibericum mare dicitur. tum à balearibus inſulis balearicum, poſthac Narbonenſium prouinciam contingens. Gallicum. deinde à Liguria Liguſticum, mox uſq; in Siciliā à Thuſcis thuſcum, ſiue Thyrrenum à thyrrenis, ſiue à differentia ſuperi inferum. Superum enim adriaticum uocamus, quod ad id ab urbe ueniens Appeninum conſcendamus. inde ab Ionibus ionium. à Sicilia ſiculum à Creta criticum. ab Aſia aſiaticum. à Pamphilia pamphilium. À Carpatho inſula, quæ inter Aegyptum, & Rhodum eſt. Carpathium. à Cypro cyprium. à Rhodo rhodium. Multa præterea nomina habet. ut ægeum. Corinthium. argolicum. tyrium, & ſimilia, de quibus partim diximus, partim ſuis locis dicemus. Poëtæ tamen oceanum pro quocunq; mari uſurpant. Virgilius. Et ruit Oceano nox. item ab eodem Ocythoë nympha, de qua ſuperius diximus. & Ocyrhon fluuius in finibus Arcadiæ, quaſi uelociter fluens. Ocrem uero montem confragoſum dixerunt antiqui. à quo ocrea notum calceamenti genus, quod inæqualiter tuberata ſit. Ab hoc ocreati dicuntur, qui ocreis calceati incedunt. Præterea ab otio per compoſitionem fit negotium, quod otio contrarium eſt, de quo atque eius deriuatiuis ſuperius locuti ſumus. QVISQVAM PICTA COLIT? Interrogatiue pronuntiandum eſt, ut ſit ſenſus. Erit'ne quiſquam, qui colere poſſit faſtus, & labores urbanos, cum frui liceat otio, ac delitijs ruris? COLIT. Habitat. frequentat. PICTA FRIGORA SPARTANI SAXI. Pictos, ac frigidos ſpartanos lapides. ideſt potentiorum domos laconico marmore cultas, frigidum epitheton marmoris eſt. Pictum autem ideo dicitur. quia Lacedæmoniū marmor. quadam ueluti ſquamarum uarietate pictum uidetur. SAXI SPARTANI. Lacedæmonij marmoris, quod pretioſiſſimum habetur, & uiriditate cunctis hilarius, quale ſuperius diximus ophiten & Tiberianum, atque Auguſteum eſſe. Spartani Lacedæmonij dicuntur. Nam cum ij cum Meſſenijs ob ſtupratas uirgines ſuas in ſolenni Meſſeniorum officio bellum intuliſſent, grauiſſima ſe execratione obſtrinxerunt. non prius quàm Meſſenam expugnaſſent. reuerſuros. itaque cum præter opinionem annis iam decem tenerentur, & querelis uxorum poſt longam uiduitatem reuocarentur iuuenes legerunt ex eo genere militum, qui poſt iuſiurandum in ſupplementum uenerant, quibus Spartam remiſſis promiſcuos omnium fœminarum concubitus permiſcere, ut celerius, certiusq; conciperent. Ex ijs nati ex nota materni pudoris Spartani, quaſi ſati appellati ſunt. & inde urbs quoque Sparta uocata eſt. INEPTVS. Imprudens. quid aptum & commodum ſit non diſcernens. inepti proprietatem præclare declarat Cicero cum inquit. Ego mehercule Cæſar. ex omnibus latinis uerbis, huius uerbi uim uel maximam ſemper putaui.

Quem enim nos ineptum uocamus, is mihi uidetur ab hoc nomen habere ductum, quod non ſit aptus, idq; in ſermonis noſtri conſuetudine perlate patet. Nam qui aut tempus quid poſtulet, nō uidet, aut plura loquitur, aut ſe oſtentat, aut eorum, quibus cum eſt, uel dignitatis, uel commodi rationem non habeat, aut denique in aliquo genere aut incontinens, aut multus eſt, is ineptus dicitur. hoc uitio cumulata eſt eruditiſſima illa græcorum natio. itaque quod uitium huiuſmodi græci non uident, ne nomen quidem ei uitio imponunt. Vt enim quæras omnia quomodo græci ineptum appellent, non reperies.

Omnium autem ineptiarum, quæ ſunt innumerabiles, haud ſcio an ulla ſit maior, quàm ut illi ſolent quocūq; in loco, quoſcunq; inter homines uiſum eſt de rebus aut difficillimis, aut nō neceſſarijs argutiſſime diſputare. ab ineptus fit diminutiuum ineptulus. & ineptitudo. & ineptia, quæ tam uerborum, quàm factorum eſt. & inepte aduerbium. & ineptio uerbū, quod eſt ſtulte aliquid uel dico, uel facio. Eſt autem compoſita hæc uox ab in negatiua particula, & aptus, quod modo pro eleganti & dextero ponitur. Cicero. Vt enim pulchritudo corporis apta compoſitione membrorum mouet oculos, & delectat. modo pro colligato, & connexo. Varro. Vbi lucus opacus teneris fructibus aptus. Cicero. Quis enim hominem hunc dixerit, qui cum tam certos cœli motus, tam ſtatos aſtrorum ordines, tamq; inter ſe omnia connexa & apta uiderit, neget ijs ullam ineſſe rationem? Idem. Fulgentem gladium è lacunari ſeta equi aptum demitti iuſſit, aliquando pro adepto. Varro. ea omnibus oſtentat, quæ bello aptus eſt. ab aptus fit aptitudo, hoc eſt conuenientia. pulchritudo. elegantia. & apte aduerbium, hoc eſt commode. conuenienter. & apto uerbum, à quo adapto, quod modo accommodo ſignificat. modo paro. Virgilius. Interea claſſem uelis aptare iubebat Anchiſes. Idem. Proiecto dum pede læuo Aptat ſe pugnæ. PORTAT MATVTINVM AVE. Mane ſalutat. Erat enim Romanorum mos mane ſalutare potentiores. Iuuenalis. Sollicitus ne Tota ſalutatrix iam turba peregerit orbem. Matutinum opus dicimus, quod mane fit, & cum prima aurora. Matutam n. imitatione græcorum auroram dicimus. EXVTI NEMORIS. Nitidi. peruij. nullis ſenſibus impediti. PLENAS PLAGAS. Retia feris plena. DVCERE Educere. SALIENTEM. Palpitantem. TREMVLA SETA. Hamo, qui pendet è ſeta calamo piſcattorio alligata. PROMERE, producere. Promere enim proprie dicimus ea, quæ repoſita fuerant proferre, à premendo (ut quidam putant) deductum, à quo promptus appellatur is, qui iam paratus, & expeditus eſt ad agendum, & in quo nulla mora eſt, quaſi iam è penu, ſiue repoſitorio ſit productus. item promptus ingenio, qui ingenioſus eſt, hoc eſt qui ingenium ad omnia paratum habet & promptuarium locus, in quo res ad uſum neceſſariæ ita repoſitæ ſunt, ut ſtatim promi, ac proferri poſſint. item quod facile produci poteſt. & in promptu eſſe, quæ iam parata. & inſtructa ſunt. à promtus fit promptior. & promptiſſimus. & aduerbia prompte. promptius. promptiſſime. à promo uero depromo, & expromo eiuſdem ſignificationis. FLAVA MELLA. Proprius mellis color eſt flauus, hoc eſt fuluo clarior, qualis eſt color auri, cum fuluus ex uiridi & rubro, flauus ex uiridi rubro, atq; albo ſit. ab hoc fit flaueo uerbum, hoc eſt fulgeo, & auri colorem reddo. quidam à flamma deductum uolunt, quod ſit color haud diſſimilis flammæ. alij à flando, quod flata metalla eum colorem habent. à Flauo flauiorum cognomen deductum ob crinium candorem. RVBRO CADO. Rubra teſta. Martialis. Si ſpumet rubra conchis tibi pallida teſta, Dibutadis inuentum fuit ex rubra creta uaſa fingere, uel rubricā plaſticæ addere. PINGVIS. Vel craſſa ob quietam uitam, & omnis ſolicitudinis expers, uel diues, hoc eſt rebus ad uitam neceſſarijs abundans. ideo uſus eſt poëta hoc uerbo onerat, ut rerum omnium copiam ſignificaret. INAEQVALES. Impolitas, non dolatus manu artificis, quales fiunt menſæ ruſticorum. CINIS NON EMPTVS. aliunde quæſita. NON AMET HANC VITAM. Imprecatur inimicis ſuis, ne uel ament, uel aſſequantur hanc uitam de qua loquitur, ſed ſemper in urbibus uiuant, quod ſcilicet hæc quietis & uoluptatis plena ſit. illa uero, curarum & miſeriæ. ALBVS. Pallidus, hoc eſt anxius. ſolicitus. Album proprie candidum dicimus, quod Sabini cum p. litera ſcribebant alpum. ſiquidem à græco deducitur ἄλφυ, quæ uox candorem ſignificat. unde quidam alpes à niuium candore appellatas exiſtimant. Nos à gallis potius inditum hoc nomen exiſtimamus, qui montes altos alpes uocitant. Sunt enim alpes montes altiſſimi, qui Italiam à Gallia, & Germania dirimunt, quas peruias primus Annibal fecit, cum antea tutam redderent Italiam, unde omnis ille mons perpetuo iugo tendens ad ſiculū fretum à Pœnis (ut quidam putant) dictus eſt apœninus. ab alpibus uero alpinus dicimus, unde ciſalpina, & tranſalpina Gallia. & Albingaunium, & Albium intemelium, Liguriæ oppida. Nam cum ligures partim ingauni, partim intemelij dicerentur, eorum coloniæ ad mare deductæ, altera Albium, quaſi alpium intemelium. altera uero Albigaunium uocitatæ ſunt. Quoniam uero ob timorem ſanguis ab exterioribus partibus ad cor refugit, propter quod exalbeſcere facies uidetur, factum eſt, ut album ſæpe pro pallido capiamus. & exalbeſcere pro palleſcere, quod græci quoq; ἀπὸ τοῦ λευκοῦ, quod album ſignificat dicunt λευκαίνειν. Martialis. λευκαίνειν cupidæ licet auaritiæ. Ab albus albedo deducitur, quod ſignificat candorem. & album neutro genere. Quintilianus. Alij ſe ad album tranſtulerunt. Hoc & album prætoris ſic album iudicum dicebatur, quod qui uel fœdaſſet, uel uitiaſſet, uel quocunq; ſcripturæ genere turbauiſſet, capitaliter non expectata ordinis ſententia puniebatur. & albor. & albitudo pro albedine. Varro. Qui uident alborem eius admirantur. Plautus. Ad ipſam capitis albitudinē, & albico candico. Horatius. Nec prata canis albicant pruinis. & paſſiuum eius albicor. Varro. deorſum itaq; rapitur. & offenſas aliquo à ſcopulo lapidoſo albicatur. & albula tyberis ab albo aquæ colore. & Alba oppidum latij ab omine albæ ſcrophæ, & triginta porcellis albis ibi repertæ, quamuis & alia alba eſt ad lacum fucinum, ſed ab illa albani, ab hac albenſes dicuntur, à quibus alboſia ſcuta, quibus utebantur, quæ cum decumana uocabant, quod eſſent ampliſſima. quemadmodum & decumani fluctus dicuntur. & Albiona ager transtyberim à luco albionata, in quo loco bos alba ſacrificabatur. & Alburnus Lucaniæ mons à candore uerticis. & Albunea dea, quam & Leucotheam uocari ſuperius diximus. item fons & ſylua tyburtina. Virgilius. lucosq; ſub alta Conſulit albunea nemorum, quæ maxima ſacro Fonte ſonat, ſæuamq; exhalat opaca mephitim. Mephitis obiter dicitur terræ putor, qui de aquis naſcitur ſulfureis. & eſt in nemoribus grauior ex denſitate ſyluarum. Alij Mephitim dicunt deum eſſe leucotheæ connexum, quemadmodum eſt Veneri Adonis, & Dianæ Virbius. Alij Mephitim Iunonem intelligunt, quam aerem eſſe conſtat. Omnis autem putor ex aeris corruptione naſcitur. bonus odor ex aere incorrupto, ut ſit Mephitis dea odoris grauiſſimi, ſiue rerum male olentium, & alburnum adeps (ut ita dicam) arboris. Plynius. Vnde quidam ἀπόλλωνα quaſi ἀπελλῶντα cognominatum putauere tanquam ἀπελαύνοντα τὰς νόσους, hoc eſt morbos expellētem. nec defuerunt, qui latinam potius interpretationem ſecuti Apollinē appellatum dixerint, quaſi appellentem, hoc eſt depellentem mala. quippe Apellinem pro Apolline ueteres dixiſſe manifeſtum eſt. hinc Athenienſes hunc deum Alexicacon uocabant, quod ſuperius diximus expulſorem malorum ſignificare, ob eam rationem Lyndij λοίμιον, hoc eſt lœmium Apollinem colebant, qđ ei cognomen finita peſtilentia impoſuerunt, & uirgines ueſtales Romæ in ſacris, ita Apollinē uocabant, Apollo medice Apollo pæan. παιᾶν enim ἀπὸ τοῦ παύειν τὰς ἀνίας, hoc ē à ſedādis morbis nominauerūt. eundē quoq; deū Vliō appellauere, hoc eſt ſalubritatis authorem. Homerus, οὖλέ τε καὶ μάλα χαῖρε, Hinc Theſea ferunt, cum in Cretam ad minotaurū duceretur, Apollini Vlio pro ſalute, & reditu ſuo uotum feciſſe. hinc & apud Pachynum Siciliæ promontorium, Apollo libyſtinus eximia religione colebatur, quod cū Libyes aduerſus Siculos cum claſſe profecti ad id promontorium appulſi eſſent, Apollo, qui ibi colebatur, ab incolis inuocatus immiſſa hoſtibus peſte, & penè cunctis ſubita morte interemptis, cultores ſuos liberauit. Tarquinus ore iam ſerio attentiore animo factus conſtantiam mulieris haud negligendā putauit, & treis reliquos libros, nihilo minori pretio, quàm quod pro omnibus fuerat à principio petitum, mercatus eſt. mulier, à rege digreſſa poſtea nuſquam loci uiſa conſtitit. propter quod Sibylla exiſtimata eſt, libriq; ipſi in ſacrarium conditi, ſibyllini appellati. ſibyllas autem ueteres uocabant mulieres entheas, hoc eſt quarum pectus deum recepiſſet. Iuuenal. Parce precor Pæan, & tu depone ſagittas. Idem, ſed Pæan contrahit arcum. quoniam uero diſcerpto Phytone laudibus innumeris celebratus eſt Apollo, & uictoria eius paſſim decantata carminibus, factum eſt, ut Pæan etiam pro laude capiatur, quæ in Apollinis honorem decantatur. interdum etiā aliorum deorum. φιλήσιον

φιλήσιον amabilem dicunt, quia lumen eius exoriens amabili ueneratione oculorum conſalutamus. & Pythius ἀπὸ τοῦ πύθειν. hoc eſt putreſcere, quod nunquam ſine ui caloris efficitur, quamuis aliqui à nece potius Draconis inditum deo hoc nomen fabulentur, quæ tamen fabula non omnino expers rationis uideri poteſt. Latonæ Apollinem, Dianamq; parturienti, fertur Iuno immiſſo, Phytonis terrore obſtitiſſe, ſed ubi partus tandem effuſus eſt, Draconem memorant, qui phyton uocabatur inuaſiſſe deorum cunas, ſed Apollinē in prima infantia ſagittis belluam confeciſſe, quod ita intelligendum eſſe naturalis ratio ſuadet. poſt Chaos ubi primum cœpit confuſa deformitas in rerum formas, atq; elementa niteſcere, terraq; adhuc humida ſubſtantia, molli, atq; inſtabili ſede nutaret. conualeſcente paulatim ætherio calore, atq; inde ſeminibus igneis in eam defluentibus, hæc duo ſydera edita eſſe creduntur, & ſol quidem ingenti ui caloris in ſuperna raptus fuiſſe, luna uero humidiore, & uelut fœmineo ſexu naturali quodam preſſa tepore inferiora tenuiſſe, tanquam ille magis ſubſtantia patris conſtet, hæc matris quippe Latonam phyſici uolunt terram uideri, cui diu interuenit Iuno, ne duo, quæ diximus numina ederentur, hoc eſt aer qui tunc humidus, grauiſq; obſtabat æther, ne fulgor luminum per humoris aerij denſitatem tanquam ex cuiuſdam partus progreſſione fulgeret, ſed diuinæ prouidentiæ uicit inſtantiā, quæ partum iuuaſſe exiſtimatur. ideo in inſula delo ad confirmandam fabulæ fidem ædes prouidentiæ, quam ναὸν προνοίας appellant, ſumma religione celebrabatur propterea in inſula dicūtur nati, qđ ex mari nobis oriri uidentur. inſula uero ideo delos uocatur, quia ortus, & quaſi partus luminum dela, hoc eſt manifeſta omnia facit. de nece uero Draconis ratio hæc eſt. Nam terræ adhuc humidæ exhalatio meando in ſuperiora uolubili impetu, atq; inde in ſeſe poſtquam caleſacta eſt inſtar mortiferi ſerpentis in inferiora reuoluendo omnīa ui putredinis corrumpebat, quæ non niſi ex calore, & humore generatur, ipſumq; ſolem denſitate caliginis obtegendo nebula quodammodo uidebatur lumen eius eximere. ſed diuino feruore radiorum tandem quaſi ſagittis incendentibus extenuata, interempti ab Apolline Draconis fabulam fecit. eſt & alia ratio draconis perempti. Nam ſolis meatus licet ab ecliptica linea nunquam recedat, ſurſum tamen, ac deorſum uentorum uices certa deflexione uariando iter ſuum uelut flexum Draconis inuoluit. ſub hac ergo appellatione cœleſtis itineris cum confeciſſet curſum ſuum, Draconē confeciſſe dicebatur. inde fabula exorta eſt, de ſerpentis nece, ſagittarū autem nomine non niſi radiorū iactus oſtenditur. ſunt etiam qui hanc rationem huius appellationis affirant, quod cum ſol in ſigno cancri æſtiuum ſolſtitium facit, in quo longiſſimi diei terminus eſt, & inde retro greſſum agit ad diminutionem dierum. Pythius eo tempore appellatur ὡς πύματον θέων, hoc eſt quod ultimum curſum currat. Idem ei nomen conuenit & cum capricornū rurſus ingreditur ī quo ultimū breuiſſimi diei curſum intelligitur peregiſſe. & ideo in alterutro ſignorum peracto annuo ſpatio draconem Apollo. ideſt flexuoſum iter ſuum ibi confeciſſe memoratur, ideo autem his duobus ſignis, quæ portæ ſolis uocantur cancri, & capricorni nomina contigerunt, quod cancer animal retro, atq; oblique incedit, eademq; ratione ſol in eo ſigno obliquum, ut ſolet, incipit agere retro greſſum. capræ uero hæc in paſto conſuetudo uidetur, ut ſemper altum paſcendo petat, atqui ſol quoque in Capricorno incipit ab imis in alta remeare. Apollinem Didymæū uocant quod geminam, ſpeciem ſui numinis præfert illuminando, formandoq; lunam. etenim ex uno fonte lucis gemino ſydere ſpatia diei, ac noctis illuſtrat. græci autem δίδυμον geminum

uocant. Delphium nominant, quod ea, quæ obſcura ſunt, lucis claritate patefacit ἐκ τοῦ δηλοῦν τὰ ἀφανῆ, uel quod unus ſolus ſit. ſiquidem priſci græci Delphum unum uocitabant. à quo Adelphon fratrem dixere, quod iam non unus eſſet. Agyleum uero dicunt; quod agylei lingua attica uici uocantur. Apollini autem ex reſponſo in uicis publicis urbis ſuæ ſtatutis altaribus ſacrificia inſtituerunt, eumq; ob id Agyleum nominauere. lingua autē Scythica Apollo Oetoſcyros dicebatur. à Phœbus phœbeus dicitur. Virgil. Poſtera phœbea luſtrabat lampade terras. ab Apolline Apollineus, à ſole ſolaris. Solanus. ſubſolanus, & alia plurima, de quibus ſuperius latiſſime diſſeruimus. SORORES DOCTAE. Nouem muſæ de quibus ſuperius diximus, quas in Apollinis tutela eſſe commemorant, in Parnaſſo monte habitantes, qui Phœbo, & Baccho ſacer eſt. Vnde poëtæ quoq; in utriuſq; dei tutela eſſe dicuntur, ideoq; non ſolum lauro, ſed etiam edera coronantur, quæ Baccho ſacra eſt. Vnde & niſia dicitur. Virg. Paſtores edera creſcentem ornate poetam. rationes autem cur poëtæ in Bacchi quoq; tutela ſint, præter eam, quod in Parnaſſo ſpeluncæ Bacchicæ ſunt, has quoq; tradunt, uel quod, ut Ariſtoteles inquit, Apollo & liber pater unus, idemq; deus ſit, uel qđ poëtæ uaticinari dicuntur. ex quo uates appellati. hoc autem optime fieri conſtat plurimo mero ſumpto, hinc eſt, qđ & Apollini ederam, & Baccho laurum aliquando tradunt poëtæ. Euripides δέσποτα φιλόδαφνε βάκχε παιὰν ἄπολλον εὔλυρε. Aeſchylus ὁ κισσεὺς ἀπόλλων· ὁ βάκχειος ὁ μάντις, quibus uerſibus uterq; poeta eundem eſſe & Bacchum, & Apollinem indicant, quod etiam facit Orpheus εἷς ζεὺς εἷς ἀΐδης. εἷς ἥλιος. εἷς διόνυσος, propter quod Dionyſium non ea, quam ſupra diximus, ratione dictum phyſici putent, ſed uel ἀπὸ τοῦ διανύω, quod eſt perficio, quia ſol quotidiano curſu ab oriente ad occaſum conficit iter, uel quaſi διὸς νοῦν, hoc eſt Iouis mentem, quia ſolem mundi mentem eſſe philoſophi dixerunt, mundus autem uocatur cœlum, quod appellant Iouem. Vnde Aratus de cœlo dicturus ait. ἐκ διὸς ἀρχώμεσθα. Eademq; ratione liberum patrem appellatum à latinis, quia ſol liber, & uagus eſt. Næuius. Hac qua ſol uagus igneas habenas immittit. SALVTATOR. Opus inquit Seruius dicimus quando ipſum ſignificamus, quod geritur, ſi autem fœminino genere dixerimus operas, ſi perſonas ipſas oſtendimus, quæ aliquid faciunt, quod quãquam uerum ſit, non tamen abſolute deffiniuit, quid ſit opera. non ſolum enim perſona eſt, quæ aliquid agit, ſed etiam actio ipſa, & labor, ut do operam uirtuti. do operã rei militari. do operam agriculturæ. Cicero operam inquit exigendam à ſeruis. ideſt laborem, & operationem corporis. Rectius igitur Vlpianus ait. operæ ſunt diurnum officium. opus finis. fructuſq; operæ. Terentius in uno uerſu optime utrunq; expreſſit, quod in opere faciundo operæ conſumis tuæ. hinc operæ pretium dicitur. ideſt fructuoſum & ad rem pertinens. Cum igitur conducerem hanc operam, hoc eſt cum denuntiarem me laborem tractandæ huius cauſæ ſumpturum, non eras in hoc albo. ideſt non eras inter iudices deſcriptus. in albo enim nomina ſcribebantur eorum, qui magiſtratus & dignitates principis iudicio conſecuti erant. unde diuini uiri primo, deinde centum uiri in albo deſcripti, lege etiam in albo prætoris deſcribebantur. unde qui album uitiaſſet, uel quodcũq; aliud ſcripturæ genus ſua præſumptione turbaſſet, capitaliter (ut Paulus inquit) non expectata ordinis ſententia puniebatur. Multos cognouimus, qui tædio laboris, quem ferre tendentibus ad eloquentiam neceſſe eſt, confugerint ad hæc diuerticula deſidiæ, quorum alij ad album ſe, ac rubricas tranſtulerunt, & formulæ, uel (ut Cicero ait) quædam legum eſſe maluerunt, perinde itaq; eſt, ac ſi dixiſſet, cum hoc opus editurus eſſem, non putabam te ipſum lecturum, nec iudicem eius futurum. ideo cauſam ſubdit. Extra omnem ingenij aleam poſitus, cuius ingenium ſine dubio omnibus præfertur. Alea dicitur omnis ludus magna ex parte in fortunæ uarietate cõſiſtẽs. unde Martialis de nucibus ita inqt. Eſt enim talus oſſis genus, non plani, ſed omnibus quatuor lateribus parum concaui, quo ludentes turricula utebantur, quam Perſius orcam uocat, cum inquit. Quid dexter ſenio ferret, Scire erat in uoto damnoſa canicula quantum Raderet anguſtæ collo non fallier orcæ. De turricula ſcribit Martialis Quærit compoſitos manus improba mittere talos, Si per me miſit, nil niſi uota facit. Cæterum ex hoc fit, ut alea etiam pro fortuna ponatur. Liuius, Nec tam celerem aleam uniuerſi certaminis timens. Quoniam uero fortunæ omnis euentus anceps, ac periculoſus eſt, & continue mutatione obnoxius. unde Apelles quondam interrogatur cur fortunam ſedentem finxiſſet, quoniam inquit ſtare non poteſt. Qui primus condidit ſtyli naſum, qui primus ſcripſit ſatyram, quæ acerbitatem quandam & acrimoniã ſtyli habet, in uitijs inſectandis. Nam (ut Quintil. inquit) primus Lucilius in ſatyra inſignem adeptus eſt laudẽ. Naſum autem dixit acrimoniam. quoniam irati & ſeueriores obrugare naſum ſolent, atq; torquere, quod etiam deriſores faciunt. unde Valerius marti. exprimere uolens multos Romæ deriſores eſſe, ita inquit. Quanto nos cauſatius, quanto maiori cauſa, quando. ſ. neq; Lucilio cõparandi ſumus, neq; Ciceroni. Ab aliquo iudice defendimur. Duobus modis ab aliquo defendi dicimur, uel cum ille nos defendit, uel cum ipſi defendimus nos, uel alius defendit nos ab illo tanquam iniuriam inferẽte, ut ſi nobis aduerſentur iudices, & Cicero tueatur. Recte dicemus defendi nos à iudicibus, nõ quod illi nos defendant, ſed quod præſidio Ciceronis, ab illorum iniuria defendamur. Hoc ſecundo modo intelligendus eſt hic locus, ut ſit ſenſus, quanto honeſtius poterimus ipſi nos tueri ab ijs, qui uolẽt de opere noſtro ſententiam ferre. Nã ſi Lucilio & Ciceroni licuit iudices, quos uoluerunt reijcere, longe profecto id nobis licebit. Verum corrector noſter, cum hunc loquendi morem ignoraret, errorẽ alium fecit magis inſignem, & pro defendimur diffidimus ſcripſit, hoc modo quãto nos cauſatius ab aliquo iudice diffidimus. Sed hæc ego non mihi patrocinia ademi nuncupatione, quia ſcilicet nuncupaui, & aduocaui te iudicem dicando tibi libros meos. Quamplurimum refert ſortiatur aliquis iudicem, an eligat, quia ſiquis ſponte ſe iudicem fecerit, poſſem, quod ſupra retuli dicere. Quid te iudicem facis? Si uero elegi iudicem, nullã habeo culpæ deprecationem corrector addidit ne hoc modo quamplurimum refert ſortiatur ne aliquis iudicẽ, an eligat. Putans in eo errorem eſſe. quod elegantius dicitur. Cic. parum intereſt noſter, an illius ſit. Quintil. Quid enim refert aduerſas res an ſecundas æquo animo feras. Multumq; apparatus intereſt apud inuitatum hoſpitem, & oblatum. Nam ſi oblatus eſt hoſpes. non poteſt accuſari tenuis apparatus. ſi uero inuitatus, facile reprehendi poteſt. Intereſt poc loco author pro differt accipit, & cum recto coniungit. Seneca eodem modo uſus eſt, cum inquit, id uero parum intereſt. Cum apud Catonem illum ambitus hoſtem. Equidem ita ſentio. ſoluit obiectionem quam fecerat. quanquam enim uideantur inquit illa, quæ dixi me retrahere, tamen magis cen-

ſeo laudandū, ut utilitas iuuandi præferatur gratiæ placendi. Ni animus inqes. animus inquietus, adiectiuum enim nomen eſt hic & hæc & hoc inquies inquietis. profecto enim populi gentium uictoris. Et non nominus gloriæ, & reliqua. ordo eſt. decuit enim profecto illa compoſuiſſe Liuium nō ſibi ſed gloriæ populi gentium uictoris & gloriæ Romani nominis, & Liuius. ideo ſcribere ſe dicit, quia animus inquies paſcitur opere, hoc eſt laborat. ponitur enim interdum opus pro opera, ut hoc loco, & apud Virgilium, Mollibus è ſtratis opera ad fabrilia ſurgit, quaſi ad operas & labores fabriles. Non animi cauſa, non uoluptatis & delectationis gratia, dicimus enim in propinquum rus animi cauſa profectus ſum, ideſt uoluptatis, & recreandi animi cauſa. Viginti millia rerum. poſtquam ſoluit obiectionem & confirmauit propoſitum ſuum. nunc modum, & ordinem ſcriptorum ſuorum ponit. dicit enim ſe ex locutione circiter duorum millium librorum, qui raro uideri ſolent, elegiſſe authores centum, ex quibus ſumpſit uiginti millia rerum, quæ. xxxvi. uoluminibus incluſit, multis additis, quæ aut neſciuerunt priores, licet extarent, aut non extabant tunc ſed poſtea experientia & tempus uitæ hominum ea inuenit. Theſauros oportet eſſe, non libros. oportet non libros eſſe, ſed theſauros. uiginti autem millia rerum dixit, hoc eſt infinitas res, ponendo numerum finitum pro infinito. Exquiſitis authoribus, hoc eſt electis. Quærere enim & exquirere differunt. nam quærere eſt ſcrutari. inquire. Exquirere uero eſt ſecernere & eligere, quemadmodum cogitare eſt mente, uel ingenio aliquid rimari. Excogitare uero eſt cogitando inuenire. Subciſiuis temporibus à rebus neceſſarijs ſubtractis. dicuntur enim ſubciſiua tempora ea, quæ ſubtrahuntur à rebus nobis neceſſarijs, ut ad aliquem uſum accommodemus, quæ uernacula lingua dicimus tempora furto ſubtracta. Declarat hoc optime Aulus Gellius, cum inquit, quantum autem uitæ mihi deinceps deūm uoluntate erit, quantumq; à cura, & à re familiari procurandoq; cultu liberorum meorum dabitur otium, omnia ſubciſiua tempora ad colligendas huiuſmodi memoriarum delectatiunculas conferam, dictaq; ſunt à ſuccidendo, quaſi ſuccidantur à rebus neceſſarijs. ideo addidit, ideſt nocturnis. quia ſubcidere aliquid non poterat ex diurnis temporibus, quæ non ſibi ſed alijs impendebat. corrector quia huius uerbi ſignificationem minime intellexit, addidit quietis ſcripſitq; ſubciſiuis quietis temporibus, quod ſiquis eum rogaret, quæ ſint ſubciſiua tempora quietis, neſcio quid muſſitaret. Nequid noſtris putetis ceſſatum horis, ne putatis nos, à ſtudio ceſſare. & his horis, quæ curando corpori natura indulſit, quod mox declarat Dies uobis impendimus, dum exercemus officia nobis à Cæſare delegata. multas enim procurationes geſſit Plynius. multos magiſtratus obiuit (ut ſcribit Suetonius) Dum ſomno ualetudinem computans, facta cum ſomno ratione tantum ei impendimus, quantum curandæ ualetudini ſatis ſit. Cum iſta muſſitamus ideſt ſecretò loquimur, noctu uidelicet ſcribentes. muſſito frequentatiuum eſt ab hoc uerbo muſſo. muſſare eſt ſecretò loqui, & quaſi murmurare. Ennius. in occulto muſſabant. uulgo autem pro citare ponitur. ideo non decet muſſare bonos. Mutire etiam loqui eſt. idem palàm mutire plebeio piaculum eſt. Profecto enim uita uigilia eſt, quia ſomnus morti ſimilis eſt, & homo ſoporatus parum difert à mortuo. Quibus de cauſis atq; difficultatibus nihil auſo promittere, hoc ipſum cum præſtas quod ad te ſcribimus. Cum inquit propter huiuſmodi difficultates, nihil de me promittere audeam, tu hoc ut audeā præſtas. quoniam ad te ſcribo, & non eſt fiducia hæc, quaſi de me ipſo confidam., ſed dicitur quia hoc accidit, dum librum tibi dedico. multa enim ideo pretioſa uidentur, quia

ſunt templis dicata. Corrector non emendauit hunc locum, ut dicatura ſcriberetur, ſed ſcripſit indicatura uulgarem ſecutus errorem, nec animaduertit Plynium declarare ſeſe cum inqt. multa enim ideo pretioſa uidentur, quia ſunt tēplis dicata, nec fiducia operis hæc eſt, quæ me audacem facit. nos quidē omnes patrem te, fratremq; diximus. excuſat ſe quod non amplius in laudibus uagaretur, ſcripſimus inquit, de uobis oībus patre. ſ. Veſpaſiano & te, & Domitiano fratre. Quo loco nō poſſum non admirari, quod corrector noſter non aduertit ad Titum, non ad Domitianam epiſtolam fratri ſcribi, cum eum tanquā natu maiorem præpoſuerit, alioqn enim dixiſſet fratrē teq; diximus. opere iuſto temporum noſtrorum hiſtoriam orſi à fine Aufidij Baſſi. ordo eſt. niſi hiſtoriā tēporum noſtrorum à fine Aufidij Baſſi. iuſto, hoc eſt magno uolumine. dicimus enim iuſtam rem magnam, quemadmodum bonam, ut bonam partem, & iuſtam partem magnam partē, & bene doctus. i. ualde doctu. ſcripſit autem Plyn. unum, & . xxx. libros hiſtoriarum à fine Aufidij Baſſi. Quæ iampridem pacta ſancitur, quæ iampridem confirmatur per res geſtas noſtras, hoc eſt uera eſſe cōprobatur, ſic ſuperius, ut in quædā acta exeāt, hoc eſt in quaſdam res geſtas. Sācire eſt firmare. roborare. decernere. unde ſanctio dicitur, & ſancta res. i. decreta & inuiolabilis. Et alioquin ſtatutum erat hæredi mandare nequid ambitioni dediſſe uita iudicaretur, niſi uirtute ueſtra & rebus geſtis confirmarētur uera eſſe, quæ de patre te & fratre ſcripſi. ſtatuerā hiſtoriā oēm delegare hæredi, ut ſi uiuus ederem, quæ uerū excederet uiderem conſuluiſſe ambitioni, & per mēdacia principum gratiā quæſiuiſſe. Vbi ſit ea quæres. à correctore temere additum eſt. Perinde uero occupātibus locū faueo ego & poſteris. Hic opus ſuū cōmendat Plyn. dicit enim ſe ſcribēdo fauere æque & ijs qui ante eum ſcripſere, & ijs qui poſt eum ſcripturi ſunt. nam & gloriæ illorum conſuluit, nō fraudando illos nominibus ſuis, & hos ad certandum ſecum prouocat, quēadmodū fecit ipſe cum prioribus. pinde aliqñ ſignificat ita, & tunc flagitat poſt ſe ac, uel ac ſi, uel atq;, uel atq; ſi, ut fac pinde, ac ſi res tua eēt. & faueo rei tuæ, pindæ ac meæ. Si uero negatio præcedat, flagitat quàm. Suetonius in uita Domitiani, nulla tamē re pinde motus quàm reſpōſo mathematici. aliquando uero ſignificat ſatis, ſiue multum, cum abſolute ponitur, ut idē Suetonius in uita Galbæ, quare aduentus eius non pinde gratus fuit, hoc eſt nō ſatis gratus, uel non multum gratus. nonnunquam ſignificat æque, ut hoc loco, & apud Ciceronem in epiſtolis, Ego te et Dolabellam pinde diligo. Corrector non pinde, ſed proinde ſcripſit, quod cum ſignificet ideo, uel potius, ideoq; & ſemp à ſuperiore ſententia dependeat, quomodo hic ſtare poſſit, ipſe dicat. Argumentum huius ſtomachi mei habebis, quod. ſ. æque faueam prioribus & poſteris. ſtomachus aliquando in malam partem capitur pro indignatione, ut non poſſum ſine ſtomacho ſcribere. aliquando in bonam pro facilitate, ut hoc loco huius ſtomachi mei. i. huius meæ facilitatis & manſuetudinis, & benignitatis. Non ut pleriq; ex ijs, quos antiqui, quos commemoraui corrector ſecutus communem errorem Attici ſcripſit, quod uſq; adeo admiror, ut non ſciam quem locum corrigere potuerit, qñ hunc nō correxit, præſertim cum Plyn. mox dicti ſui rationem reddat, cum inquit. Scito enim conferētem me authores deprehendiſſe ab adiuratiſſimis & proximis, ueteres tranſcriptos ad uerbum, neq; nominatus. adiurati, cuius uerbi ſuplatiuo Plyn. utitur hi dicuntur, q uinculo quodā amicitiæ, quaſi ſacramento aſtricti ſunt. hi ab alijs deuoti dicuntur ſoriantes. Galli ſolidurios uocant. adiuratiſſimi igitur. i. coniunctiſſimis. Non illa uirgiliana uirtute, ut certarent. Virg. licet non nominauerit authores à quibus ſumpſit, ita tamen uerſus illorum ſu-

is inſeruit, ut uideremur de carminis excellentia uelle certare. Non ciceroniana ſimplicitate, qui & Platonem, & Cratorem, & Panætium, quos ſecutus eſt, nominauit. Alioquin ſi neq; authores nominent, neq; de doctrina certent, ut Cicero, & Virg. fecere, non tam ſcribere, quàm aliorum ſcripta furari dicendi ſunt. Obnoxij animi, non liberi, ſed ſeruilis, id enim obnoxiū dicitur, quod alicui obligatum eſt, & ſubditum. Cum ſors fiat ex uſura. tunc enim fœnus minime dānandum eſt, cum uſura cedit in ſortem. ſors principale mutuum dicitur uſura, quod ſorti accedit. Inſcriptionis apud græcos mira felicitas. nunc de titulo operis acturus primo irridet copiam titulorū, quibus græci utuntur. deinde oſtendit noſtros feſtiuioribus titulis uſos. tertio ſe conſulto inſcriptionem dimittere feſtiuam profitetur. Mira felicitas. mira ubertas. dicuntur enim felices & lætæ ſegetes, quæ uberes & fœcundæ ſunt. Cerion inſcripſere. alij inquit opus ſuum inſcripſerunt cerion quaſi ſuaue & iucundū, græci enim κήριον uocant fauum. alij κέρας ἀμαλθείας inſcripſerunt, hoc eſt copiæ cornu. ita enim dicunt κέρας ἀμαλθείας. hoc aūt feciſſe inter alios dicitur Helius Meliſſus in libro, quem ſcripſit de loquendi proprietate, quem cum ederet ingentis cuiuſdam illecebræ titulo inſcripſit, & ceras amaltheas appellauit. uelut lactis gallinacei ſperare poſſis in uolumine hauſtum, pinde ſcripſit opus cornu copiæ, ac ſi in eo lac gallinæ liceret haurire. antiquum enim prouerbium eſt, cum ſignificare uolumus omnia in aliquo loco reperiri, ut dicamus gallinaceum lac facile ibi inuentum eſſe. Iam iā mox pandectæ. genitiui caſus pandectæ. dicitur autem pandecta ἀπὸ τοῦ πάντα δέχεσθαι, quod omnia habeat, quaſi omne rerū atq; doctrinarum contineat genus. inſcripſit autem, hoc nomine opus ſuum Tiro Tullius (ut Aulus Gellius refert) cū quid pandectæ dicuntur, exponit. Enchiridiō. pinachidion. genitiui caſus ſunt, iā inquit mox πανδέκτης, ἐγχειριδίων. ita enim apud græcos dicuntur. Enchiridion aliquando gladiolum ſignificat, aliquando libellum, qui haberi frequenter in manibus debeat, quale eſt enchiridion Epicteti. & enchiridion Aurelij Auguſtini. appellabant igitur opera ſua enchiridia, hoc eſt utiles libros, & ſemper habēdos in manibus. πίνακες autem & per diminutiuum πινακίδια dicuntur tabellæ, in quibus capita omnium rerum continentur. latine indices dicimus. itaque pinachidia libros ſuos uocant quaſi multarum indices rerum. Inſcriptiones propter quas uadimonium deſeri poſſit. hæc clauſula per oppoſitionem poſita eſt. eſt enim ordo. Iam iam mox pandectæ, enchiridion, pinachidion, quæ tales inſcriptiones ſunt, ut liceret earum gratia etiam fidem uiolari. Antiquum enim prouerbium eſt, quoties magnum aliquid ſignificare uolumus, ut dicamus poſſe propter id uadimonium deſeri, quod perinde eſt, ac ſi diceret ius uiolari. Deſerere enim uadimonium ſummum eſt ſcelus. Ac cum intraueris, dij, deæq; omnes, quàm nihil in medio inuenies. licet tam magna tituli polliceātur, cum libros aperis nihil inuenis. Noſtri craſſiores antiquitatum exemplorum artium quam facetiſſime lucubrationem dicunt. Noſtri inquit, hoc eſt latini, qui in antiquitatibus & exemplis, & artibus meliores ſunt, quàm græci, magis faceta inſcriptione utentes, lucubrationem dicunt, quaſi opus nocte. lucubrari enim eſt aliquid nocte ad lucernam componere elaboratum ad lucernam. Aul. Gel. eadem ratione opus ſuum noctes atticas uocauit. Vt qui ait bibaculus eram, & uocabar Pantomimus. Aſſerit Varro in ſatyris ſuis ſuſtulit & flexibula. Varro ut multis in locis, præſertimq; apud Nonium Marcellum intelligi poteſt ſatyram ſcripſit, cui nomen impoſuit flexibula, quod interpretari poteſt conſilium flectens. βουλὴ enim apud græcos conſilium dicitur. & eſt ſenſus, quemadmodum

Bibaculus, qui ob egregiā imitationem Pātomimus dicebatur. Refert Varro, in ſatyris ſuis, Suſtulit inſcriptionem, quam fecerat .i. flexibula, quaſi pœniteret opus ſuum tam illecebroſo titulo nuncupaſſe. ita enim flexibula dici poteſt, quemadmodum flexanima dicebatur. Cic. Sed tantum uim habet illa, quæ recte à bono poeta dicta eſt flexanima, atq; omnium regina rerū oratio. Apud græcos deſit nugari Diodorus, quia neq; feſtiuis inſcriptionibus uſus eſt, neq; hiſtorias ſuas alicuius nomini dedicauit, Appion, quidam grammaticus inter eos, qui illecebroſis titulis utebantur, ponit etiā Appionem grammaticum, qui tantum inſcriptionibus ſuis pollicebatur, ut donare ſe immortalitate diceret eos, ad quos ſcribebat. Hic filius fuit Pliſtonici, cui cognomen Mochus fuit genere Aegyptius, quamuis Helicerius Cretenſem fuiſſe dicat grāmaticum. Apollonij Archebij diſcipulum audiuit & Eufranorem ſenio iam confectum. Centeſimum enim ætatis annum exceſſerat. docuit publice grammaticam Romæ ſub Tiberio et Claudio cæſaribus, ſucceſſitq; Theoni grāmatico. floruit tempore Dionyſij Halicarnaſei & Ioſephi, qui librum aduerſus eum ſcripſit. edidit hiſtorias omnium gentium, & pleraq; alia opera ſcripta reliquit. Quem Tiberius cæſar cymbalū mūdi uocabat, quoniā publicæ famæ tympanum potius uideri poſſet. neceſſe enim erat maxime eum de ijs ſcribere, quos immortalitate donare pollicebatur. Me non pœnitet nullum feſtiuiorem inueniſſe titulum. ſenſus talis eſt. mihi etſi gratum ſit, quod nullo tali titulo uſus ſim, ne tamen omnino uidear græcos improbare, ſequar nobiles illos pictores Apellem, & Polycletum, qui etiam perfecta opera pēdenti titulo inſcripſerunt. Conditoribus. compoſitoribus, ut legum conditores dicuntur. In libellis, ijs, quos ad te mitto, pendenti titulo imperfecto, nam titulus eius talis erat uidelicet. APELLES Faciebat. Similiter & POLYCLETVS. Faciebat. hi enim erant tituli eorū, tanquam inchoata ſemper arte & imperfecta; non enim ſcribebatur Apelles fecit. Polycletus fecit, ſed. Apelles faciebat, Polycletus faciebat. Vt contra iudiciorum uarietates ſupereſſet artifici regreſſus ad ueniam, ueluti emendaturo quicquid deſyderaretur, ſi non eſſet interceptus. Hinc eſt quod Apelles etiā perfecta opera in pergula trāſeuntibus proponebat. ipſe uero poſt ipſam tabulam latens, uitia, quæ notarētur, auſcultabat uulgum ſeipſo longe diligentiorem iudicem exiſtimans. Si non eſſet interceptus. ſi nō antea moreretur. Tanquam aliquid ſingulis fato ademptum. tanq̃ morte intercepti pficere ea nequiuiſſent. Tria opera fuiſſe Apellis dicuntur, in qbus titulus erat. Apelles fecit. imago Veneris exeuntis è mari. Caſtor & Pollux cum uictoria, & Alexandro magno. Item imago Beli reſtrictis à tergo manibus, Alexandro in curru triumphante. Quo apparuit ſummam artis ſecuritatem authori placuiſſe in illis tribus. ſ. in quibus exiſtimauit nihil prorſus addi poſſe. Et ob id magna inuidia affuere omnia ea. omnes enim ea habere cupiuerunt. unde primam Veneris imaginem D. Auguſtus dicauit in delubro patris Cæſaris, cuius inferiorem partem corruptam, qui reficeret non potuit inueniri. Poſtremas uero tabulas poſuit in fori ſui partibus celeberrimis. Ego planè meis adijci poſſe multa confiteor. ego inqt aꝑte confitor multa addi poſſe meis libris non ſolum ijs, quos in præſentia ad te mitto, ſed alijs etiā quos interea edidi. Obiter, quod uulgo dicitur incidenter. Iuuenalis, Atq; obiter leget. dictio eſt compoſita ex ob & iter, quaſi inter eundum. iſtos Homeromaſtigas. ſ. inuidos & maledicos. Alludit enim ad Zoilum. hic cum libros aduerſus Iliadem atq; Odyſſeam Homeri compoſuiſſet Alexandriam ueniens recitauit eos Ptolemæo regi. Ptolemæus, cum animaduertiſſet poetarum parentem immerito abſentem uexari, nullum illi dedit reſponſum. Zoilus cum

diu fuiſſet in regno, tandem inopia omnium rerum compulſus regem adijt, rogans ut dari ſibi aliquid iuberet. Tum rex, Homerus, qui ante annos mille deceſſet æuo perpetuo tot millia hominum paſcit, quare tu quoq; debes, q̃ meliori ingenio te profiteris, non modo unum, ſed etiam plures alere poſſe. Dignum profecto ſapiētiſſimo rege reſpōſum. à quo non longe poſt eundem paricidij damnatum pœnas luiſſe cruci affixum tradunt. hic uero cognomen adoptauerat, ut homeromaſtix uocaretur, qđ uerbū apud græcos flagellū ſignificat. Tractum inde prouerbium, ut omnes huiuſmodi doctorum uirorum calumniatores homeromaſtiges dicantur. ita enim uerius dixerim, quàm ut audio ſtoicos & peripateticos, & epicureos quoq;. tales enim ſe faciebant Plynij calumniatores. ſenſus quidē manifeſtus eſt. At corrector, qui ita ſcribat. ita enim uerius dixerim, quoniā audio & ſtoicos, & dialecticos, & epicureos quoq;, quid ſignificare uelit, ipſe aperiat. nam de grāmaticis ſemper expectaui parturirent aduerſus libellos meos, quos de grāmatica edidi. expectaui inquit iandiu, ut grammatici parerent aliqd aduerſus libros, quos de grāmatica ſcripſi. illi uero enim frequenter iam. x. fecerunt abortiuos, hoc eſt nihil pepererunt præter minas, & inania uerba. Subinde ſignificat frequenter cum quodam interuallo, ut ſi dicam me ſubinde reſpicere an poſt tergū aliquis me ſequatur. cum celerius etiam elephāti pariant. hoc ideo inquid, quia. x. annis geſtari in utero elephātos uulgus exiſtimat. Ariſto. biennio, nec amplius, quàm ſingulos uno partu gigni refers. uiuere autem annis ducentis, & quoſdam trecentis. eſt autem uetus prouerbium, cum ſignificare uolumus aliquid tarde fieri, ut dicamus, celerius elephanti pariunt. Cernimus etiā aduerſus Theophraſtum. conſolatur ſe exemplo Theophraſti, quaſi dicat non eſſe mirandum ſi aduerſus ſe aliquid ſcribant, cum etiā aduerſus Theophraſtum ſcribere quoq; mulier auſa fuerit. Corrector noſter Proteruius ſcripſit C. Tiberonis, in quo quid ſibi uoluerit, aut cui uerbo is caſus iungatur, ipſe exponat. hominem in eloquētia tantum, ut nomen diuinū inde inuenerit. Dictus eſt enim Theophraſtus, quaſi θεία φράσις, hoc eſt diuina quædam compoſitio orationis. Sic enim ab Ariſtotele præceptore impoſitum ei nomē fuit, cum antea Tyrtamus uocaretur. Et prouerbium inde natum, ſuſpendio arborē eligendam, hoc eſt prorſus deſperandum eſſe, quando aduerſus doctiſſimos uiros ſcribere etiam mulierculæ præſumunt. Non queo mihi temperare. adducit aliud exemplum Catonis, ſ. Cēſorini, qui licet ſub Africano, licet contra Annibalem militaſſet, nec potuiſſet ferre Africanum ſuperiorem, & imperator triumphum reportaſſet, non potuit tamen carere calumniatoribus, qui libros ſuos de rei militaris diſciplina carpere auderent. & ne africanum quidem ferre potuiſſet, quaſi indignaretur ſub eo imperatore militare. Quid enim ad te in meo uolumine. hæc ſunt uerba Catonis aduerſus calūniatores operis ſui. Scio ego quæ ſcripta ſunt, etſi palàm proferantur multos fore, qui ita reprobent, ut eligant. ſententia & acuta, & clara eſt, corrector ita rupit multos fore, qui inuiti legant, ita non ſatis ei fuit peruertere Plynium, niſi Catonē quoq; deprauaret. Nec Plancus illepide. tertium exemplum refert de Planco, qui cum audiſſet Aſinium Pollionem orationes aduerſus ſe parare, quas ipſo mortuo ne reſpondere poſſet, uel ipſe Aſinius uel filius eius ediderant, dixit cum mortuis nō niſi laruas luctari. nec Plancus illepide. ſubaudi dixit. Non niſi laruas luctari. laruæ dicuntur noxiæ inferorum umbræ, & nocturni lemures. Varro de uita patrum. in ſacris fabas iactant noctu, ac dicunt ſe laruas, & lemures domo extra ianuam eijcere, nunc generali uocabulo laruæ ſeu laruati dicuntur, quicunque alienas facies ſumunt. Ergo ſecuri, nihil

formidantes propter rationes quas ſupra diximus. dicitur. n. ſecurus quaſi ſine cura, unde ſecuri ſunt qui periculū nō timēt etiam ſi periculo obnoxij ſunt. tuti uero econtrario qui periculo obnoxij non ſunt etiam ſi ſecuri non ſunt, ſed periculum timeant. Contra uitiligatores. ideſt uitioſos litigatores, hoc eſt obtrectatores, & calumniatores, hi enim nihil aliud quàm uitiligatores ſunt, cum ſola prauitate contentionē quærunt. Exequamur reliqua propoſiti. honeſtus loquēdi modus, hoc eſt exequamur reliqua, quæ ad propoſitum pertinent. Quia occupationibus tuis publico bono parcendum erat. hic rationem affert quare omnium librorum capitula in principio operis poſuerit. & hæc eſt ratio, quia parcendū tibi erat publico bono, hoc eſt propter publicas occupationes, ſubiunxit huic epiſtolæ quid ſingulis libris contineretur, ut neque tu, nec tua cauſa cæteri perlegendi omnia laborem ſuſciperetis. Sed inueniri facillime poſſet quod quiſq; deſyderaret. Quod fecit in literis noſtris. i. in latina lingua. confirmat enim inſtitutum ſuum authoritate Valerij Sorani, in libris, quos ἐποπτίδων ſcripſit in libris, quos ſcripſit de ſpectaculis. hoc enim ἐποπτίδων ſignificat, quod uerbum ἀπὸ τοῦ ἐποπτεύειν deductum eſt. nam ὄψις aſpectus eſt. liber ergo, ἐποπτίδων, hoc eſt liber ſpectaculorū. Neſcio qua ratione corrector non epoptidon, ſed epoptendō ſcripſerit, niſi ut in penultimo quoq; proœmij uerbo erraret. En igitur tibi abſolui mi Franciſce, quod à principio pollicitus fueram, et unà cum expoſitione Plyniani proœmij duos & uiginti errores correctoris ſatis inſignes ad te miſi, quod beneuolentiam noſtram teſtor, quam ſola uirtus & ſumma illa ſtudiorum neceſſitudo contraxit, me non inuidia feciſſe. neque enim inuideo alijs bonum, quo ipſe careo, quin potius glorior, & ſenſum quendam uoluptatis percipio, cum illa, quæ mihi deſunt, intelligo alijs ſupereſſe, non odio cum non modo doctos & eruditos uiros, ſed quoſcunq; bonarum artium ſtudioſos non amore tantum, uerum etiam ſingulari obſeruantia proſequar. non ſtudio laudis, quam expectare ex re tam parua, uel nullam, uel perquam mediocrem poteram, ſed ſolo ueritatis deſyderio. Et quia tam egregium authorem pati non poteram tam lacerum, ac ſordidatum circunferri, ut non modo non allicaret homines ad legendum, ſed potius faſtidio quodam & quaſi ſtomacho abalienaret. Tum quod uidebam in tanta talium librorum multiplicatione latinam linguam (niſi prouideretur) contra ſpem atq; opinionem omnium breui tempore perituram. ferant hæc æquo animo correctores. nec nobis ſuccenſeant, ſed agant potius gratias, quod hoc breui opuſculo uiam eis, quam tenere debeant, ueluti intento digito demonſtrauimus, ſeq; ad reliquos errores, quos toto libro penè infinitos uel dimiſerunt, uel fecerunt emendandos accingant, in quo non deerit eis Beſſarioneæ academiæ opera, ſi ea uti uoluerint, et nos certe q̃tum ingenio, q̃tum mediocri doctrina, q̃tum ſtudio ualebimus rei tā utili, atq; honeſtæ operā nauabimus. Tu uero mi Frāciſce, quē & ingenio excelſum, & natum altumq; in literis, & optimarum artium ſtudijs flagrantem omnes & norunt, & prædicant, talem te in hoc opere præſta, ut intelligant uniuerſi, neq; conſilium, neq; operam neq; fidem tuam in re tam neceſſaria defuiſſe. Vale beneq; & feliciter.

Ornelius Vitellius Parthenio Benacenſi ſuo ſalutem. Data eſt mihi tandem ex negotijs facultas, Sipuntini libellū perlegē di, quo Plynij ĩ naturali hiſtoria ad Titū Veſpaſianū epiſtolam corrigit, ſimul et interpretatur, qui ut aperte dicā qđ ſentio, uiſus eſt mihi magna diligentia, maiori ingenio, tanti ope-

ris initium multis in locis caſtigaſſe. Quod profecto à titulo ipſo uſq; ad calcem, correctorum pariter, & impreſſorum incuria, adeo deprauatum erat, ut doctiſſimi, ac propè diuini authoris nomine & ingenio uix dignum uideretur. Verumdum in Alarienſem epiſcopum, qui primus omnium impreſſoribus Romanis Plynium recognouit, uehemens fertur, cæcus, ne aliter dicā, quædam meo iudicio parum animaduertit, ac frigide interpretatus eſt. Quos locos Partheni dulciſſime notaui omnes. nō maleuolentia & odio, aut ambitione aliqua. neq; enim is ſum qui alieni ingenij obtrectatione mihi famā quæram, ſed ut bonæ me fidei eſſe cognoſcas. hac enim proxima æſtate, cum libellum illum mihi legendum Venetijs dediſſes, negaremq; tunc me illum poſſe euoluere, dixi (ut ſcis) laturum mecum Patauium, hac conditione, ut cum primum poſſem, quid de eo ſentirē, ad te ſcriberem. Quod ſi tardius opinione tua factum eſt, negotijs, quibus plus nimio diſtringor, imputabis. ſed de his ſatis. parum enim peccat, cuius fides tempore tantum lapſa eſt. Nūc ad Plynium. Qui cum cauſas addit, Cur Titū imperatorem, uiuo patre Veſpaſiano appellet, Verebatur enim ne Tito hac appellatione ſtomachum faceret, propter Veſpaſiani patris ſuſpicionem, de qua inferius dicemus, ſic ait. Agnoſcis & hoc caſtrenſe uerbum. Ille enim (ut ſcis) permutatis prioribus ſyllabis duriſculum ſe fecit, quàm uolebat exiſtimari à uernaculis tuis et famulis. Senſus uero eſt Non ego o Tite primus regnāte patre te imperatorem appello, ſed agnoſcis hoc caſtrēſe uerbum. Omnium enim militum fauore in caſtris apud Hieroſolymam ea appellatione honeſtatus eſt. Et ille (ut ſcis) permutatis prioribus ſyllabis. i. reciprocis, & retrouerſis carminibus, durius quàm uolebat exiſtimari à domeſticis tuis, id fecit. Quidam enim Titi amicus, carmine ſotadico, cum laudando imperatorem obſcurius fortaſſe appellauerat, ne male de Tito filio ſuſpicantē patrē Veſpaſianum offenderet, quod coniectari facit Trāquillus de Tito ſic ſcribens. Et ad perdomandā Iudæam relictus, nouiſſima Hieroſolymæ expugnatione duodecim propugnatores totidem ſagittarum confecit ictibus. Cœpitq; eam natali filiæ ſuæ, tanto militum gaudio, ac fauore, ut in gratulatione imperatorem eum conſalutauerint, & ſubinde prouincia decedentem detinuerint ſuppliciter, nec non & minaciter efflagitantes, aut remaneret, aut ſecum omnes pariter abduceret. unde nata ſuſpicio eſt quaſi deſciſcere à patre, orientiſq; regnum ſibi uendicare tentaſſet. quam ſuſpicionem auxit, poſtquam Alexandriam petens, in conſecrando apud Memphim Api boue diadema geſtauit, de more ſiquidem rituq; priſcæ religionis. ſed non deerant, qui ſecius interpretarentur. Quare feſtinans in Italiam, cum Rhegyum, inde Puteolos, oneraria naui appuliſſet, Romam inde contendit expeditiſſimus, inopinantiq; patri, ueluti arguens rumorum de ſe temeritatem, Veni inquit pater ueni. Vides Partheni, quàm aperte Trāquillus & Titum imperatorem à militibus conſalutatum ſcribit, qui honor ducibus ſummus erat (ut Alexādrinus in bellis ciuilibus, & Plutarchus in uitis, ac Cicero multis in locis teſtatur) Et patrē Veſpaſianum ſuſpicatum, ne Titus deſpiceret, oriētiſq; regnum ſibi aſſūmeret, unde (ut ſuperius ſcripſi) facile conijci datur, quendam, quem Plynius non nominat. Tito enim ipſi notus erat, dum carminibus Titum retrouerſis laudat, imperatorem obſcurius appellaſſe, ne ſcilicet ſuſpicionem patri augeret. Triplici igitur. inductus cauſa Plynius Titū imperatorem appellaſſe dicit, & quod eo nomine in caſtris appellatus ſit, & quod alius carmine appellauerit, & ut hac epiſtola aliquid de Titi laudibus deguſtaret, cum ait. ſimul ut hac mea petulantia fiat. Ordo autem eſt. Agnoſcis hoc caſtrenſe uerbum, hoc eſt imperatoris appelllationem, qua

in caſtris honeſtatus es, more fortiſſimorum ducum, qui ob rē bene geſtam, à militibus in caſtris imperatores conſalutantur. ille enim ſecunda cauſa imperatoriæ appellationis. etenim hic coniunctiua particula eſt, & eleganter poſita. & qualem apud Ciceronem eſt ſæpius inuenire (ut ſcis) duriuſculū ſe fecit, quàm uolebat exiſtimari à uernaculis, ideſt domeſticis & famulis tuis prioribus ſyllabis permutatis, ideſt ſotadico carmine in hoc enim genere carminis ita pedes ordinantur, ut ſi retrorſus incipias legere, uerſus uel eiuſdem, uel diuerſi generis etiam conſtet, unde fit, ut ſyllabæ ordine permutentur, & priores ultimæ, & ultimæ priores fiant. Nec eſt mirandum eo genere carminis ad Titum uſum fuiſſe illum, quiſquis fuerit, cum ipſe Titus ad omne genus carminis promptiſſimus fuerit. Quintilianus in nono inſtitutionum oratoriarum de ſotadicis ita. Pleriq; enim ex commiſſuris eorum, uel diuiſione, pedes fiunt, quo fit, ut ijſdem uerbis alij, atque alij uerſus fiant. Inde ait, memini quendam non ignobilem poëtam ita luſiſſe Aſtra tenet cœlum mare claſſis. area meſſes. hic retrorſus fit ſotadicus. Diomedes uero grammaticus uetuſtiſſimus in ultimo libro ſui operis ita ait. reciprocus uerſus eſt apud neotericos talis. Volo liber tua prædicentur acta. Acta prædicentur tua liber uolo. uerſus ſotadicus eſt ex utraq; parte, ſed durus. Et, Eſſe bonus ſi uis Cole diuos optime Panſa. Panſa optime diuos cole ſi uis bonus eſſe. hic in procurſu hexameter eſt, in recurſu ſotadicus. Repertum eſt etiam hexametrum poſſe per hexametrū recurrere, ut in illo uerſu. Muſa mihi cauſas memora, quo numine læſo. Læſo numine quo memora cauſas mihi muſa. Et elegiacus reciprocus eſt, ut pio precare thure cœleſtum numina. Numina cœleſtū thure precare pio. hic in procurſu iambicus, in recurſu, elegiacus. ſotadicus uero dictus à Sotade q primus hoc genus carminis uel inuenit, ut inqt Strabo, uel frequētius uſus eſt (ut Diomedes ſcribit), qui Cinædus eſt appellatus, quia eo carmine mores, et orationem cinædicam eſt imitatus, ut idem Strabo late meminit. Vnde Martialis, nec retro lego Sotadem cinædū. Sed uide nūc, quid Sipuntinus ſentiat. Caſtrenſe inquit uerbum, ideſt conterraneum, quod uocabulum non tam eſt eruditum, quàm militare, & quaſi uernaculum. Quod quàm uerum ſit, tu Partheni iudica. ſed Sipuntini erat conterraneum militare uocabulum eſſe ueterum authoritate probare. illud mihi reſpōdeat uelim. Cur Plyn. excuſatione potius noui (ut ipſe dicit) et ineruditi uocabuli, quàm uſitato uerbo uoluerit uti, cum præſertim exeat ex propoſito, & in ipſa epiſtola excuſet ſe, quod in naturæ rebus ſcribendis coactus ſit uti uocabulis ruſticis, & barbaris, niſi fortaſſe Plyn. in epiſtola his ineruditis uocabulis, & militaribus uti, haud abſurdum putauit, in reliquo opere putauit, ſed audi Partheni, quàm frigide, ne dicam inepte, cætera interpretatur. Qui magnificè prius ita ſe iactat, ponam eius uerba, ut facilius omnia cognoſcas. Hic locus diligēter animaduertendus eſt. Nam auſim dicere, neminem eum, noſtræ duntaxat ætatis, ſatis intellexiſſe. Senſus autem talis eſt. Non ſine ratione obijcere molior Catullum, quia & conterraneus eſt, & quemadmodum ego ſum, duriuſculus fuit, ob priores ſyllabas immutatas. conſtat ſanè Catullum metri legem præuaricatum de induſtria fuiſſe. præſertim in hendecaſyllabis uerſibus, ponendo primam ſyllabam breuem, cum requireretur producta, ut in ipſo uerſu, quem modo Plynius adduxit, & alibi. hæc ille. Non poſſum non mirari, acre ingenium hominis, alioquin docti, & diligentis, in has nugas cecidiſſe. Sed ut in principio dixi, dum in Alarienſem inuehitur, cæcus obtrectandi hominis uehementia effectus eſt. Vide Partheni quantum committat. Retrahit primū authorem ab eo, quod paulo ſuperius præpoſuerat. deinde uult, quod Plyn. comparet ſeſe Catullo, quod ſit

durus & aſper in carmine, quemadmodum ipſe in ſoluta oratione, quàm inepta comparatio ſit, hiſtoriographi, & poëtæ ipſe uideat. Certe Catullo (ſi durus ē) lege carminis ignoſci poteſt. Plynio, quia pedeſtris eſt, nulla uenia danda, et præſertim in epiſtola. Illud uero Partheni tu iudica, breuiſ ne ſyllaba pro producta, uel lōga pro breui, an potius iuſitata uocabula, obſcuræ ſententiæ, & ſtructura ipſa orationis in ſe contortæ, carmen durum, & aſperum faciat. Quid quod nullo pacto Sipūtino ignoſcendum eſt, qui cum uideret hāc ſententiā non poſſe ex uerbis Plynij elici, quod in Alarienſem reprehendit, in id ipſe incidit. Omnes enim codices antiqui, à uernaculis tuis, & famulis habent, ipſe pro tuis, ſuis ſcribēdum, Famulis uero interlinendum putat, cum non faciant ad ſententiam ſuam. Sed de his plus nimio. Subnectit deinde author tertiā cauſam. Cur Titum imperatorem appellare uoluerit. Simul inquit, ut hac mea petulantia fiat, quod proxime non fieri queſtus es in alia procaci epiſtola noſtra, ut in quædam acta exeat, hoc eſt ut petulantia mea aliquid de rebus tuis geſtis dicat. Sipuntinus uero exeam prima perſona corrigendum putat. neſcio qua ratione. præſertim cum huius uerbi tertia perſona pro ea ſignificatione, qua nūc Plynius utitur, à ueteribus tantūmodo uſurpetur. Quintil. ſed tamen ſiqd exierit, non erit atticū. et Perſius. Nō ego cum ſcribo. ſi forte qd aptius exit. et codices antiq exeat habeant. ſeqtur inde author. Stylus etiam accipitur aliquando pro pūctione & reprehenſione, quam alios ſcriptis taxando facimus, in qua ſignificatione nunc Plynius utitur. Cēſores enim ſtylo omnem notam inferebant. Nam aut ſenatu ſenatorem amouebant, aut equiti equum auferebant, aut plebeium, uel ærarium faciebant, uel à tribu amouebant. Ergo naſum ſtyli, hoc eſt ſubdolam punctionis, & reprehenſionis irriſionem, non ut Sipuntinus dicit, acerbitatem. acrimoniam. & dicacitatem. Sequitur poſtea author. iam omnia attingenda, quæ græci τὰς ἐγκυκλοπαιδείας uocant. ſic enim codices ueteres habent, & eſt ſententia. De ijs rebus mihi in hoc opere eſt ſcribendum. de quibus in omnibus diſciplinas tractatur. Græci enim omnium diſciplinarum collectione ἐγκυκλοπαιδείαν appellant. Circularis autem diſciplina, omnē eruditione, conſonantia & motu continetur. in hac eruditum fuiſſe Thebanum Epaminondam, & alios multos ornatos uiros à compluribus hiſtoriographis ſcribitur. unde miror Sipuntinum id non animaduertiſſe, cum & ipſe atticiſſator ſit. et iandiu in officina græcorum uerſetur. Et neſcio qua ratione inductus ſit corrigere. ἰδίων παιδείας ideſt particulariū diſciplinas ita enim interpretatur. inde Plynius. Scito enim conferentem me authores deprehendiſſe à iuratiſſimus, & proximis ueteres tranſcriptos ad uerbum, nec nominatos. Sipuntinus adiuratiſſimis corrigit, quod uocabulum ſignificare dicit coniunctiſſimum. inquit enim Adiurati, cuius uerbi ſuperlatiuo Plynius utitur, ij dicuntur, qui uinculo quodam amicitiæ, quaſi ſacramento aſtricti ſunt. Ego ſanè fateor adiuratum coniunctum dici, non authoritate Sipuntini contentus, ſed Apuleij, q in deo Socratis ait. Lemurem ſecundo ſignificatum appellamus animū humanum exutum, & liberum ſtipendijs uitæ, corpore ſuo adiuratis. ſed iſtius uerbi ſignificatio non facit ad ſenſum Plynij, niſi fortaſſe ueteres authores trāſcriptos ab amicis, & coniunctis eorum Plynius dicit. Quæ ſententia, quàm ſit digna ingenio Plynij, tibi iudicandum Partheni relinquo. Adde etiā quod omnes codices à iuratiſſimus habent, ubi à præpoſitio eſt. Sequitur deinde Plynius. Noſtri craſſiores antiquitatum exemplorum, artiumq;. Repetendum eſt hic, inſcripſerunt. Deridet enim Plynius græcos, ut nimium in feſtiuioribus titulis excogitandis ambitioſos, latinos uero in his modeſtiores fuiſſe, dicit, qui non κέρας ἀμαλθείας ideſt copiæ cornu. non κηρίον ideſt fauum. non πανδέκτας. ideſt omnia continentes. non πινακίδιον ideſt catillum. non ἐγχειρίδιον. quod is liber ſemper in manibus ſit habendus,

opera ſua appellauerunt ſed ea, aut antiquitatum, aut exemplorū, aut artium titulis inſcripſere. Hæc eadem Gellius libro ultimo noctium atticarū, de græcis & latinis ſcribit. Inde Plynius, Quam facetiſſimi lucubrationem puto, & qui ait, bibaculus eram, & uocabar pantomimus. Senſus eſt. Ego puto lucubrationis inſcriptionē, eſſe hominis latini quam facetiſſimi, ut aſſerit Furius bibaculus, libros ſuos lucubrationis inſcribens, qui ob diligentem imitationem, Pantomimus eſt ab omnibus appellatus. Ordo uero eſt. puto lucubrationem, quam facetiſſimi, ut aſſerit, qui ait, bibaculus eram, & uocabar pantomimus. inde Ply. Varro in ſatyris ſuis ſuſtulit & flexibula. Varro ſatyras quaſdam compoſuit, quibus flexibula nomen impoſuit, (ut teſtatur Nonius Marcellus) qui in interpretatione uocabulorum Varronem in flexibulis allegat, ubi impreſſores errauerunt. nam pro flexibulis flexabulis impreſſere. Vocabulum pluratiuo numero declinatur, & compoſitum eſt ex latino uerbo flecto, & græco uocabulo βουλή. ideſt conſilium, quod lectione earum conſilium deſeri poſſit, & ea ratione dicitur qua flexanima. ſenſus eſt. Varro in ſatyris ſuis modeſtam latinorum exceſſit, qui paſſus eſt tam ambitioſo titulo ſatyras ſuas inſcribere, quod earum lectione omne conſilium ſit deſerendum. ordo uero eſt. Varro in ſuis ſatyris, flexibula ſuſtulit. ideſt paſſus eſt. peculiare enim præteritum eſt uerbi ſuffero. inde ſubintelligendum eſt, inſcribere. Sed animaduerte obſecro Partheni, quo pacto Sipuntinus tres iſtos locos interpretatur, ubi uerba peruertit. Nam ille ita corrigendum putauit. Noſtri craſſiores antiquitatum exemplorum, artiumq; quam facetiſſime lucubrationē dicunt. Omnes profecto codices ueteres, quos ego uiderim quam facetiſſimi habent, et puto. aliq uero dico. nullus tamē dicunt. Deinde ita ordinat. Omnes noſtri latini, qui in antiquitatibus, & exemplis, & artibus rudiores ſunt, quàm græci, magis faceta inſcriptione utentes lucubrationem dicunt. Quibus uerbis Sipuntinus hoc dicere uidetur, quod latini omnes, lucubrationis titulo operà ſua inſcripſerint, quod falſum eſſe quis ambigit? cum Gellius uarias latinorum inſcriptiones authorū enumeret. Illud neſcio quo ore auſus ſit dicere, Varronem ſatyras appellaſſe flexibula, Et quia eum pœniteret opus ſuum tam illecebroſo titulo nuncupaſſe, eam poſtea inſcriptionem deleuiſſe. quod ſi ita eſt, reſpondeat mihi uelim Sipuntinus, Quo pacto illæ ſatyræ ita inſcriptæ peruenerint ad ætatem Nonij, qui Varronem in flexibulis allegat. Sequitur Plyn. Apud græcos deſit nugari Diodorus quia ſcilicet nō feſtiuiore titulo, ſed operi ſuo apto, & cōuenienti uſus eſt. Diodorus enim omnem hiſtoriam ab initio mundi uſq; ad Diui Iulij Cæſaris tempora XL libris cōplexus, bibliothecas hiſtorias īſcripſit. Hæc ſunt Partheni, quæ mihi in epiſtola Plynij à Sipūtino parū animaduerſa uidentur. Te uero & Bergomatem Raphaelem noſtrum hac in re iudices deligo, hac tamen cōditione, ut Plynio in manibus ſumpto, hæc omnia ingenij ueſtri acumine quod quam maximum in utroq; cognoſco, perpendatis. Et ſi fortaſſe placebunt, ea compoſitiora, et latiniora faciatis, ſin minus, pro noſtra ſumma iam uetere amicitia oro, obſecroq; flāmis urenda tradatis. Vale, & me mutuo ama. FINIS. LAVS DEO.

In his ad te ſcribã, à quibus rebus uocabula ĩpoſita ſint in lingua latina, et ea, quæ ſunt in conſuetudine apud poëtas, cũ uniuſcuiuſq; uerbi naturæ ſint duæ, à qua re, et in qua re uocabulũ ſit ĩpoſitũ. RIGINIS verborum quæ ſunt locorum, & ea quæ in his in priore libro ſcripſi. in hoc dicam de uocabulis temporum & earum rerum quæ in agendo fiunt aut dicuntur cum tempore aliquo, ut Sedetur, ambulatur, loquitur. Atq; ſiqua erunt ex diuerſo genere adiuncta, potius cognationi uerborum, quàm auditori calumnianti geremus morē. Huius rei author ſatis mihi Chryſippus, aut Antipater, & illi in quibus & ſi non tantum acuminis, at plus literarum, in quo eſt Ariſtophanes, & Apollodorus, qui omnes uerba ex uerbis ita declinari ſcribunt, ut uerba literas alia aſſumant, alia mutent, alia commutent, ut fit in turdo & turdario, turdelitio, Sic declinantes græci noſtra nomina dicunt Lucianum λευκιανὸν & Quintum κόιντον. & ἀρίσταρχον illi, nos Ariſtarchon, & Διωνα Dionen, ſicut inquam conſuetudo noſtra multa declinauit, ut ab ſolo ſolum. ab libero libera. ab Laſibus lares, quæ obruta uetuſtate, ut potero eruere conabor. Dicemus primo de temporibus, quàm quæ per ea fiunt. Sed ita ut ante de natura eorum. ea enim dux fuit ad uocabula imponēda homini. Tempus eſſe dicunt interuallum mundi, & motus. Quod ad temporum uocabula latina attinet hactenus ſit ſatis dictum. nunc quod ad eas res attinet quæ in tempore aliquo fieri animaduerterim dicam, ut hæc ſunt. Legiſti. Currēs. Ludens. De queis duo prædicere uolo, quanta ſit multitudo eorum, & quæ ſint obſcuriora quàm alia, Cum uerborum declinantium genera ſint quatuor. Vnum quod tempora adſignificat neq; habet caſus, ut lego leges. Alterum quod caſus habet neq; tempora adſignificat, ut à lego lectio. & lector. Tertium quod habet utrunq;, & tempora. & caſus ut à lego legens, lecturus. Quartum quod neutrum habet. ut ab lego lecte lectiſſime. Horum uerborum ſi primigenia ſunt admitte, ut Coſconius ſcribit.

Ex eorum declinationibus uerborum diſcrimina quingenta millia eſſe poſſunt. Ideo quia ſingulis uerbis primigenijs, circiter quingentæ ſpecies declinationis fiunt. Primigenia dicuntur uerba, ut Lego Scribo. Sto Sedeo. & cætera, quæ non ſunt ab aliquo uerbo, ſed ſuas habent radices. contra uerba declinata ſunt, quæ ab aliquo oriuntur, ut à lego legis legit legam, & ſic itidem hinc permulta. Quod ſi hæc decem ſolum præuerbia eſſent quoniam ab uno uerbo declinationum quingenta diſcrimina fierent, his decem plicatis coniuncto præuerbio ex uno quinq; millia numero efficerentur, ex mille quinquagies centum millia diſcrimina fieri poſſunt. Democritus, ſecutiq; item, alij, q infinita principia dixerunt, quæ unde ſint non dicunt, ſed cuiuſmodi ſint, faciunt tamen magnum numerum, & ex his quæ conſtant in mundo, oſtendunt. Quare ſi etymologos principia uerborum poſtulet mille, de quibus ratio ab ſe non poſcatur, & reliqua oſtendat quod non poſtulat, tamen immanem uerborum expediat numerum. de multitudine quoniam quod ſatis eſſet admonui de obſcuritate paucæ dicam uerborum, quæ tempora conſignificant. ideo locus difficillimus eſt, quod neq; his ferè ſocietas cum græca lingua, neq; uernacula, ea quorũ repertum memoriæ affuerit noſtræ. de quibus ut dixi, quæ poterimus. M. TERENTII VARRONIS. DE ANALOGIA. LIB. III.

i N Verborū declinatiōibus diſciplina loquēdi diſſimilitudinē an ſimilitudinē ſequi deberet, multi quæſiuerūt. Cū ab his rō quæ à ſimilitudine oriretur, uocaretur analogia, reliqua ps appellaretur anomalia. de qua re primo libro, quæ dicerētur cur diſſimilitudinem ducem hēri oporteret, dixi. Scđo cōtra quæ dicerentur cur potius ſimilitudinem conueniret præponi. quarum rerum qđ nec fundamenta, ut debita poſita ab ullo, neq; ordo neq; natura ut res poſtulat explicata, ipſe eius rei formam exponam. Dicā de quatuor rebus quæ continentur declinationibus uerborum. quid ſimile ac diſſimile. quid rō, quam appellant λόγον. quid proportione quam dicunt ἀναλογίαν. quid cōſuetudo, quæ explicatæ declarabūt analogiam et anomaliā. uñ ſit, quid ſic, cuiuſmodi ſit. De ſimilitudine et diſſimilitudine. Iō primum dicēdum q ea res eſt fundamentum oīum declinationū, ac cōtinet rōnes uerborū. Simile eſt qđ res pleraſq; uidetur hēre eaſdem quas illud cuiuſq; ſimile. Diſſimile ē qđ uidetur eſſe cōtrarium. huius minimum ex duobus cōſtat oē ſimile. Itē diſſimile qđ nihil pōt eſſe ſimile, quin alicuius ſit ſimile. Itē nihil dicitur diſſimile quin addatur q id ſit diſſimile. Sic dicitur ſimilis hō hoī. equus equo. Et diſſimilis hō equo, nā ſimile eſt hō hoī, iō q eaſdem figuras membrorum hēt, quæ eos diuidunt ab reliquorum aīaliū ſpecie, in ipſis hoībus ſimili de cā uir uiro ſimilior, q̄ uir mulieri, qđ plures hēnt eaſdem partes. et ſic ſenior ſeni ſimilior, q̄ puero. Eo porrò ſimiliores ſunt qui facie quoq; penè eadē habitu et corporis filo. Itaq; qui plura hēnt eadem dnr ſimiliores qui proxime accedunt ad id, ut oīa hēant eadem, uocantur gemini. Simillimi ſunt qui treis naturas rerum putent eſſe. Simile, diſſimile. Neutrum qđ aliâs uocent non ſimile, aliâs non diſſimile. Sed q̄uis tria ſint ſimile, diſſimile, neutrum, tñ pōt diuidi ēt in duas partes ſic. Quodcunq; conferas aut ſimile eē aut non eſſe ſimile, eſſe ad diſſimile ſi uideatur eſſe ut dixi. neutrū ſi in neutram partem præponderet, ut ſiquæ res duæ conferūtur, uicinas hēnt partes, et in his denis hēant eaſdē denas alias et diſſimilitudinē ſimilitudinē æque aīaduertendas. hanc naturā pleriq; ſubijciūt ſub diſſimilitudinis nom. quare qm̄ fuit ut potius de uocabulo, quàm de re controuerſia eſſe uideatur. illud eſt potius aduertendū cū ſimile quid eē dicatur quin cui pti ſimile dicatur eē. in hoc.n. ſolet cē error, qđ pōt fieri ut hō hoī ſimile non ſit, ut multas partes hēat ſimilis. & iō dici poſſit ſimilis habere oculos, manus, pedes, et ſic alias res ſeparatim, & una plures. Itaq; qđ diligenter uidendum eſt in uerbis quas partes et quot modis oporteat ſimilis habere dicuntur, ut infra apparebit. Is locus maxime lubricus eſt. Quid.n. ſimilius pōt uideri indiligenti, q̄ duo uerba hæc ſuis et ſuis? quæ non ſunt, q alterum non ſignificat ſuere, alterum ſuē. Itaq; ſimilia eē uocibus ac ſyllabis confitemur, diſſimilia eſſe partibus orōnis uidemus, q alterum hēt tpa, alterū caſus. quæ duæ res uel maxime diſcernunt analogias. Item propinquiora genere inter ſe uerba ſimilem ſæpe pariunt errorē, ut in hoc nemus et lepus uidetur eſſe ſimile, qđ cum utrunq; hēat eundē caſum rectū, ſed non eſt ſimile, q eas certe ſimilitudines opus ſunt in quo eſt, ut in genere hoīum ſint eodē, qđ in his nō eſt. Nam in uirili genere noīum ſint eodem eſt lepus, ex neutro nemus. Dicitur.n. hic lepus, & hoc nemus. ſi eiuſdem generis eēt utriq; præponeretur idē ac diceretur, aut hic lepus et hic nemus, aut hoc lepus et hoc nemus. quare quæ et cuiuſmodi ſunt genera ſimilitudinū ad hāc rē pſpiciēdū ei, qui declinatiōes uerborū proportione ſumit, ne quæreret qđ locus, qđ eſt difficilis, qui de his rebus ſcripſerunt aut uitauerūt, aut incœperūt, neq; aſſequi potuerunt. Itaq; in eo diſſenſio neq; ea uniuſmodi apparet. Nā alij de oībus uniuerſis diſcriminibus poſuerūt numerū, ut Dioniſius ſidonius qui ſcripſit eas eſſe ſeptuagintaunam. alij partes eius quæ hēnt caſus. cuius eidem hic cum dicat eſſe diſcrimina quadragintaſeptem. Ariſto. retulit in literas. xiiij. Parmenſius. yiij. Sic alij pauciora aut plura. quarū ſimilitudinū ſi eſſe origo recte capta et inde orſa rō minus erraret in declinationibus uerborū, quarū ego principia prima duorū generū ſola arbitror eſſe, ad quæ ſimilitudines exigi oporteat. è quis unū poſitū in uerborū materia. alterū ut in materiæ figura quæ fit ex declinatione. Nam dēt eſſe unum ut uerbum uerbo, unde declinetur, ſit ſimile. Alterū ut è uerbo in uerbū declinatio. ad quā cōferatur eiuſdem modi ſit. aliàs.n. à ſimilibus uerbis ſimiliter declinantur, ut ab herus, ferus, hero, fero. Aliàs diſſimiliter herus ferus, heri ferū cum utrunq; et uerbum uerbo erit ſimile & declinatio declinationi. Tum deniq; dicam eſſe ſimilem ac duplicem, et perfectam ſimilitudinem hēre, id qđ poſtulat analogia. ſed ne abſurdius uidear poſuiſſe duo genera eē ſimilitudinū ſola, cum utriuſq; inferiores ſpēs ſint plures ſi de his reticuero, ut mihi relinquā latebras, repetam ab origine ſimilitudinū, quæ in cōferēdis uerbis et inclinandis ſequenda aut uitādæ ſint. Prima diuiſio in oratione, q alia uerba nuſq̄ declinantur ut hæc, uix, mox. alia declinantur à lima limabo à fero ferebam. Et cū niſi in uerbis quæ declinātur nō poſſit eſſe analogia, qui dicit ſimile eſſe mox et nox errat, qđ nō eſt eiuſdem generis utrūq; uerbū, cum nox ſuccedere dēat ſub caſuum rōne, mox neq; dēat neq; poſſit. Secunda diuiſio eſt de his uerbis quæ declinari poſſunt, quod alia ſunt à uolūtate, alia à natura. Voluntatem appello cū unus qs à noīe alio imponit nomen, ut Romulus Romæ. Naturam dico cum uniuerſi acceptum nomen ab eo qui imponit, non requirimus queadmodū id uelit declinari, ſed ipſi declinamus, ut huius Romæ hanc Romam. De his duabus ptibus uolūtaria declinatio refertur ad conſuetudinem, naturalis ad orationem. Quare proinde ac ſimile conferri non oportet ac dicere, ut ſit è Roma Romanus. Sic ex capua dici oportere capuanus, qđ in cōſuetudine uehementer natat, qđ declinātes impite rebus noīa iponunt, à quibus cū accepit cōſuetudo turbulēta neceſſe eſt dicere. Itaq; neq; Ariſtarchus, neq; alij in analogijs defendēdā eius ſuſceperūt cām. Sed ut dixi hoc genere declinatio in cōi cōſuetudine uerborū ægrotat et langueſcit, qđ oritur è populo multiplici imperio. Itaq; in hoc genere in loquēdo magis anomalia q̄ analogia. Tertia diuiſio eſt, quæ uerba declinat à natura. Ea diuiditur in parteis quatuor. In unam primam, uidelicet, quæ habet caſus, neq; tempora habet. ut docilis. facilis & amabilis. In alteram quæ tempora habet neq; caſus ut docet, facit, amat. In tertiam quæ utraq; habet ut docens faciens. In quartā quæ neutram ut docte & facete. Ex hac diuiſione ſingulis partibus tres reliquere diſſimiles. Quare niſi in ſua parte inter ſe collata erunt uerba, ſi non cōueniunt, non erit ita ſimile ut debeat facere idē in articulis. Vix adūbrata eſt analogia et magis rerum q̄ uocū in noībus magis expreſſa, ac plus ēt in uocibus ac ſimilitudinibus, q̄ in rebus ſuā obtinet rōnem. Etiam illud accedit in articulis habere analogias oſtēdere ſit difficile, qđ ſingula ſint uerba, hic contra facile qđ magna ſit copia ſimiliū noīum. Quare non tā hāc ptem ab illa ob diuidendū, quā illud uidēdū, ut ſatis ſit uerecundi ēt illam in eandē arenā uocare pugnatū. ut articulis duæ ptes finitæ et infinitæ ſic in uocabulis duæ, uocabulū et nomen. Non.n. idē oppidū et Roma cū oppidū ſit uocabulū, rōa nomē. quarū diſcrimē in his reddēdis rōnibus alij diſcernūt, alij nō. Nos ſicubi opus fuerit q ſit et cur

Obmoueto pro admoueto apud antiquos dicebatur, ut alia quæ ſupra relata ſunt. Valerius conſul propter inopiam patriciorum ex plebe adlegit in numero ſenatorum centum & ſexaginta & quatuor, ut expleret numerum ſenatorum trecentorum, ſic duo genera appellauere. Quiſpiam quin ſignificet aliquis, & quæpiam, aliquæ ſimiliter, quæ & alia eiuſdem generis ut dubium non eſt, ita unde ſequens pars eius cœperit, inueniri nō poteſt. Quinquatrus appellari quidam putant à numero dierum, quia ferè ijs celebrabantur, qui ſcilicet erāt tam Herculi, quàm quitriduo ſaturnalia, & totidem diebus compitalia. nam omnibus ijs ſingulis diebus ſunt ſacra, forma autem uocabuli eius exemplo multorū populorū Italicorum enuntiata eſt, qui poſt diē quintū iduum eſt is dies feſtus, ut apud Thuſculanos triatrus, & ſexatrus. Mineruæ autē dicatū eū diē exiſtimant, q̄ eo die ædes eius auētino conſecrata ſit. Quinquatrus feſtiuus dies dictus, q̄ poſt diē quintū iduum celebraretur, ut triatrus, & ſexatrus, & ſeptimatrus, & decimatrus.

Quinquertiū uocabant antiqui quem græci pentathlon, ut indicat uerſus hic: oīs equalis uincebat q̃nquertio. Liuius quoq; ipſos athletas ſic noīat, quinquertiones præco in mediū uocat. Quiſquiliæ dici putant quicquid ex arboribus minutis ſurculorū foliorū ue cadit uelut quicq̃d cadit. Cæcilius. quiſquilias uolantis uentis ſpolia memorāti modo. & Næui. in tegularia, abi deturbate ſaxo quiſquilia non hō. Quintipor ſeruile nomē frequēs apud antiquos erat, à prænomine dñi dictum, ut marcipor. gnipor, q̃uis ſint q̃ à numero natorū ex ancilla quinto loco dictū putent. Quippe ſignificat quid ni, teſtimonio eſt Ennius lib. XI. quippe ſolent reges oēs in rebus ſecundis. Idem libro XVI. Quippe uetuſta uirum non eſt ſat bella mouere. Item alij cōplures. Quianā pro quare, & cur poſitum, & apud antiquos, ut Næuiū in carmine punici belli, Sume deū regnator quianā genus iſti. & in ſatyra, quianā ſaturniū populum pepuliſti. & Enni. libro VII. heu quianā dictis noſtris ſententia flexa eſt. Quid niſi uſurpauiſſe antiquos teſtis & Afranius in epiſtola, me authore mater abſtinebis quid niſi. Quadrata Roma in palatio ante templū Apollinis dicitur locus ubi repoſita ſunt, quæ ſolēt boni ominis gratia in urbe condenda adhiberi, q̄ ſaxo munitus eſt initio in ſpeciē quadratā. eius loci. Ennius meminit cum ait, et q̃s extiterat Romæ regnare quadratæ. Quadrurbē Athenas Accius appellauit, qđ ſcilicet ex quatuor urbibus in unū domicilia tulere, Braurone, Eleuſine, Pireo, Sunio. Quæſo, ut ſignificat idē quod rogo, ita quæſere ponitur ab antiquis pro quærere, ut eſt apud Ennium libro ſecundo, Oſtia munita eſt idē loca nauibus pulchris Munda facit, nautisq; mari quæſentibus uitā. & in Creſphonte, ducat me uxorē liberū ſibi quæſendū gratia, & in andromeda. liberū quæſendū familiæ matres cauſa tuæ. Quadrantal uocabant antiq̃, quam ex græco ἀμφορεῖς dicunt, qđ uas pedis quadrati octo & quadraginta capit ſextarios. Plau. Curgulione, Anus hæc quantillum ſitit, modica eſt, capit quadrantal te. Cato contra Oppiū. Vinum redemiſti, prædia pro uini quadrantalibus ſexaginta in publicū dediſti, uinum nō dediſti. Quoaxare ranæ dicuntur, cum uocem emittunt.

Quartarios appellabant antiqui muliones mercenarios, quod quartā partē quæſtus capiebant. Lucil. porrò hoīes nequam malus ut quartarius cappos colligere oēs. Quatenus ſignificat quaſi ne hactenus, hac ſine. At quatinus quoniā. Sed antiqui quatenos dicebant, ut Scipio Africanus in ea oratione, quā ſcribit, poſtq̄ ex Africa redijt uti negotiū natum erat quatenos caſtra noſtra ita munita erant, ut poſſes partem exercitus abducere. Quāde pro quam uſos eſſe antiquos cum multi ueteres teſtimonio ſunt, tum eſt Liuius in primo. Iupiter, ut muro fretus magis quamde manu impe ſecundo, Quāde tuas oīs legiones, ac popularis. & Lucre. Clarus ob obſcuram linguam magis ut inanes Quamde grauis terga uos qui uera requirunt. Quā mox ſignificat, quàm cito, Sed ſi per ſe ponas mox ſignificabit paulo poſt uel poſtea. Quatere ſuſpenſum & uicinū rei alicuius motū ſignificat, non, ut Verrius putat, ferire, cum id ipſum uerbū concutere ex præpoſitione, quæ eſt con & quatere ſit cōpoſitum. Quaſſare autem eſt ſæpe quatere.

Querquetulanæ reputantur ſignificare nymphæ præſidentes querqueto uireſcenti, quod genus ſyluæ indicat fuiſſe intra portam, quæ ab eo dicta ſit querquetularia. Ques antiq̃ dicere, inde declinatū remanet datiuo caſu, quibus, nam qui adhuc itē queis facit, ut iſti iſtis, illi illis. Qui hoc cēſetis illic tranſite, q̃ alia oīa in hanc partē ijs uerbis præito minis uidelicet cauſa ne dicat, qui non cenſetis. Quot ſerui, tot hoſtes in prouerbio eſt, de quo Aſinius Capito exiſtimat errorē hoībus interueniſſe præpoſtere plurimis enuntiantibus. uero enim ſimilius eſſe dictum initio, Quot hoſtes, tot ſerui, tot captiui ad ſeruitutem adducebantur, unde etiam Mancipia.

Proin tuum quæram, ne requiram te uide. Specula & ſpeculum ſicut genere, ita ſignificantia differunt. Nam ſpecula deſpicientiam ſignificat. Virgilius libro decimo. atq; leo ſpecula cum uidit ab alta Stare procul campis meditantem prælia Taurum. Speculum, quo imago redditur. Mar. Tullius in Clodium, & Curionem. Sed credo poſtquam tibi ſpeculum allatum eſt, longe te à pulcris abeſſe ſenſiſti. Varro eumenidibus. Sed nos ſimis, atq; in ſummam ſpeculam peruenimus. Videmus populum futuris incinctum tribus. Confiteri & profiteri hoc diſtant. quia profiteri uoluntatis eſt. Confiteri neceſſitatis, & coactus, quod ita poſitum ſæpius legimus. Cicero pro Manilio. Hic ego non ſolum confiteor, uerum etiam profiteor. Honeſtius profiteri, quàm confiteri. Vlcus & uulnus hoc diſtant, quod Vlcus tecta, & clauſa eſt malignitas. Virgilius georgi. libro tertio. Quam ſiquis ferro potuit reſcindere ſummum Vlceris os alitur uitium, uiuitq; tegendo. Vulnus hians, & patens. Idem libro nono. Produxi, preſſiue oculos, aut uulnera laui Veſte tegens. Turpe, & fœdum quam habeant diſtantiam, manifeſtum eſt. Nam turpe leuior res eſt. Marcus Tullius de officijs. Luxuria uero cum omni ætati turpis, tum ſenectuti fœdiſſima eſt. Formæ & figuræ quæ ſit differentia. Mar. Tul. Manifeſtator eſt. Nam formam integritatem ſpeciei eſſe uoluit figurã formam noſtram. M. Tullius de offi. libro primo. Principio corporis noſtri magnã natura ipſa uidetur habuiſſe rationem, quæ formam noſtram, reliquamq; figuram, in qua eſſet ſpecies honeſta, eam poſuit in promptu.

Dignitatem & uenuſtatem diſcerni uoluit Mar. Tull. ut dignitas uiris, uenuſtas fœminis ſit attribuenda de offi. libro primo. Venuſtatem muliebrem dicere debemus, dignitatem uirilem. Monſtra & prodigia & portenta hoc diſtant, quod ſunt monſtra oſtenta, & monita deorum Virgilius lib. iij. primumq; parentem Mõſtra deûm refero. Prodigia deorum minæ, uel iræ. Idem lib. iij. Sola nouum, dictuq; nefas harpyia celæno Prodigium canit, & li. yi. Prodigijs acti cæleſtibus oſſa piabunt. Portenta oſtenta, quæ aliquid imminere ſignificant. Lucil. lib. xxy. Niſi portẽta, anguiſq; uolucres, ac pinnatos ſcribitis. Celare, & cælare hãc habẽt diſtantiam, qđ celare eſt tegere, & abſcõdere. Ter. an. Bene diſſimulatum amorem, & celatum indicans. Vir. æn. lib. yi. Secreti celant calles. Cælare inſculpere. Virgi. æn. libro primo. Cælataq; in auro Fortia facta patrum. Varro agathone. Nummam cælatus in manu dextra ſcyphus cœlo dolitus artem oſtentat Mentoris.

Ignoſcere & concedere quemadmodum inter ſe diſtant aperit M. Tul. ad Cæſarem Iuniorem lib. i. Quod mihi, et Philippo uacationem das, bis gaudeo. Nam & præteritis ignoſcis, & concedis futura. Contẽnere & deſpicere eo diſtant, quod eſt deſpicere grauius, quàm contẽnere. Mar. Tulli. in Verrem actione iij. Quemq; contempſerit deſpexerit liberum eſſe nunquam duxerit. ijdem ad Cæſarem lib. iij. Amici nonulli te contemni, ac deſpici, ac pro nihilo haberi ſenatus uoluit. Et de ſenectute. Contemni ſe putant, deſpici, illudi. Cupiditas & cupido diuerſa ſunt. Nam cupiditas leuior eſt. Lucilius lib. xxiij. Cupiditas ex homine cupido ex ſtulto nunquam tollitur, quod cupiditas pars quædam ſit temperatior defluens ex cupidine.

Aemulatio ab imitatione hoc diſtat quod imitatio ſimplex eſt, & liuorem atq; inuidiam non admittit. Aemulatio autem habet quidem imitandi ſtudium ſed cum malitiæ operatione. Virgi. lib. yi. Aemulus exceptum Triton (ſi credere dignũ eſt) Inter ſaxa uirum ſpumoſa immerſerat unda. M. Tullius in Cæſarianis, quaſi quodam æmulo, atq; imitatore ſtudiorũ & laborum meorum, & comite abſtracto. Probatum & ſpectatum uis maioris eſt. Lucilius lib. xxyi. Tuam probatam mihi, & ſpectatam maxime adoleſcentiam. Bellum & præ=

lium hoc differunt, quod prælia partes ſunt belli. Hoc eſt in bello congreſſiones. Lucilius lib. xxvi. Vt populus Romanus uictus ui, & ſuperatus prælijs ſæpe eſt multis, bello uero nunquam, in quo ſunt omnia. Vir. lib. xi. Infantem fugiẽs media inter prælia belli. Inter cauere & uitare. Lucilius eſſe diſtantiam uoluit lib. xxvi. Et eſſe plus uitare, quid cauendum tibi cẽſere, quid euitandum maxima. Vetuſtiſcere & ueteraſcere quid interſit Nigidius commentator grammaticus lib. x. deplanauit. Dicemus quæ uetuſtate deteriora fiunt uetuſtiſcere, Inueteraſcere quæ meliora. Mar. Tul. ad Hircium. Cum. n. nobilitas ſit nihil aliud quàm cognita uirtus, quis in eo quem ueteraſcentem uideat ad gloriam generis antiquitate deſyderet?

Nocens à nefario & impio diſtare, uti nocens leuius uideri poſſit, M. Tul. de offi. lib. ij. uoluit nec tamen ut hoc fugiendum eſt. Item eſſe habendum religione nocentem aliquando, modo nefarium impiumq; defenderes. Innuere & annuere hoc diſtant, quod eſt innuere facie ſignificare. Ter. adelphis. Annuere quin pugnus continuo in mala hæreat; Non innueram uerum in iſtam partem potius peccato tamen. Annuere concedere. Virg. lib. x. Annuit his Iuno & mentem læta retorſit. Mar. Tul. in Hortenſio. Quod cum uterq; noſtrum annuiſſent, omneſq; ad id tempus, quod erat dictum, poſtero die ueniſſemus. Poſitum eſt annuere pro innuere. Plautus Aſinaria. Neq; illa ulli homini nutet, nictet, annuat. Flagrare, & fragrare, ita diſcernuntur, quod flagrare eſt incẽdi, & ardere. Fragrare uero olere, & in plurimis inuenitur iſta diſcretio.

Noxa & noxia hanc habent diuerſitatem, quod eſt noxa peccatum leue. Virgilius æneidos lib. primo. Vnius ob noxam & furias Aiaci Oilei. Noxia nocẽtia. Virgilius libro octauo. iræq; & crimina noxia cordi. M. Tul. in Hortenſio. & cæteris quidem rebus, in quibus peccata non maxime affirũt noxias, tamen, ni ſciunt, attingunt. Plus à multo uetuſtas uoluit diſcrepare, & poteſt uideri hanc habere diſtantiam, ut ſit multum à plurimo minus ac non ſupra modum. Virgilius geor. libro primo. Multum adeo raſtris glebas qui frangit inertes. Plus ſicut in pleriſq;, quæ maioris modi eſt quàm neceſſarium, atq; ideo M. Tullius diſcreuit epiſtola ad Catonem. Nec idcirco mihi deſyderandam eſſe dignitatem meam, quod eam multi impugnarint, ſed eo magis recolendam, quod plus deſyderarint. Inter ſperatã & dictam & pactam et ſpõſam hoc intereſt, quod uirgo prius quàm petatur, ſperata dicitur. Plautus amph. Amphitryo uxorem ſalutat lætus, ſperatam ſuam. Dehinc promiſſa, uel pacta, uel ſponſa dici poteſt. Virgilius æneidos libro ſecundo. Cui pater & coniux quondam tua dicta relinquor? Et idem in alio loco & gremijs abducere pactas. Titinnius diuortio qui exacta ætate ſponſa ſit deſponſa. Mutuũ à fœnore hoc diſtat, quod mutuum ſine uſuris, fœnus cum uſuris ſumitur, & eſt quaſi accepti fœtus. Vnde & fœnus dictum eſt, ut græce τόκος. quaſi partus multi ſumpti. Plautus Aſinaria. Nam ſi mutuo non potero certum eſt ſumam fœnore. Vnde honeſtius mutuum eſt, quod ſub amico affectu fiat, tamen uſu temporis neceſſarij fœnore ſumere decet. Inter nutare, & annuere, & nictare ueteres hoc intereſſe uoluerunt, ut nutare capitis, annuere, uel innuere narium, uel labiorum. Nictare oculorum. Plautus Aſinaria. Nec illa ulli homini nutet, nictet, annuat. Simulare, & diſſimulare hanc habent diſtantiam. Simulare eſt fingere ſcire quæ neſcias. Diſſimulare fingere neſcire, quæ ſcias. Salluſtius Catilinæ bello. Cuius rei libet ſimulator, ac diſſimulator.

Caſtitas & pudicitia paria deputantur cum ſit pudicitia ab iniuria turpium libidinum libera. Caſtitas & ab his continens, & remota præterea & religioſa munditia, & puritas. Virgilius geor. libro ſecundo. Caſta pudicitiam ſeruat domus. Et æneidos libro ſexto. Quiq; ſacerdotes caſti dum uita maneret. Et libro ſeptimo. Præterea caſtis adolet cum altaria tedis, atq; ideo plus eſt caſtitas à pudicitia, quod par ſit cum alijs cæteris caſtitas. Paſcere & alere hoc diſtant authoritate Varronis. γέροντος διδασκάλου. ut ſit alere ſufficiendi generis curam habere. Paſcere natos cibo ſaginare. Vbi graues paſcantur pauonum greges. Ora & oræ licet paria eſſe uideantur, tamen ut genere, ita intellectu diſtant. nam quoties in his neutrum genus tangitur, uultus, uel facies noſtra ſignificatur. Virgil. Os, humeroſq; deo ſimilis. & libro duodecimo. Ora citatorum dextra detorſit equorum, quoties fœmininum cuiuslibet rei fines. Virgilius æn. libro primo. exire, locoſq; Explorare nouos quas uento acceſſerit oras. Inter extinguere, & opprimere intereſſe Cicero uoluit de amicitia, ut ſit maius opprimere, quàm extinguere. Quamobrem primũ danda opera eſt, nequa amicorum diſſidia fiant, ſin tale aliquid euenerit, ut extinctæ potius amicitiæ, quàm oppreſſæ uideantur, quaſi quod extinguitur poſſit renouari, quod opprimitur non queat. Morbum à uitio prudentia ueterum ſic uoluit ſeparari, ut ſit morbus cum acceſſu utiq; aut temporis, aut contagij, ut uitium perpetua & inſanabilis, atq; irreuocabilis cauſa.

Meminiſſe & in memoriam redire hoc differre Ariſtoteles putat, quod διαφέρει μνημονεύειν τῷ μεμνῆσθαι & uult meminiſſe omnium eſſe animantium, ut cibi, potionis, ſomni, uoluptatis, in memoriam reuocare, quod exciderit, non niſi homines poſſe. Die quarta, & die quarto hoc differre prudentes uolũt, quorũ tamen authoritas in obſcuro eſt; ut ſit die quarto temporis præteriti, die quarta futuri. Mentiri & mendacium dicere quemadmodum diſtent. P. Nigidius ſtudijs bonarum artium præclariſſimus manifeſtiſſime ſeparauit. Qui mentitur ipſe non falſus alterum fallere conatur, qui mendaciũ dicit ipſe fallitur, quantum in ſe eſt, uir bonus præſtare debet, ut non mentiatur, prudens ne mendacium dicat. alterum iudicet in homine alterum non. Feſtinare & properare ueteres, uoluerunt habere diſtantiam. Cato oratione, quam de ſuis uirtutibus ſcripſit. Aliud eſt properare, aliud feſtinare qui unum quicquid mature tranſigit, is properat, qui multa ſimul incipit, nec perficit, feſtinat. Verum utroruną; uerborum ratio ſub hac ſignificãtia proxima eſt ueritati, ut ſit ſæpe animi properare ſtudioſe ad res aliquas contendentis, feſtinare corpore neceſſitatibus obſequendi. Virgilius libro quarto. Et medijs properas aquilonibus ire per altum. Idem æneidos lib. ij. Feſtinate uiri, nam quæ tam ſera moratu Segnities? Matronæ, & matresfamilias diſſimilitudinem hoc modo ueteres docti ſeparant quidam, ut ſit matrona quæ peperit ſemel, mater familias quæ ſæpius, ſed hæc definitio uidetur abſurda. Ad hæc fidelius locupletiores matronam, quæ in matrimonio ſit mariti etiam ante ſuſceptos liberos dictam meliore tamen matris futura ſpe. Mar. Tul. in nomine nuncupatam, matrem uero familias, quæ in familia mancipioq; ſit patria, & ſi in mariti matrimonio eſſet. Auarum & auidum ita diſcernuntur. Auarum enim ſemper in reprehenſione eſt, auidum autem ab auẽdo, quod eſt etiam honeſte cupiendo. & à delectatione intelligi poteſt, ac per hoc aliquando malis, aliquando bonis adiungitur cauſis. ut Virgil. georg. libro. ij. paſcuntur oues, auidæq; iuuencæ. Salluſtius bello Catilinæ. Laudis auidi, pecuniæ liberales erant. Audacia & audentia hoc differunt, quod audentia fortitudinis ſit, audacia temeritatis. ut Salluſtius, Audacia pro muro habetur, & apud ueteres ſæpe ſic. Audentia Virgilius, Audentes fortuna iuuat. &, audentior ibo in caſus omnes

omnes. quanquam & audaciam pro fortitudine legimus, ut Virgilius lib. ix. Irim de cœlo miſit Saturnia Iuno Audacem ad Turnum. & Aude hoſpes contemnere opes. Proſpicere, & reſpicere diſtant, ut aduorſum uidere proſpicere recte dicatur. Reſpicere quaſi retro aſpicere. Varro manio. Sedens altus alieno ſumptu, neq; poſt reſpiciens, neq; ante proſpiciens.

Furor ab inſania diſtare Cicero Thuſcu. lib. iij. oſtendit. Itaq; non eſt ſcriptum inſanus, & furioſus eſſe incipit. Inſaniam enim cenſerunt inconſtantiam, ideſt ſanitate uacantem. tamen poſſe tueri mediocritatem officiorum, & uitæ communem cultum, atq; uſitatum furorem eſſe rati ſunt mentis ad omnia cæcitatem, quod cum maius eſſe uideatur, quàm inſania, tamen eiuſmodi eſt, ut furor in ſapiẽtẽ cadere poſſit, inſania nõ poſſit.

Confidentiæ, & fidentiæ diſcretionem pandit Mar. Tull. Thuſ. lib. iij. Qui fortis eſt idem fidens, quoniã confidens mala conſuetudine loquentium in uitio ponitur, ductum uerbum à confidendo, quod laudis eſt. Qui autem eſt confidens, is profecto non extimeſcit. diſcrepat enim à timendo fidens.

Inuidia & inuidentia. Cicero Thuſcu. libro iij. Poſſet etiam in miſericordiam, poſſet in inuidiam, non dixi in inuidẽtiam, quæ tum eſt, cum inuidetur. ab inuidendo autem inuidia recte dici poteſt, ut fugiamus ambiguum nomen inuidiæ. & libro quarto, ut ægritudini inuidentia, utendum, eſt enim docendi cauſa uerbo minus uſitato, quoniã inuidentia nõ in eo, qui inuidet ſolum dicitur, ſed etiam in eo, cui inuidetur. Aegrotatio, & ægritudo. Cicero Thuſc. lib. iij. Sed proprie ut ægrotatio in corpore, ſic ægritudo in animo nomen habet. Iracundus & iratus, ebrius & ebrioſus, amator & amans quid inter ſe diſtent, Cicero diſcreuit Thuſc. lib. iiij. Aliud iracundum eſſe, aliud iratum, ut differt anxietas ab angore. neq; enim omnes anxij, qui anguntur. Inter ebrietatem, & ebrioſitatem hoc intereſt, aliud eſt amatorem eſſe, aliud amantem. Lætari & gaudere diſtant. ut Cicero Thuſc. lib iiij. Atq; ut confidere decet, timere non decet, ſic quidem gaudere decet, lætari non decet. quoniam docendi cauſa à gaudio lætitiam diſtinguimus, ut autem innuit idem Cicero, gaudiũ in ſapiente, & in rebus bonis ſemper eſt, lætitia etiam in malis, & turpibus rebus eſſe poteſt. Pernicitatem & uelocitatem Cicero diſcreuit Thuſ. libro v. Præſtans ualetudine uiribus forma acerrimiſq;, integerrimiſq; ſenſibus, adde etiã, ſi lubet, pnicitatem. & Virgilius geor. li. iij. hoc ſenſit. Dura iacet pernix inſtrato ſaxa cubili, ut illud ſit celeritatis, hoc patientiſſimæ fortitudinis. Metum, timorem, formidinem, pauorẽ Cic. diſcreuit Thuſcu. lib. v. in quem autem metus, in eum formido, timiditas, pauor, ignauia. Innocens & innocuum hoc diſtant, qđ ſit innocens nõ nocens, & innocuum illæſum. Virgilius libro. x. & ſedere carinæ Omnes innocuæ. Legere & eligere non ſub ea ſignificatione intelligi uult Varro de re ruſtica libro primo. atrica prius debet defendere uite, in uindemia diligentis, una non ſolum legitur ad bibendũ, ſed etiã eligitur ad edendum, ut ſit legitur colligitur, ut plerũq; eligitur melior quæq; de plurimis.

Miſerari & miſereri cæteri his ſenſibus eſſe uoluerunt, ut ſit miſerari flere & lamentari. Miſereri miſerationem alienis caſibus exhibere, & actiuo ad primum affectum, paſſiuo ad ſecundum. Accius euryſace, Heu mihi; ut etiam hæc erumna mihi luctum addit luctibus alia perſona quid miſerari id me Euryſacem tuam ſodalitatem nemoras formidas tibi te commiſerabar magis, quàm miſerabar mei, & multis mei & aliquãdo uexata generibus. Acceroſum & acceratum utrunque noue poſitum, ſed diſtanti proprietate ſignatũ. Acceroſum naq; panem farre minus purgato, ac ſordibus à candido ſeparato dicendum ueteres putauerunt. Lucilius lib. xxv. Quæ Gallam uiuere, ac rugis cõducere uentris. Farre acceroſo olei decumano, pane cumano coẽgit, tunc græci ὑπόπυρον uocant. Acceratum uero eſt lutum paleis miſtum, ut laterarij uſus eſt. Lucilius lib. ix. Latere qui ducit habet nihil amplius. Nam quam commune lutum à paleis, cenumq; acceroſo. Multum & ſatis eo diſtant, quod multum infinitum eſt, ſatis finitum Auaris illud, hoc parcis ſe continentibus applicandum eſt. Lucilius lib. v. Nã ſiquod ſatis eſt homini, id ſatis eſſe potuiſſet, hoc ſat erat. Nunc cum hoc non eſt, qui credimus porrò diuitias ullas animum mihi explere poſſe? Et lib. xviij. Deniq; ut ſtulto nihil ſit ſatis omnia cum ſint. Omne atq; totum, ut ab omni plus eſſe totum putent, uolunt quidam eſſe ſeiunctum, cum indiſcrete inter authores frequenter poſitum legerimus, & utrunque cum ſignificantia uniuerſitatis. Lucretius libro primo. Totum per inane geri res. Virgilius bucolicis. Omnia uincit amor. & idem geor. lib. tertio.

Omne adeo genus in terris hominumq;, ferarumq;,
Et genus æquoreum, pecudes, pictæq; uolucres
In furias, ignemq; ruunt, amor omnibus idem.

Et æneidos. libro ſexto. totamq; infuſa per artus Mens agitat molem, et magno ſe corpore miſcet. Quid quod totum, quod plus putatur nõ pro cuncto alicubi accipi poteſt? Virgilius geor. libro. iij. totaſq; Aduoluere focis ulmos, igniq; dedere, ut ſint totas integras non omnes, quæ in mundo ſunt, ulmos. Niti & obniti cum ex uno ſit intellectu, acceptis tamen præpoſitionibus fit, diuerſum. Niti enim poteſt uideri aut aliquam gratiam, aut honorem, aut utilitatem erumnoſo tendere ſine labore, quanquam in aliquibus grauius audiatur, ut ſint enixæ pariendi labore defunctæ, inniti autem incumbere manifeſtum eſt. Virgilius libro ſexto. Ille uides pura iuuenis qui nititur haſta. Obniti uero eſt contra aduerſum obluctari. Virgil. Sæpe uſq; adeo obnixi non cedere, & alibi Obnixi torquent ſpumas, & cærula uerrunt. Teren. andria. Pedibus, manibuſq; obnixe omnia facturum.

Illix & illex hoc diſcernuntur, ab illiciendo illix, illex uero à quo lex non ſeruetur. Plautus pœnulo. Qui malæ rei antefuimus illices. Idem perſa. In iure illex, hoc eſt uiuens ſine lege, ſine iure labes populi. Ergaſtulum & ergaſtulus ut genere ita & intellectibus differunt. Nam neutro carceris locus eſt, maſculino cuſtos pœnalis loci. Lucilius libro. xv. Non ergaſtulus unus, & alius iudicem appoſuit, ut nemo ſententiam libere quaſi ergaſtulus poſſit dicere. Fremere & frendere hoc diſſeparantur, quod eſt fremere magnum ſonare. Virgilius geor. libro. ij. Fluctibus, & fremitu aſſurgens Benace marino. Frendere alicubi cum gemitu, uel iracundia miſerum aut minax ſonare. Virgilius æn. lib. iij. Luminis effoſſi fluuidum lauit inde cruorem Dentibus infrendens gemitu. Pacuuius antiopa. Frendere noctes miſera, quas perpeſſa ſum. Plautus. nec machærã audes dẽtes frendere. Pacuuius antiopa. Fruges frendo ſolas, ac ſic probo re. Accius troadibus ſaxo fruges frendas.

Fora & fori, ut genere, ita & intellectibus diſcernuntur. neutro enim loca ſunt, quibus ius dicitur, Maſculino ſpatia in nauibus, ut Virgilius libro ſexto. Inde alias animas, quæ per iuga longa ſedebant Deturbat, laxatq; foros, ſimul accipit alueo ingentem Aeneam. uel locus apertus, ac patens, unde & gladiatores foros facere dicuntur, cum longo circuitu ſectantur.

Educere & educare hanc habent diſtantiam, Educere eſt extra trahere, educare enutrire, & prouehere. Varro de liberis educandis, Educit enim obſtetrix, educat nutrix, inſtituit pædagogus. Aborſus & abortus uarias habent ſignificationes. Aborſus enim ille dicendus eſt, qui eſt in primis menſibus, ſum conceptui exordium factum eſt. Abortus propè tempus pariendi, Tunc enim moritur, quod naſcitur, in plu=

ſtrimis hoc reconditum inuenimus.
