Plyn. membra animalibus agnata, inutilia ſunt, ſicut ſextus homini ſemper digitus, & in Aegypto nutritum eſt portentum binis, & in aduerſa parte capitis oculis homo, ſed his minime cernens. item ab eodem bignæ dictæ ſunt geminæ, quod bis uno die natæ ſunt, & bigenera animalia, ex diuerſo genere nata, ut Leopardalis, ex Leone, & Panthera. & natiuitas quæ ortum ſignificat. & natura quæ naſci omnia facit, hanc quidam deum eſſe dixerunt, à quo omnia ſunt creata. ponitur tamen aliquando pro genitalibus. Plyn. ſi quadrupes fœtum non admittat urtica naturam fricandam monſtrant. natura etiã pro ui ponitur. unde arborum atq; herbarum naturas dicimus. & pro more. Virg. Nunc age naturas apibus quas Iuppiter ipſe Addidit, expediam. item natura eſt quæ unicuiq; rei formam dat ſpecifica differentia, definiturq; à philoſophis. natura eſt motus principium ſecundum ſe, & non per accidens, quoniam uniuerſa corpora proprium habent motum per ſe, ut ignis per ſe ſurſum fertur. terra deorſum, & non per accidens, quoniam id non naturale, ſed artificiale dicitur. ab hac fit naturale, qđ ſecundum naturam eſt, & aduerbium naturaliter, & naturalia pudenda. Columella. ſi equa marẽ nõ patitur, detrita ſcylla naturalia eius linuntur, quæ res accendit libidinem. naturales filij dicuntur illegitimi, quod ſola natura, non coniugali lege ſint orti. natorum appellatio ſecundum Modeſtinum ad nepotes etiam extenditur. Virg. Et nati natorum, & qui naſcentur ab illis. natus ſum laudi, & ad laudem dicimus. Cic. nam quid ageret uir ad dignitatem, & gloriam natus? Idem, qui ſe patriæ. qui ciuibus ſuis. qui laudi. q gloriæ. non ſomno. non conuiuijs, & delectationi natos arbitrantur. hinc fit natalitius, & natalis, in quo quis natus eſt. natalia etiam dicuntur dies ipſe natalitius. & natalis, quando ſubſtantiuum eſt ſimiliter. Plyn. dum natales ſuos celebraret. item natales aliquando genus, ac familiæ conditionem ſignificant, ut generoſi uel obſcuri natales. Quintil. cuius ut interiecto mari non fortunam quiſq̃ noſſe, non natales, non patrem poterat. hinc natales nobilitatem ſignificant. Plyn. nonnunquam candidatus aut natales competitores, aut annos, aut etiã mores arguebat. hic natales pro ignobilitate accipiuntur. nepotẽ quoq; nonnulli appellatum exiſtimant, quaſi natum poſt filium. eſt enim nepos proprie filij noſtri filius, cuius filius pronepos eſt. huius abnepos, cuius atnepos. nepotes tamen aliquãdo etiam fratrũ & ſororũ filij dicuntur, unde & illis germani, matrum ſunt auunculi, quaſi parui aui. ſed nunquam de his ſimpliciter dicitur nepos, uerum additur ex fratre, uel ſorore, ut nepos ex fratre. nepos ex ſorore. item nepotes pro poſteris, ac deſcendentibus capimus. Virg. forte recenſebat numerum, caroſq; nepotes. nepotes etiam luxurioſæ uitæ homines appellamus, quod tam ijs rei ſuæ cura eſt, quàm ijs, quibus pater auuſq; uiuunt.

ab hoc nepotatus deducitur, hoc eſt uoracitas, & uitæ luxuries. Afranius, ſcurilitate ac nepotatu nobilis. præterea à gigno ſiue genero appellatæ ſunt genæ, quod in his pili gignantur. Pacuuius. nunc primum opacat flore lanugo genas. ab his uero genua (ut quibuſdam placet) appellata, femorum ac crurum commiſſiones. quod hæc dum infans eſt in utero matris, genis oppoſita ſint. ſiue à generando. quod in genibus ineſt uitalitas. in ipſa enim genu utriuſq; commiſſura dextra, leuaq; à priore parte gemina quædam buccarũ inanitas eſt. qua perfoſſa, quaſi è uinculis ſpiritus fugit. putant autem ex omni parte corporis uitali ſemen ad genitalem uenam confluere. hinc græci quoq; γόνον quidem genitum γόνυ uero genu appellant. à genu fit geniculum & geniculatum & geniculatim, de quibus ſupra diximus, & congenulare, quod eſt genu replicato cadere, uel genibus flecti. Cæcilius, ipſe regis ferit pectus, aduerſum congenulat. percuſſũ deijcit dominum. item à gignendo genuini uocati dẽtes, q in homine nouiſſimi gignuntur circiter uigeſimum annum, multis & octogeſimo. ſed quibus in iuuenta non fuere nati. decidere in ſenecta, & mox renaſci compertum eſt. Zancli ſamothraceno cui poſt centum, et quatuor annos renatos fuiſſe prodiderunt. hos græci cynodontas, noſtri caninos dentes appellant. hinc exercere in aliquem genuinum, pro maledicere uſurpamus. his enim dentibus maxime morſus infigitur, qui longiores ſunt, & acutiores. appellantur autem canini in omnibus animalibus. Plyn. mutantur dentes homini. leoni, iumento, cani, & ruminantibus, ſed leoni & cani non niſi canini appellati. quidam tamen genuinos, à caninis diſtinguunt, uolunt'q; caninos prius gigni, & amiſſos nunquam renaſci. item à gignendo ingeniũ, quod proprie ſignificat naturam cuiq; ingenitam. Teren. nam qui cum ingenijs conflictatur eiuſmodi. i. cũ hominibus eius naturæ. Virg. Nunc locus aruorum ingenijs, quæ robora cuiq;. Salluſtius, ingenium nemo ſine corpore exercebat. huius diminutiuum eſt ingeniolum. item ingenuus, qui libera matre natus, nec poſtea ſeruus factus eſt, cuius contrarium eſt libertinus, qui iuſta ſeruitute manumiſſus eſt. Vnde interrogare hoc modo ſolemus. ingenuus ne an libertinus eſt? hoc eſt liber natus, an ſeruitute liberatus, ſiue ex libertorum genere ortus. ab hoc fit ingenuitas quæ contraria eſt libertinitati. & ingenue aduerbiũ, hoc eſt libere, unde ingenue loqui dicimus eum, qui ita loquitur, ut liberum hominem decet. nihil timidum. nihil ſeruile habens. item genius, quẽ ueteres putarunt deum eſſe, qui uim obtineret omnium rerum generandarũ, quapropter Dei filium, & parentem hominum nuncupabant, quod homines gigneret. ideo genius meus dicitur, quia me genuit. item genium eſſe exiſtimarunt uniuſcuiuſq; loci Deum. geniales autem deos dicebant aquã. terram. ignem. aerem, quod ex his omnia procrearentur. item duodecim ſigna, lunamq; & ſolem. alij genium naturæ Deum eſſe definierunt, & ipſam naturam, unde indulgere genio. eſt obſequi naturæ, & uoluptati operam dare, ſicut econtrario defraudare genium interrumpere uoluptatem. Teren. ſuum defraudans genium comparſit miſer. hinc genialis hyems dicta, hoc eſt uoluptuoſa. & genialis homo hoſpitalis, atq; ad inuitandum, ac largius apparandum cibum promptior. genialis etiam lectus dicitur, qui in nuptijs ſternitur, uel quod in eo indulgemus genio, uel quod in honorem genij apparatur, uel à generandis liberis. Virg. lucent genialibus altis. genij etiam

Lucilius. geniæ illæ uetulæ. improbæ. ineptæ. qdam geniales Deos à laribus non diſtinxerunt. lares Mercurij, & Laræ ſiue (ut alij uolunt) Larundæ filij fuere. nam cum Iupiter Iuturnam tyberinam nympham diligeret Turni regis ſororem, cæteris nymphis eius loci mandauit, ut ſe forte illam ſequente fugientem retardarent, nec præcipitari in undas paterentur, Lara Almonis filia id Iuturnæ, & Iunoni retulit. Quapropter indignatus Iupiter Laræ linguā trūcauit, Mercurioq; ut eam ad inferos duceret, iuſſit, & inter ſtygias nymphas conſtitueret. Mercurius uero dum mādata exequeretur, Nymphæ pulchritudine in itinere captus cum ea concubuit, quæ prægnans facta peperit geminos, quos à matris nomine lares appellauit. hos ergo geniales deos dixere, ſiue quod ut gignamur curāt, ſiue quod unà nobiſcum gignantur, ſeu quod genitos ſemper tueātur. Cic. quæ autem Dea ad res omneis ueniret Venerẽ nominauerunt. Eſt autem Venus infima quinq; errãtium ſtella & terræ proxima, quæ phoſphoros græce, lucifer latine dicitur, cum antegreditur ſolem, cum autem ſubſequitur, heſperos. Item ueſper. Virg. quid ueſper ſerus uehat, et à quibuſdam ueſperugo. Plau. nec ueſperugo, nec Vergiliæ occidunt. hinc ueſpera deducitur, & ueſper pro ſero diei. à quo fit aduerbium ueſperi, & ueſperaſcit uerbum cuius compoſitum eſt aduesperaſcit, hoc eſt fit ſerum diei, et quo quidam utuntur, nouum quidem, ſed non inelegans uocabulum pro ſacrificio, quod ueſperi fit. Veſper etiam adiectiuum eſt, unde cum ueſperũ dicimus neutro genere intelligimus tempus. Plyn. his horæ rigandi matutina, atq; ueſpera. Idem, matutinum tempus, ac ueſperum. & ueſpillo uilis cadauerum funerator, qui ueſpertino tẽpore eos efferre ſolebat, qui funẽbri pompa duci propter inopiam non poterant. Martia. qui fuerat medicus, nunc eſt ueſpillo Diaulus. hic etiam ueſpillo, & ueſpa uocatur. & ueſpertinum, quod ueſperi fit, & ueſperna, quo ueteres pro cœna uſi fuere, et ueſpertilio nocturna auis, uel potius biforme uolucre animal, quod ſe ueſpertino uolatu proferat, huic pro pennis membrana eſt, ſola uolucrum animal lacte nutrit, ubera filijs admouens, geminos infanteis amplexa uolitat, ſecumq; deportat. In cibatu culices habet gratiſſimos, & ueſpæ ex inſectorum genere ſimiles apibus, quod ueſperi grandiores muſcas in cibo uenentur, & amputato ijs capite reliquum corpus abſumant, hæ in ſublimi è luto nidos faciunt, et in his ceras, ſicut crabrones in cauernis, ac ſub terra. Eſt ueſparum genus, quod Ichneumonas uocant, minores quàm aliæ, hæ unũ genus araneorum perimunt phalangium nomine, & in nidos ſuos ferunt, deinde illinunt, & ex ijs incubando ſuum genus procreant. Proprie tamen Ichneumon animal eſt magnitudine felis, ſpecie muris, uulgo nunc murem indicum uocant, naſcitur in Aegypto, & cum aſpide pugnat, hac maxime gloria inſignitur. Mergit ſe limo ſæpius, ſiccatq; ſole, mox ubi ſe pluribus hoc modo corijs loricauit, in dimicationem pergit, & cauda ſe attollens, ictus irritos auerſus excepit, donec obliquo capite ſpeculatus inuadat in fauces. Sed (quod mirabilius eſt) Crocodilum quoque interimit. Hoc quadrupes animal eſt, hominibus terra pariter, atque aquis infeſtum. Nilus hoc malũ producit, caret linguæ uſu. Solus ex omnibus animãtibus ſuperiorem maxillam mouet. magnitudine excedit plerunque duodecim cubita, quandiu uiuit, creſcere exiſtimatur, uiuit autem longo tempore. oua parit quanta anſeres, & quadam diuinatione ea ſemp extra eum locum incubat, ad quem ſummo auctu egreſſurus eſt Nilus, unguibus armatus eſt, & cutem ſuperius habet contra omneis ictus inuictam, in uentre autẽ mollem, ac teneram, quapropter delphini uitæ eorum in ea parte inſidiantur. Habent enim Delphini ſpinam dorſo cultellatam. itaq; immeantes Nilo, & ueluti territi à perſecutoribus fugientes, ſubeunt aluum, & ſpina illa diſcindunt, quo uulnere paulatim marceſcentibus inteſtinis. Crocodili moriuntur. Terribilis hæc contra fugaces belua eſt, fugax contra inſequenteis, hebetes oculos habet in aqua, extra acerrimi uiſus eſt, conſpecto homine emittit lachrymas, mox appropinquantem deuorat. Vnde factum eſt prouer-

Tũ parua auis, quæ trochilos ibi uocatur, in Italia Rex auium dicitur, inuitat ad hiandũ pabuli ſui gratia, os primũ eius repurgans, mox denteis, præterea fauces, ad hanc ſcabendi dulcedinem quammaxime hiantes, in quam uoluptate ſomno preſſum cõſpicatus ichneumon ꝑ eaſdẽ fauces ingreditur aluũ, atq; erodit. E crocodillorũ genere, ſed minor Ichneumone eſt Scincus in nilo ſimiliter natus, præcipuũ cõtra oĩa uenena antidotũ. A crocodilo crocodilinũ dicitur, qđ ad crocodilũ ꝑtinet, uel de crocodilo eſt. Quint. nõ ꝗa ceraſtinæ, aut crocodilinæ ambiguitates poſſint facere ſapiẽtem, ſed qđ illum ne in minimis ꝗdẽ oporteat falli. Eſt & genus crocodili, ꝗ alio minor multo eſt, & in terra tantũ odoratiſſimus floribus uiuit, ob id inteſtina eius diligenter exquiruntur iucũdo nidore referta, crocodileã uocant oculorũ uitijs utiliſſimã. Itẽ Crocodiliõ herba eſt chamæleõtis nigræ figurã habens, radice lõga, æqualiter craſſa, odoris aſperi, naſcitur in ſabuletis. Pota ſanguinẽ ꝑ nareis pellit copioſum, craſſumq;. Atq; ita lyenẽ conſumere dicitur. Itẽ ab heſpero heſperiæ dictæ, ſic enim & Italia, & Hiſpania appellantur. Sed cũ heſperiã tantum dicimus, ſignificamus Italiam. Virg. Eſt locus Heſperiam Graij cognomine dicunt. cũ uero ultimã addimus, hiſpaniã intelligimus. Hora. ꝗ nunc Heſperia uictor ab ultima. Hiſpania ab heſpero occidẽtali ſtella dicta eſt heſperia. Italia uero ab heſpero fratre Atlãtis, ꝗ Italiã à Germano pulſus tenuit. & ei nomen uel propriũ, uel ſuæ priſtinæ regionis impoſuit. Ab hoc et heſperides appellatæ, huius (ut ꝗdã putant) (ut alij) Atlãtis filiæ numero tres. Aegle. Erethuſa. Heſpertuſa. hæ amœniſſimos hortos colere dicebantur in Africa iuxta Lixon coloniã à Claudio Cæſare deductam, in ijs auriferũ nemus eſſe, cum aureis malis exiſtimabant, cuſtodiri uero à peruigili dracone, et quoniã Themis dea prædixerat, futurum olim quẽdam Iouis filiũ, qui ea poma diriperet, cinxiſſe Atlãtẽ pomariũ montibus, ne peruiũ graſſatoribus foret. Ex eo aũt datũ huic fabulæ locum exiſtimant, qđ ibi flexuoſo meatu æſtuariũ fertur è mari adeo ſinuoſis lateribus tortuoſum, ut uiſentibus procul lapſus anguineos fracta uertigne metiatur, & quod heſperidũ hortos appellauere, circundet. Eſt aũt inſula, quam ſolã è uicino tractu aliquanto excelſiore, non tamen æſtus maris inundãt. Perueniſſe eò Herculẽ. ara eius, quæ ibi ædificata conſpiciebatur, indicio erat, nec præter oleaſtros aliud ex narrato illo aurifero nemore illic uiſebatur. Alij putant ouiũ greges ibidẽ fuiſſe purpureã lanam ferenteis, eaſq; ab Hercule raptas, et ad Euriſtheũ ductas. Hinc quoniam μῆλον græce, latine ouem dicimus, locum fabulæ datũ, Ouid. Heſperõ promontoriũ in Africa eſt nauigatione decem dierũ, ac noctium ab Oenochema monte. Venus etiã dea eſt Iouis, & Diones filia, quæ una fuit ex Nymphis filia Oceani, & Tethyos, à qua fit Dionæum, qđ ad Venerem pertinet. Vir. Ecce Dionæi proceſſit Cæſaris aſtrum. et Venus ipſa Dionæa appellatur. Idem, ſacra Dionææ matri. Hæc Vulcani coniux fuit, & à Marte dilecta eſt, deprehenſa aliquando à ſole in adulterio cũ illo, qđ cum intellexiſſet Vulcanus, inuiſibileis plagas ſummo artificio fabricatas circũ lectũ tetendit, et ſe Lemnon ire ſimulauit, qua occaſione motus Mars,

ad cubile Veneris uenit, ubi cum laſciuire nudi cœpiſſent, tenuiſſimis uinclis ſeſe irretitos conſpexere. Reuerſuſq; extẽplo eſt Vulcanus, ꝗ cum iniuriã acrioribus uerbis expoſtularet, plurimi ex ijs illuc conuenere, & inter cæteros Neptunus, Mercurius, & Apollo. Deæ autem ob pudorẽ uenire eò noluerunt. Tandem Neptuni precibus placatus Vulcanus remotis plagis uinctos liberauit. Ex hoc adulterio Harmoniã genuiſſe proditur Venus. Eadẽ dilexit Adonin Cynaræ regis aui ſui, et Myrrhæ ſororis ſuæ filiũ, quem ab apro dum liberius eum inſequitur interfectum fleuit amare, & in florẽ purpureũ conuertit. Anchiſen quoq; amauit, ex quo apud Simoenta flumen prægnans facta Aeneã genuit. Simois flumen eſt ex Ida Troiano monte ſcaturiens, qđ iuxta Troiã peruectus cum mari propinquat, Xantho cõmiſcetur alteri Troiæ fluuio, & in paludem coactus cadit in mare iuxta Sigeum promontorium. hoc Troiæ eſt ita dictum propter Herculis taciturnitatem, quoniã prohibitus hoſpitio ſimulauit diſceſſum, deinde contra Troiam per ſilentium uenit, quod græce dicitur σιγή. Vulnerata propterea Venus à Diomede fuit, dũ Aeneam protegeret, propter quod imprecatione Diones ob ſuſpicionem commiſſi ab uxore adulterij, exilium ſibi ſponte Diomedes in Appulia elegit, & occupato Gargano monte, iuxta radices eius Sipontum urbem clariſſimã ædificauit, quæ & Sipus Sipontis dicitur, & à græcis ob multitudinem ſepiarũ, quæ ibi capiuntur, Sepius Sepiuntis. Vnde fit Sipontinus adiectiuum à Siponto, & à Sepiunte Sepiuntinus. Ab eo Diomedei campi uocati in Appulia, qui in diuiſione regni, quam cum Dauno feciſſe dicitur, ei ceſſerunt, et duæ inſulæ quæ è Gargani regione ſunt Diomedeæ dictæ, quarum altera habitatores habet, altera eſt deſerta, in qua diſparuiſſe Diomedem ꝗdam affirmant, & in cœlũ ſublatum, atq; inter Deos relatum fuiſſe. alij Diomedem ab Aenea per dolũ occiſum tradunt, & loca ꝗbus imperauerat occupata, mortuoq; ab incolis templũ in inſula, tanquã in numerũ deorum relato conſtructum. ſocios eius ob dolorem in aueis uerſos, quæ ob id Diomedeæ uocitatæ ſunt. has memorant maiorem in modum miteis eſſe, græciſq; in Italiam uenientibus applaudere, ac lætas occurrere, cæteras uero genteis, uel fugere, uel deuitare, uel ſubuolare ad capita, & tam grauibus ictibus, ut etiam perimant, uulnerare. nam duris, & grandibus roſtris ſatis ad hæc prælia perhibẽtur armatæ. Fuit hic Diomedes Aetoliæ rex. Tydei, & Deiphilæ filius, dictus à Virgilio fortiſſimus Danaũm, quia Aeneam apud Troiam ſingulari certamine uicerat. uxorem habuit egialem, quam cum adulteriũ commiſiſſe cum Cylleboro Stheleni filio comperiſſet, natale ſolum præ pudore ſibi perpetuo relinquendum putauit. Fuit et Diomedes alter rex Thracum ſæuus uir, ac truculentus, ꝗ equos ſuos aduenarum carnibus in Tiri oppido paſcebat. Sed tandem ab Hercule mactatus, equis ſuis in pabulum appoſitus eſt. Diomeda uero Phorbantis filia fuit, quam Achilles è Leſbo raptam poſt amiſſam Briſeida concubinam habuit. Genuit præterea Venus ex Mercurio hermaphroditum, qui ex utroq; parente nomen accepit, nam græce ἑρμῆς, Mercurius ἀφροδίτη Venus appellatur, Hic Androgynus fuit, hoc eſt utriuſque ſexus. cuius nominis ratio eſt, quod græci ἄνδρα uirum uocant γυνὴ mulier dicitur. De hoc extat celebre illud Epigramma. Dũ mea me genitrix grauida geſtaret in aluo, Quid pareret fertur conſuluiſſe deos, Mas eſt Phœbus ait, Mars fœmina, Iunoq; neutrum. Cumq; forem natus hermaphroditus eram. Quærẽti letum Dea ſic ait, occidet armis, Mars cruce. Phœbus aqs. ſors rata quæq; fuit. flumina. tela. crucem. Sed de hoc latius inferius dicemus. Item ex Bute Venus genuit Ericem, ex Ioue patre Cupidinem, quẽ alij geminum eſſe uoluerunt, quod aut honeſti amor ſit, aut iucundi. Ouid. Alma faue dixi geminorum mater amorum. Alij plurifarium. quod ut infinitæ res ſunt, ita infiniti amores. Papi. et cuncti faciles illi erraretis amores. alij ex Venere ſola natum Cupidinem uolunt. propterea ſcripſiſſe. Virg. Nate meæ uires mea magna potentia ſolus. & Papinium, ſed dabitur iuueni, cui tu mea ſumma poteſtas, Nate cupis. huius ſententiæ Simonides fuit. alij ex Venere, & Marte. Alij ex ipſa, & Vulcano, Nonnulli patriæ materiæ, & primæ rerum naturæ, quæ Chaos dicitur, fuiſſe filiũ putant. Sunt etiam qui triplicẽ eſſe amorem tradant à triplici, qui nobis eſt affectu. Siꝗdẽ Ariſto. ſcribit aut honeſti eſſe amorem, aut iucundi, aut utilis. Apuleius uero Platonicus philoſophus primum dixit eſſe diuinum cum incorrupta mente, & uirtutis ratione conuenietem, alterum de generis animi, corruptæq; uoluntatis. tertium ex utroq; permiſtum. Hunc M. T. Herebi, ac Noctis prodidit filium eſſe. Quidam etiam gratias ex Venere, et Ioue genitas ſcripſerunt, alij ex uenere, et libero patre, quãuis Cicero has quoq; ex Herebo, et Nocte ortas exiſtimauerit. Sunt etiã qui Iouis, et Eurydomenes nymphæ filias putent, ſiue Eurymones, ſiue Eurymeduſes, A Ioue enim gratia omnis procedit Eurydomene aũt ἀπὸ τοῦ εὐρὺ καὶ δίδωμι, hoc eſt ab abundanter dando appellata ẽ. Eurymone ἀπὸ τοῦ εὐρὺ καὶ νέμω. hoc eſt ab abundanter retribuẽdo, Eurymeduſe ἀπὸ τοῦ εὐρὺ καὶ μέδω, quod ſignificat rego, quod qui liberales, et munifici ſunt, cæteris imperare conſueuerunt. Treis autẽ eſſe gratias prodiderunt, his quæ diximus nominibus appellatas. Alij primã Aglaiã, hoc eſt lætitiam. ſecundam Thaliam, hoc eſt uiriditatem, quia beneficiũ ſemper uiret, tertiam euphroſinem, hoc eſt delectationem nominant. hæ à græcis charites uocantur ἀπὸ τῆς χαρᾶς, qđ lætitiam ſignificat, merito enim lætari uidentur & qui dant, & qui accipiunt beneficium. Treis aũt ideo eſſe prodiderũt, quia & benefici eſſe in alios debemus, & aliorũ beneficia ſuſcipere, et ijs, qui in nos liberales fuerũt retribuere. Dare aũt, & accipere, & referre tres actus ſunt inter ſe diſtincti. Alij ideo dicunt treis gratias eẽ, quia acceptum beneficiũ cum fœnore reddi debet, quapropter ſolebant ueteres ita gratias pingere, ut una earũ auerſam faciem teneret, quaſi à nobis profecta, duæ uero nos aſpicerent, ut duplex nobis beneficium rependi debere oſtenderent. Propter quod inquit. Vir. Nec te certaſſe priorem pœniteat. Nudæ etiam pingebantur, quia beneficia fuco debent carere, & nullo uelamine obtegi. Item connexæ, quia inſolubileis eſſe gratias decet, & beneficium ſemper beneficium parere, perpetuumq; eſſe amicitiæ fœdus. Horatius, ſegneſq; nodum ſoluere gratiæ. qui ueneris & liberi patris filias arbitrantur, hac mouentur ratione, ꝙ horum præcipue deorum muneribus gratiæ cõcilientur. Tradunt eas in Acidalio fonte, qui eſt Orchomeni Bœotiæ urbe, lauari, quoniã pura eſſe beneficia oportet, & nihil ſordidum, nullam ſpem retributionis habere. Ab hoc fonte Venus acidalia dicitur, uel ꝗa inijcit curas, quas græci ἀκυδίας uocant, uel ꝙ ἀκίδας ſpicula nominant, quibus utitur Cupido. Gratiam ἀπὸ τῆς χάριτος dictam exiſtimant. Aliquando pro beneficio accipitur. Cice. cum præſertim conſiderem nullam eſſe gratiam, quã uel non capere animus meus in accipiendo, uel remunerando, cumulãdoq; illuſtrare poſſet. A quo gratioſus dicitur, ut Gellius ſentit, & qui adhibet gratias, et qui admittit. Interdũ gratia capitur pro pœna ſiue damno. Cice. ut pro iniuria tam graui parem ei gratiã referret. Nõnunquam pro cauſa. Terẽ. & ea me reſtitiſſe hic gratia. Agere gratias, eſt uerbo oſtẽdere nos

memores eſſe accepti beneficij. Habere gratias eſt animum, ac mentem gratam habere, & inuicem gratificandi uoluntatem. Referre gratiam eſt facto beneficium, aut iniuriam acceptam compenſare. In quo notandum eſt, ꝙ habere gratiam, & gratias dicimus, agere gratias non gratiam, referre gratiam, non gratias, necunꝗ ferè probatiſſimi authores aliter loquuntur. Teren. Pol. dijs habeo gratias, qđ in pariẽdo aliquo affuerunt liberæ. Plau. Malo enim eius gaudij expertẽ eſſe me, quàm lenoni gratiam hẽre. Cice. magnas ei meo nomine gratias ages. Liui. ſatiatus tandem complexu filij, renuntiate (inquit) gratias regi me agere, referre gratiam aliam nunc nõ poſſe, quàm ut ſuadeã nõ ante in aciem deſcendat, quàm in caſtra me rediſſe audierit, Cice. cui pro me ſenatus gratias agendas putauit, ego à me gratiam referrendã non putem? Seneca de malo reddi potius gratiam, quàm referri dicendum putat, & econtrario de bono referri potius, quàm reddi. Sed hanc differentiã ſolus ipſe excogitauit, et fecit. Cice. ſemper referre uſurpat, & in bonum, & in malum. In bonum, ut in ſuperiori exemplo. In malum, ut in Salluſtiũ. Nam qđ inuſitata rabie in uxorem, ac filiam meã inuaſiſti, quæ ſe facilius mulieres abſtinuerunt à uiris, quàm tu uir à uiris, ſatis docte, ac perite feciſti, nõ enim ſperaſti me mutuam tibi gratiam relaturũ, ut uiciſſim tuos compellarem. Nã quod Plancus ad Cice. ſcribit, immortaleis ago tibi gratias, agamq; dum uiuam, nam relaturum me affirmare non poſſum, profecto gratiam hoc loco ſubintelligi manifeſtum eſt. Quod uero apud Valerium maximum legitur, tibi quidem ſexte Pompei dij magis, quos relinquo, quàm quos peto gratias referant, certe deprauatum eſt, et nos librum peruetuſtum legimus, & penes nos hẽmus, ubi non gratias, ſed gratiam eſt ſcriptum. agere etiam, & perſoluere grates legimus, ſed apud poetas duntaxat, atq; hiſtoricos. Virg. Grates perſoluere dignas, Non opis eſt noſtræ Dido. raro autem apud oratores. Cice. Aliquando poſt ſuſpexit ad cælum, & grates tibi inquit ſumme ſol. Ab hoc fit gratulor uerbum, quod eſt uerbis teſtor me gaudere fortuna, ac felicitate alterius, apud eum ipſum, qui affectus eſt felicitate, aliquando apud meipſum ob meam felicitatem. ideo ferè poſtulat datiuum. Quintil. non efficiet tamen infandum præſentis reatus, indignumq; diſcrimen, ut miſera puella non gratuletur ſibi, ꝙ illam pauper accuſare non poteſt. Aliquando tamen authores prætereunt datiuũ, cum fuerit pronomen Ouidius, Gratulor Oechaliam titulis accedere noſtris, idem Priſca iuuent alios, ego me nunc deniq; natum gratulor. Quintil. gratulemur iam qđ nulla ciuitas fame laborat, illic nobi ſubintelligitur hic nobis. Falſum eſt enim quod quidam tradunt, gratulor hic pro gaudeo accipi, cum in rebus moleſtiſſimis gratulari liceat, utiq; inter falſos amicos. In eadem ſignificatione, & grator accipitur, ſed poeticum hiſtoricumq; eſt. Virg. Iuueni germana uiam gratare ſorori. Liuius, tuum ſequenteis currum Iouis optimi maximi templum gratanteis, ouãteiſq; adire. Gratulari etiam, et grates agere, ſiue gratari dijs dicimus pro eo, quod eſt gratias agere, ſiue ſupplicare. Liuius, itaq; prætor extemplo edixit, uti æditui ædes ſacras tota urbe aperirẽt, quo circuẽũdi, ſalutãdiq; deos, agẽdiq; grates, ꝑ totam diẽ populo ꝑtãs eſſet. Itẽ triũphantes in capitoliũ aſcẽdebãt Ioui optimo maximo cæteriſq; dijs gratulaturi. Nec mirũ ſi gratulari & gratari dijs dicimus, quaſi oſtẽdere nos illis aggaudere, cũ ſalutare ẽt eos dicamus, quaſi ſalutẽ illis optare. quod nõ in dijs, ſed hominibus conuenit. Item ſalutare animas, ſalutare cineres, & reliquias defunctorum. Virg. Salue ſancte parens, iterum ſaluete recepti Nequicquam cineres. A gratulor fit compoſitum congratulatio, & gratulator, & gratulatio, & congratulator, & congratulatio.

Item à gratia fit gratus, qui memor eſt accepti beneficij, & cõtrarium eius ingratus. à quibus gratitudo, & ingratitudo deriuantur, & grate, atq; ingrate aduerbia, et comparatiua, atq; ſuperlatiua gratior, & gratiſſimus gratius, & gratiſſime. Itẽ aliud aduerbium gratis, quod ſignificat ſine merito, ſine præmio, & gratuitum, quod gratis datur, & gratuito aduerbium. Item à gratus fit gratificor, quod eſt aliud, quàm gratum facio, licet utrunque à facio deducatur. Etenim gratum facere eſt quiddam minus, & propè idem, quod obſequi, & inſeruire. Cicero, ſi hũc iuueris. gratiſſimum mihi feceris. gratificari uero eſt quiddam maius, & quaſi idem, quod beneficium eſſe, & beneficia conferre. Quapropter deos non gratum facere, ſed gratificari hominibus dicimus. Ab hoc gratificus, & gratificatio deducuntur, & Gratidia proprium nomen mulieris Neapolitanæ unguẽtariæ, ac maleficæ, quam Horatius in Epodo Caniniam nominauit. Venus meretriciam artem inſtituiſſe dicitur, authorq; mulieribus in Cypro fuiſſe, ut uulgo quæſtũ corpore facerent, huic Phœnices dona ex filiarũ proſtitutionibus offerre ſolebant ante, quàm uiris coniungerentur. Sunt qui eandem cœli, & diei fuiſſe filiam ſcribant, alij ſolius cœli, et ſine matre ortam hoc modo. Nam, cum Saturnus in patrem ſæuiẽs falce ei uirilia abſcidiſſet, & falcem ſimul, & uirilia proieciſſe in mare dicitur, haud longe à promontorio Siciliæ, quod Lilibœum uocant, hinc & promontorium ſimul, et oppidũ Drepanũ uocatum, quoniam græci δρέπανον falcem dicunt, uirilia uero ſanguinem emiſiſſe ex quo cum ſpuma maris permiſto Venus ſit procreata, propter quod Aphrodite à græcis uocatur, quippe ἀφρὸν græci ſpumam nominant. Macrobius tamen eam ſolo cœli ſanguine ortam ſcribit, ſed ſpuma maris nutritam. Contra Ouidius, ſi tamen in medio quondã concreta profundo ſpuma fui, gratumq; manet mihi nomen ab illa. Itẽ Vir. apud quẽ ſic loquitur Neptunus. Fas omne eſt Cytherea meis te fidere regnis, Vnde genus ducis. Geſtabat manibus concham, quod ea uecta dicebatur in inſulam Cyprum, et in Cytheram urbẽ exiſſe, à qua Cytherea uocata eſt, quamuis cythera una etiam ſit ex Cycladibus inſulis, &, ut Laertius ſcribit, Laconiæ inſula, quæ prius Porphyris uocabatur. deinde dicta eſt Cythera neutro genere, & numero plurali. A cythera fit cythereius, quod ad Venerem pertinet. Cytheris aũt nomen fuit libertæ Volũnij, quam Gallus amaſſe dicitur. Virgilius eam licorim nominat. Et Cytorus mons Aſiæ minoris buxo fertilis, quæ uento mota undarum æſtus imitatur. Virg. Et iuuat undantem buxo ſpectare cytorum. Quidam Venerem non in hanc urbem primum exiſſe ſed in Palepaphon aliam eiuſdem inſulæ urbem affirmant, à quo Paphia dicta eſt, & ab inſula Cypro Cypria, in qua primum ei templũ conſtitutum fuit, uel ἀπὸ τοῦ κύειν, quod eſt parere, quia hæc dea parturientibus præſidebat. Erycina etiam dicitur ab Eryce monte Siciliæ, in quo templum ei conſtruxit Eryx filius, de quo Ouid. Sed dea nec patitur ſic ad ſua munera cogi, Colle ſub umbroſo, quam tenet altus Eryx. & Papinius, exultat uiſu, tectiſq; potentis alũnæ, nõ ſecus alma Venus, quã ſi Paphon æquore ab alto, Idaliaſq; domos, Erycinaq; tẽpla ſubiret. Idalia quoq; appellata eſt ab Idalo monte Cypri. Quod concha in Cyprum uecta ſit, ipſa teſtatur apud Papinium, dum de Violantilla ſtellæ uxore loquitur. Hæc et cœruleis mecum conſurgere digna Fluctibus, & noſtra potuit conſidere concha. Hoc genus conchæ eſt, quam margaritas producere ſupra memorauimus. Nulla certe dignior tribui Veneri poterat, & ob candorem, & ob leuorem, & quia partus earum ſunt margaritæ, mulierum ornatui præcipue conuenientes, hinc huiuſmodi conchæ cytheriacæ dicuntur. Martia. leuior ò conchis Galle Cy-

Nec mirũ eſt talẽ deã concha uectam cum inter concharum genera Neritæ ſint per maria nauigantes præbẽtes cõcauam ſibi partem, alteram uero flanti auræ inſtar ueli apponentes. Dicitur etiam Venus lingua Aſſyriorum Myluta, ut teſtatur Herodotus. in eius tutela columbam eſſe, currũ eius à cygnis duci, roſam inter flores, et inter arbores myrtum, ei ſacras eſſe. Myrtus arbor eſt, cuius duo genera ſatiuæ, & ſylueſtris, et in utraque latifoliæ, bacas fert ſaporis præcipui, ex quibus uinum fit, quod Myrtidanum uocant. Item generoſum obſonium, quod dicunt myrtatum. nam myrtetum locum myrtis conſitum dicimus, obtinent & piperis uicem, & pro hoc uſi ueteres produntur ante, quàm pip reperiretur, ad intinctus quoq; adhibentur, præſertimq; ad ſaporem aprorum commendandũ. A myrto myrteum dicitur, quod ex myrto eſt. Myrtea uerbena Romanos, Sabinoſq;, cũ propter raptas uirgines dimicaſſent, depoſitis armis pacificatos fuiſſe commemorant eo in loco, qui poſtea ſigna habuit ueneris cluacinæ. Cluere enim ueteres pugnare dicebant, & myrtinum eiuſdem ſignificationis. Plyn oleo myrtino illitum ſtatim reſoluitur. habetur quoq; in hac arbore ſuffimenti genus ideo electa, quia Venus & coniunctioni pariter, & huic arbori præeſſe exiſtimabatur. In antiquiſſimo Romuli delubro ſacræ myrti fuere duæ ante ædem ipſam longiſſimo tẽpore, altera patricia appellata, altera plebeia. fuit, & ara uetus Veneri myrteæ, quæ poſtea myrtina dicta eſt. quidam huius arboris genera ita diſtingunt, ut ſit candidà, nigra, & coniugalis. hæc tertia à coniugijs appellata eſt, quod ſit ex illo cluacinæ genere, cuius uerbenis ſedatum eſt bellum propter coniugia ortum. Sylueſtris myrtus eſt, quã ſupra diximus ruſcum, & chamæmyrſynem. et oximyrſinem uocari. Satiuarum genera topiarij, ac coronarij faciunt Tarentinam folio minuto, noſtratem patulo, exoticam denſiſſimo. cõiugalem putant eſſe, quã dicimus noſtratẽ. Bacæ ſi non ſiccentur, oleũ gignunt. E nigra fit uinũ, ſiccata uſq; in ariditatem in umbra, deinde mulſo indita. Quin et oleo quidã uini ſapor ineſt. ſimulq; pinguis liquor, qđ præcipuã uim habet ad uina corrigenda, ſaccis ante pfuſis, retinet enim fecem, nec præter purũ liquorẽ trãſire patitur, & ſe comitem præbet præcipua cõmendatione liquato. Virgas quoq; huius arboris geſtatas putant uiatori pediti in longo itinere mire prodeſſe. Poſthumius libertus in conſulatu, qui primus omniũ ouans ingreſſus eſt urbem, quoniã rẽ leuiter ſine cruore geſſerat, myrto Veneris uictricis coronatus inceſſit, unde mos inoleuit, ut ouãtes myrtea corona uterentur, excepto M. Craſſo, q de fugitiuis laurea coronatus ẽ. Curru quoq; triũphãtes myrtea corona uſos fuiſſe quidã prodiderũt. Papyrius Maſo, qui primus in monte Albano de Corſis triũphauit, myrto coronatus cyrcenſes ludos ſpectare ſolitus eſt. M. Vale. duabus coronis, hoc eſt myrtea, & laurea utebatur. Myrtilus uero Mercurij filius. Myrtoũ pelagus pars maris Aegei nomẽ accipiẽs à Myrtilo, qui eò fertur proiectus fuiſſe. Myrſus proprium nomẽ eſt, ſic enim uocatus fuit Cãdaulus pater, qui et Myrſillus dictus eſt. Itẽ Myrſus Pelopõneſi oppidum fuit. Sunt qui tres Veneres fuiſſe affirment, unam cæli, & diei filiã. Aliã è cæli pudendis, & ſpuma maris genitam. Tertiam Iouis filiã. et Diones, Hæc ut amorũ, gratiarumq;, ita pulchritudinis, & delitiarũ, et uoluptatũ omniũ dea eſt. Vnde Venus aliqñ pro libidine, et coeundi appetitu ponitur. Seneca. qđ in uenerẽ pronior eſſet. Teren. Sine cerere, et libero friget uenus, à quo venereus pro libidinoſo accipitur. ſiue prò eo, qui ſtellæ ueneris ſubiectus ẽ. hinc uenerẽ utriuſq; ſexus, hoc eſt marẽ ſimul, ac fœminã eẽ finxerũt, ꝙ in utrũq; ſexũ hoĩs libido graſſetur. Propterea ueteres uenerẽ non deã ſolũ, ſed etiam deũ nominabant,

Virg. Diſcedo, ac ducẽte deo flãmam inter et hoſteis Expedior. Neq; enim dea legendum eſt, ut pleriq; faciunt, ſed deo. Signum etiam eius Cypri fuiſſe legitur barbatum corpore, ſed ueſte muliẽbri, cum ſceptro, ac ſtatura uirili. Ariſtophanes eam nõ Aphroditem, ſed Aphroditon nominat. Leuinus ita ſcripſit. Venerem igitur almum adorans, ſiue fœmina, ſiue mas eſt. ita uti alma noctiluca eſt. Philochorus quoque eandem ſcripſit eſſe lunam, & ei ſacrificium facere uiros cum ueſte muliẽbri, muliẽres cum uirili, quod eadem & mas exiſtimatur, & fœmina. Item Venus pro pulchritudine capitur. Quintilia. quod cum gratia quadam, & Venere dicitur. Plyn. quorũ opera, cũ admiraretur, collaudatis omnibus, deeſſe ijs unam illam uenerem dicebat, quam græci charita uocant. ab hoc, ut Cice. ſcribit, fit uenuſtas, hoc eſt pulchritudo, & uenuſtus pulcher, & uenuſto uerbum orno, & uenuſte aduerbium pulchre, Venuſta oratio eſt, quæ cum gratia quadã, ac uenere dicitur. Horũ contraria ſunt inuenuſtus, hoc eſt ſine decore, et inuenuſto decoro, & inuenuſte ſine decore. Item à uenio uenia, qđ optanti adueniat. eſt enim uenia remiſſio culpæ, & condonatio erroris. Quintilia. Peccaui, ueniam pcto. & errare hominis eſt, & ignoſcere patris. Male quidam indulgentiam pro uenia capiunt, & indulgere pro ignoſcere, in quo theologi noſtri frequẽtiſſime labuntur. indulgere enim eſt obſequi, & aliquid (ut ita dicam) delicate concedere, & indulgentia eſt mollis, & delicata permiſſio. Quintil. Mollis illa educatio, quam indulgentiã uocamus, neruos omneis & mentis & corporis frangit. Venia tamen aliquando pro indulgentia accipitur. Cicero, dabitis mihi hãc ueniã, hoc eſt indulgebitis, concedetiſq; mihi. Teren. da pater ueniam, ſine te exorem, & cum uenia tua dicimus, hoc eſt cum pace tua & te pmittente. Per metaphoram quoq; aliquãdo indulgere ponitur pro delicate intendere, et ſpatium maius dare. Vir. Indulge hoſpitio, cauſaſq; innecte morã. di. idem, Sin tumulis accliue ſolum, colleſq; ſupini Indulge ordinibus, aliquãdo pro facilẽ eſſe, et clementem. Cicero, magnus uir in primis, & qui indulgens in patrem idẽ ſeuerus in filium. Ab hoc fit indulgentior, & indulgentiſſimus, & aduerbia indulgenter, indulgentius, indulgentiſſime. Veteres pro indulgentia indulgitatem dixere, Siſenna, Baſſus aſſidua indulgitate uictus. A uenia fit ueneror, quaſi ueniam oro à quo ueneratio. uenerabilis. uenerabundus. uenerandus. ueneratus. ueneranter uenerabiliter, de quibus ſupra diximus. Indulgeo dictum exiſtimãt quaſi inde algeo. Algere enim frigere eſt, tractum à græco ἀλγῶ, quod proprie ſignificat doleo, Ponitur tamen etiam pro frigeo, cum frigus nihil aliud ſit, quã dolor qdam membrorum rigore conceptus. Qui ergo indulgent, hoc eſt delicate aliquid pmittunt, quodãmodo frigeſcunt, non urgent, non ſolicitant. Ab algeo algor deducitur, hoc eſt frigus. rigor et Algidus mons ab aſſiduo frigore appellatus eſt. Hora. quæq; Auentinum tenet algidumq;. & ab hoc quoq; ſylua Algida dicta eſt, huic mõti ſubiacens, in cuius ingreſſu lacus eſt Regillus, apud quẽ A. Poſthumius dictator proſpere aduerſus Tarquinum ſuperbũ patria eiectum, & Latinos Romanis bellũ inferenteis pugnauit. Veteres algo pro algere dixere. Lucilius, morbis, algoq;, fameq;. Item à uenio uena, quod per eam ueniat ſanguis. eſt enim uena conceptaculum ſanguinis. quod ἀγγεῖον græci uocant, miſti, confuſiq; cum ſpiritu naturali, in quo plus ſanguinis eſt, & minus ſpiritus, differtq; ab arteria, quod hæc conceptaculũ eſt ſpiritus naturalis miſti, confuſiq; cum ſanguine, in quo plus ſpiritus eſt, quam ſanguinis. Vena imobilis eſt, exploraturq; emittendi ſanguinis gratia. Arteria uero motu, atq; pulſu ſuo habitum, & motum febrium demonſtrat. σφυγμὸς à medicis uocatur ipſa intentio motus, et remiſſio in corde, nõ arbitraria

ſed naturalis. Per metaphoram etiam uenæ in terra dicuntur ſubterranei meatus, per quos unda manat, aut alius liquor. Vnde uenas argenti, & auri dicimus. A uena uenoſum dicitur uenis turgentibus plenum, & uenenum, quod per uenas eat, differtq; à toxico. Nam toxica proprie ſunt, quibus ſagittæ tingũtur, dicta quaſi taxica à taxo arbore. hæc abieti ſimilis eſt, ſed minus uirens, gracilisq;, & triſtis, nullo ſucco, bacas fert, quibus letale uenenum ineſt, præcipue in Hiſpania. Vaſa etiã uiatoria ex ea facta ad afferendum uinum mortifera eſſe compertum eſt. Hanc quidam ſmilacem à græcis uocari dixere, et eſſe in Arcadia tam præſentis ueneni, ut ſiqui ſub ea dormiant, cibumue capiant, moriantur. Innoxiam fieri putant, ſi in eam arborem clauus æreus figatur. Venenum uero generale uocabulum eſt ad omnia, quæ naturam eius, cui adhibita ſunt, mutant. Plyn. Galbanum aduerſatur uenenis, maxime toxicis cum myrrha, & uino. Caius iuriſconſultus ſic ſcribit, qui uenenum dixit, adijcere debet bonum, uel malum, nam & medicamenta uenena ſunt, quia eo nomine omne continetur, quod adhibitum, naturam eius, cui adhibitum eſt, mutat. græci Pharmacum uocant, nam & apud eos tam medicamenta, quàm quæ nocent, hoc uocabulo ſignificantur. Vnde Pharmacopolæ dicuntur medicamentorum uenditores. Quinetiam medicamenta ipſa & bona & mala appellantur, quippe & amatoria, & incantationes mala medicamenta ſunt, & à ueneno ueneficia uocantur, & uenefici dicuntur, non modo qui uenena, aut toxica conficiunt, ſed etiã qui incantationibus, exorcizationibus, & cæteris malis artibus utuntur. à quo fit compoſitum Triueneficus, hoc eſt excellens ueneficus. Plau. muſſas adhuc triuenefica? Venenum etiã aliquando uirus ſignificat, hoc eſt ſpumam, unde Virgil. pro colore purpureo poſuit, qui eius conchæ ſpuma eſt. Alba neq; aſſyrio fucatur lana ueneno. Item à uenenũ fit uenenoſum, unde ſerpenteis uenenoſas dicimus, & uenenatum, in quod coniectum eſt uenenum & ueneno uerbum, hoc eſt ueneno contamino, quidam etiam uenenarias muliẽres dixerunt, quæ parant, aut conficiunt, aut uendunt uenena. Item à uenio uenor. proprie enim uenari eſt indagare feras, et quaſi circũuenire, propter quod ueteres uenari, & paſſiue pro circumueniri poſuerunt. Ennius, teneor correpta, & undique uenor. A quo per metaphoram uenari etiam capimus pro captare, hoc eſt artificio quodam, & ſolertia quærere, & uenor laudem, uenor gloriam, quod etiam aucupari dicimus, cum proprie aucupari ſit aueis captare. A quo aucupium, & aucupatio, & aucupator, & auceps, qui aueis captat. A uenor uenatio dicta notæ ſignificationis. et uenaticus canis, quo feras perſequimur, ſicut indagator dicitur, odorus, & ſagax. Vir. Et odora canum uis. proprie tamen odorus eſt, qui olet, hoc eſt ex ſe odorẽ mittit, ut flos odorus odoratus, qui aliũde odorem accipit, ut odoratum templum. Odorator, q odorẽ ſeqtur, ut canis. idẽ, & odoriſecus dicitur, hoc eſt odorẽ ſequens. ſagax aũt canis dicitur, quaſi acute ſentiens. Sagire enim ueteres acute ſentire dicebant. Cice. Sagire enim ſentire acute eſt, ex quo ſagæ anus, q multa ſcire uolunt. et ſagaces dicti canes. Is igitur q ante ſagit, quã oblata res eſt, dicitur præſagire. ideſt futura ante ſentire. Hinc manifeſte oſtenditur error Acronis, q ſagã muliẽrẽ ſcribit incantatricẽ dici, atq; maleficã, ab eo, qđ ſatis agit. Melius Feſtus. ſaga inquit mulier eſt perita ſacrorum, et uir ſapiens. Et Nonius, ſagæ dicuntur fœmine ad libidinem uirorũ indagatrices, unde & ſagaces canes dicuntur ferarum, uel animalium quæſitores. A præſagiendo præſagium, hoc eſt præſenſio, et prædiuinatio deducitur. A ueteribus præſagatio uocabatur. Cice. ineſt igitur in ais præſagatio extrinſecus iuecta, atq; icluſa diuinitus. Itẽ à uenor uenator, ac uenatrix, et uenatio, et uenabulũ. uenãtiũ te-

Item à uenio, ſeu uento uenter, quod uentet in eum cibus, deinde in aluum delabatur. Capitur enim uenter pro eo, qui uidetur. Iuuenalis, Montani quoq; uenter adeſt abdomine tardus, unde uentrem facere dicimus exporrigi, à ſimilitudine prægnantium mulierum. Vlpianus, ſiquando inter ædeis binas paries eſſet, qui uentrem faceret, ut in uicini domum ſemipedẽ, aut amplius procumberet, agi oportet ius nõ eſſe illum parietem ita porrectum, inſitum mihi eſſe uitioſe. Sed proprie uenter eſt, ubi cibi conficiũtur. Subeſt ſtomachum habẽtibus cæteris ſimplex, ruminantibus geminus, ſanguine carentibus nullus. In homine eſt adnexus infimo ſtomacho ſimilis canino. Stomachus enim inteſtinorum principium eſt neruoſus à ſeptimæ ſpinæ uertebra incipiens. A` quo fit ſtomachor uerbum, quod & faſtidio, & cum ſtomacho dicere aliquid, uel facere dicimus, hoc eſt cum indignatione, ſiue faſtidio, & ſtomachoſus, qui facile indignatur, ac cuncta faſtidit, & ſtomachoſe faſtidioſe. A` uentre uero fit uentriculus diminutiuum. Cornelius Cel. uentriculus autem, qui receptaculum cibi eſt, conſtat è duobus tergoribus, iſq; inter lienem, et iecur poſitus eſt. utroq; ex ijs paululum ſuper eum ingrediente. Homini, & cani ſtomachus inferiore parte anguſtior eſt, propter qđ ſola hæc animalia facilius euomunt, quia repleto propter anguſtias ſtomacho ſupprimitur cibus, quod ijs accidere non poteſt, quorũ ſpatioſa laxitas eum ad inferiora tranſmittit. Ab hoc uentriculo lactes in oue, & homine ſunt, per quas labitur cibus, in cæteris animalibus hæ ilia ſunt, quibus capaciora inteſtina ad aluum. ilia quidam ab ima dicta exiſtimant, quæ pars chartæ eſt tenuiſſima. nos autem ab inuoluendo potius appellata exiſtimamus. quippe apud græcos εἰλοῦμαι inuoluo ſignificat. inuoluta enim inter ſe eſſe ilia manifeſtum eſt, in ſingulari ile dicitur. Ennius tamen ad riſum mouendum artem ſpernens ilium dixit. Tu ut Hector ab ilio nunquam recedis. Iliũ regia fuit Priami, quæ & Troia à nomine regionis minoris Aſiæ cognominata eſt, mille qngentis paſſibus diſtans à portu. ab hoc Homerus opus ſuum de bello Troiano Iliada nominauit. ab Ilio Iliacus deducitur, & Iliades troianæ. Ilione maxima fuit filiarum Priami. Ilioneus propriũ nomẽ. Ilia mater Remi, et Romuli. ilys græce limus dicitur. illyrium ſiue illyris Prouincia eſt, cuius latiſſimi fines ſunt, hinc Italiam, illinc Germaniam, inde Macedoniam. Thraciam. & Epeirũ habens. hinc Adriaticum ſinum, inde Danubium flumen. ab eo illyricus deducitur. à Troia tros deriuatur. Virg. tros, tyriuſq; mihi nullo diſcrimine agetur, & Troianus. Idem, troianaſq; ſimul, & troicus. Idem, & troica caſtra. & troius. Idem, et troia gaza per undas. Item troiugena. Ennius, troiugenas bello claros. Troezenus propriũ uiri nomem eſt. hic Thrax fuit filius Cradi. unus ex ijs, qui tulerunt ſuppetias Troianis aduerſus græcos. Troia etiam ludus puerorum equeſtris fuit. Sueto. de Cæſare. Troiã luſit turma duplex maiorum, minorumq; puerorum. Item locus in agro Laurente, in quo primus Aeneas cum ſuis conſtitit. Troiã duo inſignes amnes exornant. Mæander dicitur, quod flexum fluminis eius ſimilem habeat, nõ diſſimilem ab opere Labyrinthorũ, chlamydulis, ad alligatam. Varro. mihi facies mæandrata, & uinculata, atque adeo grandis. Virg. Victori chlamydem auratam, quam plurima circum. Purpura Mæandro duplici Melibœa cucurrit. aluus medio umbilico adnexa omnibus eſt, ab alendo dicta. in homine ile, infima parte eſt ſimile ſuillo, à græcis colon, ubi dolorũ magna cauſa, qui ab hoc dicuntur colici. colum etiam morbus ipſe uocatur, quẽ primus

in Italia ſenſiſſe Tiberius princeps dicitur. cũ antea eſſet ignotus. anguſtiſſima aluus canibus eſt, ob quam cauſam uehementi niſu, nec ſine cruciatu eam exonerant. uentres elephanto quatuor ſunt. in iuuencarum ſecundo uentre nigricans thophus reperitur inſtar pilæ rotundus, nullo pondere, ſingulare (ut putant) remedium ægre parientibus. item à uenio fit uenum quaſi ueniũ. à quo fit uenundo, quaſi id, in quod uenimus, dehinc uenundatio, quæ eſt permutatio rerum, & contractus ex conuentione proueniens. à uenundo fit detractis duabus literis uẽdo eiuſdem ſignificationis, cuius frequentatiuum eſt uendito. ab hoc uenditio. & uenditor & uenditrix. & uendibile, quod modo ſignificat id, quod facile uẽdi poteſt, modo id quod populare eſt, & uulgo gratum, unde uendibilis oratio dicitur, et uẽdicatio pro oſtentatione ponitur. Cicero. quinctiam mihi quidẽ laudabiliora uidentur omnia, quæ ſine uendicatione, et ſine populo teſte fiunt, & nuguendus. à quo nuguendulus. de quibus alibi diximus. à uenum uęneo deducitur, quod ſignificat uendor, quaſi uenum eo, hoc eſt ex conuentione in alium tranſeo. à quo fit uenale. quod uendendum eſt. aliquando uenalis capitur pro ſordido, & auaro, q pecuniæ gratia ſeipſum uenderet. Salluſtius, ò urbem uenalem, & cito perituram. uenales etiam, ſi nihil aliud addas, dicuntur ſerui nouitij, qui ad uendendum expoſiti ſunt. ſeruorum enim alij nouitij ſunt, alij ueteratores. Vlpianus, præcipiunt ædiles, ne ueterator pro nouitio ueneat, & hoc edictum fallacijs uenditorum occurrit, ubiq; enim curãt ædiles, ne emptores à uẽditoribus circumueniãtur. præſumptum eſt enim ea mancipia, quæ rudia ſunt, et ſimpliciora eſſe, & ad miniſteria aptiora. trita autem mancipia, &ueterana difficile eſt reformare, et ad ſuos mores formare. qa igitur uenalitiarij ſciunt facile decurrere ad nouitiorum emptionem, idcirco interpolant ueteratores, ne pro nouitijs uẽdãt. Quintilia. item quod commune eſt, & alijs nomen, intellectu alicui rei peculiariter attribuitur, ut urbẽ Romam accipimus, et uenaleis nouitios, et corinthia æra, cũ ſint urbes aliæ quoq;, & uenalia multa, et tam aurum, et argentum, q̃ æs corinthiũ. hinc uenalitium dicitur, uel corpus ipſum, uel uenditio, uel locus, ubi nouitij uenduntur. Paulus. nam quicunq; ex uenalitio nouitiorum emptus alicui miniſterio præpoſitus ſit, ſtatim eum è ueteratorum numero eſſe. uenalitius quoq; adiectiuũ eſt. Pomponius. quod ſi familiam domeſticam uxoris, aut uenalitiã parauit. hinc uenalitiarij appellati mangones, & uenditores nouorum ſeruorum. à ueteratorum ſeruorum nequitia ueteratores etiam appellati ſunt callidi, atq; aſtuti, quãuis mihi ſimilius ueri uidetur ueteratorem proprie aſtutum, ac uerſutum dici à uetuſta multarũ rerũ cognitione, indeq; ſeruũ iam tritũ, & ueteranũ ueteratorem uocari. item à uenum fit uendico, quaſi conueniẽs mihi dico. eſt enim uendico (ut ita dicam) approprio. Quintilia. ruſticus petit partem bonorum, orator totum ſibi uendicat. uindico uero à uis, & dico compoſitum eſt, quaſi uim dico. uindicare enim proprie eſt ulciſci, unde uindicta dicitur quoties iniuriam, contumeliam'ue illatam punimus, et uindex ultor iniuriæ, & uindicatio ipſe actus ultionis. ponitur tamen aliquando uindico, pro eo quod eſt ab iniuria, contumelia'ue, ſiue iactura defendo, & libero. Cicero. et eſt ſenectus natura loquacior, ne ab omnibus eam uitijs uidear uindicare. item protraho, & in libertatem aſſero. à quo uindicta dicta eſt uirga, qua ſerui libertate à prætore donabantur. uis modo uirtutem ſignificat. Plyn. è uiperina carne fiunt theriaces paſtilli. & uehemens, acer, à ui, atq; impetu mentis (ut Gellius tradit) à quo uehementia, acritudo. & uehementer acriter, quorum comparatiua, et ſuperlatiua ſunt uehemẽtior, uehementiſſimus, & uehementius, uehementiſſime. et uinulus, illecebroſus, quaſi uim faciens. Plau. compellando, blanditer oſculando, oratione uinula. uenuſta, uel impudentius. & inuitus, qui per uim aliquid facit. à quo fit aduerbium inuite, cuius comparatiuum eſt inuitius. Cicero, quem ego paulo ſciebã, uel inuitius. nolo enim dicere de tam ſuaui homine faſtidioſius. & inuito, quod eſt prouoco, allicio, & quaſi uim facio. Virgilius, Celeri certare ſagitta, inuitat, qui forte uelint. Cicero, ad quem fruendum non modo non retardat, uerum etiam inuitat, atq; allectat ſenectus. ponitur tamen aliquando inuito pro delecto. Virg. Inuitat genialis hyems, curaſq; reſoluit. aliquando pro repleo. Plau. mirum, ſi inuitauit ſeſe in cœna pluſculum. ab hoc inuitatio. & inuitamentum. & inuitator. quidam inuito putant dictum, quaſi non uito. uitare enim cauere eſt, immo plus, quàm cauere, & à ui dicitur, quaſi ui auertere. à quo uitium dictum, quod proprie id eſt, qđ uirtuti opponitur. græci κακίαν uocant, quod uitandum, ac fugiendum ſit. unde uitioſi homines dicuntur flagitioſi, quamuis uitiati ſint, qui uitium aliquod in corpore patiuntur. ſic enim uitiũ, à morbo diſtinguunt, ut morbus ſit habitus quidam contra naturam, qui uiſum rei facit deteriorem, ut febris, inſania, quæ à græcis phreneſis dicitur, morbi ſunt. uitium uero perpetuum eſt, ut cæcitas, claudicatio. uecordia morbus cum acceſſu, diſceſſuq; eſt. uitium perpetuo manet. poteſt tamen qui morboſus eſt, etiam uitioſus dici, ſed non econtrario. eum, qui uitioſus eſt, neceſſe eſt dici morboſum. Equus mordax, & calcitro uitioſus, non morboſus eſt. claudus uero aliquo ictu factus & morboſus dici, & uitioſus poteſt. ab hoc fit uitioſe aduerbium. et conuitium, quod eſt maledictum cum contumelia. Cicero, maledictum autem nihil habet propoſiti, præter contumeliam, quæ ſi petulantius iactatur, conuitium, ſin faceti us, urbanitas nominatur. inepte ſanè Labeo iuriſconſultus conuitium putat à concitatione, uel à conuentu deriuatum, & id eſſe, quod cum clamore publice fiat. item à uitio uitupero fit. nihil enim aliud eſt uituperare, q̃ uitio aliquid dare, quod aperte oſtendit Ter. nam cum dixiſſet, nunc quã rem uitio dent, quæſo animaduertite, paulopoſt ſubiungit, id iſti uituperant factum. ab hoc fit uitupero uituperonis pro uituperatore. et uituperatio, quod ſi cum uerbo uenio iungatur, & alijs ſimilibus, paſſiue accipitur. Cicero, ut propter eum in ſermonem hominum, atque in tantam uituperationem ueniret. et uituperiũ. Cicero, uel ẽt à uitio dictum uituperium. item à uitio uitiligo (ut quidam exiſtimant) dicta, ut alij à uitulo propter candorem membranæ eius, qua naſcitur inuolutus. uitiligo, quamuis per ſe nullum periculum affert, tamen fœda ẽ, fit ex malo corporis habitu. eius tres ſpecies ſunt. alphos uocatur, ubi color albus eſt ſubaſper, & nõ continuus, ut quædã guttæ, quaſi diſperſæ eſſe uideantur. ab hoc Alpheus nomen ſumpſit amnis Piſam græciæ urbem præterfluens. Strabo φασὶ δὲ καὶ τὸν ἀλφειὸν ἀπὸ τῆς τῶν ἀλφῶν θεραπείας ὀνομασθῆναι, hoc eſt. tradunt autem & Alpheum amnem, qđ Alphos curet, ita nominatum. ab Alpheus fit alpheus ad-

Leuce habet quiddam ſimile alpho, ſed magis albida eſt, & altius aſcendit, in eaq; albi pili ſunt, & lanugini ſimiles. omnia hæc ſerpunt, ſed in alijs celerius, in alijs tardius. priora curationẽ non difficillimam recipiunt. ultimum uix unq̃ ſeneſcit. itẽ uitiare à uitio fit, quod proprie eſt uirginẽ uiolare. Plau. is puellam uitiarat. ponitur tamen aliquando pro fœdare. Apuleius. utroq; oculo uitiatus. hinc corpore uitiatos dicimus, qui cæci, uel manci, uel claudi nati, facti'ue ſunt, aut aliud huiuſmodi uitiũ patiuntur. aliquando uitium pro errore ponitur. Plyn. librum uitijs plenum, hoc eſt erroribus. item pro peccato. Seneca, ſiquid uitij commiſit. quando uirtuti opponitur uitium, ſic definitur. Vir. ille malũ uirus ſerpentibus addidit atris. à uirus fit Virulentus, hoc eſt plenus ueneno, & uiroſus modo mali odoris. idem, uiroſaq; pontus caſtorea. Conſtat enim Caſtoreũ fœdi, & execrandi odoris eſſe, adeo ut prægnantes odore eius eijciant fœtum, modo mali ſaporis. Varro, Rancidam carnem appoſuit nobis, & uiroſam. Viroſa mulier non à uirus, ſed à uir deducitur. Dicũtur enim mulieres uiroſæ, quæ appetentes ſunt uirorum, ſicut mulieroſi uiri, qui appetentes ſunt mulierum. Ab hoc fit uiciſſim aduerbium, quod proprie ſignificat per uices, ut uiciſſim incumbunt oneri, hoc eſt modo unus, modo alius incumbit oneri. Capitur tamen aliquando pro ſecundo loco, ſiue è diuerſo. Cicero, ſed ego admiratione quadam uirtutis eius, ille uiciſſim opinione fortaſſe nonnulla, quam de moribus meis habebat, me dilexit. Item uiciſſatim eiuſdem ſignificationis. Neuius, uiciſſatim uolui uictoriam. & uiciſſitudo alternatio. Terentius, omnium rerum uiciſſitudo eſt. Veteres pro uiciſſitudine uiciſſitatem dixere. Accius, uiciſſitatemq; imputãdi tradit. item uicarius, qui uicem alicuius gerit. Liuius, hunc ego inſtitutum diſciplina mea uicariũ pro me reip. do, dicoq;. Quint. uicariam ei operam impẽdi interdum uicem pro loco ponimus. Horatius, fungor uice cotis acutum reddere, quæ ferrum ualet exors ipſa ſecandi. Vnde inuicem aliquando pro ſecundo loco accipimus. Item à uis Vibro deducitur, quod eſt moueo, & quaſi ui agito. Virgil. Sibila lambebant linguis uibrantibus ora. Hinc Vibratio excuſſio, agitatio. & Vibriſſæ pili in naribus hominum dicti, q̃ ijs euulſis caput uibretur. Vibrare etiam per metaphoram aliquando accipitur pro eo, quod eſt uocem in cantando criſpare. uis à græco deflectitur. ἴς enim dicitur potentia, robur. præter hæc à uenio (ut quidam exiſtimant) uer dicitur, quod tum uenire incipiunt uirgulta, & frondes, ac flores arborum, atq; herbarum. Virg. Et nunc omnis ager, nunc omnis parturit arbos, Nũc frondent ſyluæ, nunc formoſiſſimus annus. Sũt tamen qui uer à uiuendo. quaſi uiuer nominatum uelint. Alij à uertendo, quod tum ſe uertere incipiat tempus anni. quippe uer nouum, anni initium eſt. Diuiditur enim uer, ut cæteræ partes anni in parteis treis, nouum, adultum. et præceps. Ver ſacrum dicebant ueteres, in quo ſacra, & ludos faciebant, qđ quidam quaſi religioſum putant dictum. Siſenna, quondã Sabini ferũtur uouiſſe, ſi res communis melioribus locis conſtitiſſet, ſe uer ſacrum facturos. Alij quaſi uitabile, & execrandũ, quoniam Itali magnis periculis adducti, uouebant quæcunq; proximo uere nata eſſent apud ſe animalia immolaturos. Sed cum crudele uideretur pueros, ac puellas innocenteis interficere, perductos in adultam ætatem uelabant, atq; ita extra fineis ſuos exigebant. Liuius, uer ſacrum factum erat priore anno, M. Ver ſacrum uideri pecus, quod natum eſſet inter calendas Martias, et Idus Maias P. Cornelio, & T. Sempronio conſulibus. Sunt qui uer à græco deriuatum uelint. Græci enim ἔαρ uer dicunt, unde Earinus dicitur uernus. À uer deducitur uernus, ſicut ab æſtate æſtiuus. Item ueruactum, quod eſt terra uere proſciſſa. Plynius, quidam utiq; ab æquinoctio uerno proſcindi uolunt, quodq; uere ſemel aratum eſt, à temporis argumento ueruactũ uocatur. Hoc in nouali, atq; requieto neceſſarium eſt. Varro, multum intereſt in rudi terra, an in ea feras, quæ quotãnis obſita ſit. quæ uocatur reſtibilis, an in ueruacto, quæ interdum requieſcit. Item uerno, quod eſt pullulo. Martialis, Dum tibi uernarent tenera lanugine malæ, hoc eſt pullularent, & pilos emittere inciperent. Interdum per metaphoram pro cano accipitur. Plautus, dum auiculæ uernant. Quippe uerno tempore omnia lætari uidentur. Item Vergiliæ, quod earum ortu

Item uereor, quod ſignificat timeo, quoniam timentes pericula, ea quæ proximo uere naſcerentur, immolaturos ſe uouebant, quamuis alij uereor dictum uelint, quaſi ualde reor, quia ea quæ timemus, multifacere ac diu cogitare ſolemus. Proprie tamen uereri liberorum eſt, qui honeſti gratia mouentur, Timere ſeruorum, qui id non honeſti gratia, ſed pœnæ formidine faciunt. unde reuereri honorare eſt, quod eſt timor aliquid agendi, quod reprehendi poſſit, & uerecundari, quod eſt uerecundia teneri. Cicero, alterum cunctantem, & quaſi uerecundãtem incitabat, et uerecundus proprie, qui uerecundia tenetur, cuius contrariũ eſt inuerecundus. unde fit uerecunde aduerbium, ideſt cum pudore. Aliquando tamen uerecundus pro audaci, & confidente accipitur. Plau. ſic eſt, uera prædico. niſi etiam hoc falſò dici inſimulaturus es. nimis uerecunda es. Item uerum, hoc eſt ſolidum. ſyncerum. non falſum, quod uerno tempore ſole ariẽtem ingreſſo, omnia uere naſcuntur, partuſq; ad maturitatem perueniunt, cum alijs temporibus nata ſæpe deficiant. Hinc ueritas dicta, et uerifico uerbum. À quo uerificatio. & ueriſimile, quod licet, non ſit uerum, ueri tamen ſimilitudinem habet. À quo ueriſimilitudo, & uere aduerbium. & uerax, qui non mentitur. À quo ueracitas pro integritate ſermonis. & ueridicus, qui uera dicit. À quo ueridicentia contrarium mendacitatis. Item uerna ſeruus domi natus, quod hoc tempus anni ad generandum maxime ſit idoneum, & quia domini cum ancillis conſuetudinem habebant uerno tempore, ideo ſeruos domi natos uernas appellauerunt. Ab hoc uernaculus fit. dicitur autem uernaculum quicquid domi noſtræ naſcitur. Vnde uernaculam linguam dicimus uulgarem, hoc eſt domi natam, & uernaculum morem domeſticum. uernaculum etiam pro proprio, & peculiari accipimus. Plynius, potiſſima nobilitas datur uuis peculiaribus, atq; uernaculis Italiæ. Vernaculi etiam dicuntur malis moribus homines, & lingua proterua, quod uernarũ ſimiles ſint, quibus ars eſt adulari, & maledicere. Hinc ueteres Vernilitum pro adulatore poſuere. Cæcilius, credo nimis tandem hic ſit uernilitus. Et uerniliter ſcurriliter, ſiue adulatorie, quoniam hac arte uti uernæ ſolebant. Quidam etiam Vernilitatem pro ſcurrilitate uſurparunt. À uerna fit diminutiuum uernula. Item à uer Vernatio dicitur, quod ſignificat corium uetus, quo ſerpentes exuuntur, quoniam id uere fit. Plynius, lendes tolluntur adipe canino, uel anguibus in cibo ſumptis anguillarum modo, aut uernatione, quam exuunt pota. idem, anguinæ uernationis membrana cum oleo, tedæq; reſina calefacta auribus prodeſt. Eadem dicitur ſenectus. Idem, anguinus adeps æruginimiſtus, ſiue earum ſenectus exuta, ſi affricetur ruptas oculorum parteis ſanat. item à uere Verto, quia uere annus incipit uerti, cuius frequentatiuum eſt Verſo. Plautus, uerſipellem ſe facit, quando lubet, & Verſutus hinc dicitur, qui aliquando ponitur pro perito. Plautus, nec magis uerſutum, nec quo cereas ægrius, Proprie tamen uerſuti dicuntur, qui mentem crebro ad malitiam uertant, ſiue (ut Cicero inquit) quorum tanquam celer rota mens uerſatur. Hinc uerſutia calliditas. malitia. & Verſute. callide. malitioſe. & uerſutiloquus. ac uerſutiloquax. qui uerſute loquitur, & cum uerſutia blatterat. Nonnunquam etiam uerto ponitur pro muto. Virg. quæ te geni-

Hinc fit animaduerto, quod eſt conſydero. intueor. & reqrit accuſatiuum ſine præpoſitione. Plau. animaduerto hominem ſubalbidũ. tremulũ. aliquãdo tñ uſurpatur pro punio. Sed hoc ab eo differt, qđ punire eſt quorũcunq; ſiue iure, ſiue iniuria. Animaduertere autem eſt eius, q̃ in alterum habet poteſtatem ordine, ac rite, hoc eſt cum animaduerſione punire, & poſtulat accuſatiuũ cum in. Oblato itaq; tertio poculo mente alienatus, in medio antro immane corpus dormiturus extendit. Hunc igitur Vlyſſes uino, ſomnoq́; ſepultum animaduertens immiſſo in oculo telo excæcauit. Sed exurgens tandem Cyclops, cum aperire antri hoſtium gregibus cogeretur, immanem exinde lapidẽ amouit. In qua ideo tutiſſime ſumuntur, quoniam Seſamoides admiſcent, hoc genus herbæ in Anticyra naſcens ſimilis erigeronti, quidam à loco anticyricõ uocant. Farina utriuſque ellebori admiſta radiculæ, qua lancæ lauantur, ſternutamentum facit. Durare uim eius triginta annis ferunt. Tradunt etiã ſi cum albo elleboro cæro coquatur, carnem abſumi. Antiquorum error fuit, elleborum propter metum parcius dare, cum celerius erumpat, quo largius ſumitur. Themiſon binas non amplius drachmas donauit, alij quaternas dedere, elleborum fortiſſimi ducis ſimilitudine æquantes, concitatis enim intus omnibus conſtat ipſum primũ exire. Mureis polenta admiſtum necat, Galli ſagittas uenenato elleboro tingunt, circunciſoq́; uulnere teneriorem ſentiri carnem affirmant. Muſcæ quoq; necantur albo trito, et cum lacte ſparſo. Sicut lunaris annus dicitur, qui menſe uno ſuum conficit curſum. & Magnus annus, cum omnes planetæ in unum locum recurrunt, quod fit (ut ſcribit Hortenſius) ſpatio duodecim millium & noningentorum annorum. & ſolaris herba, quam græco nomine heliotropium dicimus, quod ſe cum ſole circumagat, etiam nubilo die, tantus eſt eius ſyderis amor, ut nocte contrahat cœruleos flores. Magnus eſt medicorū noſtri temporis error, qui cicorium putant heliotropium eſſe, cum cicorium ſit intybum erraticū, cui radix longa, & lenta, qua ad uincula etiam utuntur, eſtq; herba frigidiſſima, cum heliotropium temperata ſit, & aliquid habeat caliditatis. Cicorium quidam ob ſingularem ſalubritatem chreſton appellant. Græci enim χρηστὸν utile uocant. Alii pancration, quod παγκράτιον omnipotens ſit. Magi putant huius ſucco cum oleo perunctos fauorabiliores fieri, & quæ uelint, facile impetrare. Solaris quoq; lapillus eſt, quē ſimiliter græco uocabulo heliotropium nominant porracei coloris, ſanguineis uenis diſtinctus, de quo ſupra diximus, ſicut ſolis gemma. Quicquid ponderi adiiciatur, mortem repræſentat. Sunt qui dorion appellent, quod cuſpides ea in prælIis tingerentur. Strychnis etiam, & halicallios, & erythros, & neuris nuncupatur. Xenocrates nullum eſſe corporis malum ſcribit, cui hac herba non ſit ſalutaris. Item à ſole ſolarium horologium, locus in quo horæ ad ſolem conſpiciuntur. Primus Romanis hoc ſtatuiſſe dicitur L. Prætor autem Accenſo iubere ſolebat, ubi ei uidebatur meridiem eſſe, ut inclamaret meridiem eſſe circa muros ire ſolitus, ut illiceret populum in eum locum, unde uocare poſſet ad concionē. Hinc eſt uerſus ille ueteris comœdiæ. Vbi primum Accenſus clamarat meridiem. Illicium eſt, cum circa muros itur, ut populus alliciatur ad magiſtratus conſpectum. Qui eos uocat, aſcendit in locum. unde uox ad concionem uocantis exaudiri poſſit. Marcel. ſcribit, Accenſos genus militiæ eſſe adminiſtrantibus proximum, dicti quod ad neceſſarias res ſæpius acciantur, ueluti acerſiti. Solidurius non à ſole, ſeu ſolido, aut ſolo deriuatur, ſed ita uocatur lingua gallica deuotus. Cæſar, cum ſexcentis deuotis, quos Galli ſoldurios appellant, quorum eſt conditio, ut omnibus in uita commodis unà cum ijs fruantur, quorum ſe amicitiæ dediderunt. Si quicquam per uim accidat, aut eundem caſum unà ferant, aut ſibi mortem conſciſcant. Item à ſolus ſoliuagus dicitur, qui ſolus uagatur. & ſoleo, quod ſignificat conſueui, quaſi ſolus, hoc eſt totus eo. Nec erat uertendum, ne uera prædicans ſeſe nimis uideatur aut inſolens, aut audax. Hinc inſolentia pro arrogantia deducitur. & inſolenter aduerbium, arroganter. Veteres inſolum pro inſolitum uſurparunt. Afranius. orbitatem ſenectuti tuæ malum metui, quod inſolum non uenit cæco, ac dementi. idem. ne ueniret, quod non agitur inſolum. à ſoleo fit compoſitum aſſoleo. Plau. Oppido ſic aſſolet. Græci Rheam uocant. hanc quidam putant terram eſſe, ab opere ita uocatam, ut ſupra diximus, quia ex operibus terræ, humanæ uitæ alimenta quærantur, fructuſq; & fruges ex ea naſcantur. ab hac opes, hoc eſt diuitiæ dictæ, quia diuitias omnes in agris eſſe, ueteres exiſtimabant. Hinc locupletes dicebant loci, ideſt agri plenos. & pecunia ipſa à pecore appellabatur. & paſcua cenſorijs tabulis dicebantur omnia, ex quibus populus redditus haberet, quia diu hoc ſolum uectigal fuerat. Multatio quoq; non niſi ouium, boumq; impendio dicebatur. Maxima multa erat trium millium & uiginti aſſium, quia non licebat quondam pluribus triginta bobus, & duabus ouibus quēquam multari. exiſtimabaturq; bos centuſſibus, ouis decuſſibus. Minima autem multa unius ouis erat. & ouis, quando multa erat, maſculino genere proferebatur. Varro. Quando citatur neq; reſpondit, neq; excuſatus eſt, ego ei unum ouem multam dico. Multa pœnam ſignificat, quod Oſci pœnam uocant multam. Var. autem icirco pœnam multam dici exiſtimat, quod olim ſingula ob peccatum exigebantur. ut ouis, aut bos. poſtea multa ſimul exigi cœperunt, & uinum, atq; oleum addi. in hoc autem multa differt à pœna, quòd pœna generali nomine dicitur omnium delictorū coërcio, multa uero eſt ſpecialis peccati, cuius animaduerſio pecuniaria eſt. pœna autem (ut Vlpia. inq̄t) non tm̄ pecuniaria, ſed capitis, & exiſtimationis irrogari ſolet. Et multa q̄dē ex arbitrio eius uenit, q̄ multam dicit. pœna autem non irrogatur, niſi quæ lege, uel quo alio iure ſpecialiter huic delicto impoſita eſt. q̄nimmo multa ibi dicitur, ubi ſpecialis pœna nō eſt impoſita. itē multā is dicere poteſt, cui adiudicatio data eſt. Magiſtratus enim ſolos, & præſides prouinciarum poſſe multam dicere permiſſum eſt. Irceus uero genus eſt farciminis. Ir neutri generis, & indeclinabile uolam ſignificat, hoc eſt manus concauitatem, & pro ipſa manu accipitur. NOCENTES. Delatores. Nocentes enim proprie dicuntur, qui iniuriam, aut maleficiũ commiſerunt, à noceo uerbo, quod eſt obſum, & à maleficio non abſtineo. Vnde econtrario innocentes dicuntur, qui ab omni iniuria, & maleficio abſtinent. & innocentia integritas eſt. Salluſtius. Vbi quæ Metellus agebat, ex nuntijs accepit, ſimul & de innocentia ſua certior Romæ factus, diffidere, at tum demum ueram deditionem facere conatus eſt. Ab hoc fit aduerbium innocenter. Dicimus etiam innocuum, & innocue. Sed hoc aliquando actiue pro innocente accipitur. Virg. Littuſq; rogamus Innocuum. idem. ſic grandine tecta Innocuo pulſa ſonant. Aliquando paſſiue pro eo, cui non nocetur. idem. & ſedere carinæ Omnes innocuæ, hoc eſt ſine detrimento. A noceo etiam noxius deriuatur pro nocente. & innoxius pro innocente. & noxia pro culpa, quod uir alioqui doctiſſimus Valla Feſtum Pompeium hoc aſſerentem reprehendens nequiit reperiri. Quintilia. Alebat deuotum corpus grauior omni fame ſagina, & inter dedita noxæ mancipia, contemptiſſimus tiro gladiator, ut nouiſſime perderem calamitatis meæ innocentiam, diſcebam quotidie ſcelus. Ouidius. Verba fides ſequitur, noxæ tibi deditus hoſtis, Spargitur effuſo cornua Bacche mero Hinc obnoxius fit, qui proprie eſt alicui ob noxam datus, ſiue is, qui noxæ datus eſt. Sed quoniam qui noxæ datur, in eius poteſtate eſt, cui datur, fit ut aliquando obnoxius pro obligato ponatur. Plautus. Adeo ut ætate ambo ambobus nobis ſint obnoxij, noſtro deuincti beneficio. Virgil. iuuat arua uidere, Non raſtris hominum, non ulli obnoxia curæ, hoc eſt arua, quæ non egent raſtris, nec cura hominum, propter quæ deuincta, ac obligata illis eſſe uideantur. Nonnunquam tamen non à noxa, ſed à noxius hoc uocabulum deducitur, & idem ſignificat, quod ſuum ſimplex. unde obnoxius, & innoxius ſunt contraria. Ennius. Virgil. Caſtaneaſq; nuces, mea quas Amaryllis amabat. Macro. Nuces à malis ita diſtinguit, ut nuces ſint omne pomum, qđ foris duro tegitur, & intus habet qđ eſui eſt. Seruius hæc aliter diſtinguit, nuces inquiens generaliter dici omnia tecta corio duriore, ut ſunt auellanæ. amygdalæ. iuglandes. caſtaneæ. Poma uero econtrario omnia molliora. Sed hoc quoque falſum eſſe manifeſtum eſt, cum etiam ea, quæ corticem duriorem habent, poma dicantur. Martialis de pinu. Dicendum igitur pomum generale omnium fructuum, quæ ex arboribus eſui apta proueniunt, nomen eſſe, ſiue mollium, ſiue durorum. Nucis ea duntaxat poma uocari, quæ duro operimento teguntur. Mala autem non quodcunque pomi genus tenuioris, atq; carnoſi, ſed ea tantum dici, quæ ſui nominis arboribus producuntur, ijs ſcilicet, quas malos uocamus, quemadmodum pira, quæ pirus producat, hoc modo mala citrea ſiue medica dicimus. mala cotonea. mala punica. & quæ uulgo generali uocabulo appellantur mala, de quorum generibus inferius dicemus. Quod ſi aliquando perſica quoque mala uocari animaduertimus, improprie hoc fieri conſtat, nec quia ex malorum genere ſint, cum nucleum habeant, ſed quia inſeri malis cœperunt genitricis ſibi nomen aſſumpſere. inter nuces autem primum locum obtinet iuglans, quæ & per excellentiam nux appellatur. Hanc nonnulli à iuuando, & glande appellatum putant. Alij quaſi Iouis glandem exiſtimant uocitatam, quod hæc arbor nuces habeat ſuauiori ſapore, quàm glandeis. Vnde Cloacius Verus diu glandem primo uocatã ſcribit, quaſi Διὸς βάλανον. Poſtea detractione primæ literæ, iuglandem. Quapropter cum hunc, de quo loquimur, fructum ueteres illi egregium exiſtimarent, decorare eum digna appellatione uolentes, iuglandem, quaſi Iouis cibum nuncupauere. Nullum præterea nucum genus eſt, quod huic uel magnitudine, uel pulchritudine præſtet. quamuis enim pineis uniuerſitate minores ſint, nuclei tamen portione ſunt multo ampliores, hinc uarijs in ludis celebrantur. & nuptialium feſceninorum comites eſſe apud ueteres ſolebant. Cuius rei cauſam nonnulli putauerunt eſſe, quod cadendo tripudium, ac ſonum facerent. Sed illa uerior eſt, quod gemino operimento proteguntur, puluinati primum calicis, mox lignei putaminis. tum leui corticula, lignea nucleum intercurſante membrana. Quoniã enim tot modis munitum fœtum hẽbant, merito nuptijs religioſas eſſe uoluere. Græci hanc nucem ob excellentiam Baſilicam appellant. Plyn. Et iuglandes è Perſide à regibus tranſlatas indicio ſunt græca nomina. Optima earum genera ſunt, quæ perſica, atque baſilica uocant. Perſica quidem in tantum augentur, ut putamen rũpant. ideoq; moluſcæ nuces à putaminis mollicie uocitantur. Ridiculus eſt Macrobij error, qui nucem moluſcam eſſe Perſicum ſcribit, motus authoritate poëtæ, quem adducit, ita ſcribentis, Adde perſica, quod nomen ſic deniq; fertur. Moluſca hæc nux eſt, nequis forte inſcius erret. Neque animaduertit poëtam nõ de perſico pomo teneriori ſcribere, ſed de nuce perſica, quandoquidem hortulanum deſcribit facientem moretum, in quo non poma tenera, atque carnoſa, quæ perſica uocantur, ſed perſicæ nuces poni ſolent. Taceo quod Plynius, cæteriq; authores de naturis rerum ſcribentes, poſtquam de

Eſt & aliud nucis iuglandis genus, quæ Tarentina dicitur, fragili putamine, & ita mollis, ut uix attrectata frangatur. unde quidam Tarentum appellatum putant, quod nuces iuglandeis, & pineas molleis habeat, ac ſimiliter oues. Tarentum autem Sabini uocant molle, ad quod alludens Horatius ſcripſit. Et molle Tarentum. A iuglande iuglam ueteres dixerunt ſtellam, quæ alio nomine appellatur orion, quod amplior ſit cæteris, quaſi nux iuglans. Secundum inter nuces locum obtinet Pinea, exileis nucleos habens, quamuis totius corporis magnitudine alias ſuperet. Eſt genus earum, quod tarentinum uocatur, putamen habens fragile digitis, & auium furto ſemper expoſitum. Hæc ſylueſtris pinus dicitur, ad differentiam alterius, quæ uocatur urbana. Eſt & tertium genus, quæ pinus picea uocatur, quod piceæ potius, quàm pino ſimilis ſit, idcirco etiam apinam uocant, quaſi minime pinum. Nucleum autem uerius, quàm putamen adeo mollem habet, ut ſimul mandantur. Nuces quoque eius apinæ à ueteribus nominabantur. Apina etiam, Tricaq; duo Appuliæ oppida fuerunt, quæ rex Diomedes euertit, tanta ignominia, ut in prouerbij ludibrium tranſierint. Tertio loco numerãtur auellanæ, quas antea abellinas patrio nomine conſtat uocitatas. Ab Abellino Campaniæ oppido, ubi abundant. Nam proprium arboris nomen eſt corylus, à quo colurna opera dicuntur ex corylo arbore facta. Eædem & præneſtinæ dicuntur, quod ijs Præneſtini abundent. & ponticæ, quod in Aſiam, Græciamq; primo è ponto uenere. quidam per diminutionem nuculas præneſtinas dictas exiſtimant, uel quod exiguæ ſint, uel quod incluſi olim à Pœnis præneſtini famem nucibus tolerauerunt. Dehinc ſequitur amygdala, nucleum habens diſſimilem latitudine. Hæc & nux græca uocatur. & thaſia à Thaſo inſula Thraciæ, olim Etria dicta, cuius populi Thaſij uocãtur. Poſtea nux caſtanea armata echinato calice, quæ et heracliotica uocatur. Varia eius genera ſunt. Quædã triangulari forma in aqua naſcuntur. Nigræ, quæ magis in uſu ſunt, coctiuæ dicuntur patria. laudatiſſimis caſtaneorum Tarentum, et in Campania Neapolis. A nuce nucleus deriuatur, quod tenerum in nuce includitur. Plautus. Qui è nuce nucleos eſſe uult, frangat nucem. A quo fit enucleo uerbum, quod proprie eſt aperio, & nucleum extraho. Per metaphoram uero capitur pro declaro, explano, à quo enucleate aduerbium, hoc eſt aperte, manifeſte. & enucleatio declaratio. Item à noceo nox deducitur, quæ eſt umbra terræ, quod noceat oculis. Quãuis aliqui à græco deductum malunt, quod eſt νύξ. à quo Nyctilieus dictus eſt Bacchus, ꝙ eius ſacra noctu celebrarentur, & Nyctimene puella, quæ, quoniã cum patre concubuerat, facinus recognoſcens, in ſyluas aufugit, & in noctuam conuerſa lucem odit, nocte tantum uolitans. à græcis γλαῦξ appellatur. Quæ auis quoniam Athenis maxime abundat, factum eſt prouerbium γλαῦκ' εἰς ἀθήνας, hoc eſt noctuã Athenas, de ijs qui uel inutilẽ mercaturã exercent, uel laborãt in aliqua re inutili, aut ea uerbis exaggerãt, quæ notiſſima ſunt audiẽti. Hinc ueteres præbia remedia dixerunt, quod ægrotantibus præbeantur. Plautus præbiterẽ pro perire uſurpauit.

Redhibeo, quod proprie eſt (ut ſentit Vlpianus) facio, ut rurſus habeat uenditor, quod habuerat. Vnde redhibitum definiunt, quod redditum eſt, improbatúmq;, & qui reddidit, rurſus coactus eſt habere id, quod habuit. & redhibitio dicitur actus ipſe reſtitutionis. Poſtremo cohibeo, quod eſt comprimo. refreno. Plyn. Et impetum furentis blanda oratione cohibuit. Ab hoc cohum deductum, lorum, quo temo buris cum iugo colligatur. Cohum etiam poetæ cœlum dixerunt à chaos, ex quo putabant eſſe formatum. Varro autem cohum pro loro à cauo, quaſi cauum dictum exiſtimat, dicítq; eſſe ſub iugo medio cauum, quo buris extrema iugo copulatur. EXILIVM. Relegationem. Exul enim dicitur, qui extra ſolum natale, hoc eſt extra patriam eiectus eſt. Hinc fit exulo uerbum, quod eſt extra patriam eiectus uiuo. & exilium ipſa exultatio. & exilica cauſa, quæ aduerſus exules agitur. & exulabundus in exilio uitam agens. PROFVGVS. Procul à finibus ſuis uagans quaſi porrò fugatus. Fugare enim expellere eſt, & in fugam conuertere, quod à fugio deducitur. Fugio autem à græco φεύγω. Eſt autem fugere cum curſu, & celeritate relinquere. Virgil. Nos patriam fugimus. Diciturq; etiam de nauigantibus. idem. Non fugis hinc præceps, dum præcipitare poteſtas. Idem. Tendunt uela noti fugimus ſpumantibus undis. Plau. Remigio, ueloq; quantum potes feſtina, & fuge. Item de auibus. Virgi. Celeriq; fuga ſub ſydera lapſæ, Semeſam prædam, & ueſtigia fœda relinquunt. A fugio fuga deducitur, quod modo ſignificat actum ipſum fugiendi, modo pro curſu ponitur. Virgi. uel qualis equos Threiſſa fatigat Harpalice, uolucremq; fuga præuertitur Hebrum. modo pro impetu. Idem. Ille uolat ſimul arua fuga, ſimul æquora uerrẽs. Item à fugio fugax, qui propter timiditatem facile fugit. Ponitur etiam pro celeri, & ueloci. unde fugacem equum dicimus uelocem. Ab hoc fit diminutiuum fugaculus, & comparatiuum fugacior, ac ſuperlatiuum fugaciſſimus. & nomen fugacitas. & fuga, dea lætitiæ, à fugatis hoſtibus. & fugitiuus ſeruus, qui à domino ea mente diſcedit, ne ad eum redeat, etiam ſi mutato conſilio ad eum reuertatur. Nemo enim tali peccato pœnitentia ſua nocens eſſe deſinit. Fugitiuæ uero aquæ dicuntur, quibus ex publico riuo fluentibus furtim quis, ac non ſuo iure utitur. Præterea à fugio compoſita fiunt perfugio, quod eſt auxilij gratia ad aliquem confugio. unde perfugium dicitur locus, ſiue perſona, ad quam confugimus. Apule. Perfugium facinoroſorum hominũ. & confugio eiuſdem ſignificationis. à quo confugium. Virgili. Ad te confugio, & ſupplex tua numina poſco. Veteres pro confugium confugelam frequentiſſime uſurparunt. & refugio ſimiliter. à quo refugium. & aufugio, atque effugio eiuſdem cum ſuo ſimplici ſignificationis. à quibus aufugium. & effugium, & fœminino genere effugia. & profugio, longe fugio, à quo profugus. Virgilius. Italiam, fato profugus, lauinia uenit Littora. & transfugio, quod proprie ſignificat ad partem hoſtium fugio. Hinc transfugium, hoc eſt fuga ad hoſteis facta. & transfuga, qui ad hoſteis fugit. Salluſtius. Modo harum, modo illarum partium leuiſſime transfuga. Item ſolifuga animal, de quo ſupra diximus, à ſole fugiendo. & lucrifuga, qui lucrum fugit. Plau. Cum hos huc adij lucrifugas, damni cupidos. Item noctifuga, qui noctem fugit. lucifuga, qui fugit lucem, & alia quædam huiuſmodi. item à fugio fit frequentatiuum fugito. Apuleius. Huc atque illuc fugitando, ad ſtabulum tandem perueni. AB VRBE AVSONIA. Ab urbe itala, hoc eſt ab urbe Roma, quæ non modo Italiæ, ſed terrarũ caput eſt. Auſonia eadem uoce & ſubſtantiuum, & adiectiuum eſt, hoc loco adiectiuum. Dicta eſt autem principio Auſonia ea pars Italiæ, duntaxat, in qua

ſunt urbes Beneuentum, & Cales ab Auſone Vlyſſis, & Calypſonis filio. Poſtea tota Italia, quæ Apennino finitur Auſonia uocitata eſt ab eodem duce, à quo urbem etiam conditam Aruncam ferunt. Ab Auſonia populi Auſonij uocitati, & mare auſonium. pars maris tyrrheni, à Campania Siciliã uerſus. IMPENSIS VITAM PRINCIPIS ADNVMERES. Ad cætera inquit, beneficia principis illud adnumerandum eſt, quod uitam nobis dedit, quoniam delatores eiecit, qui uitæ noſtræ continue inſidiabantur. ADNVMERES. Addas, & numero cæterorum beneficiorum adiungas. Adnumero, & connumero, à numero componuntur. ſignificant autem addo, & ad numerum adiungo. Item ſimul numero, hoc eſt ſimul computo. Numero autem à numerus fit, qui definitur collectio unitatum. unde unitatem dicunt non eſſe numerum, ſed principium numeri. numerum autem à numo deductum exiſtimant, cum propter numos in primis inuentus ſit numerus. & Numerare proprie ſit numos computare. Numus autem à numiſmate appellatus eſt. Græci enim numum νόμισμα uocant, quo uerbo & latini eodem modo utuntur. Horat. Regale nomiſma Philippos. Nomiſma autem ἀπὸ τοῦ νόμος, quod eſt lex deriuatur, quia cum permutatione uti homines ſolerent lege, numi uſus introductus ē. Quapropter noſtri numum monetam appellauere, quod ſigno numiſmatis monerentur, cuius pretij eſſet. A numo numoſus fit, ſicut à pecunia pecunioſus. & numatus in eodem ſignificato apud Plautum. & numularius, campſor pecuniarum. Item qui numos cudit, ac monetarius etiam appellatur. Sed proprie campſor pecuniarum à noſtris argentarius dicitur. A græcis trapezita. Numularij, & menſarij ſunt minutiores non tenentes libros, in quibus data, acceptaq́; ſcribuntur, quos græci Colybiſtas appellant. Numerus uero non modo de ijs, quæ numerantur, dicitur, ſed aliquando de ijs, quæ menſurantur. Cicero, ſi exempli gratia uir bonus Alexandria Rhodum magnum frumenti numerum adduxerit. interdum etiam pro ordine metaphorice accipitur. Virgilius. Digerit in numerum. & quoniam omnis concentus, & omnis harmonia numeris conſtat, frequenter etiam pro ratione harmonica ponitur, quam græco uocabulo rhithmos appellamus. Virgil. numeros memini, ſi uerba tenerē. Idem, Tum uero in numerum faunoſq́;, ferasq́; uideres Ludere, ideſt in rationem, & rhithmum. Quintilia. ſunt rhithmi, ut & ipſe Cicero conſtituit, et ſecutus eum Virgilius dixit. Numeros memini, ſi uerba tenerem. idem. rhithmi (ut dixi) neque finem habent certum, neq; in contextu uarietatem. Hinc oratio, quæ numeris caret, ſoluta dicitur, quæ uero numeris conſtat, numeroſa. Numeroſum etiam dicimus, quicquid magno numero conſtat, ut numeroſus grex. numeroſus populus. A quo fit numeroſe aduerbium, ideſt magno numero. Innumerum uero, quod ſine numero eſt, hoc eſt infinitum. Innumerato eſſe dicitur, cum pecunia eſt in prõptu, ut habeo pecuniam innumerato, hoc eſt non ualorem, ſed pecuniam ipſam promptam, paratamq́;. Vnde de actore dicente ex tempore, dictum eſt ingeniũ eum innumerato habere, hoc eſt ſemper promptum, paratumq́; ad omnia, ſicut de Pollione Aſinio ſerijs, iociſq́; pariter accommodato, dictum eſt eſſe eum omnium horarum. Item à numerus Numerius prænomen deducitur. & numerabile, quod numerari poteſt, ſicut innumerabile, quod non poteſt numerari. & numerarium, quod ex numero eſt. ſicut ſupernumerarium, quod ſupra numerum additum eſt. & numeratim aduerbium, hoc eſt per numerum, & unum compoſitum ſæpenumero, quod ſignificat frequenter. Item numerale, quod ad numerum pertinet. Vnde numeralis ſcientia, quæ de numeris eſt. Græce Arithmetice uocatur.

nam ἀριθμός numerus eſt. & apud grammaticos numeralia nomina dicuntur, quibus utimur in numerãdo, ut unus. duo. tres. ſinguli. bini. trini. & numeralia aduerbia, ut ſemel. bis. ter. atque alia eiuſmodi. in quibus notandum, quod ut maximus quiſque numerus, ita primo loco ponitur, ut uigintiquinque. trigintaſex, ſed ſi copula intercedat, is numerus præponitur, qui minor eſt, quoties infra centum, & ſupra uiginti loquimur, ut unus & uiginti, duo & uiginti. Cicero. Plato uno & octogeſimo anno ſcribens eſt mortuus. Iſocrates quarto & octogeſimo eum librum, qui Panegyricus inſcribitur, ſcripſiſſe dicitur. uixitq́; quinquennium poſt, cuius magiſter Leontinus Gorgias centum & ſeptem compleuit annos. Ex quibus Ciceronis uerbis manifeſte colligitur ante centum præponi numerum minorem. Poſt centum uero poſtponi. Eodem modo loquemur ſupra uigintimillia uſq; ad centum millia, ut milites noſtri ſex & uigintimillia erant, uel milites noſtri erant uigintiſexmillia, uel milites noſtri erant uicies & ſexieſmille. uel militum nobis erant uigintiſexmillia. Etenim. hæc nomina, dum copula carent, compoſita uidentur, ut undecim. duodecim. ſeptendecim. uigintiduo. uigintitres, quemadmodum illa undeuiginti, quaſi uno dempto de uiginti, & ſignificat decem & nouem. & duodeuiginti, quaſi duobus demptis de uiginti, & ſignificat decem & octo. eodē modo undeuigeſimus. duodeuigeſimus, undetrigeſimus. duodetrigeſimus. undecenteſimus. duodecenteſimus. undemilleſimus. duodemilleſimus, & reliqua ſimiliter. Hæc enim nomina ſecundus. tertius. centeſimus, & reliqua huiuſmodi ſignificant ultimum ex eo numero, ut ſecundus ideſt ultimus ex duobus. Tertius ultimus ex tribus. Centeſimus ultimus ex centum. Licet primus non ſignificet ultimum ex uno, ſed ipſum unum, in ordine tamen ad multos ſequentes. Aliquando tamen non pro ultimo ex eo numero uſurpantur, ut centeſimam partem bonorum patris aſſecutus eſt. hoc eſt unam ex centum. Aliquando pro bis tantum. ter tantum. ut ager hic centeſimum fructum attulit, hoc eſt centies tantum, quantum ſementis acceperat. Plyn. admiſcetur huic far, ut mitiget amaritudinem eius, & tamen ſic quoque ingratiſſimum uentri eſt, naſcitur qualitercunq; ſolo cum centeſimo grano. ipſumq́; pro letamine eſt. cum centeſimo grano inquit, hoc eſt cum centum granis, ſiue cum centuplo grano. hoc modo appellata eſt quadrageſima, quod quadraginta dies contineat, quo uocabulo eloquentiſſimi noſtræ religionis uiri utuntur. Hanc ſignificationem habent nomina illa numeralia, ſimplus. duplus. triplus. decuplus, & ſimilia, hoc eſt ſemel tantum, bis tantum, ter tantum, decies tantum. Sunt præterea numeralia. unarius. binarius. ternarius. uicenarius. centenarius & ſimilia, quæ denotant non multiplicationem ſui, ſed numerum aliarum rerum, quæ non nominantur, ut lapis centenarius, non quod centuplus ſit, ſed centum librarum. homo centenarius, non quod ſit centum geminus, ſed quod habeat centum annos. Grex centenarius, non quod ſint centum greges, ſed grex centum capitum. Dicimus etiam binarium. ternarium. centenarium numerum, quia numerus omnia complectitur, propter quod recte dicimus centenarium numerum annorum ingreſſus eſt, non autem centenarium annum, & millenarium numerum pondo uehit, non autem millenaria pondo. itē ſingulum. binum. trinum, ſiue ternum. quaternum. quinum. ſenum. octonum. nouenum. denum. undenum. duodenum. ternundenum. quaternundenum. quinundenum. ſenũdenum. uel denunquaternum. denunquinum. denunſenũ. denunſeptenum. denumoctenũ. denunnouenum. uicenũ. uicenũſingulũ. uicenum binũ. uicenunternum. ſiue ſingulũ & uicenum. binum & uicenũ. ternũ & uicenũ. et ita deinceps, tũ tricenũ. quadragenũ, quinquagenum.

ſexagenum. octogenum. nonagenum. centenum, quibus oratores utroq; numero utuntur, ſed frequentius plurali, præſertim ubi ſubſtantiuum nomen, cui adduntur, tantum pluraliter declinatur, ut binæ literæ. binæ nuptiæ. bina arma. bina caſtra. Neque enim recte diceremus duæ literæ. duæ nuptiæ. duo arma. duo caſtra. Poëtæ uero frequentius ſingulari utuntur. Sed oratores ferè propriam uſurpant ſignificationem horum nominum. Binus enim, ſiue bini ſignificat ſingulis duo. Ternus, ſiue ternũ ſingulis tres. Quaternus, ſiue quaterni ſingulis quatuor, ut creabantur olim bini conſules. ideſt per ſingulos annos, ſiue ſingulis annis duo, & accepimus omnes à Cæſare bina talēta, hoc eſt ſingulis nobis data ſunt à Cæſare duo talenta. At poëtæ non ita accipiunt, ſed pro ſuis ferè primitiuis hæc nomina uſurpant. Virg. Gurgite ſepteno rapidus mare ſubmouet amnis, ſepteno gurgite, hoc eſt ſeptem gurgitibus. Idem. Per duodena regit mundi ſol aureus aſtra. pro duodecim aſtra. Verum non modo poëtæ, ſed alij quoque ſcriptores nonnunquam hoc modo accipiunt. Plyn. Prodigioſa ſunt, quæ circa hoc tradit Theophra. author alioqui grauis, ſeptuageno coitu durare libidinem contactu eius, ſeptuageno coitu inquit, hoc eſt ſeptuaginta coitibus. Sed in his nominibus notandum eſt, quod à triginta tricenum dicimus. g. litera in. c. mutata, ſicut pro uigeno uicenum. Tricenum uero à trecentum dicimus, quia hæc nomina ſupra centum quidem ſyncopantur, infra uero non ſyncopantur, quippe duceni dicimus pro ducenteni. Treceni pro trecenteni. Quadringeni. quingeni. ſexageni. ſeptingeni. octingeni. Nongeni, uel noningeni, pro quadringenteni. quingenteni. ſexcenteni, ſeptingenteni. octingenteni. nongenteni, uel nonningenteni. Centeni autem, & milleni propter dictionum breuitatem nō ſyncopantur. Sunt item nomina numeralia ſimplex. duplex. triplex. quadruplex. decuplex. centuplex. & ſimilia. A quibus ſimplicitas. duplicitas. triplicitas. & reliqua. item ſimpliciter. dupliciter. tripliciter. & alia huiuſmodi aduerbia. Veteres etiam ſimplicitus pro ſimpliciter dixere. Numeralia præterea aduerbia ſunt ſemel, bis. ter. quater. decies. centies. millies. & ſimilia, in quibus notandum eſt, ſicut ſuperiora illa, quæ diximus, ſupra centum ſyncopantur, infra centum uero minime, ita hæc ediuerſo infra centum ſyncopari, ultra uero non ſyncopari, ut uicies pro uiginties. Tricies pro triginties, & ſimiliter quadragies. quinquagies. ſexagies. ſeptuagies. octogies. nonagies. Cætera uero non ſyncopantur. Quinquies. ſexies. ſepties. octies. nouies. decies. centies. ducenties. tricenties. quadringenties. quingēties. ſexcenties. ſeptingenties. octingenties. noningenties. millies. biſmillies. termillies. quinquieſmillies. decieſmillies. uicieſmillies, & deinceps. Mille ſubſtantiuum nomen, & neutri generis aliquando eſt, cuius pluratiuus numerus eſt millia. Declinaturq́; hoc mille huius mille. Et in plurali hæc millia, horum millium, ideoq́; cum genitiuo iungitur. Cicero. Ante fundum Clodij, quo in fundo propter inſanas illas ſubſtinctiones, facile mille hominum uerſabatur ualentium. idem. Qui unquam in illo inuentus eſt, qui L. Antonio mille numûm ferret expenſum. Quadrigarius. ibi occiditur mille hominum. Qui etiam declinatum hoc nomen à ueteribus inuenitur. Lucil. Hunc milli paſſuum qui uicerit atque duobus Campanus ſonipes ſubcuſſor nullus ſequetur Maiore ſpatio, ac diuerſus uidebitur ire. idem, Tu milli nummûm potes uno quærere centum, Vno milli nummûm, inquit, hoc eſt mille numis, hoc eſt quod græci χιλιάδα uocant, dicuntq́; unam chiliada, et duas chiliadas, hoc eſt unum mille, & duo millia. Aliquando mille adiectiuũ eſt, itaque mille homines dicimus. mille uiros. mille propugnacula. Nec licet dicere millia homines, quia ſubſtantiua non cohærent ſine copula.

Dicimus tamen decem millia & ducenti homines, quod ita intelligitur, decem millia hominum, & ducenti homines. A mille (ut quidam putant) Millus deriuatur, collare canum uenaticorum, factum ex corio, multis clauis ferreis eminentibus aduerſus impetum luporum. à multitudine ergo clauorum, hoc eſt à mille clauis millum appellatum uolũt. Scipio Aemilianus ad populum. Nobis (inquit) reipu. præſidio eritis, quaſi millus cani. Nos millum potius quaſi melinum dictum exiſtimamus, quod ex pelle animalis, quod melis dicitur, ferè hæc collaria fiant. Varro. Ne uulnerentur canes à beſtijs imponuntur ijs collaria, quæ uocantur melium, ideſt cingulum circũ collum, ex corio firmo cum clauis capitatis. Quod autem animal ſit melis, nos primi hac ætate, ut pleraque alia tenebris ignorantiæ obducta aperuimus. Taxonem id uulgus uocat. Plynius Frontinuſq́; tegi ſcuta melium pellibus ſcribunt, eamque eſſe huic animali in metu ſolertiam, ut ſufflata cute diſtente ictus hominum, & morſus canum arceant. item à mille millies aduerbium. & milliarium, hoc eſt mille paſſuum ſpatium. & millenus, à quo millenarius numerus, ſicut à centum centenarius. & milium frugis genus propter multitudinem acinorum. Adhibetur hoc neruorum doloribus in ſacco feruens, quoniam eſt caloris capaciſſimum. itaq; talis uſus eius eſt ad omnia, quibus calor profuturus eſt. ab hoc miliaria auis uocitata, quod milio pingueſcat. Item à mille miles appellatus, quaſi milleſimus quiſque, hoc eſt quiſquis ex millenario numero fuerit. Legio enim primo (ut Varro inquit) trium millium fiebat, & ſingulæ tribus Tatienſium, Ramnium, Lucerium mille militum mittebant. Hinc militaris dicitur ad militem ſpectans, ut militaris panis. militaris toga. res militaris. & militia, pro bello, & re militari. & milito uerbum, hoc eſt militiam exerceo. & militariter aduerbium, hoc eſt more militum, uel more militiæ, & commilito commilitonis, qui ſimul militat, hoc eſt ſocius in bello, & commilitium ipſa belli ſocietas. Militiæ apud ueteres tria genera erant. Alij euocati dicebantur, qui non milites, ſed promilites erant. Alij tumultuarij, qui neceſſitate aliqua electi ad unum duntaxat bellum militabant. Alij ſacramento religati, qui poſt electionem in Rempu. iurabant, quod militare ſacramentum dicebatur. hi plenam militiam habebant, erantq́; quinq; & uiginti annis obligati. Miletus autem urbs fuit Ioniæ, eius regionis caput. A qua Mileſij dicti alia eiuſdem nominis fuit in Creta. Alia in Leſbo inſula. à qua mileſia uellera dicta, quod ibi optime lana tingeretur. Milo proprium nomen uiri eſt. Fuit hoc nomine Athleta Crotonienſis, qui taurum in olympico certamine ictu nudæ dextræ occidiſſe dicitur, & ſine fatigatione ſtadij ſpatium ſupra humeros portaſſe, totumq́; eo die comediſſe. hic tamen exitum uitæ miſerandum habuit. nam cum ætate grandæuus relicta palæſtra, per ſylueſtria Italiæ loca iter faceret, uidit quercum proxime uiã patulis in parte media ramis hiantem, ut creditum eſt, uolens an ullæ ſibi reliquæ uires adeſſent, experiri, immiſſis in cauernas arboris digitis, deducere, & reſcindere quercum conatus eſt, ac mediam quidem partem diſcidit, diuellitq́;. Quercus autem, cum ille quaſi perfecto quod erat connixus, manus laxaſſet, ceſſante ui, redijt in naturam, manibuſq́; eius retentis, incluſiſq́; ſtricta denuo, & cohæſa dilacerandum hominem feris, atque alitibus præbuit. A Milona milonianus dicitur. unde miloniana Ciceronis oratio dicitur pro Milone acta. Milo etiam Indiæ mons eſt, in quo homines naſcuntur auerſis plantis octonos digitos in ſingulis pedibus habentes. IMPENSIS. Beneficijs. meritis. ut ſupra diximus. PRINCIPIS. Domitiani, qui delatores caſtigans, uitæ ciuium conſuluit.

AD DOMITIANVM EPIGRAMMA QVINTVM.

VNCTAM PASIPHAEN. Laudat Domitianum, q̄d ita fabulas ueterum repræſentet, ut poſſint, quæ ficta ſunt, uideri uera fuiſſe. Paſiphaë Solis filia fuit, & uxor Minois regis Cretæ. Minos, cum pulchriorem taurum ſacrificare Neptuno ſolitus eſſet, deteriorem aliquando appoſuit, quapropter indignatus deus uxorem illius compulit in tauri amorem. Alij hoc à Venere factum tradunt, quod oēm ſolis progeniem inſectaretur, quia ſol omnia cernens compertum eius cum Marte adulterium dijs immortalibus indicauerat. Paſiphae igitur amoris impatientia ſibi fabricari à Dædalo bouem ligneam fecit, ſub qua latens cum tauro concubuit, ex quo prægnans facta genuit Minotaurum, qui partim hominis effigiem habebat, partim tauri. Qua re comperta, indignatus Minos in Dædalum, qui bouem fabricauerat, Labyrintho eum cum Icaro filio includi iuſſit, quod metuens Dædalus, alis ſibi, & Icaro è cera fabricatis è Creta inſula euolauit. Icarus alis, quod nimis alta peteret, calore ſolis liquefactis in mare decidit, quod eſt inter Myconem, & Gyarum, ob id Icareum dictum. Nam Icarius Oebali Laconum regis filius fuit, pater Penelopes. Item mons ē in Attica regione. Icarion uero ſæuiſſimus pirata fuit. Dædalus in Siciliā peruenit, ubi tum Cocalus imperabat, quem perſecutus Minos à Cocali filiabus (ut Ariſtoteles refert) iuxta Camerinam urbem interfectus eſt, & apud inferos iudex animarum factus. Virgili. Quæſitor Minos urnam mouet, ille ſilentum Conciliūq; uocat, uitaſq́; & crimina diſcit. A minos fit Minoius. Idē. Dædalus (ut fama eſt) fugiens minoia regna. Hanc igitur fabulam ita præſentauit Domitianus, ut fuerit hiſtoria uiſa, non fabula. hoc ipſum ſpectaculum Nero prius ediderat, ita ut omnes ligneo iuuencæ ſimulachro abditam muliërem inire conſpexerint. Icarū primo ſtatim conatu iuxta cubiculū eius decidere, ipſumq́; Neronem cruore reſpergere. Dædalus patria Athenienſis, Mitionis filius fuit, nobilis architectus, fabricam materiam primus inuenit, & in ea ſerram. aſciam. perpendiculum. terebrā glutinum. lithocollam. Quidam falſò ſcribunt Talaum ſororis filium, ab eo interfectum inuidia ingenij, quoniā figuli rotam, & ſerram primus inueniſſet. Nā figulinam primus inuenit Chorœbus Athenieſis. Rotam Anacharſis Scythes, uel (ut alij uolunt) Hiperbios Corinthius. Dædalus, cum Athenis ab Ariopagitis expulſus in Cretam nauigaſſet, primo bouem ligneam fabricauit, deinde Labyrinthum, in quo minotaurus includeretur. Portentoſiſſimum hoc humani ingenij opus fuit, itinerum ambages, occurſus, ac recurſus inexplicabiles continens. crebris foribus ad fallendos exitus, redeundumq́; in errores eoſdem. Quatuor hi fuiſſe memorantur. Primus in Aegypto, qui (ut aliq̄ ſentiunt) regia Mothæ rudis principis fuit, ut alij, ſepulchrum Meridis. Plures honori ſolis extructum fuiſſe exiſtimant. Hinc Dædalum ſumpſiſſe conſtat exēplar eius labyrinthi, quem fecit in Creta, ſed centeſimā tantum eius portionem imitatum. Secundus hic ab Aegypto Labyrinthus fuit. Tertius in Lemno. Quartus in Italia, omnes lapide polito fornicibus tecti. Italicum Labyrinthum fecit ſibi Porſena rex Hetruriæ ſepulchri cauſa, ſimul ut & externorum regum uanitas quoq; ab Italis ſuperaretur. Var. Sepultus eſt Porſena ſub urbe Cluſio, in quo loco monimentum reliquit lapide quadrato. Singula latera pedum lata trecentum, alta quinquagenum. inq; baſi quadrata intus Labyrinthum inextricabilem, quò ſiquis improperet ſine glomere lini, exitum inuenire nequeat. Supra id quadratum Pyramides ſtant quinque, quatuor in an-

gulis, & in medio una. in uno latere pedum ſeptuagenum quinum, altæ centum quinquagenum. ita faſtigatæ, ut in ſummo, orbis æneus, & petaſus unus omnibus ſit impoſitus, ex quo pēdent excepta cathenis tintinabula, quæ uento agitata longe ſonitus referant. Supra quem orbem quatuor pyramides inſuper, ſingulæ extant altæ pedum centenum, ſupra quas uno ſolo quinq; Pyramides tantæ altitudinis, ut reliquæ totius molis altitudinem ſuperent. Dædalo autem impoſitum nomen exiſtimant ἀπὸ τοῦ δαιδάλλειν, quod eſt uariare. Alij hoc uerbum potius à Dædalo deriuatum putant, ob multiplex, uariumq́; ingenium hominis, propter quod græci Dædalon uarium dicunt. & Lucre. terram ob rerum, artificiorumq́; uarietatem Dædalam nominat. En. ſimili modo Mineruam. Virg. Circen, Plato Logodædalos uocant, qui dolum colunt ſermonis ornatu. CREDITE. Vos ſcilicet, qui Domitiani ludos ſpectatis. Credite, fidem habete. Credere enim aliquando eſt dictis, uel factis fidem habere. Virg. Ora dei iuſſu non unquam credita Teucris. A quo creduli dicuntur, q quæcunq; facile credunt. & credulitas ipſa facilitas credendi. Sicut econtrario, Increduli, qui non facile credunt. et incredulitas credendi difficultas. Aliquando credere eſt fidei committere. Cice. Vitam, ac fortunas cui crediderim meas. Interdum ſeruandum committere. Plau. Vbi is obijt mortem, qui mihi id aurū credidit. plerūq; etiam pro confidere uſurpatur. Vir. O' formoſe puer, nimium ne crede colori. Salluſti. Virtuti ſatis credebant. Item pro mutuare. Martial. Dimidium donare Lino, quàm credere totum. Qui mauult, mauult perdere dimidium. Hinc creditores proprie dicuntur, quibus mutuata pecunia debetur. Vlpia. tamen creditores dicit eos eſſe, quibus debetur ex quacunq; actione, uel perſecutione, uel iure ciuili, ſine ulla exceptionis perpetuæ remotione, ſiue honorario, ſiue ordinario, ſiue extraordinario. ſiue pure. ſiue in diem. ſiue ſub conditione. Creditum etiam à credo deducitur, ſignificatq́; id, quod nobis debetur. & hoc differt à mutuo (ut Plau. ſentit) quo genus à ſpecie. Nam creditum conſiſtit extra eas res, quæ pondere, numero, menſura'ue continentur, ſicuti ſi eandem rem recepturi ſumus creditum eſt, non autem mutuum. Item mutuum non poteſt eſſe niſi pecunia, aut alia res proficiſcatur. Creditum autem fit interdum etiā ſi nihil proficiſcatur, ueluti ſi poſt nuptias dos promittatur. Veteres pro credas creduas uſurpabant. Plau. Ipſus nec amat, nec tu creduas. Item à credo fit credibile, quod ita uerisimile eſt, ut facile credi poſſit. Cuius contrarium eſt incredibile, quod non eſt credendum, & credibiliter aduerbium, quaſi uerisimiliter. & incredibiliter contrarium. IVNCTAM. Sunt etiam qui putent βουβῶνα à græcis, hoc eſt bubona à boue appellari, quod ſignificat inguen ob tumorem, ſcilicet, qui in īguine facile naſci ſolet. Ab hoc fit bubonocele, qđ ē genus ægritudinis, de quo ſupra diximus. Solebant etiā ueteres magnis, & amplis rebus bu particulam præponere, à magnitudine ſcilicet bouis. Hinc bupædas magnos pueros. bupodas magnos pedes. bulimam magnam famem dixere. λιμὸς enim à græcis fames appellatur. & bumaſtus magna mamma. μαζὸς enim græce mamma dicitur. Eſt autem bumaſtus uuæ genus, quæ mammarum modo tumet, ſicut dactylus, quia ad digiti ſimilitudinem longis porrigitur acinis. & leptorox, exiguos habens acinos alioqui mira ſuauitate prædulcis. λεπτὸς græce tenuis, ac gracilis dicitur. ῥώξ acinus, & bufo rana terreſtris nimiæ magnitudinis. Taurus ſimiliter à græco deducitur. Græci enim ταῦρον taurum nominant, & eſt cæleſte ſignum. ideo enim in cœlum translatus fuiſſe taurus exiſtimatur, quod Europam in Cretam inſulam trāſuexit incolumem. Europa Agenoris filia fuit, cuius pulchritudine captus Iupiter, Mercurio iuſſit, ut armenta omnia ex Phœnicum montibus in litus compelleret, quod ijs ſciebat Europam oblectari ſolere. ipſe uero in candidum taurum transformatus ſeſe armentis immiſcuit. Cuius pulchritudine ſimul, ac manſuetudine oblectata uirgo, primo manibus eum tractare cœpit, deinde dorſo inſedit. ille paulatim undas ingreſſus, poſtquā territam uirginem, & dorſo, ac cornibus nixam ſenſit, maturato curſu tranſuexit in inſulam Cretam, ubi priſtina forma reſumpta cum uirgine concubuit, quæ prægnans facta Minoem, Rhadamanthum, & Sarpedonem peperit. Minos, et Rhadamanthus, quia uiri iuſtitia, ac ſeueritate inſignes fuerunt, finguntur à poëtis nocentium apud inferos explorare peccata. Virgilius. Quæſitor Minos urnam mouet. idem. Gnoſius hæc Rhadamanthus habet. Sarpedon rex Lyciæ fuit, & Troianis aduerſus græcos tulit auxilium. Homerus hunc Iouis filium, non ex Europa, ſed ex Laodomia Bellerophontis filia contra aliorum opinionem fuiſſe commemorat. Sunt qui ſcribant Iouem hunc Taurum à Neptuno fratre habuiſſe, cui in figura Tauri ſenſus eſſet humanus. Eum à Ioue Sidonem miſſum ut Europam Agenoris filiā ad ſe portaret. Virgilius, et uictum Dodona negaret. Has cum à Lycurgo captiuitatem timentes fugerent Thebas, Iouem, ne aliquid à Iunone paterentur, in cœlum translatas, inter ſydera collocaſſe tradunt. Ouidius, At ſimul inducent obſcura crepuſcula noctem, Pars hyadum toto de grege nulla latet, Ora micant tauri ſeptem radiantia flammis, Nauita quas hyadas graius ab imbre uocat. Dicebatur hæc et obliqua tibia ob eam rationem. Phrygia autem dicta eſt, quia in Phrygia primum reperta eſt à rege Mida. Item aliæ tibiæ ſimplices erant, & id genus monaulos uocabatur. μόνον enim græci ſolum dicunt, αὐλὸν tibiam. Huius inuentor Mercurius fuit. Aliæ geminæ, quarum author Marſias fuit. Erant & præcentoriæ tibiæ, quarum locus erat ad puluinaria præcinendi. & uaſtæ, quæ foraminum numero præcentorias antecedebant. & Gingriæ, quæ licet breuiores, ſubtilioribus tamen commodis inſonant. & miluinæ, quæ in accentus exeunt acutiſſimos. & lydiæ, quæ & thurariæ dicuntur, & ægyptiæ, omnibus clariorem uocem habentes. Lydiæ ideo appellatæ, quod ijs in ſacrificijs, & inter thura uti ſolerent. Lydios modulos inuenit Amphion, Dorios Thamiras thrax, Phrygios Marſias phryx. Cum tibijs uoce canere Træzenius Dardanus

inſtituit. Eſt & genus exiguarum tibiarum, quæ à uoce anſerum gingrinæ dicuntur. Etenim gingrire anſerum uocis proprium eſt. à quo gingritor tibicen appellatur. Gingreria uero ex multis obſonijs decerpta dicuntur. Gindes uero fluuius eſt in Mantianis montibus naſcens, & per Dardanios fluens, ingreditur Tigrim. Hic, cum ſecundæ poſt Euphratem magnitudinis, Cyri impetum uenientis contra Babylonios interciperet, & quidam ex militibus ſumme dilectus regi, eius moliẽs tranſitum rapacitate fluuij abſorptus eſſet, iratus rex, ulciſci amnem ſtatuit, iurans eum, qui nunc præclarum equitem uorauiſſet, mox uix genua mulieris abluturum. Nec peragendo ſegnior bellum hoſti indictum cum flumine geſſit, & anno integro Gindem per magnas deductum foſſas in quadraginta ſex alueos partitus eſt. Tibiæ primo ex gruum tibijs, à quibus nomen habent, tum ex arundinibus factæ ſunt. unde tibialis calamus dictus eſt, quem auleticon uocant. Item Zeugites à paritate, quod ex eo duplices fiebant tibiæ, poſtea ſacrificæ Thuſcorum tibiæ ex buxo fieri cœptæ. Ludicræ uero ex loto arbore, deinde ex oſſibus aſininis, poſtea ex argento. Tibicines etiam dicuntur trabes, quibus ædificia ſuſtentantur. Iuuena. Nos urbem colimus tenui tibicine fultam, quod à tibijs canentium ſimilitudine tractum uidetur. Hi enim cantanteis ſono tibiarũ iuuant, & quem ſuſtentant, ne fatigentur cantando, quod uſque adeo uerum eſt, ut non modo cantantes, & muſici ſed etiã oratores adhibendos ſibi aliquando tibicines exiſtimauerint. Notum eſt C. Gracchi præcipui ſuorum temporum oratoris exemplum, cui concionanti conſiſtens poſt eum muſicus tibia, quam tonarion uocant, modos miniſtrabat, quibus deberet intendi. Eadem ratione et uerſus quidam tibicines dicuntur, qui ad ſui ſuſtentationem dictiones aliquas alioqui ſuperuacuas habent. Virg. Aſpectans ſyluam immenſam, & ſic forte precatus. Forte quantum ad ſenſum nihil facit, ſed ob id duntaxat poſitum fuit, ut uerſus conſtaret. Thuſcorum lingua tibicines, ſubulones uocantur, à ſubulæ, uel potius ſubulonis cornu ſimilitudine, de quibus ſupra diximus. Item à cantu cornicen, qui cornu canit. item liticen, qui canit lituo. Eſt autem lituus proprie tuba incurua dicta à ſono. Home. λίγξε βιός, hoc eſt inſonuit neruus. Virg. Et lituo pugnas inſignis obibat, & haſta. ab huius poſtea ſimilitudine lituus appellatus ẽ auguralis uirga breuis, in latere, qua robuſtior eſt, incurua. Idem. Ipſe quirinali lituo, paruaq; ſedebat Succinctus trabea, læuaq; ancile gerebat. item ſiticen, qui apud ſitos canere ſolitus eſt, hoc eſt uita functos, & ſepultos. Hi proprium genus tubæ, qua canerent, habuerunt, à cæterorum tubicinum proprietate diſtinctum, quos ſiciniſtas uulgus appellat, qui rectius loquuntur, ſicinniſtas. n. litera geminata. Sicinnium. n. genus ueteris ſaltationis fuit. ſaltabundi autem canebant, quæ poſtea ſtantes canere conſueuerunt. Accius appellari ſicinniſtas ait nebuloſo nomine. credo propterea nebuloſo, quod ſicinnium cur diceretur, obſcurum ẽ. Nos ſicinnium quaſi ſiticinnium, hoc eſt cantum apud ſitos, hoc eſt ſepultos appellari exiſtimamus, quemadmodum à canendo dicimus gallicinium, de quo ſupra diſſeruimus. Saltationem funẽbrem, ac funẽbres ludos Acaſtus in Iolcho inuenit, ſicut ſaltationem armatã Curetes docuere. Pyrrhicam Pyrrhus. Sueto. de Cæſare. Pyrrhicam ſaltauerunt Aſiæ, Bithyniæq; principum ludis. idem de Nerone. pyrrhicas quaſdam è numero epheborum, quibus poſt æditam operam diplomata ciuitatis Romanæ ſingulis obtulit. inter Pyrrhicarum argumenta taurus Paſiphaẽn ligneo iuuencæ ſimulachro abditã iniuit. Quoddam etiam armatæ ſaltationis genus apud Lacedæmonios inueniſſe legimus Lycurgum, quam hormum uocari Lucianus in libro, quem de ſaltatione edidit, refert. Conſtituebatur id genus

ex adoleſcentibus,

ex adoleſcentibus, & uirginibus alternatim ad choream diſpoſitis. Ducebat chorum adoleſcens militarem exercens peritiam, qua poſtea in inuadendis hoſtibus uti poſſet. ſequebatur uirgo modeſtia quadam inſignis, & fœmineum ſaltum decenter agebat, ex quo intelligebatur Hormum conſtitui ex duabus illis uirtutibus temperantia, ac fortitudine. item ab ore, & canendo oſcines dictæ, quæ aues ſunt augurium ore facientes. unde oſcinum augurium, qui cantu auium fit. Plynius tamen oſcines aues omneis dici exiſtimat, quæ canunt. Tria enim genera auium facit. Primum earum, quæ ungueis, ac digitos habent. ſecundum oſcinum, quibus cantus eſt oris. Tertium alitum, quæ in magnitudine à cæteris differunt, ut ſunt pauones gallinæ, & ſimilia. Item à cano gallicinium, tempus, quo galli canere conſueuerunt. & uaticinium uatum carmen. quapropter & uates ipſi à uinciendis carminibus ſunt appellati. item à canendo luſcinia dicitur, quod lugendo canat. Auis eſt, quam græci philomelam uocant, lugere hæc auis canendo dicitur. Martia. Flet Philomela nefas inceſti Tereos, & quæ Muta puella fuit, garrula fertur auis. Cauſa fletus hæc eſt. Philomela, & Progne filiæ fuerunt Pandionis Athenienſium regis. Hic, cum Eritheo patri in regno ſucceſſiſſet, auxilio Terei Thracum regis profligauit regem Ponti, qui Athenas obſidebat. propter quod meritum Prognen filiam Philomelæ ſororem illi dedit uxorem. Ouidius. Quem ſibi Pandion, opibuſq;, uiriſq; potentem, Et genus à magno ducentem forte gradiuo, Connubio Progne iunxit. ex hac Tereus filium Ityn ſuſcepit, ſed cum deſyderio uidendæ ſororis uxor Terei teneretur, exorauit uirum, ut Athenas profectus Philomelam ad ſe duceret. Qui mandata peragens, aduentum Philomelæ à Pandione impetrauit. Verum dum in itinere eſſent, in libidinem mulieris exardens, quamuis repugnantem, compreſſit. poſt hæc, ne exprimere facti obſcœnitatem poſſet, linguam ei abſcidit, & ſeruo in uinclis cuſtodiendam tradidit, reuerſuſq; ad uxorem maris nauſea defunctam ſimulauit. Philomela tædio carceris affecta, rem omnem, uti geſta fuerat, acu in tenuiſſima tela deſcripſit. hanc ancillæ Prognes clàm deferendam tradidit. Progne re intellecta, ac diſſimulato ad tempus dolore, poſtquam orgiorum tempus aduenit, thyrſis, & pellibus pro more inſtructa, ſororem adit, eamq; eodem indutam habitu ducit ad regiam. Hic communicato conſilio, ueluti furijs agitata Ityn paruulum filium interficit, uiroq; domum redeunti epulandum apponit, qui re tandem ob delatum iuſſu Prognes in fine cœnæ pueri caput, comperta, dum fugientem uxorem furibundus perſequitur, mutatam deorum miſeratione in hirundinem uidit; quæ conſuetudinem habitandi intra hominum tecta ſemper ſeruauit, ipſe in upupam conuerſus eſt, ideoq; militarem criſtam adhuc in capite gerit, & quaſi adhuc filium quæritans clamat ποῦ ποῦ, quod ſignificat ubi ubi. Mutare autem hanc pennarum colorem Aeſchylus ſcribit, oſcenam alias paſtu auem, ut quæ filium ſumpſerat in cibum, ſed criſta uiſendam inſigni, quam contrahit, ſubrigitq; per capitis longitudinem. Aeſchyli quidem tragœdia de upupis non extat. Sed hos uerſus eius adducit Ariſtoteles in libris, quos de hiſtorijs animalium ſcriptos reliquit.

Quin & ſui ſpectantem affert Epopem mali
Colore pingens ſpeciem multimodo,
Saxicolam, improbum, arma geſtantem militem
Adultum, & infantem uaria ſe gerit forma,
Nam uere candicans ubi diu fuit nouo,
Aeſtate tum deinde, ubi canduit ſeges,
Varijs alas maculis guttatas mouet,
Vagatur quoque ſemper, appetens loca

Deſerta, quærens nemora, atque inuias rupeis.

Itys uero in phaſianam mutatus eſt, quæ auis picturatarum ueſtium colores ſeruat, quibus uti regij pueri ſolebant, geminaſq; ex pluma aureis ſubmittit, ſubrigitq;. Hæc auis in Colchis frequens eſt, præſertim iuxta flumen Phaſim, per quem argonautæ in Colchos peruenere. unde ad nos allata nomen habet. Marti. Argiua primum ſum tranſportata carina, Ante mihi notum nil niſi Phaſis erat. At Philomela in auem conuerſa eſt ſui nominis, nec ceſſat deflere cantu dulciſſimo iniuriam, quam paulo ante elinguis promere non poterat. ideo à noſtris à lugendo, canendoq; luſcinia uocata eſt. Mirum eſt tantam uocem, & tam pertinacem ſpiritum in tam paruo corpuſculo eſſe, ut niſi uiſa fuerit, uix credi poſſit. Sonum edit perfecta muſicæ ſcientia modulatum, qui nunc continuo ſpiritu trahitur in longum, nunc uariatur inflexo, nunc diſtinguitur conciſo, copulatur intorto, promittitur, reuocatur. infuſcatur ex inopinato, plenus. grauis. acutus. creber. extentus. Vbi uiſum eſt (ut Plynius inquit) uibrans. ſummus. medius. imus, breuiterq; omnia tam paruulis in faucibus, quæ tot exquiſitis tibiarum tormentis ars hominum excogitauit. Singulis etiam ſunt cantus, & non ijdem omnibus, ſed cuique ſuus, certantq; inter ſe palàm animoſa contentione. Victa morte ſæpe uitam finit, ſpiritu potius deficiente, quàm cantu. Meditantur cantum iuniores, uerſuſq;, quos imitentur, accipiunt. Audit diſcipula intentione magna, & reddit, uiciſſimq; reticet. intelligitur emendatæ correctio, & in docente quædam reprehenſio. Ergo ſeruorum illis pretia fuere, & carius aliquando emptæ ſunt, quàm armigeri. candida Romæ empta fuit temporibus Claudij principis, & Agrippinæ eius uxori dono data. uiſum etiam ſæpe fuit iuſſas canere cœpiſſe. & cum ſymphonia alternaſſe, quemadmodum homines quoque reperti ſunt, qui ſonum earum addita in tranſuerſas labias fronde arundinea, quaſi foramine inſpirantis linguæ redderent. Verum aucto æſtu in totum alia uox fit, nec modulata, ut uaria. mutatur & color. poſtremo hyeme ipſa non cernitur. Luſcinia à poëtis aliquando Attis uocatur, quaſi attica. Martialis. Sic ubi multiſona feruet ſacer Attide lucus. Extatq; apud græcos tragœdia Philochori de Philomela, quæ Attis inſcribitur. Attis filia fuit Cranai Athenarum regis, qui Cecropi in regno ſucceſſit. à quo inquilini Cranai ſunt uocati. Hæc nomine ſuo regionem, quæ eſt inter Achaiam, & Macedoniam, Atticam, & Attidem nominauit, cum Actica prius ab Actæone diceretur, ſiue ab ἀκτὴ, quod litus ſignificat, cum ea regio magna ex parte litoralis ſit, qua uoce utimur etiam latini. Virgilius. At procul in ſola ſecretæ Troades acta. in hac ſunt Athenæ, & Marathon campus cum oppido eiuſdem nominis. ab hoc atticus adiectiuum nomen deducitur. & atticiſſo uerbum. ſicut græciſſo. & aduerbium attice, hoc eſt lingua attica, hoc eſt attice loquor, & græce loquor. & ſiciliſſo, ſicula lingua loquor. Plautus. Non atticiſſat, ſed ſiciliſſat. Athenas primus condidit Cecrops, à quo urbs Cecropia uocitata. poſtea à Mopſo Mopſopia. à filio Xuthi Ione Ionia. A` Neptuno, qui à græcis ποσειδῶν dicitur, Poſidonia, ſiue Neptunia. à Minerua Athenæ. quippe græci Mineruam Athenam uocitant. ab hoc uero Athenienſes, & Athenæi dicti. Tradunt enim qua tempeſtate Cecrops eam urbem condidit, apparuiſſe illic oliuæ arborem, & alio loco aquam erupiſſe. Tunc regem duplici prodigio motum ad Apollinem Delphicum ſciſcitatum oracula miſiſſe. Reſponſum oleam quidem Mineruam ſignificare, undam uero Neptunum. Nunc in eorum poteſtate eſſe, utrius potius nomen urbi imponerent. itaque Cecropem ciueis omneis utriuſq; ſexus ad ferendum ſuffragium conuo-

cæſſe. Conſulta igitur multitudine mares pro Neptuno, fœminas pro Minerua ſuffragia dediſſe. Quoniam uero una plus inuenta eſt fœminarum, Mineruam uiciſſe, atque ita ἀπὸ τῆς ἀθήνης, hoc eſt à Minerua Athenas appellatas, ſed ob eam rem indignatum Neptunum emiſſis ingenti procella æquoreis fluctibus, omnem Atticam regionem deuaſtaſſe commemorant, quem ut mulcerent Athenienſes, triplici ſupplicio mulieres affeciſſe, ut nulla poſt eum diem Senatum ingrederetur. nulla earum proles maternum nomen acciperet, nequis eas Athenæas, ſiue Athenienſes, ſed Atticas uocaret. Tradunt Luſciniam aliquando in ore Steſichori infantis ceciniſſe, mirabili auſpicio ſummum eum poëtam futurum, & cantus ſuauitate omnes, qui ante ſe fuerant, ſuperaturum. Horatius. Steſichoriq; graues camœnæ. Hic Euphorbij, ſiue Euphemij filius fuit, ſiue (ut alij dicunt) Euclidis, uel Hyetis, uel Heſiodi, ex Himera Siciliæ urbe, ex qua Himereus eſt dictus. Nonnulli eum in urbe Italiæ Metauria ortum dicunt. Alij in oppido Arcadiæ Palantio. inde profugum Catanam ueniſſe, eoq; in loco defunctum, & extra portam urbis ſepultum fuiſſe, portamq; ab eo ſteſichoriam nuncupatam. ætate quidem poſterior fuit Alcmane poëta. floruit trigeſimaſeptima olympiade, ſextaq; & quinquageſima obijt. Mamertinus ei frater fuit, geometriæ peritus. Alterum quoq; fratrem habuit legum latorem, nomine Helianacta. Excellens ipſe lyricus fuit, ut non immerito facundiam eius cantum luſciniæ (ut diximus) auſpicatum tradant. Extant poëmata eius libri ſex & uiginti doricæ ſcripti lingua. proditum eſt, cum carmen aduerſus Helenam contumeliæ plenum ſcripſiſſet, repente oculis captum fuiſſe. poſt hæc cum in ſomno monitus Palinodiam ſcripſiſſet, laudes eius decantans, uiſum recepiſſe. ideo autem dictus eſt Steſichorus, quod primus ſaltare ad citharam inſtituit, hoc eſt choream ducere, antea Tiſias uocabatur. Palinodia contrarius cantus eſt, & dici poteſt recantatio, ſiue recentus, ſiue retractatio, ᾠδὴν enim græci cantum dicunt, πάλιν rurſus. à Steſichoro ſteſichorium carmen appellatum, de quo in libro, quem de metris ſcripſimus, diligentiſſime diſſeruimus. Item à cano canor, quod proprie conſonantiam quandam ſignificat. Quintilianus. Vocis rationem Ariſtoxenus muſicus diuidit, ῥυθμὸν καὶ μέλος ἔμμετρον, quorum alterum in modulatione eſt, alterum canore, ac ſonis conſtat. A cano uero fit cantito frequentatiuum, & cantus. & cantio, cuius diminutiuum eſt cantiuncula. & canticum, quod proprie ſignificat elegantem cantum, atque laſciuum. Quintilianus. Sit poëtæ lectio cum ſuauitate quadam grauis, & non quidem pro ſe ſimilis, quia carmen eſt, & ſe poëtæ canere teſtantur, non tamen in canticum diſſoluta. Græci canticum Hymnum uocant, item Pſalmum. Sed proprie hymnus dicitur, qui uoce naturali fit, Pſalmus, qui aliquo muſico inſtrumento, unde pſalmodia deducitur, Canticum miſtum, ut cum aliquis ad citharam, ſiue aliud muſicum inſtrumentum canit. Hinc etiam pſalterium inſtrumentum muſicum uulgo notum. & pſaltria fidicina. Pſalmus autem ἀπὸ τοῦ ψάλλω deriuatur, quod ſignificat canto. & cantator. & cantatrix. & cantilena. & canta, quo ueteres pro cantata uſi ſunt. Quoniam autem mos ueterum fuit, conſtanterq; in hanc uſque ætatem durat, ut uerbis quibuſdam ad carminis ſimilitudinem compoſitis homines utantur, quibus credunt ſe & eijcere deos poſſe, & cum eis colloqui, & tonitrua, ac tempeſtates prouocare, & ſerpentes contrahere, & morbos curare, & oſtia ſine clauibus aperire, & ſecreta ſcrutari, & amorem ſibi conciliare, & alia huiuſmodi infinita etiam contra naturam, factum eſt, ut canto aliquando pro incanto accipiatur. Virgilius. Frigidus in pratis cantando rumpitur anguis.

eſt autem proprie incantare uerbis ſolis, uel etiam rebus quibuſdam adiunctis, aliquid ſupra naturam moliri. à quo incantatio dicitur, & incantamentum. Plynius. Quæſtionis ſemper fuit, ualeantne aliquid uerba, & incantamenta carminum. Vbi notandum eſt etiam carmina aliquando pro incantationibus uſurpari. Virgilius. Ducite ab urbe domum mea carmina, ducite Daphnin. incantamentum eſt lapide uulgari, qui iuxta flumina fert muſcum ſiccum, canum tangere impetiginem, & eum, qui tangit, carmen hoc dicere φεύγετε κανθαρίδες, λύκος ἄγριος ὔμμε διώκει, hoc eſt fugite cantharides, lupus ferus uos inſequitur, quo facto, ſtatim liberari hominem impetigne arbitrantur. Quod genus ſtultitiæ mirum profecto eſt ita in hominum mentes inuaſiſſe, ut uiri etiam docti, & toti populi id uerum eſſe ſibi perſuaſerint. quippe & in duodecim tabulis ſcriptum erat, qui malum carmen incantaſſet, & alibi, qui fruges excantaſſet. Eſt enim proprie excantare, rem incantatam alio carmine liberare, quod & recantare aliquando dicimus. Plynius. Non pauci & ſerpentes ipſos recantari putant. Aliquando tamen excantare pro excludere accipitur. Plautus. Nam credo, cuius cor excantare poteſt in urbium oppugnationibus. ſolebant ante omnia Romani ſacerdotes carminibus quibuſdam euocare deum, cuius in tutela id oppidum eſſet, promittereq; illi eundem, aut ampliorem locum, cultumq; apud Romanos. Conſtatq; ideo occultatum in cuius dei tutela Roma eſſet, nequi hoſtium ſimili modo aduerſus eam agere poſſent. Nota ſunt Theocriti apud græcos, Catulli, atque Virgilij apud nos amatoria incantamenta. Marſorum cantu etiam in nocturna quiete contrahi ſerpentes uulgo prodiderunt. Homerus Vlyſſem ſcribit uulnerato fœmine profluuium ſanguinis carmine inhibuiſſe ὠτειλὴν δ' Ὀδυσῆος ἀμύμονος ἀντιθέοιο, Δῆσαν ἐπισταμένως, ἐπαοιδῇ δ' αἷμα κελαινὸν Ἔσχεθον, hoc eſt uulnus uero Vlyſſis optimi, & deo ſimillimi ligauerunt perite, cantuq; ſanguinem atrum inhibuerunt. Heſiodus Iſchiadicos carmine ſanari prodidit, hoc eſt eos, qui coxendicum morbum patiuntur. Morbus ipſe Iſchias appellatur. Cato affirmat luxatis membris carmen auxiliari. Luxata membra dicuntur, quæ ſuis locis mota ſunt, ut inferius oſtendemus. Quid quod carmen ipſum ponit uerbis quibuſdam compoſitum fictis, & nihil prorſus ſignificantibus, quaſi ridicula iſta magis idonea ſint ad deum mouendum. M. Varro. carmine ſanari podagras aſſerit. Cæſarem dictatorem tradunt poſt unum ancipitem uehiculi caſum, ſemper, ut primum conſediſſet, carmine ter repetito ſecuritatem itinerum aucupari conſueuiſſe. M. Seruilius Nouianus in metu lippitudinis duabus literis græcis α & ρ chartam inſcriptam lino ad collum circunligatam ferebat. Mutia. Ter conſule eadem cauſa uiuentem muſcam in linteolo albo geſtare collo ſuſpenſam ſolitus erat. Sed de his opinetur quiſque, ut ei libitum fuerit. Nos certe uerecundia prohibemur, ne plura ſcribamus, non minus hæc deliramenta putantes eſſe, quàm quod Orpheus, & Archelaus ſcribunt ſagittas è uulnerati corpore eductas, ſi terram non attigerint, ſubiectas cubantibus optimum amatorium eſſe. Quis enim non huiuſmodi ſagittarum magnum numen ſumma diligentia cuſtodiret, ſi hoc uerum eſſe fuiſſet aliquando compertum?

AD DOMITIANVM EPIGRAMMA SEXTVM.

BELLIGER. Mars, & Minerua à bello gerendo belligeri dicuntur, quemadmodum quod bello polleant, dicuntur Bellipotentes. Bellum proprie eſt diſſenſio, per quam arma mouentur. Vnde ſociale bellum dicimus, & bellum Romanorum cum Hetruſcis, aut Sãnitibus, differtq; à prælio, quod prælium eſt ipſa in bello hoſtium congreſſio. Virgilius. Infantem fugiens media inter prælia belli. Aliquando tamen bellum pro prælio ponitur. Salluſtius. In eo bello trecenti milites deſyderati. Hinc & bellari pro pugnare uſurpamus. Virg. & pictis bellantur Amazones armis. bellum etiam bonum ſignificat, eſtq; eius diminutiuum. Var. Item cum eis bellum geras, ut bella omnia domum auferas, ideſt bona omnia. Et quoniam bonum aliquando pulchrum ſignificat, ut apud Terentium, forma, bona fortaſſe. bellum quoque aliquando pro pulchro accipitur. Martial. Bella es, nouimus, & puella, uerum eſt. Hinc belli homines aliquando boni, & prudentes. aliquando formoſi, atque elegantes dicuntur. unde Varro belliores pro meliores poſuit. uenio nunc ad ultimum teſtamentum, quod dicitur Phyſicon, in quo græci belliores, quàm Romani noſtri. & Varus bellitudinem pro pulchritudine (ut Põpeius affirmat.) A bellus fit etiam aliud diminutiuum bellulus, hoc eſt pulcherrulus. & bellatulus blandientis uocabulum in eodẽ ſignificatu. Plau. Cum imus ergo cubitum bella bellatula. bonum proprie eſt, quod malo opponitur, generale nomen, & honeſta ſimul, atque utilia complectens. ut bonum animi. bonum corporis. bonum fortunæ. Hinc ſi bonum uirum diximus, probum intelligimus. Terenti. Mala mens. malus animus. Cicero. Auaritia magnum malum eſt. A bono bonitas fit, quod pro uirtute accipitur. Idem. Cum enim fidem alicuius hominis, bonitatemq; laudant. A malo malitia, quam græci κακίαν dicunt, hoc eſt peruerſitas. Seneca. In hoc ſumma bonitas, in illo extrema malitia. Sed bonitas frequentius pro benignitate, & quadam ingenij ſimplicitate accipitur. Plynius. bonitas, ac ſimplicitas uxoris.

malitia econtrario, pro uerſutia. unde malitioſum, callidum, ac uerſutum uocamus. Cicero. Virtutis contraria eſt uitioſitas. Sic enim malo, quàm malitiam appellare, quam græci κακίαν appellant. Nam malitia certi cuiuſdam uitij nomen eſt, uitioſitas omnium. Eſt & alia bonitas non ex induſtria, ſed ex natura proueniens. Cice. Quæ & bonitate naturæ multi aſſequuntur & progreſſione diſcendi. ideſt excellentia, & dote naturæ. huic ſimiliter contraria malitia eſt. Plyni. Quod modo cœli, modo terræ malitia facit. Varro. Id ſæpe malitia accidit ſoli. Item à bono benignus dicitur liberalis. beneficus. clemens. Vnde benignam terram dicimus, fructus abunde reddentem. Plyn. de Aegypto. Nulla eſt benignior tellus, nullus ager feracior. A quo benignitas liberalitas. clementia. & benigne aduerbium, liberaliter. clementer. à malo uero deducitur malignus, hoc eſt aſper, difficilis inuidus. auarus. Plyn. Homo malignus, & inuidus. Teren. Apollodorus tamen ſcribit Saturnum laneo uinculo per annum alligari ſolitum, & menſe Decembri in die ſibi feſto ſolui, unde ortum eſſe prouerbium. Ianiculum huic, illi fuerat Saturnia nomen, Et regio. item ſaturnalia dies Saturno feſtus. à quo ſaturnalitium, quod ad ſaturnalia pertinet. Martialis. Saturnalitiæ ligulam miſiſſe ſelibræ. ſaturnalia à ueteribus menſe Decembri uno die celebrari ſolebant. Is erat ad XIIII. cal. Ianuarij. Poſtea uero in triduum propagata ſunt adiectis primum à Cæſare huic menſi diebus, deinde ex edicto Auguſti, quo trium dierum ferias ſaturnalibus inſtituit, hoc eſt à XVI. ad XIIII. cal. Ianuarij. ſed ſigillariorum mox adiecta celebritas, in ſeptem dies diſcurſum publicum, & letitiam religionis extendit. hinc rurſus detractis duobus diebus ad quinq; dies ſaturnalia redierunt. erant autem ſaturnaliorum dies lætitia pleni. Nam primo die ad ædē Saturni conuiuio diſſoluto ſaturnalia clamitabantur. Bellū his diebus ſumere nefas habebatur, quoniam regni eius tempora feliciſſima fuerant, nullis bellis uexata, nullis infeſtata latronibus. quæ cauſa fuit, ut Romani ædem Saturni ærarium eſſe uoluerint, quod nullum ſub eo furtum in Italia fuiſſet commiſſum, ſiue quia ſub illo nihil erat cuiuſquam priuatū, Nec ſignare ſolum, aut partiri limite campum Fas erat, non dum quiſquam ſeruitio, aut libertate diſcriminabatur. unde & pœnas à nocentibus ijſdem diebus ſumere piaculare erat, et tota ſeruis licentia permittebatur. Hinc & pileos, quod ſignum, ut ſupra diximus, libertatis erat, capitibus geſtabant, & cum dominis epulabantur, quamuis hoc quidam inſtitutum potius uelint, quia cum Saturnus, & uxor eius ops, tam frugum, quàm fructuum repertores fuiſſent, dignum uidebatur, ut fœtu agrorum iam ab omnibus coacto, & ſaturnalia atque opalia celebrarentur, & domini paſſim cum ſeruis ueſcerentur, cum quibus patientiam laboris in colendo rure toleraſſent. ſumebant præterea omnes his diebus togis depoſitis, ſyntheſim breuem, ut ſupra diximus, ueſtem, & negotijs aptam. Martialis. Dum toga per quinas gaudet requieſcere luces, Hos poteris cultus ſumere iure tuo. Item pileum, quo uti aliâs duntaxat ruri, & militiæ ſolebant. Idem de pileo. Si poſſem totas cuperem miſiſſe lacernas, Nunc tantum capiti munera mitto tuo. Mittebant præterea ſibi inuicem munera, & quæ primo mittebantur, Xenia, quaſi hoſpitalia, hoc eſt ad hoſpites miſſa uocabantur. Quæ uero remittebantur, Apophoreta. Hinc Martialis duos poſtremos libros epigrammatum Xenia, atq; Apophoreta appellauit, quod in ijs ſingulis diſtichis deſcripta ſunt munera, quæ ſaturnalibus mitti ſolebant. & diſticha ipſa pro muneribus, hoc eſt pro Xenijs, atq; apophoretis miſſa, quemadmodum ſuperius latius diſſeruimus. Ratio autem mittendorum ſaturnalibus munerum hæc erat, ut uiderentur ſibi inuicem gaudere, ac gratulari, & Saturno atque Opi gratias agere, quod fruges, fructuſq; ad uitæ cultū neceſſarios percepiſſent. Solebant autem inter cætera munera Cerei, & ſigillaria donari. Sunt autem ſigillaria paruæ imagines fictilibus deſcriptæ, dictæ à ſigillis, hoc eſt paruis ſignis. Nam à ſignum fit diminutiuum ſigillum. Eſt autem Signum opus ſculptile, & ad alicuius animalis effigiem formatum. unde ſigna & tabulas dicimus pro cælatis operibus, atq; depictis. Proprie tamen ſignum eſt parua quædam ſignificatio indicans totius rei

qualitatem. Terentius. Num eius color pudoris ſignum uſquam indicat? Hinc literarum notæ ſigna dicuntur. Item notæ genitiuæ, & quæ pecudibus inuruntur. Hinc duodecim ſigna cœleſtia, quæ in Zodiaco ſunt, appellata, quia notæ quorundam animalium ſunt, quæ ad naturam ſolis iure referũtur. Quippe Aries menſes ſex hybernos ſiniſtro incubat lateri, ab æquinoctio uero ſuper dextrum latus. Sic ſol ab eodem tempore dextrum, reliquo ſiniſtrum ambit hemiſpheriũ, propter quod Ammonem, quem Libyes occidentem ſolem eſſe exiſtimant, arietinis cornibus figurant, quibus maxime id animal pollet, ut ſol radijs. Taurus uero ad ſolem triplici ratione uidetur referri, uel quia apud Heliopolim taurus ſoli conſecratus erat, uel quia bos apis in ciuitate Mẽphi inſtar ſolis excipiebatur, uel quia in oppido Hermunthi magnifico Apollinis templo conſecratum ſoli taurum colebant. Gemini autem, qui alternis mortibus uiuere creduntur, profecto ſolem unum, eundemq́; ſignificant modo deſcendentem ad mundi infima, modo in ſummam altitudinem reſurgentem. Cancer obliquo greſſu nil aliud, quàm ſolis iter oſtendit, qui nunquam rectus incedit, ſed ſemper obliquus, qua ſe ſignorum uerteret ordo maximeq́; in hoc ſigno à curſu ſupero incipit obliquus inferiora iam petere. Leo quidem non minorem cum ſole ſimilitudinem habet. Quemadmodũ enim Leo impetu, ac calore præſtat cætera animalia, ſic Sol cætera ſydera. Leo pectore, ac priore corporis parte ualidus eſt, poſterioribus partibus degenerat, ſic ſolis potentia prima diei parte ad meridiem increſcit, & prima parte anni à Vere in æſtatem mox elangueſcens deducitur, uel ad occaſum, qui diei, uel ad hyemem, quæ anni uidetur pars eſſe poſterior. idemq́; etiam oculis patentibus, atq; igneis ſemper cernitur, quemadmodum Sol patenti, atq; igneo oculo terram perpetuo cernit, infatigabiliq́; conſpectu. Virgo, quæ manu ariſtam fert, ſolis potentiam ſignificat, quæ fructus curat, & ideo iuſtitia creditur, quæ ſola facit naſcentes fructus ad uſus hominum peruenire. Scorpius totus, in quo Libra eſt, naturam ſolis repræſentat, qui hyeme torpeſcit, & ea tranſacta, aculeum rurſus erigit, ui ſua nullum naturæ damnum ex hyberno torpore perpeſſa. Sagittarius ex homine in feram per membra poſteriora degenerans, quaſi poſtremis partibus ſuis à ſuperis in inferna detruſus, & tamen ſagittam iaciens, indicat tunc quoq; uniuerſorum conſtare uitam radijs ſolis, uel ab ima parte uenientibus. Capricornus ab infernis partibus ad ſuperna ſolem reducens capræ naturam imitari uidetur, quæ in paſtu ab imis partibus ſemper prominentium ſcopulorum alta depaſcit. Aquarius ex eo maxime uim ſolis oſtendit, quod non caderet imber in terras, niſi à calore ſolis humor ad ſuperna traheretur, cuius refuſio eſt aqua pluuialis. Piſces certe non aliquam ſolis ſimilitudinem repræſentant, ſed duntaxat potentiam eius oſtendunt, à quo uita non modo aëreis, terreniſq; animalibus datur, ſed ijs, quæ merſa aquis ab illius conſpectu ſemota ſunt. tantaq́; eſt uis eius, ut abſtruſa quoq; penetrando uiuificet. ſignum etiam uexillum dicitur ab effigie animalium, quæ in uexillis ferri conſueuerunt, ut puta aquilæ. lupi. minotauri. equi. apri. His enim uti Romanæ legiones conſueuerũt. Sed C. Marius in ſecundo conſulatu ſuo quatuor poſteriora in totum abdicauit, ſolum aquilæ ſignum retinuit. A ſigno ſigniferi dicti ſunt, qui ſigna ferunt, hoc eſt uexilliferi. Signifer etiã à latinis dicitur circulus, in quo duodecim ſigna ſunt, qui græce Zodiacus appellatur, ab effigie animalium, quæ in eo ſunt. Græce enim ζῶα animalia dicuntur. Item à ſigno anteſignani dicti ſunt milites, qui ante ſigna in acie conſtituuntur. Ab hoc fit uerbum ſigno, quod modo ſignificat oſtendo. Plautus. Hic meretricem

deperit. ſignat tamen ſe eam non amare. modo ſcribo. unde & ſubſignare, ſubſcribere dicimus. modo imprimo. Virgilius. & ſummo ueſtigia puluere ſignent. unde ſignare epiſtolam dicimus, hoc eſt annulo ſignum imprimere. & reſignare, deleto ſigno aperire. à quo ſignatores, & reſignatores, & ſignatio, ac reſignatio teſtamentorũ appellata. Diſſigno, idem quod ſignum facio. & interdum cum nota ignominiæ aliquid facio. A quo diſſignatores dicti, qui ludis funebribus præſunt, qđ in ipſis ludis multa noua, ac ſpectanda fieri ſolerent. Hinc diſſignatio pro contractione, ſiue conductione populi in unum accipi ſolet, quod contingit ei, qui aliquo flagitio omnium in ſe oculos uertit, & quaſi deſignator in ludis funebribus multitudinem continet. Terentius. modo quid diſſignauit. Reſignare etiam ueteres dicebant pro reſcribere. & reſignatum æs militi dicebatur, cum ob delictũ iuſſu Tribuni militum, ne ſtipendium ei daretur, in tabulas referebatur. item reſignare pro claudere. Virgilius. & lumina morte reſignat. hoc eſt claudit. Quamuis phyſici hoc aliter exponant, dicunt enim pupillas, quas in oculis uidemus, morituros ante triduum non habere, quibus non uiſis, eſt ſumma deſperatio uitæ. Reſignat ergo dixiſſe Virgilium, hoc eſt aufert ſigna luminibus. Quandoq; etiam ſigno, accipitur pro eo, quod eſt pecora ſignis noto. unde ſignata pecora dicuntur, quæ notam habent inuſtam. Ab hoc uerbo compoſita ſunt aſſigno. & conſigno eiuſdem ſignificationis. Obſigno idem quod ſigno. Deſigno notæ ſignificationis. item à ſigno fit inſignis, quod modo accipitur pro magnus, ut inſignis clades. Lucilius. Cocus non curat caudam inſignem eſſe, modo pinguis ſiet. modo pro clarus, præſtans. Virgilius. Inſignem pietate uirum. Hinc fit inſignitas, claritas. & inſigniter aduerbium clare. aperte. ſumme. Apuleius. Homo inſigniter malus. Item ab inſignis inſignia deducuntur, hoc eſt ſigna, & ornamenta ob uirtutem adepta. Vnde inſignia laudis, & inſignia gloriæ dicimus. Hinc fit inſignire uerbum, quod eſt ornare, & aduerbium inſignite, quod ſignificat cum indicio notæ. Cicero. Nec improbum notari, aut uituperari inſigniter poſſet. Item à ſigno ſigillo, quod eſt ſignum imprimo. Hinc ſigillatæ literæ dicuntur, hoc eſt clauſæ, & annulo impreſſæ. Propter quod ueteres ſigillare pro claudere uſurparunt. Varro. Contra lex nimis impia eſt, ne filij patribus luci ſigillent oculos. Sugillare uero eſt percuſſu carnem maculare, à ſugendo dictum, quod ſucus, hoc eſt liuor deducatur. Hinc ſugillati dicuntur qui ex percuſſione tumorem, maculamq́; contraxerunt. Plynius. Medici tepſiam permiſtam allijs ſugillatis, ac liuentibus auxiliari debent. Nero Cæſar claritatem ei dedit initio imperij graſſationibus conuerberatam faciem illiniens ſibi cum thure, ceraq́;, & ſequenti die contra famam cutem ſynceram circunferens. Idem, Cinis allij ex oleo, & garo illitus, ſugillata, aut liuentia ad colorem reducit. Ab hoc fit ſugillatio, quæ modo percuſſionem ſignificat, modo deriſionem. Nam & ſugillare aliquando pro deridere accipitur. Liuius. Legati grauiter ferentes ſe ſugillatos eſſe, propter quod nonnulli deductum hoc potius exiſtimant à græco συγγελᾶν, quod corridere ſignificat. Quippe & de ijs, qui ſigna percuſſionis in facie gerunt, ridere ſolemus. item à ſigno ſignaculum, quod proprie ſignificat ſignum alicui rei impreſſum, ut lateat quouſque reſeretur. Item ſignifico, quaſi ſignum facio. à quo conſignifico. & ſignificanter. & ſignificantius, hoc eſt exprimo. expreſſe. expreſſius. Item ſignificatio, ac conſignificatio. Cice. Heu quæ ſignificatio doloris. Apuleius. Ea furoris conſignificatione perterriti

territi omnes. Quidam etiam ſignificantiam pro ſignificatione uſurparunt. Signatam ueteres uirginem dixere, quaſi inſignem uirginitate. Plau. Negat ſe puellã domum ſignatam reuerſuram. Sed, ut ad propoſitum reuertar, mittendorum cereorum, ac ſigillariorum conſuetudinem hinc ortam fuiſſe exiſtimant, quod Hercules occiſo Geryone, cum uictor per Italiã armenta duxiſſet, ponte, qui nunc ſublicius dicitur, ad tempus inſtructo, hominum ſimulachra pro numero ſociorum, quos caſu peregrinationis amiſerat, in fluuiũ demiſit, ut aqua ſecunda in mare deducta pro corporibus defunctorũ ueluti patrijs ſedibus redderentur. inde ergo uſum talia ſimulachra fingendi inter ſacra manſiſſe, ſed mihi illa uerior origo uidetur. Pelaſgi, cum ſedibus ſuis pulſi, diuerſas quondam terras petijſſent, plerique eorum Dodonam uenere, & incerti quibus tandẽ locis adhærerent, huiuſmodi acceperunt reſpõſum. Ipſi ita interpretati ſumus. Ite quærentes Siculorum Saturniã terrã. Acceptoq́; reſpõſo, cum poſt multos errores tandem in Latium perueniſſent, in lacu Cotulienſi, enatam inſulã deprehenderunt. Ampliſſimus enim ceſpes coacta compage uirgultis, & arboribus in inſulæ licentiam comptus, iactantibus per omne mare fluctibus uagabatur. Hoc igitur quaſi omine ſuſcepto, has ſibi prædictas ſedes eſſe didicerunt, pulſiſq; inde ſicilienſibus incolis, atq; direptis, regionem ipſi tenuere, decima prædæ ſecundũ reſponſum Apollini conſecrata, erectiſq; Diti ſacello, & Saturno ara, illum humanis capitibus, hunc uirorum uictimis placare ſe exiſtimabant, propter oraculum, in quo erat, Καὶ κεφαλὰς ἅδῃ, καὶ τῷ πατρὶ πέμπετε φῶτα, Saturni feſtum ſaturnalia nominantes. Poſt hæc Herculem ferunt cum Geryonis pecore per Italiam redeuntem ſuaſiſſe illorum poſteris, ut fauſtis ſacrificijs infauſta mutarent, offerentes Diti non hominum capita, ſed oſcilla ad humanam effigiem formata. et Saturni aras non mactatis uiris, ſed accenſis cereis excolentes, quia φῶτα non ſolum uirum, ſed etiam lumen ſignificat. inde ergo inualuit conſuetudo, ut et Cerei Saturnalibus miſſitarentur, & ſigilla arte fictili fingerentur, ac uenalia exponerentur, quæ homines pro ſe, ac ſuis piaculis Diti, ac Saturno ſacrificarent. Sigilla ipſa Oſcilla dicuntur. Ab ipſo Hercule factum, quo nihil dici maius poteſt. Hercules Iouis, & Alcmenæ filius fuit. Alcmena Electrionis filia ea lege Amphitryoni nupſerat, ut fratris ſui occiſi mortē ulciſceretur. Hic igitur cū aduerſus Teleboas Aetoliæ populos pro Thebanis in expeditionem profectus fuiſſet, Iupiter ſub ſpecie Amphitryonis, q̃ Alcæi Thebani filius fuit, Alcmenā oppreſſit. Quapropter impetraſſe primo à Ioue, ut id iureiurando firmaret, dein miſſa Lucina, quæ dea parturiẽtium erat, diſtuliſſe Herculis ortum, et uxoris Stheleni, quæ ſeptimo iam mẽſe prægnãs erat partum acceleraſſe, ex quo natus eſt Euryſtheus, q Mycenis XLV ãnis imperauit. ſemp infeſtus Herculi. & ob id frequenter eũ impellens ad cõgrediẽdũ cum monſtris facile ſic periturũ Herculẽ ſperans. Hercules tamen in tantam fortitudinẽ, gloriamq; euaſit, ut & in deos ſit relatus, & merito id nomen conſecutus uideatur. quippe Hercules dictus eſt, quaſi ἥρας κλέος, hoc eſt Iunonis laus, qđ Iunone perſequẽte, maximam gloriam ſit adeptus. Hoc autem ideo fictum à ueteribus conſtat, quia Herculem ſolẽ eſſe exiſtimarunt, qui uere heras, hoc eſt aeris cleos dici poteſt. quæ enim alia aeris gloria eſt, niſi ſolis illuminatio, cuius receſſu penitus occultatur? Hinc apud Aegyptios creditur gigantes interemiſſe, cum cœlũ expugnaturi uiderentur. Quippe gigantes nihil aliud fuiſſe credendũ eſt, quàm hominum quandam impiam gentem deos negantem, et ideo creditum deos è cœleſti ſede pellere uoluiſſe. Sed & præteritum tempus lupi capite ſignatur, quod memoria rerum tranſactarũ rapitur, & aufertur. Canis blandiẽtis effigies futuri tpis euentũ ſignificat, quo nobis ſpes licet incerta blanditur. Iſis autem proculdubio uel terra eſt, uel natura rerũ ſubiacens ſoli. Hinc eſt q continuatis uberibus corpus Deæ omne denſatur, qa uel terræ, uel rerũ naturæ alimẽto nutritur uniuerſitas. Hercules magno, ac procero corpore fuit. Quippe Plutarchus in eo libro, quẽ inſcripſit, Quantũ inter homines animi, corporisq; ingenio, ac uirtutibus interſit, Pythagorã philoſophum tradit in reperiẽda longitudinis eius præſtãtia hũc modum ſeruaſſe. Quantum uero robore, ac fortitudine cæteris hominibus præſtiterit, in primis prouerbiũ illud indiciũ eſt, ultima quidem parte recens, cæteris antiquiſſimum. Hinc Teumeſium leonem adhuc penè puer occidit, eiq; pellem detraxit, qua poſtea ſemper pro pallio uſus eſt. Teumeſius à Teumeſo Bœotiæ exiguo monte dictus eſt, quem Antimachus græcus poëta multis uerſibus ornauit. Fluuius etiam, & regio eſt eodem nomine, & paruum oppidum in Thebanis finibus, ubi cum leo inauditæ magnitudinis terrori omnibus eſſet, ab Hercule extinctus eſt. Statius, Illius in ſpeciem, quem per Theumeſia tempe Amphitryoniades fractum iuuenilibus armis, Ante Cleonæi ueſtitur prælia monſtri. Hic Leo à Ioue in cœlum dicitur translatus, ut gloriæ Herculis conſuleret, qui eum inermis occiderat, et qđ hæc prima Herculis iam adoleſcentis certatio fuerit. Eius ſimulachrum Virgini proximũ eſt, ad cuius caudã ſeptem aliæ ſtellæ ueluti in triangulo collocatæ uidẽtur, quas Berenices crines appellãt. Hercules Heſionem Laomedontis filiã à monſtri marini diſcrimine liberauit. Laomedon rex Troianorum fuit à Ioue originem ducens, quippe Dardanus Iouis ex Electra filius fuit. Hic Erichthonium genuit, q̃ filium habuit Troẽ. Hinc ſatus Aeneas. A' Laomedonte Laomedonteus, & laomedōtiades deducuntur. Alij Herculē tradunt, nō ob negatum ſibi à Laomedōte equorū præmiū aduerſus Troianos bellū geſſiſſe, ſed ꝙ dum Hylam puerum à ſe dilectum ꝑ orbē anxius quæritaret, Troiano portu à Laomedōte prohibitus fuit. Hylas Thyodamantis filius fuit, eximia pulchritudine adoleſcens, quē Hercules uehementer amauit, et cum Argonautis nauigās ſecum duxit. Sed cum Argonautæ in Myſiam ueniſſent, Hylam tradunt ad propinquum lacum, ſiue (ut alij uolunt) fontem aquandi gratia nolente quidem, ſed tamen præ amore non prohibente Hercule, perrexiſſē, & à Nympha ob pulchritudinem raptum. Quidam uero non raptum à Nympha, ſed cum urnam tenens hauriendi gratia inclinaretur, in lacum decidiſſe affirmant. Quam opinionem ſecutus uidetur Iune. Et multum quæſitus Hylas, urnamq; ſecutus. Hūc Hercules cum anxius aliquandiu expectaſſet, mox illo non redeunte totam regionē quæritando, et nomen Hylæ fruſtra clamando pagrauit. Vir. Hercules Lacinium prædonē extremā Italiæ oram, quæ magna Græcia dicitur, rapinis, ac latrocinijs infeſtantē occidit, et in promontorio eius loci, cuius ante orā duæ iſulæ ſunt, quarum altera decē millibus paſſuum à terra diſtans Dioſcorō, altera Calypſus, et ab Hom. Hercules (ut Hom. teſtatur) Iunonis papillā telo triſulco uulnerauit, qđ ab Euryſtheo hanc deā oium laborum ſuorū cām eſſe cognouerat. Triſulcū telum dicitur trifidum, hoc eſt treis acies habens, et à tribus partibus findens. & Biſulcū animal, qđ non ſolidas, ſed fiſſas ungulas habet. Tradunt, ſiquis eam totam eruat, hunc ſtatim mori. et cynogloſſa alia herba uulgo nota, quæ lingua canina à noſtris uocatur. et cynoſura, quaſi canis cauda, ſydus, de quo ſuperius diximus è nutrice Iouis factum ex nymphis idæis, à qua & portus ibi, & agri magna pars nomen ſumpſit. et Procyō aliud ſydus, qđ ante maiorem canē oriatur, ita appellatū. Hic in lacteo circulo defixis pedibus æquinoctialem circulum tangit. ſpectat occaſum, ut inter geminos, et cancrum cōſtitutus. occidit exortu capricorni. exoritur cum leone. cōſtat tribus in totū ſtellis. Ex ijs radicibus ſi maiorē edant uiri, mares generari dicuntur, fœminæ alterū ſexum. in Theſſalia molliorem in lacte caprino uiri bibunt ad ſtimulandos coitus, duriorem uero ad inhibendos, ita alter alteri aduerſatur. Sed ut ad propoſitū reuertamur, monti iunctam huic Aethiopum gentem conſtat, quos Perorros uocant. Sunt etiam qui tradant gigni in Atlante herbam Euphorbiam nomine, quā primus rex Iuba inuenit, et ab Euphorbij medici nomine Euphorbiam appellauit. Hic frater fuit Antonij Muſæ medici ſui, qui D. Graueis, & periculoſas ægritudines ꝑ omnē uitam aliquot expertus eſt Auguſtus, præcipue Cantabria domita, cum etiam diſtillationibus iecinore uitiato ad deſperationem redactus, contrariam & ancipitem rationem medendi neceſſario ſubijt, quia calida fomenta nō proderant, frigidis curari coactus, authore Antonio Muſa. Duo montes in Mauritania fuiſſe ſcribuntur Atlantes dicti, alter colūnis Herculis uicinior, alter in interiora Libyæ remotior, de quo diximus, quem incolæ cœli columnam nominant. & ab Atlante rege in eum conuerſo, Atlantem putant uocatū, cum ante Diris diceretur. Atlas quoq; flumen eſt à ſumma montis Aemi uerſus Septentrionem in Iſtrum fluens, quem ab Atlante Arcadiæ rege cognominatum nonnulli putant. Tres enim Atlantes fuiſſe memorantur, unus rex Italiæ, & pater Electræ uxoris Coriti. Alter rex Arcadiæ, & pater Maiæ, ex qua natus eſt Mercurius. Tertius Maurus, qui dictus eſt maximus. Ab Atlāte atlantides patronymicum nomen deducitur, & licentia poëtica atlantiadès. & Atlantes populi. & atlanticum mare, de quo ſupra diximus. Atlantes degeneres humani ritus eſſe feruntur. Nam neq; nominum ullorum inter eos appellatio eſt, & ſolam orientem, occidentemq; dira imprecatione contuentur, tanquam ipſis agrisq; ſuis exitialem, neq; inſomnia uiſunt, qualia reliqui mortales. Sed quoniam Meduſæ, & Gorgonis mentionem fecimus, operæpretium eſt, ut de ijs quoq; aliquid dicamus. Phorcus Thoſeæ nymphæ, & Neptuni filius fuit, & (ut Varro ſcribit) rex Corſicæ, & Sardiniæ, qui initio olim cum Atlante nauali prælio uictus, & in mare ſubmerſus eſt, ac marinus deus effectus. Virgil. Tritonesq; citi, Phorciq; exercitus omnis. Huic quatuor filiæ fuerunt. Scylla. Meduſa. Stenio, & Euryale. Scyllam ex Cratæea nympha genuit, reliquas ex Ceto maris bellua. Scylla mira pulchritudine fuiſſe dicitur, & à Glauco maris deo uehementer amata. Glaucus piſcator fuit, qui cum aliquando in uiridi prato mari contiguo retia ad ſolem extendiſſet, & piſceis, quos ea nocte ceperat, forte recenſeret, uidit illos, quamprimum tacto gramine palpitare, mox mouere latus, & perinde niti, ac ſi in

Obſtupuit Glaucus, dúq; cauſam eius rei mente agitat, dubius numne alicuius dei, an guſtu herbarum, quas nullū unquā aīal attigerat, id actū eſſet, decerpere manu gramē cœpit, paulatimq; guſtare. Quo facto, mente ſtatim alienatus alterius uitæ deſyderio ſeſe in mare proiecit, ſed miſeratione deorū maris, in regni conſortiū aſſumptus, extrema parte corporis in piſcis caudā mutata, barbæ naturali colore in uiridē. Reliq corporis in cœruleū, qui et glaucus color dicitur. Fuit & alius Glaucus, qui primus ferri conſolidaturā inuenit, Chius patria. alius ex Potnia urbe. Itē alius Hippolichi filius, à quo Ioues nati ſunt reges. Cū igitur Scylla Glaucum ſperneret, & ecōtrario Circe mirū in modū illum deperiret, ſuaſiſſe Glauco Circe dicitur, ut ſpernentē ſe Scyllā miſſam faceret, ſibiq; in amore reſpōderet. Sed cū remouere eū à Scyllæ amore non poſſet, infeciſſe aquas ueneficijs, qbus lauari Scylla cōſueuerat. is locus erat in freto ſiculo paruus gurges, ueluti in arcū ſinuatus. id faciēte ſaxo, qđ à Zācle propinquo Siciliæ oppido Zanclæū dicebatur. Zācle Pelopōneſi oppidum fuit, uarijs temporibus clarū in regione Meſſennia, in qua ipſa Meſſene. Scindunt enim mirū in modū fluctus propter tenuitatem. Græci autem πρίσιν ſectionem, πρίσιν ſectorē nominant, ex quo facile eſt irridere ineptias eorum, qui Piſtrin, nō Priſtin ſcribunt, & per X aliquādo ſcribi poſſe aſſeuerāt. Sed,

ut ad Scyllā reuertamur, ob eam cauſam datus eſt huic fabulæ locus, qđ in freto Siculo ſaxum eſt ingēs in ſuperiori parte humanam effigiem habens, in inferiori uero plures reſectos ſcopulos ſub radicibus cauernoſos, intra quos dum æſtuoſum mare ingreditur, ab ijs refractum tumultuādo repræſentat latratum canum, & uluiantes lupos. Homerus Scyllā ſcribit latratum emittere catuli nuper editi, aſpectu horrendam eſſe, XII habere pedes, VI capita, ſingulis capitibus os ingens eſſe cum tribus dentium ordinibus, nigra plenis morte. Morari in cauæ ſpeluncæ medio, capita exerentem in profundiſſimū mare, piſcantemq; & delphinos, ac balænas deuorātem. Sunt etiā qui Scyllā tradant cum Neptuno aliquando cō cubuiſſe. propter qđ iratam Amphitriten ſparſis ueneno aquis, in qbus lauari uirgo conſueuerat, in canē eam mutaſſe. Herculē uero, cum ſuperato Geryone ex Hiſpania reuerteretur, quoniā boues quoſdā ſibi ex armento ſubtraxerat, eam occidiſſe. Sed à patre mox ei uitam fuiſſe reſtitutam. Amphitrite Neptuni uxor fuit. Cuius nuptias cum à principio fugeret, uirginitatem ſeruare cupiēs, miſit ad eā Neptunus Delphinū, qui uaria per loca quæſitam tandem ad radices Atlantis inuenit, et ut Neptuno iūgeretur, perſuaſit. Hinc poëtæ maris deam eſſe dixere. et pro ipſo mari uſurpare conſueuerunt. Ouid. nec brachia longo Margine terrarum porrexerat Amphitrite. Ob hanc cauſam Neptuni ſimulachra facientes, Delphinum ſub pede eius conſtituebāt, tanquam huic deo gratiſſimum. Ideo etiam hic Delphinus in cœlum ſublatus fuit, et inter ſydera collocatus, non lōge ab Aquilæ ſigno, capite penè roſtrum Pegaſi equi contingens, oritur cum Sagittarij poſteriore parte, occidit, cum uirgo exorta eſt à capite. habet in capite ſtellam unam. ſupra caput ad uerticem uerſus alias duas. ab ea, quæ in uentre uelut pennæ uidētur, ſtellas treis. in ſcapulis unam. in cauda duas. Sunt in totum nouem. ideo hoc ſignū muſicum uocant à nouē muſarū numero. Sunt tamen qui de hoc Delphino aliter ſcribāt, Tyrrhenos. ſ. quoſdam nauicularios, cum Liberum patrē puerum quōdam recepiſſent, ut Naxum cum comitibus tranſueherent, & nymphis nutricibus redderent, ſpe prædæ inductos nauē auertere uoluiſſe. Liberū uero, cum id ſuſpicatus fuiſſet, comitibus ſuis, ut ſymphonia canerent iuſſiſſe, quo cantu adeo oblectatos Tyrrhenos, ut ſaltare ēt cœperint, et nimis laſciuiēdo ſeſe ī mare proiecerint, quo facto, omneis in Delphinos eſſe conuerſos. Cuius rei memoriā cum mādare Liber pater poſteris uellet, unū eorū inter ſydera collocaſſe. Alij tradūt hūc eſſe Delphinū, q Arionē uexit. Ariō nobilis cytharœdus fuit ex īſula Leſbo, oppido Methymnæ, Periandro Corinthiorum regi per carus artis gratia. is cum īpetrata à rege uenia in Italiā profectus cātando grādē pecuniā cōparaſſet, Corinthū reuerti ſtatuēs, Corīthios nautas, tanq̃ ſibi notiores, elegit. Hi ergo Arione accepto, cū in altū nauigaſſent, ſpe prædæ cōſilium de eo necādo cœperunt, quare intellecta, Ariō oēm pecuniā, reſq; ſuas omneis illis tradere, et uitā tātū orare ſe dixit. Quarū precū eatenus miſerti ſunt nautæ, ut ab inferēda ei ſuis manibus nece tēperarēt, iuberēt tamē, ut ſeſe ſtati præcipitē daret ī mare. Tū ille ꝑterritus, et oī uitæ ſpe deſtitutus, id unū poſtremo obſecrauit, ut prius q̃ mortē oppeteret, ueſtimēta ſua ſeſe īduere, et fides ſumere, carmēq; conſolatoriū canere ꝑmitterent. Quare à nautis īpetrata, de more cinctus, atq; amictus, ſtanſq; in ſumma puppi, et cithara ſimul, ac uoce canens Delphinos ad ſe audiēdū prouocauit. Tū uero in mare ſe deijciens ab uno eorū exceptus, et ita, ut erat amictus, ac citharā tenēs, Tænarū. qđ oppidū eſt Laconiæ à Tænaro promontorio ita appellatū, peruectus eſt, hinc relicto Delphino Corinthum petijt, talemq; ſe Periādro regi, qualis Delphino uectus fuerat, oſtendit, rē omnē ordine narrauit.

Quod cū rex non facile crederet, cuſtodiri Arionē diligēter, nautas uero ꝑquiri, et ad ſe duci iuſſit. Qui cum ueniſſent, & periſſe procul dubio Arionem crederēt, qđ de eo eſſent à rege interrogati, in Italia eſſe, ac bene ſe habere reſponderūt, feliciterq; ei, ac pro uoto ſuccedere. inter hæc Arion cum fidibus, & indumentis, cum qbus ſe in mare deiecerat, iuſſu regis productus eſt, quo uiſo obſtupefacti nautæ inficias ire nō potuerunt. Hinc duo ſimulachra ærea apud Tænarū facta ſunt. Delphinus uehens, & homo inſidens. Delphinus piſcis eſt, uel potius maris bellua oīum non modo marinorū, ſed etiā terreſtrium animalium uelociſſimus penè uolucrē æquans, & niſi multum infra roſtrū os illi foret, medio penè in uentre, nullus piſcium celeritatem eius euaderet. Sed affert morā prouidentia naturæ, quia, niſi reſupini non corripiunt, quæ cauſa præcipue uelocitatem eorū oſtendit, nam cum fame concitati fugientem in uada piſcem ꝑſequendo diutius ſpiritum continuere, ueluti arcu emiſſi ad reſpirandum emicant tanta ui exilientes, ut plerunq; uela nauium tranſuolent. Iuncti agunt uera cōiugia, pariunt catulos decimo menſe. interdum binos nutriunt uberibus, ſicut balæna. Geſtant fœtus infantia infirmos, & adultos quoq; comitantur, magna erga partus caritate. Adoleſcunt celeriter, et decem annis ad ſummam magnitudinem ꝑueniūt, uiuuntq; tricenis, qđ cognitum eſt aliquorum caudis præciſis. Occultantur tricenis diebus circa canis ortum incognito modo, quod certe mirandū eſſet, ſi ſpirare in aqua negrent (ut ſentit Ariſto.) qui neq; hūc, neq; aliqđ animal ſine pulmone ſpirare poſſe affirmat, quaſi non poſſint pulmonis uice alia alijs ſpirabilia ineſſe uiſcera, ita uolente natura, ſicut et pro ſanguine aliquibus aliū humorē ineſſe conſpicimus. Nā in aquas penetrare hunc uitalē ſpiritum qs miretur: cum uideat in terrā quoq; tanto ſpiſſiorē penetrare, ut talpæ, et cætera animalia defoſſa oſtendunt. Spirare certe piſceis duo illa indicia eſſē uidētur. Primū qđ æſtiuo calore quædam eorū anhelatio notatur. Secundo quod bullantiū aquarū ſufflationem ſæpenumero uidemus. Sed, ut ad Delphinos reuertamur, Lingua eſt ijs contra naturam aquatiliū mobilis pro uoce, gemitus humano ſimilis, dorſum repandū. Roſtrum ſimū, qua de cauſa nomen Simonis agnoſcere oēs dicuntur. mulcetur muſica arte, præſertim Symphoniæ cantu, hominem non expaueſcit, obuiā nauigijs uenit. Puerorū amore ducitur. Appion uidiſſe ſe ſcribit apud Puteolos Delphinum puerū miro modo amantē, à quo Simon uocatus, uenire ad eum ſolebat, et pinnæ aculeos uelut uagina condens, ne dilectū ſibi corpus laceraret. præbere aſcenſuro dorſum, receptumq; eqtis modo inſidentem per magnū æquor ad triginta millia paſſuum deferre, ad qđ ſpectaculū Roma, atq; omnis Italia concurrebat. Poſtea uero cum idē ille puer à Delphino amatus morbo periſſet, Delphinum ſæpe ad ſolitum litus adnare uiſum, ubi poſtquā puerum, qui in primo uado aduentum eius operiri conſueuerat, nuſquam uidit, deſyderio contabuiſſe, & ipſum quoq; eſſe exanimatum, ac in pueri ſepulchro ab ijs, qui rem cognouerunt, humatum. Alius in Africo litore memoratur fuiſſe ex hominum manibus ueſcens, præbenſq; ſe tractandum, & alludens nantibus, ac ſæpe dorſo uehens, qui ſemel à Flauiano proconſule Africæ unguēto perunctus, odoris nouitate fluctuans, et ferè ſemianimis, per aliquot deinde menſeis latuit. Alium quoq; delphinum in Ialiſo urbe uiſum memorant, qui amore pueri captus, dum abeūtem in litus auide ſeqtur, in arenam inuectus expirauit. Puerū hunc Alexander Magnus, Babyloni Neptuni ſacerdotio præfecit, amorē illū numinis propitij fuiſſe interpretatus. Apollinaris quoque inuẽta ab Hercule memoratur, quæ apud Arabas altercum, ſiue altercagenum, apud græcos hyoſcyamos, hoc eſt faba porcina appellatur. plura eius genera. Vnum nigro ſemine, folijs penè purpureis. ſpinoſum. uulgare. Candidius, & fruticoſius, altius papauere. Tertij ſemen Cotoneis ferè ſimile, omnia inſaniam gignunt, & capitis uertignes. Quartum genus molle, lanugmoſum, pinguius cæteris, candidi ſeminis in maritimis naſcens hoc recepere medici. Vſus ſeminis & per ſe, & ſucco expreſſo. Conſtat etiam folijs mentem corrumpi, ſi plura, quàm quatuor bibantur. fit & ex ſemine oleum, quod & ipſum auribus infuſum, territat mentem, mirifice tamen contra uenenum prodeſt, adeo cõſtat etiam uenena prodeſſe. item ab Hercules Hercule & hercle, & mehercules, & mehercule iurandi aduerbia. Solebant autem uiri ſoli per Herculem iurare, nec unquam per Caſtorẽ, e contrario uero mulieres per Caſtorem iurabant, per Herculem autem deierare eis non licebat. cuius rei ratio erat, quod herculano quoque ſacrificio abſtinebant mulieres, quoniam cum Hercules boues Geryonis per agros Italiæ duceret, ſitienti aliquando, & aquam à quadam muliere petenti, reſponſum eſt, ſe aquam non poſſe præſtare, quod fœminarum deæ, quam græci θεὸν γυναικείαν uocant, celebraretur dies, nec ex eo apparatu uiros guſtare fas eſſet. propter quod facturus Hercules ſacrificium, deteſtatus eſt præſentiam fœminarum, & Potitio, ac Pinario ſacrorum cuſtodibus iuſſit, ne unquam mulierem intereſſe permitterent. Nuſquam igitur inuenire eſt apud probos ſcriptores, aut mehercules fœminam dicere, aut Mecaſtor uirum. Aedepol autem, quod iuſiurandum per Pollucem eſt, & uiro, & fœminæ commune fuit. Quamuis M. Varro affirmet antiquiſſimos uiros neq; per Caſtorem, neq; per Pollucem deierare ſolitos, ſed id iuſiurandum fuiſſe tantum fœminarum, paulatim tamen inſcitia antiquitatis iurare uiros per Pollucem cœpiſſe. Quidam Aedepol dictum uolunt quaſi per ædem Pollucis. item pol. & perpol. & ſimiliter caſtor. & mecaſtor, et perecaſtor, quaſi per ædẽ Caſtoris. Cauſam cur uiri per Caſtorem, & Pollucem non iurent, ſed tantum fœminæ, hanc quidam eſſe affirmant, quod Helenes ſororis ſuæ gratia id fecerint, quod uix frater pro fratre feciſſet. merito igitur mulieres eorum teſtimoniũ implorare uiſæ ſunt, qui in genus ſuum ſeſe tam propitios exhibuiſſent. illud quoq; in ſacris Herculis obſeruatum eſt, ut non cubando, ſed ſedẽdo epularentur. Cornelius Balbus, apud aram maximam obſeruatum, ne lectiſternium fiat. Cuſtoditur in eodem loco, ut omnes operto capite ſacra faciant, quod fit ne quis in æde dei habitum eius imitetur, nam ipſe inoperto capite eſt. Fuerunt autem Romæ ædes duæ uictoris Herculis, una ad portam Trigeminam, altera in foro Boario. Varro ideo uictorem Herculem putat cognominatum, quod omne genus animalium uicerit. Alij tradunt M. Octauium Herrenum prima adoleſcentia tibicinem fuiſſe, poſtea uero arti ſuæ diffiſum, inſtituiſſe mercaturam, & re bene geſta, decimam Herculi pſoluiſſe. Poſtea cum nauigans hoc idem ageret, à prædonibus circunuentum fortiſſime repugnaſſe, uictoremq; receſſiſſe. Apparuiſſe ei in ſomnis Herculem, & ſua opera ſeruatum docuiſſe. Proinde Octauium impetrato à magiſtratibus loco, ædem ei, & ſignum ſacraſſe, uictoremq; inciſis literis appellaſſe, dediſſeq; ei epitheton, quo ſimul & ueterum uictoriarum, & nouæ memoria continetur. Quidam etiam Heraclitum ab Hercule deductum opinantur. Fuit Epheſius philoſophus Eliſonis,

ſiue (ut alij dicunt) Herationis filius, animo nimis elatus, & omneis cõtemnens. Homerum dignum dicebat, qui de certaminibus eijceretur, & colaphis cæderetur. Nullumq; præceptorem habuiſſe ſeſe, ſed per ſe omnia didiciſſe gloriabatur. Scripſit de republ. & iis, quæ ad deos pertinent, librumq; in tẽplo Dianæ repoſuit, obſcure ſcriptum, ut ſoli docti poſſent intelligere, ne ſi in uulgi notitiam deueniret, contemptui haberetur. Accedere ad Darium Perſarum regem benigne eum inuitantem noluit, uerum in montana ſeceſſit, ubi herbas tantum depaſcens, incidit in morbum aquæ intercutis, propter quod in urbem aliquando reuerſus, ſciſcitabatur medicos per ænigmata, an poſſet ex imbre ſiccitatem facere, quibus minime intelligentibus, præſepe ingreſſus Bubulo fimo ſe obruit, ratus ſe eo calore ſiccare humorẽ poſſe. Sic annum ætatis ſuæ ſexageſimum agens, interijt. Fuerunt & alij quatuor Heracliti. Primus poëta lyricus. Secundus Halicarnaſeus ſummæ uir elegantiæ. Tertius Leſbius, qui Macedonum ſcripſit hiſtoriam. Quartus uir ridiculus. Heracleæ quoque quinq; fuiſſe leguntur præ cæteris inſignes, una in radicibus Oetæ montis, in plano ſita, quam Aſaris flumen abluit. Alia in propontide, quæ prius Perinthus uocabatur, in qua Amphitheatrum fuit, unum è ſeptem ſpectaculis orbis terrarum. Tertia in Ponto Bœotiorum Colonia. Quarta, de qua ſupra diximus. iuxta oſtia Rhodani. Quinta in Campania Italiæ, quæ & Herculaneum dicta eſt, incumbens mari iuxta Pompeios, & promontorium habens mirum in modum uentis afflatum, quos uocant Eteſias, propter quod ſaluberrimum ibi eſſe aërem conſtat. hanc urbem tenuere Oſci, ſicut Pompeios, quos Sarnus amnis abluit. Poſtmodum Thuſci, & Pelaſgi, deinde Samnites, eratq; Nolæ, & Nuceriæ emporium, non longe à monte Veſuuio, qui amœniſſimis agris incolitur, excepto cacumine. id magna ex parte planiciem habet, ſed infructuoſum eſt, & cinere ſcatens, cauernoſa præ ſe ferens antra plena aduſtis lapidibus, ut facilis coniectura ſit, ea loca quondam arſiſſe, ſed defeciſſe flammas ceſſante materia. Duo præterea in Italia portus ab Hercule nomen ſortiti ſunt. Alter in brutijs iuxta Hipponem Locrorum oppidum, quod poſtea obtinuere Romani, & mutato nomine Vibonem Valentiam appellauere. Ad hunc locum Proſerpinam è Sicilia ad legendos flores ueniſſe exiſtimant, quoniam amœniſſima regio eſt, & floridiſſima prata. hinc apud matronas conſuetudo inualuit, ut collectis ex floribus coronas texant, quoniam diebus feſtis emptas geſtare, uitio datur. Alter in Liguriæ finibus, ac Thuſciæ, qui dicitur portus Herculis Monœci, non longe à populo uia ſinus eſt, in quo tumulus ſublimis, ubi ædificatum eſt oppidum, ſub quo portus Herculis Monœci, ſiue portus Monœcius. habet enim templum Herculis cognomento Monœci, quoniam is in eo habitet ſolus, eſt quippe ſtatio quædam non multarum, nec magnarum nauium capax. Fecit Polycletus Scycionius Ageladis diſcipulus nobiliſſimus artifex Herculem, qui Romam tranſlatus fuit Anthæum à terra ſuſtinentem. & Myron Eleutris natus alter Ageladis diſcipulus Herculem alterum, qui ob nobilitatem operis apud Circum maximum in æde Pompeij magni collocatus fuit. & Eurycrates Lyſippi Sicyonij filius Herculem Delphis, omnes ex ære. At Zeuſis Heracleotes Herculem infantem pinxit dracones ſtrangulantem, Alcmena matre corãm pauente, & Amphitryone admirante. hic nobiliſſimus pictor fuit, cum quo cum Parrhaſius alter excellens pictor in certamen deſcendiſſet, detulit uuas pictas tanto ſucceſſu, ut in Scenam aues aduolarint. At Parrhaſius linteum pictum traditur detuliſſe, ita uerita-

te repræſentata, ut Zeuſis alitum iudicio tumens flagitarit, remoto tandem linteo picturam oſtendi, intellectoq; errore palmam cõceſſerit ingenuo pudore, quoniam ipſe aueis fefelliſſet, Parrhaſius autem ſe artificem. Pinxit & Parrhaſius Herculem in tabella, quæ cum Rhodi eſſet, ter fulmine ambuſta, nec unquam obliterata, hoc ipſo miraculũ auxit. item Vlyſſes nobiliſſimus pictor, qui ſe Abrodietum, quod græce ſignificat delicatum, atque elegantem cognominauit, Herculem Lyndi fecit, talem à ſe hunc pictum aſſeuerans, qualem ſæpe in quiete uidiſſet. Apelles quoque, qui pictura omneis ſuperauit, Herculẽ auerſum pinxit, qui Romæ in Antoniæ templo uiſus eſt, cuius faciẽ oſtendere potius ars, quàm promittere uidebatur. item Artemon Herculem pinxit cum Deianira laſciuientem, & alterum Herculem, ab Oeta monte exuta mortalitate conſenſu deorum in cœlũ euntem. Item Laomedontis circa Herculem & Neptunum hiſtoriam, quæ tabellæ inter eas, quæ in porticibus Octauiæ fuerunt, nobiliſſimæ habitæ ſunt. At Nicæarchus pinxit Herculẽ triſtem inſaniæ pœnitẽtia, per quã uxorem, & filios occiderat. ſed in maxima admiratione fuit Herculis ex marmore ſtatua à Mneſtrato facta, quam uiuam iudicare ſpectantium oculi cogebantur. Viſus etiã fuit in Pantheo Agrippæ templo Romæ Hercules è marmore humi ſtans ſingularis admirationis, ad quem Pœni omnibus annis humana uictima ſacrificare conſueuerant, ita omnes artifices hunc maxime inter omneis deos eligebant, quẽ perpetua memoria celebrem toto orbe reddere conarentur. quin & Corinthijs uaſis imprimi à ueteribus ſolebat. Martialis de Hercule corinthio. Elidit geminos infans, nec reſpicit, angueis. Iã poterat teneras hydra timere manus. & etiam figulinis operibus. idem de Hercule fictili. Sum fragilis, ſed tu, moneo, ne ſperne ſigillum. Non pudet Alciden nomen habere meum. LEONEM NEMEES. Leonem ſyluæ Nemeæ, de quo ſupra diximus. Leo generoſiſſimus eſt omnium animalium, tum præcipue, cum colla, armoſq; ueſtiunt iubæ, quod ætate accidit ijs, qui è leone concepti ſunt. Naſcuntur quippe ex Pardis, qui iubis carent, præſertim in Africa, ubi propter penuriã aquarum ad paucos amneis multitudo ferarũ conuenit, ideo multiformes ibi animalium partus, mutuo ſeſe miſcentibus diuerſorum generum animalibus. Vnde ortum eſt illud prouerbium. Semper aliquid noui Africam afferre. Alexander Magnus noſcendi naturas animalium deſyderio inflammatus, Ariſtoteli philoſopho in omni diſciplinarum genere excellenti, ſcribendi de ijs prouinciam delegauit, ei aliquot millia hominum in totius Aſiæ, & Græciæ tractu parere iuſſit, quibus uenatus, aucupia, piſcationes curæ eſſent, quiq; uiuaria, armenta, aluearia, piſcinas, auiaria haberent, nequid uſquam genitum ab eo ignoraretur. Hos igitur percuntando quinquaginta illa de animalibus præclara uolumina ſcripſit. in ijs ergo Ariſtoteles tradit Leænam primo fœtu quinque catulos parere, ſecundo quatuor, ac per ſingulos annos uno minus. Poſtquam uero unum tantum pepererit, ſterileſcere. Atq; fœtus ipſos initio informes, ac minimas carnes eſſe, magnitudine muſtellarum, nec niſi bimeſtres moueri, ſemeſtres uix ingredi poſſe. In Europa autem inter Acheloum tantum, de quo ſupra diximus, & Neſſum Thraciæ amnem iuxta Abderam fluentem, & Pangei montis ima ambientem, ubi Diomedes hoſpites ſuos equis apponere ſolebat, leones reperiri, ſed longe præſtantiores ijs, quos Africa, & Syria nutrit. Leonum duo genera eſſe, compactile, & breue criſpioribus iubis, hos timidiores eſſe, quàm longo ſimpliciq; uillo, illos uulnerum eſſe contemptores. Vrinam mareis crure ſublato reddere quemadmodum canes. hanc grauem odore eſſe, nec minus halitum. Ra-

ro hoc animal potare, ueſci alternis diebus. Poſt ſaturitatem aliquando triduo ieiunare. in mandendo quæ poſſint ſolida deuorare. Quando aluus grauatur, inſertis in ora unguibus ſponte protrahere. idem etiam facere poſt ſatietatem, quando eſt fugiendum, longitudinem uitæ eorum ex eo apparere, quod pleriq; dentibus defecti reperiuntur. Polybius ſcribit in ſenecta ab ijs hominem appeti, quoniam ad perſequendas feras non ſuppetant uires. Tunc obſidere Africæ urbes, eaq; de cauſa cruci fixos ſe uidiſſe, ut cæteri metu ſimilis pœnæ abſterrerẽtur à noxa. Leones tantum ex feris clementia utuntur in ſupplices, proſtratis parcunt. Vbi ſæuiunt, in uiros prius quàm in fœminas fremunt, infanteis non attingunt, niſi in magna fame. Eorum animi index eſt cauda, ſicut equorum aures. uim ſummam in pectore habent. Satiati innoxij ſunt. Generoſitatem in periculis maxime oſtendunt, ſpernentes tela. & ſe terrore ſolo diu tuentes, ac ueluti cogi ad ſæuiendum ſeſe teſtantes. Vrgente canum, ac uenatorum magna ui contemptim reſiſtunt, cæduntq; in campis. Vbi uirgulta, ac ſyluas penetrauerint, acerrimo curſu feruntur quaſi turpitudinem latebris tegentes. Vulnerati mira obſeruatione percuſſorem nouerunt, & in quantalibet multitudine appetunt. Eum uero, qui tela quidem miſerit, ſed non uulnerauerit, correptum ſternunt, nec uulnerant. Morientes humum mordent, & dant lachrymam leto. Cum pro catulis fœtæ dimicant, aciem defigunt in terram, ne uenabula expaueſcant. Carent dolis, nec limis intuentur oculis, nec ita uideri uolunt. Timet tamen tam ferox animal rotarum orbeis circumactos, & currus inaneis, & criſtas, cantuſq; gallinaceorũ, ſed maxime igneis. Aegritudinem faſtidij tantum ſentiunt, in qua medetur eis contumelia, et annexarum eis ſimiarum laſciuia in rabiem agit. Guſtatus deinde ſanguis remedio eſt. Illud quoque admiratione dignum, quod condito in corporis uaginas unguium mucrone gradiuntur, & aduerſis falculis currunt ne refringantur, hebetenturq; ungues, quos non niſi appetendo protendunt. idem quoque & pardi, & pantheræ faciunt. Plurium leonum ſimul pugnam primus Romæ edidit Scæuola Publij filius in ædilitate curuli. Centum iubatorum, primus omnium L. Sylla, qui poſtea dictator fuit in pretura. poſt quem Pompeius magnus habuit in circo CCCXV. Cæſar dictator quadringentos. Capere eos quondam difficile fuit, & non niſi foueis. Principatu Claudij Cæſaris caſus rationem docuit tã generoſo animali certe ignominioſam, paſtoris getuli ſago contra irruentis impetum obiecto, quod ſpectaculum mox in arenam translatum eſt, tanta illa feritate ſupra quam dici poteſt torpeſcente, capite quamuis leui iniectu operto, ita ut ligetur non repugnans, ueluti uis omnis conſtet in oculis. Ex quo fit minus mirum, quod dicitur à Lyſimacho ſimul incluſo iuſſu Alexandri ſtrangulatum leonem. iugo ſubdidit eos, primuſq; ad currus iunxit Romæ, quo etiam per Italiam uectus eſt M. Antonius bello ciuili malo quodam præſagio, quod etiam generoſi ſpiritus poſſent iugum ſubire. Primus leonem tractare auſus eſt, & oſtendere manſuefactum Hanno Carthaginenſis, propter quod damnatus fuit, quod nihil non perſuaſurus uir tam artificis ingenij uideretur, & male ei credi libertas, cui feritas uſqueadeo ceſſiſſet. Extant clementiæ leonum complura exempla. Mentor Syracuſanus in Syria, cum forte Leoni obuiaſſet, ſeſe ſuppliciter uolutanti, & quacunq; fugeret ſe opponenti, lambentiq; ueſtigia quaſi adulari uellet, licet initio perterritus, animaduertit tandem in pede eius tumorem, uulnuſq; & extracto ſurculo cruciatu animal liberauit. Helpis quoq; natione Samius in Africam naue delatus, cum forte iuxta litus minaci hiatu leonem conſpexiſſet, arborem fuga pe-

tijt, Libero patre inuocato, ut præcipuus uotorum locus eſſe ſolet, ubi nullus eſt ſpei ſed nec fugienti, cum poſſet, fera inſtiterat, & procumbens ad arborem hiatu, quo terruerat, miſerationem quærebat. Oſſis fruſtum auidiore morſu adhæſerat dentibus, & cũ ob id paſci non poſſet, inedia ſimul, ac dolore cruciabatur. Deſcendit tandem ille ex arbore, & fragmẽtum ex ore leonis euulſit, quem tradunt quandiu nauis ea in litore ſtetit, retuliſſe Samio gratiam uenationis partem quotidie afferendo. ob quam cauſam Libero patri templum in Samo Helpis ſacrauit, quod græci σωτῆρος νεὼς Διονύσου, ideſt ſaluatoris templum Dionyſij appellauere. Sed longe mirabilius eſt, quod Appion, qui Polyhiſtor appellatus eſt, ſeſe Romæ in circo maximo uidiſſe teſtatur. In ijs ludis inquit, leonum immanitas admirationi fuit. inter quos unus erat corporis impetu, & uaſtitate, terrificoq;, ac ſonoro fremitu, & toris, comiſq; ceruicum fluctuantibus, qui animos, oculoſq; omnium in ſeſe conuerterat. introductus quoq; inter alios plureis ad pugnam beſtiarum Dacus quidam fuerat, ſeruus uiri conſularis, cui Androdus nomen erat. hunc ille leo ubi procul aſpexit, repente quaſi admiratus ſubſtitit. Deinde ſenſim, ac placide ueluti noſcitabundus ad eum acceſſit, tum caudã inſtar adulantium canum clementer, ac blande mouens, hominis ſeſe corpori adiungit, cruraq;, & manus eius propè iam exanimati metu lingua demulcet. Androdus inter illa tam atrocis feræ blãdimenta amiſſum animum recuperat, paulatimq; oculos ad contuendum leonem refert. Tum quaſi mutua recognitione facta, ueluti lætos, ac gratulabundos leonem atq; hominem uiſos fuiſſe. Quare maximos populi clamores fuiſſe excitatos, accerſitumq; à Cæſare Androdum, & cauſam cur tam atrox bellua ſibi uni peperciſſet interrogatum, ibi rem miram, & uix credibilem Androdum narraſſe. Cũ prouinciam Africam pro conſulari imperio dominus eius teneret, iniqs eius et quotidianis uerberibus ad fugam coactum ſe fuiſſe, &, ut à domino terræ illius præſide tutiores latebræ forent, in arenarum ſolitudines conceſſiſſe, eo conſilio, ut ſi cibus defuiſſet, aliquo modo mortem oppeteret. Tum medio, ac flagranti ſole ſpecum quandam nactum remotam, ac latentem in eam ſe recondidiſſe, nec multo poſt ad eã ueniſſe hunc leonem, pede uno debili, atq; cruento edentem gemitus, & dolorem, ac cruciatum uulneris præ ſe ferentẽ, territum ſeſe, ac pauefactum primo aſpectu. Sed poſtquam introgreſſus leo habitaculum illud, ut re ipſa apparuit, ſuum, deliteſcentem conſpexit, mitem ac manſuetum ad ſe acceſſiſſe, ſublatumq; pedem, quaſi petendæ opis gratia porrexiſſe. ibi ſtirpem ingentem ueſtigio pedis eius inhærentem euulſiſſe, conceptamq; ſaniem expreſſiſſe, et ſine ulla iam formidine exiccaſſe, ac deterſiſſe cruorem. Quo facto, leuatum dolore leonem, pede in manibus eius poſito recubuiſſe, & paululum indulſiſſe geni. Poſtea uero ex eo die totum triennium ſe, & leonem in eadem ſpecu, eodemq; uictu uixiſſe. Quippe leonẽ è feris, quas uenabatur, opimiora mẽbra ad ſpecum ferre ſolitum, quæ ipſe, quoniam ignis copia non eſſet, meridiano ſole torrens epulabatur. Sed ubi eum uitæ illius ferinæ moleſtia cœpit, leone uenatum profecto ſpecum reliquiſſe, & tridui uiam permenſum uiſum à militibus, atq; apprehẽſum fuiſſe, et ad dominum ex Africa Romam deductum. Hũc ſtatim rei capitalis damnandum, obijciendumq; beſtijs curauiſſe, percepiſſe ſe iam hunc quoq; leonem olim ſuum fuiſſe captum, & Romam pductum, gratiam ergo ſibi beneficij, ac medicinæ retuliſſe. Quæ cũ Androdus narraſſet, dimiſſum ſtatim à pœna abſolutum fuiſſe, leonemq; ei ſuffragijs populi donatum, quem poſtea loro tenui reuinctũ per urbem ducere uiſus eſt donãtibus paſſim ipſum ære, Leonem uero omnibus uario flore ſpargentibus, ac ſimul

clamantibus, hic eſt leo hoſpes hominis, hic eſt homo medicus Leonis. Leones in Syria nigri naſcũtur (ut tradit Ariſtoteles) et in Aegypto, qui formicæ dicuntur, de qbus ſupra diximus. Leones coëunt auerſi, quẽadmodum Lynces. Cameli. Elephanti. et Rhinocerotes, et Tigrides. À leone terreſtri marinus quoq; leo appellatus eſt, ex cãcrorum genere, de quo ſupra diximus. item chamæleõ, quaſi paruus leo. Naſcitur in India figura, et magnitudine lacerti. niſi crura eſſent recta, et excelſiora. latera uentri iunguntur, ut piſcibus, et ſpina ſimili modo. Eminet roſtrum ſimile ſuillo. cauda prælonga in tenuitatem deſinens, & implicans ſe uiperinis orbibus. ungues adũci. motus tardior, ut teſtudini. corpus aſperum, ut Crocodilo. oculi in receſſu cauo prægrandes, et corpori concolores. nunquam eos operit, nec pupillæ motu, ſed totius oculi uerſatione circum aſpicit. ipſe acceſſus hiãti ſemper ore. Solus animaliũ nec cibo, nec potu alitur, nec alio, q̃ aëris alimento. Circa caprificos ferus, alioquin innoxius, & coloris natura mirabilior. Democritus philoſophus peculiare uolumen de Chamælcõte edidit, plenum mendacijs, nec alia cauſa legendum, q̃ ut ad riſum excitemur, inter cætera uim eius eſſe maximã ſcribit contra accipitrum genus. Detrahere enim ſuperuolãtem ad ſe, et uoluntarium præbere lacerãdum cæteris animalibus. Ab hoc & chamæleon herba appellata ob uarietatem foliorũ. Mutat enim cũ terra colores, hic niger, illic uiridis, alibi cyaneus, alibi croceus, & alijs coloribus. Duo eius genera. marem dicunt, cui flos purpureus eſt, Fœminam, cui uiolaceus. Vno naſcũtur caule cubitali, craſſitudine digitali. Quidã buphonẽ nominãt, q̃d à bobus deuorata angina eas necat. Græce quippe βοῦς Bos dicitur, φόνος mors. Alij cynozon uocant, quod fœtore eius ricini è canum auribus decidãt. κύων enim canis eſt, ὄζειν fœtere. Chamæleõtem quidam Ixion uocant, quod quibuſdam in locis uiſcum gignit album ſub alis foliorum maxime circa canis ortum. Apud græcos enim ἰξὸς uiſcum, dicitur. Cum hac herba idem Democritus ſcribit ſiniſtrũ pedem chamæleontis torreri in furno, additoq; unguento in paſtillos digeri, eos in ligneo uaſe cõditos præſtare, ut qui gerit, omnino ſit inuiſibilis. À leone etiã leontophonos dicitur, de quo ſuperius diximus paruũ animal, nec alibi naſcẽs, quàm ubi leo naſcitur, quo guſtato, ſtatim leo expirat, iccirco corpus eius aduſtum aſpergunt alijs carnibus polentæ modo, & ita leonibus inſidiantur, ac etiam cinere necant. Non immerito igitur hoc odit leo, uiſumq; dilaniat, & citra morſum exanimat. ille contra urinam ſpargit prudens. hanc quoq; leoni peſtiferũ eſſe. et leõtopetalon herba, quam alij rhopadiõ uocant, folio braſſicæ, caule ſemipedali. leni. cuius ſemẽ, in cacumine i ſiliqs ciceris modo, radix rapæ ſimilis. grãdis. nigra, naſcitur in aruis. Et leontopodion alia herba, quam & lithoron. & dorypetron. & toropetron uocant, caulibus ueluti roſæ capita ſuſtinens, naſcitur in campeſtri, & gracili ſolo. Semen eius lymphaticas ſomnia facere dicitur. & os leonis alia herba florem faciens purpureum

Item Leopardus, qui ex leone, & panthera natus eſt, uel ex pardo, ac leæna nigris maculis leoninam pellem diſtinguentibus. Pardus animal eſt, cuius fœmina pardalis dicitur & panthera, quaſi tota fera, quippe πᾶν græce totum dicitur. θὴρ fera. Sæuiores in hoc genere ſunt fœminæ, quàm mares. Numeroſæ ī Hyrcania, minutis orbiculis ſuperpictæ, ita ut oculatis ex fuluo circulis, uel cærulea, uel alba diſtinguatur tergi ſuppellex, & earum colore mirum in modum quadrupedes omnes ſolicitātur, ſed capitis toruitate terrentur. Huic ſoli aui furacitas auri, atq; argenti mira eſt. Propterea & Monedulæ dicuntur, quaſi mone-

Sunt etiam qui graculos à gracilitate uocatos exiſtiment propter paruitatem. Gracile. n. tenue dicimus. Hora. Quis multa gracilis te puer in roſa. Turpilius. Noſti quàm ſit gracili corpore. Hoc & gracilens dicitur. Næuius. Vide gracilẽtis colorem, et quàm ſubito factus eſt gracilens. & gracilentum. Ennius. Deducunt habiles gladio ſtilo gracilento. Cicero, Perge & nobis nomina teſtium indica. Virgilius, Pergite pierides. nonnunquam iter ago. Quintilianus, Dum forte in agrum pergenti obuius factus eſſet. Ab hoc pergula deducitur, de qua ſupra diximus. Tranſigo, modo duco. Plynius, Vt æſtatem hanc quietus tranſigam. Modo paciſcor. Vlpianus tamen tranſigere, ac paciſci ita diſtinguit, ut tranſigere in re dubia, & lite incerta, nec finita dicamus. Paciſci uero cum donationis cauſa rem certam, & indubitatam liberaliter remittimus. Paulus uero tranſacta finita'ue intelligit, non ſolum de quibus controuerſia fuit, ſed etiam quæ ſine controuerſia ſint poſſeſſa, ut ſunt iudicio terminata. tranſactione compoſita. longo tempore ſilentio finita. Ab hoc tranſactio deducitur. Abigo, quod proprie eſt expello, quaſi extra ago. Hinc abigere muſcas à facie dicimus. abigere oues. capras. iumenta ab horreis. uineis. pratis. Et abacti magiſtratus dicuntur, qui coacti depoſuerunt imperium, quaſi à magiſtratu expulſi. Nam abacti, lingua gallica ſerui appellantur. Abigere quoque eſt furto tollere, & latrocinari, ſed de pecuarijs dũtaxat animalibus dicitur. Vnde abactores uocantur pecuariorum animalium fures, quos quidam abigeos nominant. Vlpianus, Abigei autem ſunt, qui pecora ex paſcuis, uel ex armentis ſubtrahunt, & quodammodo deprædantur. Et differt abigeus à fure, quoniam fur generale nomen eſt, abigeus autem ſpeciale. Nam ſiquis ouem unam, aut ſcrofam, ſiue equos in ſolitudine relictos abduxerit, is fur dicetur, non abigeus. Qui uero greges ipſos, aut armenta ſubripuerit, uel clàm, uel palàm, abigeus dicitur. Fur à furuo uocitatus eſt, quod furta clàm fiant, & plerunque in nocte. Furuum ueteres atrum dixerunt. à quo furuus. Quippe apud ueteres græcos fur φὼρ dicebatur, à quo furtum deducitur, quod Paulus definit contractionem rei fraudoloſam lucri faciendi gratia, uel ipſius rei, uel etiam uſus eius, poſſeſſionis'ue, quod lege naturali prohibitum eſt admittere. Veteres tamen furtum uocabant, quicquid clàm, & occulte committeretur. Plautus. Manifeſtum hūc obtorto collo teneo furem flagitij. Virgi. Furta paro belli connexæ in tramite ſyluæ. Vt biuias armato obſidam milite fauces. idem metaphoricæ furem pro ſeruo poſuit. Quid domini facient, audent cum talia fures? À fur etiam fit bifur ac trifur. Plau. Verberaliſſime etiā rogitas non fur, ſed trifur, quomodo & triueneficam ſcripſit, hoc eſt ſumme ueneficam. & trifurciferum, hoc eſt ſumme furciferum. Item furem trium literarū hominem uocat. Trium literarum homo es. & aurifur, qui furatur aurum. idem. Et mihi hic aurifur eſt. Et furor uerbum. à quo compoſitum ſuffuror. & furtiuum, clandeſtinum. unde & furtiuæ literæ, ſiue furtiua ſcripta dicuntur, quæ artificio quodam fiunt, ne legi poſſint ab alio, quàm ab eo, ad quē ſcribuntur. Quæ et adulterinæ literæ dicuntur. Gellius. Res quaſdam occultas nuntiare regi furtiuo ſcripto uolebat. Dicuntur etiam literæ per notas ſcriptæ Suetonius de Cæſare in epiſtolis. Si qua occultius proferenda erant, per notas ſcripſit. ideſt ſic ſtructo literarum ordine, ut nullum uerbum effici poſſet, quæ ſi quis inueſtigare, ac perſequi uellet, quartam elementorum literam ideſt D. pro A. & perinde reliquas commutabat. Sed tu FEDERICE Pheretri libellum de furtiuis literis edidiſti, in quo multa eorum genera ſummo ingenio es complexus. item à fur furtim aduerbium, hoc eſt latenter, occulte. & furunculus, quod modo genus eſt muſtellæ ſylueſtris, qua in cauernis coniculi capiuntur. modo tuberculi genus acutum cum inflammatione, & dolore maxime, ubi iam in pus uertitur, qui ubi adapertus eſt, & exit, ſuper apparet pars carnis intus uerſa, pars corrupta ſubalbida, ſubrupta, quem uentriculum quidam furunculi nominant. in hoc nullum periculum eſt, etiam ubi nulla curatio adhibeatur. À furuo etiam, hoc eſt calido, ueteres forbeam genus cibi appellabant. quo calido ueſci ſolebant. item ab ago dego, quod aliquando ſimplicis ſui ſignificatum retinet, ut dego uitam, hoc eſt ago uitam. Lucre. Degimus hoc æui quodcunq; eſt. Aliquando ſignificat abigo expello. detraho. Plau. Nunc ergo iſtum ſoror laborem degam, & diminuam tibi. Idem. Degitur corium de tergo meo. Item. exigo, qđ modo extorqueo ſignificat. Cicero. Et cum eſſet tritici modius ſeſtertijs duobus pro frumento in modios ſingulos duodenos ſeſtertios egiſſe. Modo inueſtigo. Virgli. Lucilius. Veſtimentis frigus, atque horrorem exactum putet. Cicero, Claues ademit, foras exegit. Nonnūquam ago. Virgli. quos improba uentris Exegit cæcos rabies. Plau. Hinc exigere pecuniam dicimur, quæ nobis debetur. et exactores uocantur, qui pecuniam exigunt. & exactio actus ipſe exigendi. & exacta pecunia, cuius nomen Vlpianus non modo ad ſolutionem referendum eſſe, ſed etiā ad delegationem putat, hoc eſt, cum pecuniam, quæ nobis debetur, alteri aſſignamus. Tunc enim exacta à nobis dicitur, etiā ſi ille nondum ſoluerit. Exactum etiam pro præterito ponimus. Virgili. Ac tribus exactis, ubi quarta acceſſerit æſtas. idem. Exactum ad menſem inquit, hoc eſt uſq; ad menſis ultimam partem. À quo exacti menſes appellantur, qui circa partum ſunt. idem. exactis grauidæ cum menſibus errant. Eleganter etiam exactum dicimus exhauſtū & ſuperatum. Sene. Vt tot procellis, tempeſtatibuſq́; exactis, aliquando in portum ueniamus. Veteres in hunc ſenſum exanclatum uſurpauere. Cicero. Quod exanclauiſſet omnes labores, cum inciderent in mortis malum ſempiternum. Idem. Vt tot exanclatis laboribus aliquando quieſceremus. proprie tamen exanclare haurire erat. Plau. Næ iſte ædepol uinum populo exanclauit. Et aliquando pro perficere ponebatur. Pacuuius. Nō pōt Menalippe hic ſine tua opera exanclari clauus. Quintilianus hoc uerbum, ut nimis uetuſtum uitandum putat. Mihi certe inſtar flagitij uidetur aliquid uitandum affirmare, quo parens latinæ linguæ Cicero fuerit uſus. Detur ſanè uitio (ſi ita placet) Salluſtio, quod nimium antiquis M. Catonis uerbis uſus fuerit, exprobratione etiam illius epigrammatis. Et uerba antiqui multū furate Catonis Criſpe Iugurthinæ conditor hiſtoriæ. Reprehendantur & alij, quod uel nimis ſequaces uetuſtatis, uel ipſi uerborum nouatores fuerint. Nos nihil non ſumme elegans, politum, uereq́; Romanum putemus, quo Cicero uel ſemel fuerit uſus. Item ab ago fit compoſitū macto quaſi magis augeo, de quo ſuperius diximus. Et prodigo, quod modo portendo, & præmonſtro ſignificat. Vnde prodigia dicta, & prodigiatores, de quibus ſupra diximus. Modo conſumo, à quo prodigus dicitur luxurioſus, & bona ſua conſumens. Et prodigitas, & prodigalitas effuſio, & liberalitatis exceſſus. prodigas hoſtias uocabant ueteres, quæ conſumebantur. & prodige aduerbium profuſe. luxurioſe. Item ſubigo, quod modo eſt acuo. Virg. Subigunt in cote ſecures. Modo attrecto, agito. Cato. Farinam in mortarium indito. aquam paulatim addito. ſubigitoq́; pulchre. Cice. Cum autem miraretur Lyſander, et proceritatem arborum, & directos in quincuncem ordines, & humum ſubactum, atq; puram. hinc aliquando pro exerceo, ac mollio ponitur. Idē, ſubacto mihi ingenio opus eſt, ut agro non ſimul ſubacto, ſed nouato. Aliquando pro ſubdo. ſubiugo. Virgi. Ternaq́; tranſierint Rutulis hyberna ſubactis. Quandoq; pro urgeo. compello. Idem. Ab hoc fit aliud compoſitum proſubigo, quod ſignificat fodio. Virgi. Et pede proſubigit terram. Ambigo, quod proprie ſignificat circumago. Vnde ambactus circumactus, & ambages uerborum circuitus dicuntur. Idem. Longæ ambages. Quoniam uero ij, qui in ancipiti ſunt, circumuertere mentem, et agitare animo ſolent, factum eſt, ut ambigo pro dubito capiatur, quāuis ſint, qui ab ambo potius deductum ambigo uelint. Vnde ambiguum definiunt, quod in ambas agi partes poteſt, quod falſum eſt, quia non duobus tantum modis, ſed pluribus etiam, quod ambiguum eſt, intelligi aliquando poteſt. Quidam dicunt omne uerbum natura ambiguum eſſe, quod ex eo duo, uel plura accipi poſſunt. Alij nullum uerbum ambiguum eſſe opinantur. Nam ambiguū uerbi natura eſt, ut qui id dicat,

duo uel

duo, uel plura dicat, ſed nemo duo, uel plura dicit, qui ſe ſentit unum dicere. Nam, cum ipſe unum dico, tu aliud accipis, obſcure dictum eſt, non ambigue. Græci tamen ab ἄμφω, quod eſt ambo amphibolum, hoc eſt ambiguū dicunt. À quo amphibologia figura, cum ſermo dubium habet ſenſum, quale fuit illud Apollinis reſpōſum. Aio te Aeacida Romanos uincere poſſe. Ab ambigo ambiguitas fit, hoc eſt dubitatio. & ambigue aduerbium, dubie. Quidam ango quoque ab an, & ago compoſitum opinantur, quod ſignificat crucio. Etenim qui cruciantur, in diuerſum agi uidentur. Sed ego à græco potius deductū exiſtimo, quod eſt ἄγχω, ideſt ſtrangulo, à quo ſynanche deducitur. Morbus fauciū eſt peſtifer, atq; acutus. Sortitur autem diuerſum apud græcos nomen, prout ſpecies diuerſæ. Cum. n. neque rubor, neq; tumor ullus apparet, corpus aridum eſt, uix ſpiritus trahitur, membra ſoluuntur, à ſue, cui hic morbus cum homine communis eſt; συνάγχην, hoc eſt ſynanchen uocant. Cum uero lingua, facieſq́; cum rubore intumeſcunt, uox nihil ſignificat, oculi uertuntur, facies pallet, ſingultuſq́; eſt à cane κυνάγχην, hoc eſt cynanchen nominant, quod latrare, qui id morbi patitur, non loqui uideatur. Vbi uero tumor tantummodo, & rubor eſt, cætera non ſentiuntur, id παρασυνάγχην, hoc eſt citra ſynanchen appellant. À latinis uno nomine ab angendo angina dicitur. Plautus, in anginā ego nunc me uellem uerti, ut ueneficæ illi fauces prehendam, atq; enecem ſceleſtam ſimulatricem. Tradunt Demoſthenem, cum in concione Athenis neſcio quid petentibus Mileſiorum legatis aduerſatus fuiſſet, pecuniam ab illis, ne quid aduerſus eos poſtridie diceret, accepiſſe. Quapropter ſequenti die prodiſſe in forum lana multa collum, ac ceruices inuolutum, & cum rogaretur, reſpondiſſe ſe ſynanchen pati, ideoq́; contra Mileſios loqui non poſſe. Quapropter unum è populo exclamaſſe, non ſynanchē, quod pateretur, ſed argyranchen eſſe, hoc eſt non gutturis morbum, ſed argenti. hoc ipſum poſtea Demoſthenem fuiſſe confeſſum. Nam, cum interrogaſſet Ariſtodemum fabularū actorem, quantum mercedis uti ageret accepiſſet, & Ariſtodemus talentum reſpondiſſet. At ego inquit, plus, ut tacerem, accepi. Ab angina Angeronia dea uocitata eſt, cui ſacra à Romanis inſtituta ſunt, cum angina ciuitas uexaretur. eius feſta angeronalia ſunt uocitata. putabant enim ab hac dea populū eo morbo præmiſſo uoto, fuiſſe liberatū, huic pōtifices in ſacello Volupiæ ſacrum faciebant. Quam Verius Flaccus Angeroniam dici ait, ꝗ angores, ac ſolicitudines animorum propitiata depellat. Sunt qui ſcribant ſimulachrum huius deæ ore obligato, atque ſignato in ara Volupia propterea collocatum, quod ꝗ ſuos dolores, anxietateſq́; diſſimulant, perueniant patientiæ beneficio ad maximam uoluptatem. Anginam uinariam dicuntur habere, qui uino ſuffocantur. Ab ango angor deducitur, quod eſt animi, et corporis cruciatus. & anxius ſolicitus, mœſtus. à quo anxietas, & anxie aduerbiū. et anxitudo pro āxietate. Accius, Perſuaſit mœror anxitudo, error, dolor. Idē, ubi cura eſt, ibi anxitudo acerba. Cice. Quartaq́; anxitudo prona ad luctū, & mœrens ſemper, & anxifer. Cicero in Arato. Tu tamen anxiferas curas requiete relaxas. Item ab ago Agenoriam deam Romani uocauerunt, quæ ad agendum excitaret, ſicut Stimulam, quæ ad agendum ultra modum ſtimularet. Et econtrario Murceam, quæ præter modum non moueret, ac faceret hominem, ut ait Pomponius, murcidum, hoc eſt, nimis deſidioſum. Plautus. Murcide homo, ignaue, iners. Item ab ago cogo, quod interdum ſignificat urgeo. Teren. Iubes ne? iubeo, cogo, atq; impero. interdum in unum colligo, congrego. Cice. Cœlum hoc, in quo nubes, imbreſq́; coguntur. Teren. Quaſi ad talenta quindecim coēgi. à quo coquo cum eius deriuatiuis, de quibus inferius dice

Cice. Si uiuendi finis eſt optimus, cum integra mente certiſq́; ſenſibus opus ipſa ſuum eadem, quæ coagmentauit natura diſſoluit. Et coagulo conſtringo. denſo. Cuius paſſiuum eſt coagulor. Gel. Semen in utero mulieris, primis ſeptem diebus conglobatur, coagulatur, fitq́; ad capiendam figuram idoneū. Hinc coagulum ea pars uiſcerum, qua ad denſandum lac utimur, quod in hœdo præcipue laudatur. Nam leporis prorſus inutile eſt. Item coagulum uocatur, quicquid denſat, ac iungit aliquid. Idem. Vinculum illud, coagulumq́; animi, atq; amoris. Varro. Cui nihil iucundius quicquam uiuit, hoc ægritudinem ad medendam inuenerunt. hoc hilaritatis dulce ſeminarium. hoc continet coagulum, conuiuia. Item coagulū herba, ſiue potius ſpongia aquarum dulcium. Quā alij ſtrumum, alij ſtrygnon, alij conferuam uocant, de qua ſupra diximus. Hinc coagulatum, coniunctum, ac conſtrictum dicitur. & coagulatio dēſatio. Cogo quoq; aliquando pro conſtringo, & condenſo accipitur. Virg. nam frigore mella Cogit hyems, eademq́; calor liquefacta remittit. Idem, Cogite oues pueri, ſi lac perceperit æſtus. Vt nuper fruſtra preſſabimus ubera palmis. Cogite inquit, hoc eſt conſtringendo mulgete. Nonnunquam pro imprimo, coarcto. Idem, Quadrifidam quercum cuneis, & forte coactis ſcindebant. item pro ſubigo. Varro Ocimo coacto libamēta legens. Ab hoc coxa, & coxendix deducuntur, eiuſdem ſignificationis, quod ibi femur cum ſuperiori parte coniungatur ac coarctetur. Varro. Lata fronte, naribus ſimis, prolato pectore, laxis coxendicibus. Quoties autem uertebrum ipſum, ſiue os illud, quod in uertebro uoluitur, uitiatum, aut fractum eſt, coxa ipſa uitiata, fracta'ue dicitur. Sub coxa femur eſt ad genua uſq; deductum, & ex lato in anguſtum deſinens. & femen de ꝗbus ſupra diximus, à cuius mollicie dicta eſt fœmina, ut paulo mox dicemus. Femur uero, & femen à ferendo dicta, quod ijs præcipue partibus ſuſtineatur animal, atq; feratur. À coxa fit uerbum incoxo, quod ſignificat in coxā ſedeo. Pacu. Adeo incoxanti mihi pes obſtupuerat. À con uero præpoſitione, & agito fit cogito, qđ eſt mente uoluo, quaſi coagito. Nihil enim aliud eſt cogitare, quā mente agitare. & ueluti in mora eſſe conſilij explicandi. Ab eo fit cogitatio, quæ & cogitatus dicitur, & cogitabundus. & cogitabunde aduerbium. & cogitatim, pro cogitate. & cogitatiuncula diminutiuum. & cogitator, qui aſſidue cogitat. & excogito, quod eſt cogitando inuenio. à quo excogitatio, & ad res tantum incorporeas pertinet, ut excogitaui argumenta, rationes, figuras, cauſas. itaq; excogitare conſilij eſt. item ab ago indago, quod eſt inquiro. à quo indagatio, et indagator. & indagatrix. & indago. ginis. inquiſitio. Hoc nomine Aeneas ab Aſcanio appellatus eſt, cum pugnans cum Mezentio nuſquam apparuiſſet, in cuius nomine templum conſtruxit. Alij indigetes dicunt eſſe deos tutelares, quorum nomina uulgari non licet. Ab hoc ueteres indigitare dixerunt uocare. nominare uero proprio nomine. Macro. Nanque uirgines ueſtales ita indigitant. Tamen experrecti dicuntur, q ſua ſponte uigilare incipiunt. expergefacti, qui ab alio excitantur. quidam expergiſcentiam pro uigilantia uſurparunt, & pro actu ipſo expergiſcendi. item à porrigendo, hoc eſt extendēdo ſe, porrigo appellata. Lucil. Triſtem, & corruptum ſcabie, ac porriginis plenū. Morbus eſt capitis, ubi inter pilos quædam quaſi ſquamulæ ſurgunt, eæq; cutæ reſoluuntur, & interdum madent multo ſæpius ſiccæ ſunt, idq; euenit modo ſine ulcere, modo exulcerato loco. Huic quoque modo malo odore, modo nullo accidente, fereq; id in capillo fit, rarius in barba. Aliquando etiam in ſupercilio. Nā ſycoſis aliud morbi genus eſt, quod à fici ſimilitudine, quem græci σῦκον appellant nomen ſumpſit. Caro excreſcit, et id quidem generale eſt. A' lite igitur litigo, quod eſt diſcepto, contendo. & litigium litis actio. & litigioſum, id, de quo lis eſt. & litigioſus, qui frequens in litibus uerſatur. & aduerbium litigioſe, quod contentioſe ſignificat. & litigator, qui litigat. Cuius fœmininum eſt litigatrix. & litis conteſtatio, quaſi fundamentum ipſum controuerſiæ, ſiquidem litem teſtari dicuntur duo, aut plures aduerſarij, cum ordinato iudicio contendentes, utraque pars dicere ſolet, teſtes eſtote. item à non, & ago nugæ, quod nihil agant. Veteres etiam nuguendos appellabant omneis eos, qui aliquid mulieribus uenderent. nam omnia, quibus mulieres utuntur, pro rebus uanis, atque inutilibus habentur. DE LAVREOLO.

DE LAVREOLO. EPIGRAMMA. VII.

VALITER IN SCYTHICA. Blanditur Domitiano, quod ita in ſpectaculis Laureoli fabulam repræſentari fecerit, ut hiſtoria uideri potuerit. Mos hic imperatorum fuit, eos, qui ultimo ſupplicio damnati erant, ludis exponere, ut cum quadam ſpectantis populi uoluptate interirent. Laureolum poëtæ finxerunt ſceleratiſſimum hominem fuiſſe, & propterea in cruce ſublatum, & à belluis dilaniatum extitiſſe. hæc fabula aliquando repræſentata fuit ſine eius, qui Laureoli perſonam ſubibat pernicie. Domitianus uero quēdam extremo ſupplicio dānatum, ad Laureoli ſimilitudinem cruci affigi iuſſit, & ſerio ab urſa diſcerpi, atq; ita ſpectaculum exhibuit populo rei ueræ, non fictæ. Iuuena. in Lētulum inuehitur, quod in theatro, dum eadem fabula ageretur, Laureoli perſonam ſubijſſet. Laureolum uelox etiam bene Lentulus egit iudice me dignus uera cruce. LAVREOLVS. Is, qui Laureoli perſonam ſubierat. à lauro arbore Laurus, & Laureolus propria nomina deducuntur, & Laura fœmininum. & Laurentius, ac Laurentia, quæ fuit uxor Fauſtuli, Romuli, & Remi nutrix. à qua Laurentalia feſta, quæ in eius honorem fiebant appellata. Solius quippe huius arboris nomen latina lingua hominibus imponitur. Græce δάφνη dicitur. à quo daphnona lauretum uocamus. Maximo in honore apud ueteres fuit dicata triumphis, & ante limina, ac in domibus Cæſarum, pontificumq;, & magnorum uirorum ſeri ſolita. Duo eius genera tradit Cato, delphicam, & cypriam. quidam etiā Muſtaceam addiderunt, quoniam muſtaceis ſubijceretur. hāc eſſe folio maximo conſtat, flaccidoq;, & albicante. Delphicam æquali colore uiridiorem, maximis bacis, atq; è uiridi rubentibus, qua uictores Delphis coronari, & Romæ triumphantes ſolebant. Cypriam folio breui, nigro, ſubcriſpam. Alij & genera alia ſubiunxerunt. Cimum, quā ſylueſtrem laurum intelligunt nonnulli ſui generis arborem, differt colore. eſt enim cœrulea baca. Regiam, quæ cœpit Auguſta appellari ampliſſima & arbore, & folio, bacarum nō aſpero guſtatu. huic quoq; nonnulli ſuum genus aſſignant, longioribus folijs, latioribusq;, Bacaliam appellant hanc, quia bacarum fertiliſſima eſt. Sterilem uero triumphalem. Eſt & taxa, quæ adhibetur topiario operi in medio folio paruulam, ueluti laciniam folij habens. & ſpadonia huic ſimilis præterquàm quod ea lacinia caret. & chamædaphne ſylueſtris frutex unico ramulo ferè cubitali. folijs lauri. item herba, quæ uinca peruinca dicitur. & alexandrina, quam alij Idæam. alij hippoglottion. alij daphnē. alij carpophyllon. alij hypelaton uocant. Ramos ſpargit à radice dodrantaleis topiarij, ac coronarij operis, folio acutiore, quàm myrti. molliore, & candidiore. Eſt & lauri genus, quod daphnoides uocatur. alij pelaſgum nominant. alij euthalen. nonnulli cephalon Alexandri. frutex eſt ramoſus, craſſiore, ac molliore folio, quàm laurus, ex cuius guſtu accenditur odor thuris, bacis è nigro rufis. Corſica olim lauro carebat, nunc paſſim habet. pacifera hæc arbor uocatur, quia etiam inter armatos hoſteis prætenſa, quietis erat indicium. Romani præcipue lætitiæ, & uictoriarum nuntiam habebant. Addebatur literis, & militum lanceis, & pilis, & faſcibus imperatorum. Ex ijs in gremio Iouis optimi maximi deponebatur, quoties uictoria nouam aliquam lætitiam attuliſſet, idq; non quia perpetuo uiret. ſed quia ſpectatiſſima eſt in monte Parnaſſo, ideoq; gratiſſima Apollini. Aſſuetis eò dona mittere etiam Romanis, ut L. Brutus fecit. Fortaſſis etiam in argumentū,

quod ibi is libertatem publicam meruiſſet, Lauriferam tellurem illam oſculatus ex reſponſo. Quidam etiam hanc cauſam afferunt, quod ſola hæc arbor ex omnibus manu ſatis, & in domos receptis non iciatur fulmine. Tiberium principem tonante cœlo coronari ea ſolitum ferunt cōtra fulminum metus. Manifeſto quidem abdicat igneis crepitu, & ueluti quadam deteſtatione. illud memoratu dignum Liuiæ Druſillæ, quæ poſtea Auguſtæ cognomen meruit Diuo Auguſto nupta, ſedenti quondam in aperto, aquilam ſuperuolantem in gremium ex alto candidiſſimam gallinam abieciſſe, uiuam, atque illæſam, quam cum admiraretur, inuenit tenentem roſtro laureum ramum onuſtum ſuis bacis, propter quod conſeruari alitem, & ſobolem iuſſerunt aruſpices. Ramum uero ſeri, ac rite cuſtodiri, quod factum eſt in uilla Cæſarum Tyberi impoſita iuxta nonum lapidem flaminia uia, quæ ob id uocatur ad gallinas, mirumq; ea ſylua prouentum fecit, & ex ea triumphans poſtea Cæſar laurum in manu tenuit, coronamq; in capite geſſit. idem ſecuti poſtea Cæſares fecere, traditusq; mos eſt ramos, quos tenuerunt, ſerendi, ideoq; ea laurus, quæ ſterilis maxime eſt, triumphalis appellata. Conſtat ex hoc ramo ſeri laurum poſſe (quod Democritus, & Theophraſtus negauerant) quidam ob hanc cauſam exiſtimant mutatas coronas triumphaleis ex aureis in laureas. Solius huius arboris folia appellatione diſtinguntur. Dicimus enim lauream coronam ex lauro, non ſic Roſeam, coronam ex roſis, nec querneam, ex quercu, ſed ijs ſubſtantiuum addimus, cum laurea per ſe ſit ſubſtantiuum. A' laurea fit laureo uerbum, quod eſt lauream in capite pono. à quo laureati dicuntur, qui laureis coronati ſunt. Laureati milites ſequebantur currum triumphantis, ut quaſi ſordibus purgati intrarent urbem, uel ut floreret reſp. uideretur quemadmodum laurus ſemper uiret. A' lauro lauretum uocitatum eſt in Auentino locus, ubi ſylua lauri fuit. & imperatores à poëtis lauriferi, & laurigeri dicti. item Laurolauinium urbs Latij. & Laurentum huic propinqua urbs ſolis indigens, à qua Laurentes appellati. Finxerunt etiam poëtæ Daphnen Peneī fluminis filiam fuiſſe, quam cū Apollo amore eius captus perſequeretur, in arborem ſui nominis, hoc eſt laurum fuiſſe mutatam. cuius poſtea folijs citharas, & pharetras ſuas ornare Apollo ſolitus ſit. Item Daphnim Mercurij fuiſſe filium formoſiſſimum adoleſcentem, natum ex Nympha in amœniſſima regione Siciliæ iuxta monteis, quos aërios uocant, dulciſſimis undiq; aquis plenos, & laureis refertos, à quibus nomen accipit. Diodorus hunc ſcribit à nymphis eo in loco educatum boum armenta maxima poſſediſſe, à quorum cura dictum fuiſſe bucolicum, & cum eſſet ingenio acri, Bucolicum carmen inueniſſe, eoq; Dianam frequenter oblectaſſe. CRVCE. Patibulo. Crux, patibulum eſt, in quo figuntur damnati, dictum à græco κρούειν, quod eſt ferire. pulſare. Hanc ueteres gabalum uocauere. Var. Nos barbari, quod innocenteis in gabalum ſuffigimus homines, uos non barbari, quod noxios abſoluitis. à cruce uero crucio uerbum deducitur, hoc eſt torqueo. affigo. à quo crucior paſſiuum. & cruciatus. & crucium uinum, inſuaue, quod bibendo cruciet. & duo compoſita crucifigo. & crucigerulus. item à κρούω cruor, hoc eſt ſanguis, qui ex aliquo uulnere ſpargitur. Vnde cruentus, quod modo pro ſanguinolento accipitur, modo pro ſæuo, & crudeli, ut cruēta uox. cruenta oratio. Cuius contrarium eſt incruentus. Vnde incruentam uictoriam dicimus, quæ ſine cæde hominum fuit. Martialis, Securo cadit incruenta dāno. & cruēto uerbum, hoc eſt cruore inficio. Cuius paſſiuum eſt cruentor. & cruente aduerbium, hoc eſt crudeliter. & cruentatio, quod eſt ſanguinaria fœdatio. Quidam etiam crudum hinc deductum uolunt,

quod proprie recens, atq; acerbum ſignificat, ut crudum ulnus, hoc eſt recens, & quaſi adhuc cruentum. à quo recrudeſcere dicimus, quaſi renouari, & ad priſtinam acerbitatem redire. Hinc crudum uocamus, quod non eſt coctum, à ſimilitudine crudæ carnis, quæ adhuc cruenta eſt. & cruda poma dicuntur, quæ acerba, atque immatura ſunt. Cicero, Poma, quæ cruda ſunt, ui auelluntur. quæ autem cocta, & matura, decidunt. Item crudi cibi, qui indigeſti, & non dum concocti ſunt. Iuuenalis, & crudum pauonem in balnea portas. & crudus homo, cuius ſtomachus cibo offenditur, quod non facile concoquat. Quintilianus, Crudo oratori declamandum non putat. Cicero, quod in cœnam non ueniret, quod eſſet durior. à quo crudus etiam homo appellatur, qui truci aſpectu eſt, quod ita eo oculi noſtri offenduntur, ut ſtomachus cibi cruditate, uel quod facies crudum habentis animum, aſpera, & fœda eſt, ut facies crudum cibum habentis in ſtomacho. Ab hoc fit crudior. crudiſſimus. cruditas. crude aduerbium. præterea crudeo uerbum. à quo crudeſco. & ab eo, quod diximus, recrudeſco. & crudaria argenti uena, quæ in ſumma repta eſt. Item crudelis, hoc eſt aſper. immitis. à quo crudelior. crudeliſſimus. crudelitas. crudeliter. Item à κρούω quidam crura deduci exiſtimant, quod huc, atque illuc ingrediendo feriant. Sunt enim crura à genibus uſque ad inferiorem pedem non æquali modo ducta, ſed teretibus ſuris clementer extantibus, ſenſimq; tenuatis firmata. Sura certe poſterior cruris pars eſt illa carnoſa, quæ in omni animantium genere homini tantum contingit, quamuis apud authores reperiatur, hominem quẽdam in Aegypto ſuris caruiſſe. à crus fit diminutiuum cruſculum. Item à cruo crumena, hoc eſt loculus, quod è brachio pendẽs huc, atque illuc feriat. Eius diminutiuum eſt crumenula. Item cruſta, quod feriendo frangatur. Cruſta enim fœminino genere fragmentum tenue ſignificat lapidis, aut ligni, aut uitri, aut gelu, aut alterius huiuſmodi. Virgilius, Concreſcunt ſubitæ currenti in flumine cruſtæ. Plynius, Lithoſtrata cœpere iam ſub Sylla paruulis certe cruſtis. Cruſtum uero in neutro genere fruſtum panis, aut placentæ, aut alterius edulij ſignificat. Virgilius, Et uiolare manu, malisq; audacibus orbem Fatalis cruſti. À cruſta fit diminutiuum cruſtula. Apuleius, Paruas marmoreas cruſtulas parieti adiungens. À cruſto uero cruſtulum. Horatius, pueris olim dant cruſtula blandi Doctores. Iuuena. Nos colaphum incutimus lambenti cruſtula ſeruo. Item à cruſta fit cruſto uerbum. à quo incruſto, quod eſt cruſtam duco, ſiue cruſtam applico. unde cruſtatio, ſiue incruſtatio deducitur, cum cruſtæ parieti, aut pauimento, aut uaſi applicantur. Hinc uaſa cruſtata dicuntur, quæ uitreis cruſtis tecta ſunt. À quibus cruſtariæ tabernæ uocitatæ, in quibus eiuſmodi opera uenduntur. Cruſtam etiam ducere ulnus, ſiue ulcus dicitur, quando ſolidatur, qua detracta, ferè remanet cicatrix. Eſt enim cicatrix ſignum, quod ex ulnere, ſiue ulcere remanet. à quo cicatricare dicimus, cicatricem ducere. & cicatricoſum plenum cicatricibus. item à cruſtis lapidum eo in loco frequentibus, & naturaliter ita genitis, Cruſtumium, Thuſciæ oppidũ. à quo cruſtumini. & cruſtumina tribus. & cruſtumia pira, ex parte rubentia, quæ & cruſtumina dicuntur. SIC. Ita, eo modo, ſic, & ita eodem ferè modo accipiuntur. Aliquando enim ſimilitudinis ſunt. Virgilius, Non ſic aggeribus ruptis cum ſpumeus amnis Exit. Quintilianus, Quod ut optimum, ita longe difficillimum. Aliquando optantis. Virgilius, Sic tua cyrnæas fugiant examina taxos. Propertius, Sic umbroſa tibi cõtingant tecta Priape. Pacu. Ita te dij amẽt, ita tibi pro uoto ſecundent omnia. Nonnunq̃ illatiuæ coniunctiones ſunt, & pro igitur uſurpantur. Cicero, Sic tot ſimul uirtutes continẽ-

tiæ. grauitatis. iuſtitiæ. fidei defecerunt. Idem ita nobiliſſima ciuitas Græciæ, & olim potẽtiſſima ſepulchrum ciuis ſui ignoraſſet, niſi ab homine arpinate didiciſſet. Sed in hac ſignificatione nunquam ei antecedit in eadem ſententia altera dictio. Frequentius tamen in hoc ſenſu duo ab ijs compoſita uſurpantur. ſicq;, & itaq;. eſt etiam quando hæc duo aduerbia pro ualde accipiuntur. Apuleius, Nec ego rebar ſic multorum id opus dierum eſſe. Quintilianus, Nec res eſt ita magni temporis, & laboris. ſic aliquando apud authores duplicatum inuenitur. Virgilius, ſicſic iuuat ire ſub umbras. quod maioris expreſſionis eſt. Neque mihi probabile uidetur, quod aliqui dicunt, alterum hoc loco interrogatiuum, alterũ confirmatiuum eſſe, ut ſit ſenſus. Placet ſic inultam perire? placet. À ſic compoſita fiunt ſicine, quod interrogantis eſt. Plautus, Sicine tu illam? ſicine nos habes ludibrio omneis? Item ſicut, quod proprie ſimilitudinis eſt. Plynius, Quod ſcilicet ſicut mihi conſtitutum erat, expreſſi. Aliquando tamen non res ſimileis complectitur, ſed diuerſas, & planè contrarias. Quintilianus, Sed hæc eloquendi præcepta ſicut cognitioni ſunt neceſſaria, ita non ſatis ad uim dicendi ualent, niſi illis quædã facilitas, quæ apud græcos λέξις nominatur, acceſſerit. Quod per ut etiam dici frequentius inuenitur. Idẽ, Quod ut optimũ, ita longe difficillimum. Habet etiam ſicut nonnunquam uenuſtatem, atque utilitatem magnam, quoties antecedentem ſententiam adnectit cum ſequenti. Idem, Sunt & alia ingenita quædam, quæ adiuuant. uox. latus patiens laboris. ualetudo. conſtantia. decor, quæ ſi modica obtigerunt, poſſunt ratione ampliari, ſed nonnunquam ita deſunt, ut bona etiam ingenij ſtudijq; corrumpant. ſicut & hæc ipſa ſine doctore perito, ſtudio pertinaci. ſcribendi. legendi. dicendi. multa & continua exercitatione per ſe nihil proſunt. Plynius, Ferunt Craſſum auum Craſſi in Parthis interempti nunquã riſiſſe, ob id Agelaſtum uocatum, ſicut nec fleſſe multos. In hunc ſenſum etiam alia duo quemadmodum, & quomodo uſurpare frequenter ſolemus. Item à ſic ſicuti eiuſdem cum ſicut ſignificationis. PRAEBVIT. Exhibuit tradidit, ut ſupra diximus. VISCERA. Carnẽ. Lucretius. Viſceribus uiſcus gigni, ſanguenq; creari. Viſcus enim proprie dicitur quicquid ſub corio eſt. Vnde & cor uiſcus appellatur. Plynius, Cæſari dictatori quo die primum ueſte purpurea proceſſit, atque in ſella aurea inſedit, ſacrificanti bis in extis cor defuit. Vnde quæſtio magna de diuinatione argumentantibus, potuerit'ne ſine illo uiſcere hoſtia uiuere. Ab hoc uiſcerari antiqui dixerunt carnem populo diſtribuere. & uiſceratio, diſtributio carnis, quæ fieri ſolebat, uel in ſolenni ſacrificio, uel in funere excellentis perſonæ. Gellius, Tum in Albano uiſceratio Latinis data. Liuius, Secutus eſt annus nullare belli, domi'ue inſignis P. Plaucio Proculo, P. Cornelio Scapula conſulibus, præter quod fragellas colonia deducta, & populo uiſceratio data à M. Flauio in funere matris. & uiſceratim aduerbium, per uiſcera. Ennius, Alia fructus diſſert, diſſipat, uiſceratim mẽbra maria ſparſa ſpumant ſanguine. NVDA. Detecta pelle ſcilicet dilacerata. Nudum enim dicitur, quod ſine tegmine eſt. Virgilius, Nudatosq; humeros oleo perfuſa niteſcit. Vnde per metaphoram nudum aliquando pro inſepulto accipimus, quod ſcilicet aduer ſaxo tectum non ſit. idem, Nudus in ignota Palinure iacebis arena. Ab hoc fit nudo uerbum, quod proprie ſignificat detego. Apuleius, Tum ulnus nudare iuſſus eſt. Aliquando tamen pro indico uſurpatur. Virgilius, traiectaq; pectora ferro Nudauit. Ab hoc fit nude aduerbium, hoc eſt aperte. ſimpliciter. & denudo eiuſdem cum primitiuo ſignificationis. & nuditas, quod modo pro ſimplicitate, modo pro inopia accipitur. Quidam nudum, & nudatum

ita diſtinguunt,

ita diſtingunt, ut nudum ſit, quod nunquam tectum fuit, Nudatum uero, quod tectum eſſe conſueuit, ſed nunc tectum non eſt. VRSO Notum animal eſt urſus, cuius fœmina urſa dicitur. Coëunt hyemis initio, non ut cæteræ feræ, ſed ambobus cubãtibus, & ſe mutuo complexis, deinde ſecedunt in ſpecus ſeparatim, in quibus trigeſimo die pariunt ut plurimum quinos. hi ſunt candida, & informis caro, paulo muribus maior. ſine oculis, ſine pilo. unguibus tantum prominentibus. hanc lambendo paulatim figurant. Transfertur tamen & pecten, & pecto ad alia multa. Nam & pectere citharam dicimus, hoc eſt percutere, & diſtendere pectine chordas, hoc eſt plectro. item pectines ſunt, quibus lanarij, & textores utuntur. & pectere lanam, pectere ueſteis dicuntur. à quo & ueſtes ipſæ pexæ appellantur. Plynius, Iſtriæ, liburnicæq; pilo propior, quàm lana pexis aliena ueſtibus, hoc eſt ueſtibus, quæ texun-

tur. nam in texēdo pectinis morſibus ueſtes feriūtur. Ab ijs pexati dicuntur, qui pexis ueſtibus ſunt induti. Martialis. Pexatus pulchre, eſt etiam pecten cratis genus dētatæ ſtylis ferreis ad colendam terram. à quo pectino deducatur. Plynius, ſunt genera terræ, quorum ubertas pectinari ſegetem in herba cogit. à pecten etiam fit pectinatim aduerbium, quod ſignificat ad ſimilitudinem pectinis. ARTVS. Partes corporis, proprie enim artus partes ſunt corporis inter iuncturas connexæ, dictæ, quod inter ſe arctentur, unde minores partes per diminutionem articulos uocamus, quales ſunt digitorum. à quo articuli apud grammaticos. & articulatim aduerbiū, hoc eſt per partes, atque articulos. & deartuo uerbum, quod eſt per artus diuido. à quo deartuatum dicimus per artus cōciſum. Quidam à græco deductum hoc uocabulum exiſtimāt. quippe græci ἄρθρον nominant, & ita diſtinguntur artus à membris, quod artus dicimus oſſa cum neruis, & uenis. Membra autem proprie uocamus carnem artus tegentem. Vnde mēbrana ſuperior membri pars, hoc eſt pellis ipſa appellatur. Sillius, & uenis male iuncta trementibus oſſa Extant conſumptis uiſu deformia membris. Cōfunduntur tamen hæc aliquando apud authores. Ab arto, à quo artus deriuatur, fit coarcto, qđ eſt aſtringo. coniūgo. Vnde coarctatio. & arctus adiectiuum, ſtrictus. & ars, quod per eam opera inter ſe aptentur, quamuis aliqui ἀπὸ τῆς ἀρετῆς, hoc eſt, à uirtute appellatam uelint. Hinc artifices dicti, qui artem ſuam per artus exercēt, à quibus artificium deductum. & artificioſum, arte factum. & artificioſe aduerbium. & quinquertium, quod græci pentathlum uocant, quo die quinq; genera artium in ludis exercebant. & ipſos athletas Liuius quinquertiones appellat. item artitum ueteres dixerunt, bonis artibus inſtructum. Artem definiunt eſſe facultatem, quæ præceptis quibuſdam, ac regulis cōtinetur. Trifariam autem artes diuiduntur. Quædam enim inſpectione, hoc eſt cognitione, & æſtimatione rerum poſitæ ſunt, qualis eſt aſtrologia nullum exigens actum, ſed ipſo rei, cuius ſtudium habet, intellectu contenta, quæ theoricæ uocatur, hoc eſt ſpeculatiua. Aliæ in agendo, quarum hic finis eſt, & ipſo actu perficitur, nihilq; poſt actum operis relinquit, quæ practicæ. i. actiua dicitur, qualis eſt ſaltatio. Aliæ in effectu, quæ operis, quod oculis ſubijcitur, conſumationē, non finem accipiunt. hanc poëticen, hoc eſt factiuam appellamus, qualis eſt pictura, hæc & effectiua, & adminiſtratiua à quibuſdā appellatur. Ab ars compoſita ſunt iners, quod proprie ſignificat eum, qui ſine arte eſt. Lucilius, Iners, qui ſine arte eſt. Sed quoniam qui nullam artem exercent, uel otioſi, uel deſides ſunt, uel ignaui, fit, ut iners aliquando pro otioſus capiatur. Virgil. ſeu ſtabit iners, ſeu profluet humor. Idem, Libertas, quæ ſera tamen reſpexit inertem. Modo pro ignauus. Idem, Spumantemq; dari pecora inter inertia uotis Optat aprum. Ab hoc inertia deducitur, qđ modo pro ignorantia artis, modo pro otio, modo pro ignauia uſurpamus. & inerticulus diminutiuum. à quo inerticula, uuæ genus è nigris, inueterato præcipue cōmendabilis uino, ſed uiribus innoxia, ſiquidem temulentiam ſola non facit, ob id nomen ab inertia ſumens, cum iuſtius ſobria dici poſſet. Item ſolers, quaſi totus ex arte conſiſtens. à quo ſolertia, qđ modo pro acumine, modo pro artificio, modo pro diligentia accipitur. item aſtutus (ut quidam putant) hoc eſt callidus. uerſutus, quaſi tutus. Nos à græco potius deriuari, cenſemus, quod eſt ἄστυ, hoc eſt oppidum, ſiue urbs. Nam qui in oppidis, atque urbibus aſſidue uerſantur, ſiunt callidiores, quemadmodum nos ab urbe urbanum pro lepido dicimus, ita græci ab aſty aſtutum pro callido, & uerſuto. inde etiam aſtus & aſtutia deducuntur eiuſdem ſignificationis. & aſtute ad-

uerbium. à quibus aſtutior. aſtutiſſimus. aſtutius. aſtutiſſime. Apuleius aſtutulus, & aſtutule diminutiua uſurpat. Ars græce τέχνη dicitur, hoc eſt techne, qua uoce & noſtri utuntur. Plautus, qui technas hominis deprehendi ſolus. Hinc technides, artifex dicitur. & calotechnius, bonus artifex. item e contrario cacotechnius, malus artifex. & Galenus medicus opus ſuum technen, hoc eſt artem inſcripſit, quod medici noſtri temporis per inſcitiam tegnum uocitant. LACERI. Dilaniati. Lacerare proprie eſt dilaniare, & quaſi per membra diſcindere. Virgilius, Quid miſerum Aeneā laceras? Tractū à laruis, quæ diſcedēdo corpora dilaniant. Hinc lacerus dilaniatus. & lacerna ueſtis, de qua ſupra diximus. & laciniæ ſciſſuræ extremarum ueſtium decoris gratia factæ. à quo laciniatæ ueſtes. & laceſſo uerbum, quod eſt prouoco, & quaſi lacerando irrito. ideo capitur frequentius in malam partem. Cicero, Sed iuſtitiæ primum munus, ne cui noceat, niſi laceſſitus iniuria. Quandoq; etiam in bonam. idem. Tuis me amantiſſimis libris laceſſiſti, ideſt prouocaſti ad reſpondendum. Lacer à ueteribus dicebatur, qui auribus truncatus erat. VIVEBANT. adhuc palpitabant. MEMBRIS. Carne, ut paulo ante diximus, quamuis membra etiam pro artubus ponantur. item pro partibus, etiam ſi ad inanimata transferuntur. Vnde membratim dicimus, hoc eſt per partes ambitus, quæ græci cola nominant. à noſtris membra dicuntur. à membro fit bimēbris. trimembris. quadrimembris. hoc eſt duarum. trium. quatuor partium. & membroſus, q magno membro eſt. Virgilius; ſi tamen is eſt, q priapea ſcripſit. Sed ruber hortorum cuſtos membroſior æquo. Et demembro uerbum, hoc eſt ſeparo. diuido. STILLANTIBVS. Manantibus cruore. INQVE OMNI NVSQVAM CORPORE, CORPVS ERAT. Senſus eſt, in toto corpore non erat amplius caro. Facit hoc frequenter Martialis, ut diuerſam uim uocabulorum uerſibus exprimat, ut eſt in illo tetraſticho.

Cum dixi ficus, rides quaſi barbara uerba,
  Et dici ficos Cæciliane iubes.
Dicemus ficus, quas ſcimus in arbore naſci.
  Dicemus ficos Cæciliane tuos. Item in illo,
Semper agis cauſas, & res agis Attale ſemper.
  Eſt, non eſt quod agas, Attale ſemper agi.
Si res, & cauſæ deſunt, agis Attale mulas,
  Attale, ne quod agas deſit, agas animam.

Cum igitur corpus aliquando maſſam hanc membrorum diuerſitate compactam ſignificet, Seneca. Corpore trunco caput abeſt, modo ſolam carnem, Cicero. Ego hic cogito commorari, quoad me reficiam. Nam & uires, & corpus amiſi, ideſt carnem. unde corpulentos dicimus obeſi corporis homines. Martialis hoc uerſu utrunq; ſignificatum uſurpauit. Corpus inquit, hoc eſt caro nuſquam erat in toto corpore, hoc eſt in tota maſſa corporea. Corporum tria genera eſſe Pomponius affirmat. Vnum quod una ſpecie continetur, ut homo. lignum. lapis. Alterum, quod ex contingentibus, hoc eſt pluribus inter ſe cohærentibus conſtat, ut ædificium. nauis. armarium. Tertium, quod ex diſtantibus cōpactum eſt, ut puta ex pluribus corporibus uni nomini ſubiectis, ut populus. legio. grex. & corpus eſſe definiunt, quod quinq; ſenſibus comprehendi poteſt. Alij τὸ τριχῆ διαστατόν, hoc eſt quod treis dimenſiones habet. item alij ἤτοι ποιοῦν ἢ πάσχον σῶμά ἐστι. hoc eſt quod efficiens, aut patiens eſt. quam definitionem præclare expreſſit Lucretius. Tangere enim, aut tāgi niſi corpus nulla poteſt res. à corpus fit corporeus. & incorporeus. itē corporalis, atque incorporalis, quæ in hoc differunt, quod corporeum

poreum dicimus, quod eſt ex materia, ſubſtantiaq; corporea, & ediuerſo incorporeum, ut lapis eſt res corporea, Virtus eſt res incorporea. Corporale autem nominamus, quod eſt in materia, ſubſtantiaq; corporea. Et e contrario incorporale, ut domus, fundus. mancipium, corporalia non corporea ſunt. Legatum. hæreditas. cura, incorporalia non incorporea. Etenim hic non de ſubſtantia agimus, ſed de qualitate, quæ ſubſtantiæ ineſt. illic uero de ipſa ſubſtantia. item à corpus corporo uerbum, quod eſt interficio, & corpus ſolum ſine anima relinquo. Enni. Corpus contemplatur, unde corporet uulnere. Accius, Corporare abs tergo es auſus. Ab hoc fit incorporo, qđ eſt res diuerſas in unū corpus, & (ut ita dicam) in unam maſſam redigo. À quo incorporatio, quod et concorporo, & concorporatio dicitur. À corpulento corpulētia deducitur, qđ carnoſitatē ſignificat. SCELERATVS. Dilaniatus. pollutus, ut ſupra diximus. ANTIQVAE Veteris. proprie enim antiquum uetus ſignificat. Virgilius, Antiquasq; domos auium. deductum ab ante, & æuum, ut Varro exiſtimat. Quoniam uero, quæ antiquiora ſunt, ferè meliora eſſe conſueuerunt, ut mores. numi. uinum, & ſimilia. unde eſt apud Plautum, Qui utuntur uino ueteri ſapientes puto, & qui libenter ueteres expectant fabulas. Nam nouæ, quæ nunc prodeunt, deteriores ſunt, quàm numi noui. ideo factum eſt, ut antiquus aliquando pro melius uſurpemus. Cicero, Hoc quidem eſt proprium amicitiæ, ſed antiquior, & pulchrior, & magis à natura ipſa profecta. Idem, Nihil mihi antiquius uiſum eſt, quā innocentem tueri. Ab hoc fit antiquo uerbum, quod eſt aboleo. tollo. & quaſi rem in antiquum morem reduco. Cuius paſſiuum eſt antiquor. Idem, Pernicioſe quidem Philippus in tribunatu, cum legem agrariam ferret, quam tamen antiquari facile paſſus eſt, in eo uehemēter ſe moderatum præbuit. item antiquitas, uetuſtas. & antique aduerbium, quod & antiquitus dicitur. Antiquatio autem abolitionem ſignificat. Gellius, Facta mox eſt antiquatio legis. Aliquando antiquum pro nobili ponimus. Virgilius, Nos troia antiqua. Cum ſemper ferè antiquum cum quadam dignitate exprimitur. Ediuerſo uetus penè cum contumelia. Vnde uetus mancipium, & antiquā matronam dicimus. Quidā etiā antiquarium pro antiquo uſurpauere, & pro eo, qui res antiquas conſcribit. POENA. Verum non ſimulatum ſupplicium. Pœna à græco deducitur, quod eſt ποινή. Quamuis Varro à pendendo dictā uelit. Eſt autem pœna ſupplicium, quo quis ob delictum afficitur. Cicero octo pœnarum genera eſſe commemorat, damnum. uincula. uerbera. talionem. ignominiam. exilium. ſeruitutem. mortem. Taurus uero philoſophus tria genera pœnarum commemorat, quibus peccata puniuntur. Prima eſt, quæ græce dicitur νουθεσία, uel colaſis, cum pœna adhibetur caſtigandi, atque emendandi gratia. Altera, quam τιμωρίαν appellant, cum dignitas, authoritasq; eius, in quē eſt peccatum, tuenda eſt, ne prætermiſſa animaduerſio contemptum eius pariat, & honorem leuet. ideoq; ei uocabulum à conſeruatione honoris, quem græci τιμὴν uocant, factum exiſtimant. Tertia, quæ παράδειγμα à græcis nominatur, cum punitio propter exemplum neceſſario adhibetur, ut cæteri à ſimilibus peccatis metu cognitæ pœnæ deterreantur. iccirco ueteres quoque noſtri exempla pro maximis, grauiſſimisq; pœnis uſurparunt. pœnam pendere, eſt multam ſoluere, quia hoc penſo ære fieri ſolebat. À pœna pœnalis actio. & punio, quod pœnio, quaſi pœna afficio ueteres dicebant. & impune, quod proprie ſignificat ſine pœna. Seneca. Qui impune quicquid libet, agit. Aliquando tamen pro fruſtra ponitur. Apuleius, Impune capitolium aſcendi, cum nemo eſſet, qui ſententiam

diceret. Iuuenalis, Impune ergo mihi recitauerit ille togatas. impuno autem à ueteribus impudens dicebatur. Lucilius, Homo impuratus, & impuno, & rapax. & impunitas. Seneca. Quippe delictorum impunitas homines audaciores reddit ad malum. & punitio, atque impunitio notæ ſignificationis. & impunitus, qui de commiſſis non eſt punitus. Et pœnitet, quaſi pœna tenet. Pœnitere enim dicimus, cum quæ ipſi fecimus, aut quæ de noſtra uoluntate, noſtroq; conſilio facta ſunt, ea nobis poſt incipiunt diſplicere, ſententiamq; in ijs noſtram demutamus. Cicero, Nam quod obiectum eſt de impudicitia, quodq; omnium accuſatorum non criminibus, ſed uocibus, maledictisq; celebratum eſt, id nūquam tam acerbe ferret M. Cœlius, ut eum pœniteat non deformem eſſe natum. Quoniam uero in ijs etiam, quæ nobis aut tædio, aut pudori ſunt, pœna quædā eſſe uidetur, fit ut pœnitet aliquando pro tædet accipiamus. Virgilius, officio nec te certaſſe priorem Pœniteat. Aliquando pro pudet. Idem, Nec te pœniteat calamo triuiſſe labellum, Cicero, non igitur ſi ad centeſimum uixiſſet annum, ſenectutis eum ſuæ pœniteret? Ab hoc pœnitentia, & penitudo deducuntur. Quemadmodum autem pœnitet me dicimus, hoc eſt pœna tenet, ita pœniteor paſſiue, hoc eſt pœna teneor, ut illic nominatiui, hic ablatiui ſit caſus.

Hæc quæ difficilis turget pagganica pluma Folle minus laxa eſt, et minus arcta pila, quaſi dicat, eſt laxior quàm pila trigonalis, & arctior, firmiorq; quàm follis. Nam follis tertiũ pilæ genus eſt. Hic ex pelle fit, ſpirituq; inflatur. groſſior cæteris, ſed non multo grauior. pugno redditur, non palma, ut reliquæ pilæ. à flatu nomen habet, quia ſpiritu, ut diximus, impletur, ſiue quod ueteres follem pellem dicebant. Et per diminutionẽ folliculum. unde folliculare pars remi appellatur, quæ folliculo tecta eſt. à quo uita follicularis uocitata eſt. itẽ follem, ſiue folliculum utrẽ nominabant, quæ nihil aliud eſt, quàm pellis flatu plena. item inſtrumentũ, quo attrahitur uentus atq; emittitur ad ignem excitandũ. Extemplo hercle ego te follem pugillatorium faciam, & pendentem curſabo pugnis periuriſſime. Eſt præterea quartum pilæ genus, quod uocant Harpaſtum. ſiue ſphennidam. groſſior eſt, quàm pila pagganica, tenuior q̃ follis. E panno ferè fit, aliquando ex pelle, lana, tomento'ue impletur. non repercutitur, ſed cum multi ſint ludentes, & in duas partes diuiſi, ita ut utriq; eregione ſibi inuicem oppoſiti ſint, ad ſuos quiſq; trãſmittere pilam conatur, quã aduerſarij nituntur arripere. Sic magno labore luditur, decidit ſæpe in terram pila, ad quam alternatim currẽtes ſe inuicem proſternunt, puluereq;, & ſudore infecti flaueſcunt. Laborioſum ludi genus, & ideo grãdioribus tantũ conueniẽs. ſphẽnida appellatur, uel à Sphẽnida inuẽtore, uel ἀπὸ τοῦ φενακίζειν, quod decipere ſignificat. Fit enim in hoc ludo, ut cum alteri ſæpe oſtendant ſe uelle pillam proijcere, alteri tamen iaciant ad decipiendũ aduerſarium, ἁρπαστὸν autem, hoc eſt harpaſtum ἀπὸ τοῦ ἁρπάζειν, hoc eſt à rapiendo uocatur, quia proiectam pilam multi ſimul conãtur arripere. ſeq; ob eam cauſam inuicem proſternunt. idẽ Martia. Siue harpaſta manu puluerulenta rapis. idẽ de harpaſto. Hæc rapit Anthei uelox in puluere Draucus, Grãdia qui uano colla labore facit. Artemidorus de interpretatione ſomniorum. ἁρπαστὸν δὲ καὶ σφαῖρα φιλονεικίας ἀπεράντους σημαίνουσι. πολλάκις δὲ καὶ εἰς ἑταίρας ἔρωτα· ἔοικε γὰρ ἡ σφαῖρα καὶ τὸ ἁρπαστὸν ἑταίρᾳ διὰ τὸ μηδαμοῦ μένειν, καὶ πρὸς πολλοὺς φοιτᾶν. Harpaſtum inquit, & ſphæra certamen infinitum ſignificant. Sæpe etiam meretricium amorem. Videtur enim ſphæra, & Harpaſtum meretrix, propterea quod nuſquam maneat, ſed ad multos prodeat. Operæpretium eſt uidere, quàm ridicula de ijs per ignorantiam pleriq; tradiderunt. Ab huius pilæ ſimilitudine quicquid rotundum, ac ſphæricum eſt, Pilam uocamus, cuius diminutiuum eſt Pilula.

PERFIDVS. Violator fidei, quam manſuefactori ſuo debebat. LAESERAT. Offenderat. Lædere proprie eſt cõtumelia afficere, ſumptũ à græcis, qui λοιδορίαν contumeliã uocant. Transfertur tamen ad omne genus offenſionis. Eius paſſiuum eſt lædor. à quo læſus offenſus. & contrarium eius illæſus, hoc eſt inoffenſus. & læſio offenſio. MAGISTRVM. Præceptorẽ, qui eum manſuetudinem docuerat. Magiſtri proprie dicuntur artium præceptores. Transfertur tamen hoc nomen ad omnes, quibus præcipua cura rerum incumbit, uel ꝙ magis cæteris poſſint, uel quod magis, quàm cæteri diligentiã & ſolicitudinem rebus, quibus præſunt, debent. Hinc magi-

Sunt etiam qui Maium menſem à Thuſculanis ad Romanos tranſiſſe commemorent, apud quos deus Maius colebatur, qui erat Iupiter à magnitudine ac maieſtate ita appellatus. Sed quoniam de Maij appellatione diximus, operæpretium eſt, ut cæterorum quoq; menſium rationẽ reddamus. Arcades tribus duntaxat menſibus annum ſuũ explicabant. Acarnanes ſex. Comitia auſpicabantur, uectigalia locabãt, & ſeruis cœnas apponebant matronæ, quẽadmodum domini ſaturnalibus. illæ ut principio anni ad promptum obſequium honore ſeruos inuitarent, ij quia gratiam perfecti operis abſoluerent. Secundum menſem nominauit Aprilem, quaſi Aphrilem à ſpuma, quam græci ἀφρὸν uocãt. Vnde orta Venus putabatur, ut quemadmodum primus menſis à patre ſuo Marte, ita ſecundus ab Aeneæ matre Veneris nomen haberet, & ij potiſſimum menſes annum auſpicarentur, à quibus Romani nominis origo proceſſiſſet. Alij non à Venere appellatum hũc menſem putant, ſed ab aperiendo dictũ Aprilẽ, quaſi aperilẽ quoniã cum ante æquinoctiũ uernũ triſte ſit cœlum, & nubi-

Sic Athenienſes ἀνθεστηριῶνα hũc menſem uocant, quod omnia eo floreſcant. Maiũ Romulus tertium poſuit, de quo iam diximus. Poſt hunc Iunium ex parte populi, ut diximus, nominatum. Siue (ut alij putant) quaſi Iunonium, quod ita eum latini appellarent, & hæc nuncupatio apud Romanos manſerit. Sed poſtea detritis quibuſdã literis ex Iunonio Iunius ſit dictus. Nã & ædes Iunoni monetæ Calen. Iunijs dedicata eſt. Quidã Iunium menſem à Iunio Bruto uocitatum putant, qui primus Romæ conſul eſt factus, quod Cal. Iunij pulſo Tarquinio ſacrũ Carnæ Deæ in Cœlio monte uoti reus, ut ſupra diximus, feciſſet. Huius menſis Calẽdæ uulgo Fabariæ uocantur, quia hoc menſe adultæ fabæ diuinis rebus adhibentur. Sequitur Quintilis principio dictus, qđ ordine quintus eſſet, ſed poſtea in honorem Iulij Cæſaris dictatoris Marco Antonio Marci filio conſule legem ferente, Iulius appellatus, qđ hoc menſe ad quartum Idus Quintiles Iulius procreatus fuiſſet. Auguſtus dehinc ſuccedit, qui antea Sextilis uocabatur, donec honori Auguſti ex ſenatuſconſulto cõſecratus eſt. Cuius hæc uerba fuerunt. Cũ imperator Cæſar Auguſtus menſe Sextili, & primum conſulatum inierit, & triumphos tres in urbẽ intulerit, & ex ianiculo legiones deductæ, ſecutæq; ſint eius auſpicia, ac fidem, & Aegyptus hoc mẽſe in poteſtatem populi Romani redacta eſt, finisq; hoc menſe bellis ciuilibus impoſitus ſit, atq; ob has cauſas ſic menſis hic imperio feliciſſimus ſit, ac fuerit, placere Senatui, ut hic menſis Auguſtus appelletur. item plebiſcitum factum ob eandẽ rem Sex. Pacuuio tribuno plebem rogante. Menſis September principale retinet nomẽ, quẽm Germanici appellatione, Octobrẽ uero ſua Domitianus inuaſerat. Poſtquam uero decreto Senatus nomen infauſtũ ex omni ære uel ſaxo deraſum eſt, ut omnis eius memoria aboleretur, menſes quoq; uſurpatione tyrannicæ appellationis exuti ſunt. Poſt hæc principes cæteri diri ominis infauſta uitantes, menſibus cæteris priſca nomina ſeruauerunt. Octobrem, Nouembrem, atq; Decembrem, quod octauum. nonum. decimũ locum teneant. Ab octobri October quoq; equus appellabatur, de cuius capite maxima erat contentio inter ſuburbanos, & ſacranienſes, ut ij in regiæ pariẽte, illi ad turrem maniliam id figerent, cuius cauda, ut ex ea ſanguis in focum diſtillaret, magna celeritate perferebatur in regiam. Sed cum hæc ordinatio quatuor & trecentorum dierum à Romulo inſtituta neq; Solis curſui, neq; Lunæ rationibus conueniret, fiebat aliquando, ut frigus anni æſtiuis menſibus & contra calor hyemalibus proueniret. Quod ubi cõtigiſſet, tantũ dierũ ſine ullo menſis noĩe patiebatur abſumi, quãtum ad id anni tẽpus adduceret, quo cœli habitus inſtanti mẽſi cõſentaneus inueniret. Sed ſecutus mox Numa Põpilius qnquaginta dies addidit, ut in trecentos qnquaginta quatuor, quibus duodecim lunæ curſus confici credebat, annus extenderetur. atq; ijs quinquaginta diebus à ſe additis adiecit alios ſex retractos illis ſex mẽſibus, qui triginta dies habebant, ideſt de ſingulis ſingulos, factosq; ſex & qnquaginta dies in duos menſes pari ratione diuiſit, & alterũ Ianuarium nuncupauit, primumq; eſſe uoluit tanquã bicipitis diei menſem reſpicientem, ac proſpicientẽ trãſacti anni finem, & principium futuri. Alterũ Februo deo dicauit, qui præeſſe luſtrationibus exiſtimatur. Luſtrari autẽ eo menſe ciuitatẽ neceſſe uidebatur, quo ſtatutum erat, ut iuſta Dijs manibus ſoluerentur. Hanc Numæ ordinationẽ finitimi mox ſecuti, totidem diebus, totidemq; menſibus annum ſuum computare cœperunt, hoc ſolo diſcrepantes, quod menſes undetricenũ, tricenumq; in numero alternauerunt. Sed Numa paulo poſt in

honorem imparis numeri unum adiecit diem, quem Ianuario dedit, ut tam in anno q̃ in menſibus ſingulis præter unum Februarium impar numerus ſeruaretur. Nam quia duodecim menſes ſi ſinguli aut pari, aut impari numero putarentur, conſumationem parem facerent, unus pari numero conſtitutus uniuerſam computationem imparem fecit. Ianuarius igitur, Aprilis. Iunius. Sextilis. September. Nouember. December, undetricenis cenſebantur diebus. Martius uero. Maius. Quintilis. & October dies tricenos ſingulos poſſidebant. Solus Februarius uiginti octo retinuit dies, quaſi inferis, & diminutio & par numerus conueniret. Cum ergo Romani ex hac diſtributione Pompilij ad lunæ curſum, ſicut græci annũ proprium computarent, neceſſario menſem unum conſtituerunt more græcorum, quem intercalarem uocarunt, quod intra annum calarent, hoc eſt, uocarent ij, qui faſtis præerant, populum, & mẽſem hunc interponerent, non in fine Februarij, ſed poſt tertiũ & uigeſimum diem eius menſis, terminalibus ſcilicet iam peractis. Deinde reliquos Februarij menſis dies, qui erant quinque, ſubiungebant. hoc autem intercalare dicebatur, & dies ipſi intercalares, & menſis intercalaris, & actus ipſe intercalatio uocabatur. Vnde intercalares uerſus appellati ſunt, qui frequenter inter alios interponuntur, ut eſt apud Virgilium in buco. Ducite ab urbe domũ mea carmina, ducite Daphnim. Sed cum ſæpe eueniret, ut nundinæ modo in anni principem diem, modo in nonas caderent, quo die conuentus multitudinis uitandus æſtimabatur, quoniam populus Romanus exactis etiam regibus diem hunc nonarum maxime celebrabat, quem natalem Seruij Tullij fuiſſe exiſtimabat, ueriti qui diebus præerant, ne quid nundinis collecta uniuerſitas ob deſyderium regis nouaret, Nonas à nundinis ſegregandas eſſe ſtatuerunt. itaque dies illi, quibus annus abundabat, ex quibus fieri intercalaris mẽſis ſolebat, eorum, qui faſtis præerant, arbitrio permiſſi ſunt, uti cum ipſi uellent, intercalarentur, dummodo eos in medio terminaliorum, uel menſis intercalaris ita locarent, ut à ſuſpecto die celebritatem auerterent nundinarum. Verum fuit tempus, cum propter ſuperſtitionem intercalatio omnis omiſſa eſt. Nonnunquam uero per gratiã ſacerdotum, qui publicanis proferri uel imminui conſulto anni dies uolebant. itaq; modo auctio modo retractio dierum proueniebat, & ſub ſpecie obſeruationis, maior confuſionis occaſio emergebat. Quamobrem Caius Cæſar omnem hanc inconſtantiam temporum uagam adhuc atq; incertam in ordinẽ ſtatutæ definitionis coẽgit. Quippe dies omnes, qui adhuc confuſionem facere poterant, ita conſumpſit, ut annus confuſionis ultimus in CCCCXLIII dies protenderetur. Poſt hoc ad imitationem Aegyptiorum, qui ſoli omnium diuinarum rerum conſcij putabantur, ad numerum Solis, qui diebus CCCLXV & quadrante curſum conficit, annum dirigere conatus eſt. Nam ſicut lunaris annus menſis eſt, quia luna paulo minus quàm menſem in Zodiaci circuitione conſumit, ita ſolis annus hoc dierũ numero colligendus fuit, quo ad ſignum ſe denuo uertit, à quo digreſſus fuerat. propter quod annus uertens uocatur, & habetur magnus, cum lunæ annus breuis exiſtimetur. Virgi. interea magnum ſol circũ uoluitur annum, quamuis etiam annus magnus dicatur duodecim millium quingentorum quinquagintaquatuor annorũ, ſolarium (ut Cice. teſtatur) & à quibuſdam annus Saturni, qui eſt triginta annorum. Ergo Iulius Cæſar decem dies ueteri obſeruationi adiecit ut annum CCCLXV dies, quibus ſol Zodiacũ luſtrat, efficerẽt, et ne quadrans deeſſet, ſtatuit, ut quarto quoq; anno ſacerdotes, qui menſibus, ac diebus præerant, unum intercalarent diem eo menſe, & loco quo etiam apud ueteres menſis intercalabatur. i. ante quinq; ultimos menſis Fe-

bruarij dies. idq; Biſextum cenſuit nominandum, quod is dies ante hunc proximus eo anno ad VI Cal. Martij eſſe dicatur. Dies autem decem, quos anno addiderat, hac ordinatione diſtribuit, in Ianuarium, et Sextilem, & Decembrem binos dies inſeruit, in Aprilem autem Iunium. Septembrem. & Nouẽbrẽ ſingulos. Februario non addidit diem, ne deo infero religio immutaretur. Martio. Maio. Quintili. Octobri ſeruauit priſtinũ ſtatum, quod ſatis pleno numero erant unius & triginta dierum. Habet itaq; Ianuarius. Martius. Maius. Iulius. Auguſtus. October. & December dies ſingulos & tricenos. Aprilis uero. Iunius September. Nouẽber tantum tricenos. Solus Februarius duodetriginta. Annum quidam à circuitu temporis appellatum putant, quia ueteres am pro circum ponere ſolebant. Cato. Am terminum, hoc eſt circum terminum. Vnde & Anna Perēna dicta eſt quod illi menſe Martio priuatim, & publice ſacrificarent, quo eis annare, & perēnare liceret, quæ ſuperſtitio originem habuit, quaſi ab annis Anna uocaretur, quemadmodum in noſtra religione diuam Luciam præſidere oculis uulgo exiſtimant, quod à luce nomen habere uideatur. Anna Beli filia fuit, ſoror Didonis, quæ poſtquam mortuam ſororem uidit, & Carthaginē ab Hiarba Getulorū rege occupatam, relicta ſede patria, ad Battum regem, qui tū Melitæ inſulæ imperabat, curſum arripuit. A` quo iure ueteris hoſpitij benigne ſuſcepta, duos & ultra annos ibi manſit. Sed cum Pygmaleonem fratrem iam cum armis aduentare Battus didiciſſet, ueritus potentiam illius, Annam ut inde abiret, hortatus eſt. Mox igitur mare ingreſſa, dum Camerem nauigare contenderet, ui tempeſtatis acta, in Laurētem orā peruenit, ubi iam Aeneas pacatis rebus, & ducta uxore Lauinia imperabat. Hinc Ianus Iunonius cognominatus eſt, quod illi deo omnis ingreſſus, huic Deæ cuncti Calendarum dies eſſent aſcripti. Nam cum initia menſium ueteres ab ortu lunæ auſpicarentur, merito Iunoni addixerunt Calend. Lunam ac Iunonem eandem eſſe putantes, uel quia luna per aërem meat, cuius arbitra Iuno eſt. Vnde græci lunam artemin quaſi ἀερότομιν nuncupauerunt, quod aëra ſecet. Erant autem Calendæ. nonæ. & Idus copulandis nuptijs religioſæ, hoc eſt deuitandæ. qđ hi dies præter nonas feriati eſſent. Ferijs autem uim cuiquam fieri nefas habebatur, ideo tunc uitabantur nuptiæ, in quibus uis fieri uirgini uideretur. Alij tradunt, quia ferijs tergere ueteres foſſas liceret nouas facere ius non eſſet, ideo magis uiduis quàm uirginibus idoneas fuiſſe ferias ad nubendum. Nonis uero ideo prohibitæ ſunt nuptiæ, quia cum primus nuptiarum dies uerecundiæ detur, poſtridie uero nupta in domo uiri dominium incipiat, ideoq; rem diuinam facere oporteat. Omnes autem poſtriduani dies, ſiue poſt Calēdas, ſeu poſt nonas ex æquo atri ſint, ideo & nonas inhabileis nuptijs eſſe exiſtimauerunt, ne nupta atro die uel libertatē auſpicaretur uxoriam, uel Dijs immolaret. Nonæ iuliæ caprotinæ dictæ ſunt, cuius rei cauſam ſuperius expreſſimus. Calendæ per K literā ſcribi uſus obtinuit cum ipſius deriuatis, cum alioquin hæc litera penitus ſuperuacua uideatur. Virg. doctrina ſimul, uerecundiaq; inſignis, cum ſciret Romanos ueteres ad lunæ curſum, ſequentes uero ad ſolis anni tempora digeſſiſſe, utriuſque ſeculi opinioni reuerentiam ſeruans, uos (inquit) o clariſſima mundi Lumina, labentem cœlo quæ ducitis annum Liber, & alma Ceres, tam lunam, quàm ſolem duces anni hac inuocatione deſignans. Magus uero non à magis deducitur, ſed perſicum uocabulum eſt, ſignificatq; ſapientem. Sic enim Perſæ magos uocant, ut græci philoſophos. Latini ſapienteis. Galli dryudas. Aegyptij prophetas, Indi gymnoſophiſtas. & Aſſyrij Chaldæos, A` chaldæa regione Aſiæ, in qua eſt Babylon urbs. A` quo chaldaicus. Hi omnes ſyderum obſeruatis rationibus, prædicere futura ſolebant. Sed magi potiſſimum apud Perſas deorum cultui uocabant, preces illis, ac uota, & ſacrificia efferebant, de deorum ſubſtantia, & generatione differebant, ſigna, ſtatuaſq; reprehendebant. improbabant illorum errores, qui diſcerni deos ſexu, & mareis, fœminaſque inter eos eſſe affirmabant, dicebant rerum omnium, totiuſq; orbis imperium penes deos eſſe, aërem plenum eſſe dæmonibus. Auri cultum, uſumq; prohibebant, gerebant candidas ueſteis. Lectum terram habebant. Solo pane, olereq;, & caſeo ueſcebantur. arundinem pro baculo gerebāt. Duo apud eos prin-

Sed poſtea in tantum aucta eſt magorum uanitas, ut non ſolum obſeruatione ſyderum futura prædicere, ſed artibus quibuſdam, & rerum, & uerborum maleficijs et ſcire ſe omnia, & facere poſſe profiterentur. Ab ijs incantamenta reperta. ab ijs necromantia inuenta, hoc eſt diuinatio, quæ fit per cadauera, ut mortuus apud Lucanum ſuſcitatus, euentum belli Pharſalici Sexto Pompeio prædixit. & pyromantia diuinatio, quæ fit per ignem, dum attendimus, quid fulgur, quid fulmen, quid alia quæuis ignea poteſtas ſignificet. Teren. etiam de ſorte uenio in dubium, hoc eſt de pretio, quo empta erat fidicina. A mago magia dicta, ars ipſa. & magicus. unde magicas artes dicimus, & magicas herbas, quibus magorum uanitas gloriatur, ut eſt Aethiopis, qua amnes, ac ſtagna ſiccari affirmant, & tactu eius clauſa omnia aperiri. & Achemenides qua coniecta in aciẽ hoſtium trepidare omnia, ac terga uertere. Hinc uerba dare uſurpamus pro eo, qđ eſt decipere. A' uerbo prouerbium deducitur, quaſi commune omnium uerbum, uel quod uerbũ pro uerbo ponatur. Eſt enim prouerbium ſententia, quæ in ore omnium uerſatur, modo aperta & ſimplex, ut obſequium amicos, ueritas odium parit. Macro·Vnde putas illud manaſſe prouerbium totidem nobis hoſtes eſſe, quot ſeruos·modo ſubobſcura, & aliud ſignificãs, quàm uerba exprimere uideantur, ut puta de homine infelici, ac calamitoſo dicimus. ille habet equum Seianum, uel ille habet aurum Toloſanum. A' prouerbio prouerbialis deducitur, unde prouerbiales uerſus appellamus, qui uice prouerbij ſunt, quos græci ἀπὸ τῆς παροιμίας, quod prouerbium ſignificat, παροιμιώδους appellant, qualis eſt ille, πολλὰ μεταξὺ πέλει κύλικος καὶ χείλεος ἄκρου, hoc eſt. Quemadmodum enim aduerbium uocamus, quod ad uerbum accedit, & prouerbium, quod pro uerbo eſt poſitum, ita deuerbium, in qđ uerbum deſinit, quaſi deorſum tendens uerbum. Nam niſi populus, aut plebs rogetur, nullus plebei, aut populi iuſſus fieri poteſt. Sed hæc differentia non ſeruatur prorſus ab omnibus. Etenim plebiſcita, & priuilegia leges dicuntur. & hæc omnia appellantur rogationes. Sunt præterea ſenatuſconſulta, decreta principum, reſponſa prudẽtum. item municipales leges, quas unaquæq; urbs ſibi priuatim conſtituit, à municipijs dictæ, quæ ita demum uires habent, ſi urbs Romæ, aut aliarum liberarum urbium, quarum imperio ſub ſint, aut imperatoris, uel principis authoritate muniantur. Cæterum præter tripartitam illam iuris diuiſionem, quam facit Vlpianus, habemus in noſtra religione ius diuinũ, quod primum locum tenet, in quo diuina oracula comprehendũtur, quæ leges diuinæ nominantur. item ius pontificium, quod à romanis pontificibus ſancitum eſt. Hinc utriuſq; iuris prudentes dicimus, qui pontificium ſimul, ac ciuile ius profitentur. item in ciuili iure prætorium ius continetur, quod prætores ſupplendi, aut corrigendi iuris ciuilis gratia introduxerunt ob publicam utilitatem. hoc à prætoris honore, honorarium nuncupatur, & interpretatio iuris ciuilis, & quaſi uiua uox eſt. Eſt etiam (ut Paulus ſcribit) ius ſingulare, quod contra tenorem rationis ob aliquam utilitatem authoritate conſtituentium introductum eſt. item eſt aliud ius, quod ius conſuetudinis appellatur. hoc quidam ſub naturali, alij ſub iure gentium conſtituunt, definiuntq; ius conſuetudinis eſſe, quod in morem uetuſtas uulgi approbatione produxit. item ius militare dicitur, quo ſoli milites ſunt aſtricti. & ius trium liberorum, quod patribus dabatur filios non habentibus. Ad coria perficienda ſemine pro galla utuntur. Vulgaris ſpinæ ſolius radicis uſus eſt ad coria tingenda. Per Hiſpanias tamen multi ad odores, & unguenta utuntur, aſpalatum uocantes, cum aſpalatus ſit ſpina alba in oriente, magnitudine arboris modicæ, flore roſæ, cuius radix unguentis expetitur, quidã Eriſiſceptrum uocant. Alij ſceptrum Eliſei, alij adiſpacum, alij diſpacon, ſiue diacheron, ſanat ozenas. Sic enim uocatur uitium in naribus ex confluxu humoris acerrimi. Eſt & ſpina appendix, ita appellata, quoniam bacæ puniceo colore in ea inſtar racemi pendentes appendices uocantur. Spina etiam uepris dicitur, quod uehementer prehendat. Cuius diminutiuum eſt uepecula. SANGVINEA. Sanguinolenta, ſparſa cruore multarum ferarum. Sanguis quid ſignificet, manifeſtum eſt. Maribus hic quàm fœminis nigrior eſt, & in iuuenta magis quàm ſenio. Qui multo ſanguine: & pingui abundãt, iracundi ſunt, magna in eo utilitatis pars eſt. Emiſſus, ſpiritum ſecum trahit, & tamen non ſentit tractum. inter animalia, fortiora ſunt, quibus ſanguis craſſior eſt. Sapientiora, quibus tenuior. timidiora quibus minimus. Quibus nullus, hebetia. Taurorum celerrime coit, ideo peſtifer, ut ſupra diximus. Aprorum. ceruorum. caprarum. et bubalorum omnium, non ſpiſſatur. Pinguiſſimus aſinis. Homini tenuiſſimus eſt. Quæ plus quàm quaternos habent pedes, carent ſanguine. Obeſt minus ſanguinis habent, quoniam abſumitur pingui. Profluuium eius in naribus ſoli homini accidit, quibuſdã per inferna, multis per ora ſtatuto tẽpore, ut Voluſio Saturnino omnibus annis, qui tamen nonageſimum uitæ annum exceſſit.

Animalia, quæ certis temporibus latent, non habent tunc ſanguinem, præter exiguas admodum guttas circa cor. Hominibus in metu refugit, in uerecundia faciẽ petit, ideo timore palleſcimus, rubeſcimus pudore. Morbi omnes, morsq́; ſanguinem abſumunt. Aliquando ſanguis pro genere ponitur. Virgilius, An nympharum ſanguinis una. Ab hoc ſanguineus, & ſanguinolentus deducuntur, quæ modo ad corpus referũtur, ſignificantq́; plenum ſanguine, ut hoc loco. Modo ad animum, & pro crudeli, ac cruento accipiuntur. Apuleius. immani, ac ſanguinea uoce perterruit. Cicero. itaq; grauem illam, ac ſanguinariam uocem audiuimus. & ſanguiſuga, uermis, qui et hirudo dicitur. Horatius. Non miſſura cutem niſi plena cruoris hirudo. Quidam hanc ab hærendo nomẽ traxiſſe exiſtimant, quod animalium corporibus hæreat. & exangue, quod ſine ſanguine eſt. & ſanguiculus, ſanguis hœdi, ſiue ſuis in cibum formatus. Plynius. Vtuntur ad utrunque uitium. Et coagulo hœdi in uino myrteo magnitudine fabæ poto, et ſanguine eiuſdem in cibũ formato, quẽ ſanguiculũ uocant. et conſanguineus, ꝙ ſanguine mihi coniũctus eſt. A quo conſanguinitas ipſa coniũctio. et ſanguinaria herba, ꝗa ſuccus eius infuſus naribus ſupprimit ſanguinẽ, polygonũ græci uocant, uel à multitudine ſeminis, uel à frequentia geniculorum. Quippe πολὺ multum ſignificat, γόνος genitus, γόνυ genu. folia rutæ habet, parum à terra attollitur ſimilis gramini. Alij calligonon nominant. Alij halmada. Nonnulli carninothum. Quidam dema. Multi myrtopetalon. & unum eius genus, quod in montibus naſcatur oreon, arundini teneræ ſimile, uno caule denſis geniculis, & in ſe fractis. Eſt & aliud genus ſylueſtre appellatum, penè arboris frutice. radice lignoſa. rubicundum. ramis ſparti. binum palmorum. Vis omnium eſt ſpiſſare, ac refrigerare, propter quod ſtomachi feruori folia imponuntur. & ſanguen arbor, cuius cortex ad ſanguinis ſimilitudinem rubet. A quo ſanguineus. Plynius. Siquis duas uirgas ſanguineas manu tulerit. item à ſanguine ſecundũ quoſdam ſancio uerbum. Eſt enim proprie ſancire. conſecrare aliquid ſub ſanguine hoſtiæ. Vnde ſanctum dicitur, quaſi ſanguine conſecratum. & ſanctio proprie uocatur lex cum terrore pœnæ. Alij tamen uolunt ſanctum proprie dici quod ab iniuria hominum defenſum, atque munitum eſt, tractumq́; eſſe à ſagminibus herbis, quæ legati populi Romani ferre ſolebant, nequis eos uiolaret, quemadmodum legati græcorum ferebant ea, quæ ceratia uocantur. In Municipijs muros ſanctos eſſe Sabinus affirmat, nec licere eos reficere ſine principis, uel præſidis authoritate, nec aliquid coniungere, uel ſupponere. Hinc ſancire deductum, quod eſt firmare, munire, & quaſi ſanctum facere. Vlpianus Sanctum eſſe ſcribit, quod nec ſacrum, nec profanum eſt, ſed ſanctione quadam confirmatum, ut ſanctæ ſunt leges, hoc eſt ſanctione quadam ſubnixæ. Hinc Virgilius, Sancta ad nos anima, atque iſtius inſcia culpæ Deſcendam. Sancta inquit, hoc eſt incorrupta. idem. Tuq́; o ſanctiſſima coniux Felix morte tua. Sanctiſſima, hoc eſt caſtiſſima. interdum tamen ſanctum pro ſacro, & religioſo ponitur. Idem. Ecce leui ſummo de uertice uiſus Iuli Fundere lumen apex. & paulopoſt. Sanctiſſimam uocauit, quia & uates, et deo plena erat. Ab hoc fit ſanctifico uerbum, à quo ſanctificator. ſanctificatrix, ſanctificatio. item Sanctitas. ſanctitudo. ſanctimonia eiuſdem ſignificationis.

& ſancte aduerbium. A quo perſancte. Plautus, idq́; perſancte iurauit ſe facturum. & ſanctuarium, ſacer locus, templum. ſacrarium. Sacrum uero (ut Trebatius refert) dicitur omne, quod deorum habetur. Hinc Virgilius, quoties ſacrum nominat, additionem ferè deorum facit. Sacra Dioneæ matri, diuisq́; ferebam. idem. ſacra Ioui ſtygio, quæ recte incepta parabam. idem. tibi enim, tibi maxima Iuno, Mactat ſacra ferens. Hinc ſacer mons trans Anienem fluuium ultra tertium milliarium appellatur, quia Ioui fuerat conſecratus. & ſacra uia in urbe Roma uocitata eſt, quod in ea fœdus ictum ſit iter Romulum, & Tatium. & ſacrimum uocabant muſtum, quod Libero patri ſacrificabant pro uineis, & uaſis, et ipſo uino cõſeruandis, ſicut primetium de ſpicis, quas primo metendo collegiſſent, Cereri ſacrificabant. & ſacroſanctum, quo iureiurãdo interpoſito erat inſtitutum, ut qui uiolaſſet, morte pœnas pẽderet. & ſacramentum, quod iuriſiurandi ſacratione interpoſita geritur. Vnde ſacramentum militare appellatum. item ſacramentum æs, quod pœnæ cauſa penditur. & ſacrifico, quod à lito ita diſtinguitur, ut ſacrificare ſit ueniam petere. Litare uero propitiare, & uotum impetrare. Plautus. Si hercle iſtuc unquam factum eſt, tum me Iuppiter faciat, ut ſemꝑ ſacrificẽ, nunquam litem. Confunduntur hæc tamen, & utrunque accipitur pro eo, quod eſt ſacrum facere. & ſacrificulum regem ſacrorum. & ſacro uerbum, quod eſt deo dedico, & ſacrum facio. A quo ſacrator. ſacratrix. ſacratio. & conſecro eiuſdem ſignificationis. A quo conſecrator. conſecratrix. conſecratio. & execror, quod proprie eſt mala deprecor. Vnde execratio, deprecatio malorum. & execrabile, deprecabile. euitandum. & deſecro, quod proprie eſt ex ſacro profanum facio. & quod uulgo dicitur degrado. Plautus, Deſecrare eum prius oportet, ne manus contaminem. & obſecro, quod ſignificat obteſtor. deprecor, & quaſi ſacra, ut te exorem, facio. Vnde obuos ſecro ueteres dixerunt, pro uos obſecro. Ab hoc obſecrator. obſecratrix. obſecratio. & reſecro, religione abſoluo. Plautus. Reſecro mater, quod dudum obſecraueram. hinc cum populum reus aliquando rogaſſet per deos, ut eo periculo liberaretur, iubebat magiſtratus eum reſecrare. & ſacerdotem, qui deo dicatus eſt, ad ſacrificia facienda. A quo ſacerdotium, ipſum ſacerdotis munus, officiumue. Vnde gentilicium ſacerdotium ueteres appellabant, quod nunc uocatur ius patronatus. & ſacerdotale, quod eſt ſacerdotis. & ſacrarium locum, in quo ſacra reponuntur. & ſacrilegum, qui rem ſacram, aut è ſacro loco furatur. à quo tale furtum ſacrilegium. Sacrum etiam aliquando pro ſacrificio ponitur, quando ſubſtantiuum eſt. Virgilius, Sacra Dioneæ matri, diuisq́; ferebam. Quando uero adiectiuum, pro uenerabili. Idem. Extulit os ſacrum cœlo. interdum etiam pro execrando. ſceleſto. Idem. quid non mortalia pectora cogis Auri ſacra fames? Plautus, Homini quantum hominum terra ſuſtinet ſacerrimo. Quod tractum eſt à Gallorum conſuetudine. Quoties enim Maſſilienſes peſtilentia laborabant, unus ex pauperibus ſeſe offerebat alendum anno integro publicis pretioſioribus cibis. Hic poſtea uerbenis ornatus, & ſacris ueſtibus indutus, per totam urbem ducebatur cum execrationibus, ut in ipſum omnia ciuitatis mala reciderent, & ſic dijs immolabatur. item ſacrum, quando ſubſtantiuum eſt, pro templo accipitur. Cuius diminutiuum, eſt ſacellum, dictumq́; eſt ad imitationem græcorum, qui ſacrum dicunt ἱερὸν, καὶ τὰ ἱερὰ templa appellant. Paulus iuriſconſultus. Sunt autem ſacrilegi, qui publica ſacra compilarint, at qui priuata ſacra, uel ædiculas incuſtoditas tentauerint, amplius quã fures, minus quàm ſacrilegi merentur. A ſacro etiam Sacerani appellati fuerunt Reate orti,

qui ex Septimontio Ligures, Siculosq́; eiecerunt, quod iure ſacro nati fuiſſent. Veteres pro ſanguis neutro genere ſanguen dixerunt. Ennius. Et ſanguen dijs oriundum. Lucretius. Viſceribus uiſcus gigni, ſanguenq́; creari. Sacrum græci ἱερὸν dicunt, hoc eſt hieron. à quo hierarchia ſacer principatus. & Hiera, inſula inter Siciliam, & Liparim Vulcano ſacra. & Hieri populi ultra Sauromatas. & Hiero rex Syracuſarum. & Hieronymus, ac Hierotheus propria nomina, quorum alterum ſacra lex, alterum ſacer deus interpretari poteſt. & Hieropolis, oppidi nomen, quaſi ſacra urbs, & per diminutionem Hiella, urbs Hetruriæ. & Hieroſolyma, urbis nomen, in Palæſtina. & Hierapicra, medicamenti genus ad ſoluendum aluum. hoc eſt ſacra amara. nam πικρὸν græci amarum dicunt. PERDIDIT. Amiſit, quemadmodum ſupra diximus. Ab hoc fit perditio, amiſſio. & perdite uehementer, ſine remedio. & frugiperda ſalix, quia amittit ſemen ante, quàm omnino maturitatem ſentiat. Sed huic rei naturæ prouidentia conſuluit, quoniam depactus ſurculus facile, & incurioſius naſcitur. Vnam tantum ſalicem tradunt authores ſemen ad maturitatem perferre ſolitam in Creta inſula, atque ipſo deſcenſu ſpeluncæ Iouis toruum, ligneumq́; magnitudine ciceris. Salix à ſaliendo dicta eſt, quod uel ſata, uel caſu terræ compacta ſtatim ſalit, ac ſurgit. Salix perticalis dicitur, ex qua perticæ fiunt, hoc eſt fuſtæ longiores, quibus ad ſuſtentandas uites, hoc eſt ad iuga facienda, & ad meſſes flagellandas, & ad alia ruſtica opera utimur. Plynius. nam ſalicis quædam in proceritatem magnam emittunt iugis uinearum perticas. Idem. Meſſis ipſa alibi tribulis in area. alibi equorum greſſibus exteritur, alibi perticis flagellatur. Idem. Perticis quidam decutiunt oliuas cum iniuria arborum ſequentis anni damno. Has iuſtum eſt cædi quarto quoque anno. Salix uiminalis eſt, ex qua uimina colliguntur. has omnibus annis confodi iubent menſe Aprili. hæc & amerina dicitur ab Ameria Vmbriæ ciuitate ab Amerio ſic appellata. Virgilius, Atque amerina parant lentæ retinacula uiti. Amella uero herba eſt, quæ naſcitur iuxta Mellam Galliæ flumen, à quo nomen accepit. Folia ſalicis contrita, & pota intemperantiam libidinis coërcere dicuntur, atque ſi ſæpius ſumantur, uſum eius in totum auferre. A ſalice ſalignum deducitur, quod è ſalice eſt, ſicut acernum, quod ex acere. & abiegnum, quod ex abiete. & ſalicetum ſeminarium ſalicum, quod & ſalictum per ſyncopen dicitur. Virgilius, Hyblæis apibus florem depaſta ſalicti. & ſalicaſtrum, genus labruſcæ in ſalictis naſcens. Nam labruſca eſt, quæ à græcis ἄμπελος ἀγρία hoc eſt uitis agreſtis appellatur, ſpiſſis & candicantibus folijs geniculata, ramoſo cortice. fert uuas rubentes cocci modo, quæ cutem in facie mulierum purgant. Quidam hanc tamniam uocant. Vitis alba eſt, quam græci ampeloleucen uocant. alij ſtaphylen. alij molothron. alij philotrum. alij arcecoſtin. alij cedroſtin. alij madon. huius ſarmenta longis, & exilibus internodijs geniculata ſcandunt folia pampinoſa ad magnitudinem ederæ, diuiduntur ut uitium. Radix alba grandis, rhaphano ſimilis initio. Ex ea caules aſparagi ſimilitudine exeunt, qui decocti in cibo aluum, & urinam cient. Eſt & nigra uitis, quam quidam ampelomelænam. alij bryoniam. alij chironiam. alij gynecanthen. aut aproniam uocant, ſimilis priori, præterquam colore. Aſtaphis agria, ſiue ſtaphis uitis eſt cauliculis nigris, rectis, folijs labruſcæ, fert folliculos uerius, quàm acinos uirides. ſimiles ciceri, in his nucleum triangulum matureſcit cum uindemia.

FVGAM Curſum, de quo ſupra diximus. IMPLICITAM Ipſe implicitus, hoc eſt innexus, in

uolutus. implicare enim inuoluere, & irretire eſt. Plautus, Hæc meretrix miris me implicauit modis. Sed de hoc ſuperius diſſeruimus. VISCO, Rete. Retia longis temporibus ad auium duntaxat aucupia in uſu fuere, poſtea imperatorum ferè temporibus, dum uenationum ſpectacula populo edebãt, feris quoque ea adhibere cœperunt. Martialis, Pulcher adeſt onager, mitti uenatio debet. Dentis Erithræi iam remouete ſinus. Per ſinus enim retia intelligi manifeſtum eſt. Quippe ſinus proprie pars illa dicitur, quæ eſt intra pectoris, brachiorumq; complexum. Vnde fit ſinuo uerbum, quod eſt curuo, flecto. Hinc ſinus ueſtium appellati, quales erant tunicæ Romanorum, & nunc ſunt quorundam religioſorum ſupra cincturam laxitas illa, ueſtis quæ cingulum operit. Et per metaphoram ſinus uocantur litora curua, & quaſi brachijs mare amplectentia. A` quo curuitas ipſa ſinuatio dicitur. & ſinuatim aduerbium, quaſi per ſinus, & ſinuoſum mare, quod multos habet ſinus. item ſinuoſum, quicquid ſinus facit propter laxitatem, ut ſinuoſa uela, quæ uentis flantibus curuantur, & ſinus faciunt. Ponitur etiam pro orbe oculos amplectente, hoc eſt pro palpebris. Virgilius. ſinum lachrymis impleuit obortis. item pro quacunq; re fluente ob laxitatem, atque capaci. Iuuenalis. Fata regunt homines, fatum eſt in partibus illis, Quas ſinus abſcondit. unde & retia ſinus uocantur. idem. Impleuitq; ſinus. Sinus etiam prima producta, uaſis genus eſt ſinuoſum. ſicut galeola. Virgilius, Sinum lactis, & hæc te liba Priape quotannis Expectare ſat eſt. Var. Vbi erat uinum poſitum in menſa, aut galeola, aut ſinu. A` ſinu fit etiã uerbum inſinuo, quod proprie ſignificat coniungo, & quaſi in ſinum committo. Siſenna. Agmen perturbatum peditis inſinuant, ac loco commouẽt. Iuſtinus. cui ſe celeriter officij comitate, & obſequendi gratia inſinuauit. Hinc per metaphoram inſinuare dicimus, non aperte, & ſimpliciter rem exponere, ſed latenter in animum audientis ueluti in ſinum, id quod uolumus mittere. A` quo inſinuatio apud rhetores appellata, quæ exordij pars eſt, et ita à principio diſtinguitur, quod in principio eſt recta beneuolentiæ, & actionis poſtulatio, quæ eſſe in turpi genere cauſæ non poteſt. inſinuatio ſubrepit animis, uel quia res ſit improba, uel quia ab omnibus parum probetur. Quod uiſcum pro rete uſurpauerint ueteres, teſtatur Nonius Marcellus. Viſcum inquit, poſitum aliquando pro rete reperitur à tenacitate. Teſtatur Varro, cuius ipſe teſtimonio utitur. Lepuſculi timentes hoc quadrangulum, dedunt ſe in rete. Sic fugere uiſcum nequiuerunt, lineamq; compedem. Teſtatur Virgilius. Tum laqueis captare feras, & fallere uiſco Inuentum, & magnos canibus circundare ſaltus. De feris enim hic proculdubio Virgilius loquitur, non de auibus. Nec recte ſentit Seruius diuiſum eſſe ſenſum, & quod dicit laqueis captare feras ad uenationem pertinet, quod uero ait fallere uiſco, ad aucupium. mox enim poëta ipſe ſubiungit, & magnos canibus circundare ſaltus, quod ad uenationem pertinet, ferasq;. Auium autem nullam hoc loco facit mentionem. Sic igitur Virgilius laqueum, & uiſcum nominauit, ut Varro uiſcum, & lineam compedem. hinc aliqui, quos Seruius reprehendit, ui quadam ueritatis impulſi, quoniam uiſcum pro rete à ueteribus uſurpari ſolitum ignorabant, & tamen non de auibus, ſed de feris loqui Virgilium non dubitabant, pro uiſco uiſcerationem interpretati ſunt, in non minorem mihi uidentur errorem lapſi, quoniam cum carnem ſignificare uolumus, uiſcus uiſceris dicimus non uiſcum uiſci. Ouidius. Heu quantum ſcelus eſt in uiſcere uiſcera condi, Alteriuſq; animantem animantis uiuere leto. Lucretius. Viſceribus uiſcus gigni, ſanguenq; creari. Sed in hũc errorem lapſum fuiſſe Nonium Marcellũ eo magis admi-

Lucret. Viſceribus uiſcus gigni, ſanguenq; creari. Virg. Tũ laqueis captare feras, & fallere uiſco, id eſt tractu uiſceris. Sic autem pro rete uiſcum uſurpamus, à retinẽdis feris, quẽadmodum pro arboribus capimus retas, quod naueis retineant tanquam retia. Sunt enim retæ arbores, quæ aut ex ripis fluminum eminent, aut in alueis eorum extant, à retibus appellatæ, quod prætereuntes naues quaſi irretire uideantur. icirco flumina retanda locari ſolent, id eſt purganda, ne quid moræ ſiue periculi nauibus in ea uirgulta incidentibus fiat. Rete à raritate deductum diximus, teſte Varrone, à quo reticulum, de quo ſuperius locuti ſumus. & irretio uerbum, quod ſignificat retineo, capio. & irretitum dicimus, fraude aliqua, aut blãditijs, aut dolo quaſi rete captum. Viſci tria ſunt genera. unum in abiete & larice naſcens, quod caſſitias dicitur, alterum in Eubœa, quod ſtellis. Tertium in arcadia, quod hyphear. Viſcum in quercu, robore. ilice. primo ſylueſtri. Terebintho, nec ullis alijs arboribus naſcitur. Copioſiſſimum in quercu, quod dryos hyphear uocant. Satum nullo modo naſcitur, nec niſi per aluum auium redditum, maximeq; palumborum, & turdorum. Hæc eſt enim uiſci natura, ut non proueniat niſi prius in uentre auium maturatum fuerit. Altitudo arbuſculi cubitum non excedit. uiſcum fit ex acinis, qui meſſium tempore immaturi colliguntur. Nam ſi imbres acceſſerint, amplitudine quidem augentur, uiſco uero marceſcunt. Siccantur deinde, & aridi tunduntur, ac conditi in aqua putreſcunt duodenis ferè diebus, & unum hoc ex omnibus rebus putreſcendo gratiam inuenit. inde in profluente rurſus malleo tuſi amiſſis corticibus interiore carne lenteſcunt. Hoc uiſcum, cum libet inſidias moliri auibus iuglandis oleo ſubigitur, aut ſi aues aquaticæ ſint, & in aqua uiſcum debeat poni larido ſiue altero pingui. Nihil habebant druides uiſco, & arbore, in qua naſcitur, ſacratius. hi magi gallorum erant. in omni quippe Gallia eorum hominum, qui in aliquo eſſent honore, duo genera erant. nam plebs penè ſeruorum habebatur loco. qui nihil habebant per ſe, nulli adhibebantur conſilio. Pleriq; cum aut ære alieno, aut magnitudine tributorum, aut iniuria potentiorum premebantur, ſeſe in ſeruitutem dicabant hominibus nobilibus. In hoc eadem omnia iura erant, quæ dominis in ſeruos. Sed horum duo genera erant. Alterum druidum. Alterum equitum. illi diuinis rebus intererant, ſacrificia publica & priuata procurabant. Religiones interpretabantur. Ad hos magnus adoleſcentium numerus diſciplinæ cauſa concurrebat, magnoq; ij apud eos erant honore. Nam ferè de omnibus controuerſijs publicis, priuatiſq; conſtituebant. Siquis aut priuatus, aut publicus eorum decreto non ſtetiſſet, ei ſacrificijs interdicebatur, hæc pœna apud eos erat. Quibus ita erat interdictũ, ij numero impiorum, ac ſceleratorum habebantur, horum conuerſationem, ſermonemq; omnes fugiebant, ne quid ex contagione incommodi acciperent, neque ijs petentibus ius reddebatur, neq; honos ullus cõmunicabatur. Omnibus autẽ druidibus præerat unus, qui ſummam inter eos habebat authoritatem. hoc mortuo, aut ſiqs ex reliquis excellebat dignitate, ſuccedebat. aut ſi plures erant pares, ſuffragio druidum. Nonnunquam etiam de principatu armis contendebant. Hic certo anni tempore in finibus Carnutũ, quæ regio totius Galliæ media habetur, cõſidebat in loco conſecrato. huc oẽs undiq;, quibus aliqua cõtrouerſia erat cõueniebant, et druidũ iudicijs, decretiſq; parebãt. Eorũ diſciplina in Britãnia repta, et ĩde ĩ galliã trãslata fuerat. druides à bello abeſſe cõſueuerãt, neq; tributa unà cũ reliqs pẽdebãt.

Vacationem militiæ, omniumq; rerum habebant immunitatem. Hi ergo roborũ eligebant lucos, nec ulla ſacra ſine ea fronde conficiebant. unde & ἀπὸ τῆς δρυὸς, hoc eſt à quercu druides appellari exiſtimantur. Quicquid ijs arboribus adnaſcatur, è cœlo miſſum putabant, ſignumq; eſſe, quod ea arbor à deo electa eſſet. Repertum ergo in ea uiſcum magna religione petebatur. Sacrificio epulis rite ſub ea arbore præparatis duos admouebant candidi coloris tauros, quorum cornua tunc primum uinciebantur. Sacerdos candida ueſte indutus arborem ſcandebat, falce aurea demetebat uiſcum. Candido id ſago excipiebatur. Tum demum uictimas ĩmolabant precantes deum, ut donum ſuum ijs, quibus daretur, proſperum faceret. Fœcunditatem cuicunque animalium ſterili eo poto, præberi arbitrabantur, contraq; omnia uenena eſſe remedio. A` uiſco uiſcoſum deducitur, quod tenax ſignificat, diciturq; etiam uiſcidum. & inuiſco, quod eſt uiſco inficio.

SPLENDIDA. Lucentia. Ob candorem ferri. ſplendere lucere eſt. Hinc ſplendor ſolis. Ponitur tamen per metaphoram pro decore. dignitate. gloria. Vnde ſplendorem nominis. ſplendorem familiæ. ſplendorem uirtutum. ſplendorem rerum geſtarum dicimus, hoc eſt claritatem. & ſplendidus. fulgens. clarus. & ſplendide aduerbium, clare. Quidam etiam ſplendeſco uſurpant. Apuleius, Cum iam aurora ſplendeſceret. & Splendophorus, nomen proprium ex græco, ac latino compoſitum, quaſi ſplendorem ferens. & compoſitum reſplendeo. CESSENT. Deſiſtant ab opere, reponantur.

TECTO FERRO. In uagina recondito, quod in uenabulis, atq; alijs huiuſmodi telis fit, ne rubigo inceſſat. LANCEA. Teli genus omnium longiſſimum, à græco nomen habens. Quippe græci λόγχην lanceam dicunt. à quo λογχοφόρον lancearium Poſt lanceam inter tela longior eſt materis. Siſenna. Gallia materibus, ſæui lanceis configunt. idẽ. Alij materibus, aut lanceis mediũ perturbant agmen. A` lancea fit lancino uerbum, quod eſt ferio. lacero. Plynius, Eſt & uolucre canibus peculiare malum, aureis maxime lancinans, quæ defendi morſu non queunt. Solinus. In Aſia locus eſt, quò primo aduentus ſui tempore ciconiæ aduolant, & eam, quæ ultima aduenerit, lancinant uniuerſæ. TORTA. Emiſſa, iaculata. Virgilius, In medios telũ torſiſti primus Achiuos. de quo ſupra diximus. EXCVSSA MANV. Mota uibrante manu. Excutere enim proprie mouere eſt. Cicero. Explica, atque excute intelligentiam tuam. Plautus. Excute dum palium. Per metaphoram tamen aliquando pro emittere accipitur. Virgilius, excuſſus Aconteus Fulminis in morem. Aliquando pro deijcere. idem. Excutimur curſu, & cæcis erramus in undis. idem. magno ſi pectore poſſit Excuſſiſſe deum, tanto magis ille fatigat. Hinc excuſſores equi dicuntur, qui ſeſſorem deijciunt. Plynius. Excuſſo Circẽſibus auriga, cucurriſſe excuſſores conſtat, & primatum obtinuiſſe. & excuſſio, eiectio. Veteres aliquando exciet per ſyncopen pro excutiet ſcripſere. Compoſitum autem excutio eſt ab ex intentiua præpoſitione, et quatio, quod ſimiliter proprie ſignificat moueo. Virgilius, At uero ingentem quatiens Mezentius haſtam. Sed per metaphoram modo pro concutio ponitur. idẽ. Quadrupedante putrem ſonitu quatit ungula campum. Modo pro infeſto. idẽ. Aut raſtris terram domat, aut quatit oppida bello. Modo pro eijcio, ſiue excludo. Terentius, Nimirum homo quatietur cum dono foras. Ab hoc fit frequentatiuum quaſſo, quod ſimili modo ſignificat moueo. Plautus, Qui ſuam undantem chlamydem quaſſando fecit. Nonnunquam ponitur pro concutio. Virgilius, Quaſſatæq; rates, dum nõ tractabile cœlum. Ab hoc fit quaſſabundus. Plautus. Caput modo quaſſabundus exiuit domo.

Eſtq; proprie teſtamentum illud, quod iure perfectum eſt. abuſiue tamen ea quoque teſtamenta appellantur, quæ falſa ſunt, uel iniuſta, uel irrita, uel rupta. teſtamentum falſum eſt, quod non ſecundum teſtatoris uoluntatem ſcriptum eſt, ſed habet aliquid additum, uel diminutum, uel mutatum, uel aliud pro alio ſuppoſitũ. Irritum uero teſtamentum eſt, qñ de iure inualidum eſt ut ſi is, qui teſtatur, ſit capite diminutus. iniuſtum, qñ non recte factum eſt, utputa ſi ſit inofficioſum, exhæredatis liberis, & extraneo hærede conſtituto, quod eſt contra pietatis officiũ. ruptum eſt, quod ex aliqua cauſa infringitur, ut ſi poſt mortẽ patris filius naſcatur, qui dicitur poſthumus, iſq; neq; hæres inſtitutus, neq; exhæredatus ſit. uel ſi duo teſtamenta condita ſint. poſteriore. n. rumpitur prius. Vlpianus. Si binæ tabulæ proferantur diuerſis temporibus factæ, unæ prius, alteræ poſterius, utræq; tñ ſeptem teſtium ſignis ſignatæ, & aperte poſteriores uacuæ inuẽtæ ſint, ideſt nihil ſcriptum habẽtes, oĩno ſuperius teſtamentũ ruptum non erit, quia ſequens nullum eſt. Hoc et procitum teſtamentũ dicitur, quaſi prouocatum, penultima longa. Nã procitũ penultima ſyllaba correpta ſignificat petitum. à proco, qđ eſt peto. à quo procor. Pomponius, Ipſe cum uno ſeruo ſenex inteſtato proficiſcitur. Et inteſtabilis, qui iure facere teſtamentum non põt. Item inteſtabilis pro deteſtabilis. Gellius, Eos tamen, qui ad Annibalem non rediſſent, uſque adeo inteſtabiles, inuiſoſq; fuiſſe, ut tædium uitæ ceperint, necemq; ſibi conſtituerint. inteſtabilem Caius iuriſconſultus eum eſſe dicit, qui lege iubetur, ne eius

eius teſtamentum recipiatur, neue ipſi dicatur teſtimonium. inteſtatum uero Paulus eſſe ſcribit non ſolum eum, qui teſtamentum non facit, ſed etiam eum, qui teſtamento liberis ſuis tutelã non dederit. Vlpianus autem inteſtatos eos eſſe, qui cum poſſent teſtamentum facere, non ſunt teſtati. Item quorum hæreditas addita non eſt, uel ſi ruptum, aut irritum teſtamentum eſt, ſed qui teſtari non potuit, ut puta impubes, aut furioſus, uel is, cui bonis interdictum eſt, inteſtatus proprie dici non poteſt. Item à teſtor, quando ſignificat teſtamentum condo, fit teſtator, is, qui teſtamentum condit, cuius fœmininũ eſt teſtatrix. Item à calido caldarium, quaſi calidarium dictum, de quo ſupra diſſeruimus. & calefacio, quod & calfacio dicitur. à quo concalfacio, quod interdum ſignificat excito, incendo. Cicero. Et ait idem, cum brachium concalfecerit, tum ſolere pugnare. & calefio. & calefactio. & calorificum, ſicut à frigore frigorificum. & caliditas feruor. & calix ſecundum Varronem, quod in eo calida hauriri ſolerent, de quo inferius dicemus. ad hæc in ſue botulus commendatur, qui & botellus dicitur, farciminis genus è carne ſuilla, à bolis, hoc eſt fruſtulis carnis, ut quidam putant appellatus. Bolus enim cuiuſque rei fruſtum ſignificat, unde bolum terræ glebam dicimus. bolum argenti, maſſam argenteam. Martialis, Qui uenit botulus mediæ tibi tempore brumæ, Saturni ſeptem uenerat ante dies. Item offula ab offa, lucanica, quam farcire ex mediocri inteſtino Romanæ mulieres à Lucanis didicerũt. Inſitia ab eo, quod inſecta caro reticulo circundatur. alio modo & macula appellãtur, ſiue per ſyncopen tomacla, quod græci τομὴν ſectionem dicunt. Item faliſcus uenter, quod eum farcire à Faliſcis didicere. hilla tenuiſſimum inteſtinum fartum. Apexabo aliud inteſtinum ſanguine plenum admiſto pingui, quod in ſummitate quiddam habet, quaſi in capite apicem. Longauo tertium inteſtinum, quod longius ſit, quàm illa duo. Item è ſue porcellus lacteus in pretio erat. Martialis. Lacte mero paſtum pigræ mihi matris alumnus Ponat, & ætolo de ſue diues edat. Item lumbus apri, qui aprunos uocabatur, ſolidum aprum primus Romanorum in epulis appoſuit P. Seruilius Rullus. Quinctiam porcum non modo integrum, ſed etiam alijs animalibus plenum apponere in conuiuijs ſolebant, quem porcum troianum uocabant, quaſi alijs incluſis animalibus grauidum, ut ille Troianus equus grauidus armatis fuerat. Viuaria aprorum primus togati generis inſtituit Fuluius Lippinus, quem poſtea L. Lucullus, & Q. Hortenſius ſunt ſecuti. Apris in India cubitales ſunt dentium flexus, gemini è roſtro, totidem à fronte, ceu uitulis cornua exeunt. ferus aper (ut diximus) uocatur. ſus utrique commune nomen. Domeſticus porcus ferè nominatur, & feminino genere porca. Martialis.

Scribunt quidam porcetram à porca dici eam, quæ ſemel peperit, ſcrofam, quæ ſæpius. Miſcet ſe porca domeſtica cum fero, ita natos hibridas antiqui uocauere. poſtea in homines quoque ea appellatio tranſlata eſt, initio ab Antonio Ciceronis collega facto. ab apro aprinus deducitur, ut aprina caro. à ſue ſuillus, & ſuarius, ſuum cuſtos. & ſuculæ (ut quibuſdam placet) de quibus ſupra diximus. & ſeta, & ſuo, cæteraq; ab ijs deriuata, de quibus inferius diſſeremus. à porco porcinus, & porcarius cuſtos porcorum. & porcellus, paruus porcus. DIANAE. Venationis. quemadmodum enim pro uino Bacchum, pro mari Neptunum, ſic pro uenatione Dianam poëtæ uſurpant. PARTVS. Filij. Parere enim eſt fœtum emittere, quod proprium fœminarum eſt. dicitur tamen etiam

Virgilius, Ite ait egregias animas, quæ ſanguine nobis Hanc patriam peperere ſuo. Veteres in quarta coniugatione hoc uerbum uſurpabant. Ennius. Oua parire ſolet genus pennis condecoratum. à pario partus deducitur, quod modo actum ipſum pariendi ſignificat. Plynius, Quod à prægnantibus commanducatum partum faciliorem facit. modo pro ipſa prole. Martialis, Nec iacuit partus, ſed matre cadente cucurrit. modo adiectiuum eſt, & ſignificat comparatum, acquiſitum. Apuleius, Partamq; à patre longo tempore, & multo labore pecuniam uno die cō ſumpſit. Item à pario primipera, hoc eſt fœmina, quæ primū partum fecit. Plynius, Nec nouellarum ſuum præter quam primiperarum uuluæ probantur. Item puerpera, quæ mater eſt facta, à quo puerperium partus. & proles ipſa. Gellius, Diuo Auguſto imperante ancilla eius in agro laurente peperit quinque pueros, qui pauculos dies uixerunt. Mater quoq; non multo poſt mortua, monimentumq; ei factum iuſſu Auguſti in uia Laurentina, in quo ſcriptum fuiſſe conſtat numerum puerperij, de quo diximus. & uipera, quod ui pariat. unde uiperinus, quemadmodum ſupra diximus. & parens non modo pater, & mater (ut uulgus putat) ſed auus, proauusq;. et auia, ac proauia. Caius etiam iuriſconſultus ſentit omneis ſuperiores parentis appellatione contineri. Virgilius pro patria parentem metaphoricæ poſuit, quoniam patria dulciſſima parens eſt, amiſſa cura parentis. ab hoc parentare deducitur, quod proprie eſt parentibus iuſta celebrare. trāsfertur tamen & ad alios. à quo parentalia dicuntur conuiuia, quæ in parentum, aut propinquorum mortibus fieri conſueuerunt. & paricida, qui parentem occidit. ponitur tamen pro alio quocunque, qui qualemcunque hominem occiderit, unde extat lex illa Numæ Pompilij. Siquis hominem liberum morti ſciens det, paricida eſto. Hinc parici appellabantur quæſtores, qui cauſa capitalium rerum querendarum creari ſolebant. & paricidium quemadmodum homicidium. Nam de eo qui patrem occiderit, patricidium dicitur, ſicut matricidium, de eo, qui matrem occiderit, qui etiam patricidæ, & matricidæ nominari poſſunt. Item à pario, ſiue partu parturio, quod non eſt meditor parere (ut grāmatici omnes ſcripſerunt) neque deſydero parere (ut Valla) ſed in pariendo laboro, quam ſignificationem habent ferè uerba in rio deſinentia, ut cœnaturio. Martialis,

Ideſt laborat, ut cœnet. Quandoq; tamen aliter accipiuntur. parturio ergo eſt laboro, ut pariam. Plynius. Vtique conſtat parturienteis folijs ſubſtratis celerius parere. Cicero, Vtinam aliquando dolor populi romani pariat, quod iandiu parturit. Liuius, Et quod diu parturit animus, utinam pariat. præterea à pario compoſita fiunt aperio, cuius alterum compoſitum eſt adaperio, qđ proprie eſt patefacio. quippe in partu, quod latebat in utero mulieris aperitur, & fit palàm. Teren. Abi præ ſtrenue, ac fores aperi. per metaphoram tamen; quoniam quæ parum intelliguntur, tecta eſſe uidentur, & declarando aperiri, hoc uerbum pro exponere, & declarare uſurpamus. Plautus, Age iam, & hoc ænigma aperi nobis, hoc eſt expone. declara. Eſt enim ænigma quæſtio uelata, ſiue (ut Quintilia. ait) obſcura allegoria, ut Mater me genuit, eadem mox gignitur à me, quod de glacie dicitur, quæ ex aqua concreſcit, & mox in aquam effluit rurſus. græci αἰνικτὰ uocant ἄγνωστα κεκρυμμένα. Ariſtophanes ὡς πάντ' αἰνικτὰ κακόφημοι λέγεις, hoc eſt, ô quàm obſcura, atque abdita mihi loqueris.

ab hoc ænigmata dicta, quæ ueteres latini ſcirpos uocauere. eadem ratione aperire pro nudare accipitur. Cicero. Verentur enim, ne ſiquo caſu acciderit, ut partes corporis quædam aperiantur, aſpiciantur non decore. & pro oſtendere quod prius erat occultum. Virgilius, Quarto terra die primum ſe attollere tandem, uiſa aperire procul, & pro placare. mitigare. Idem. Et uaſtas aperit ſyrteis. Hinc etiam aliquādo apertum pro claro, atque ſereno accipimus, quod nullis ſit nubibus tectum. Idem, Scindit ſe nubes, & in æthera purgat apertum. ab adaperio adapertile deducitur, quod ſignificat apertum. Ouidius, Aſpicis à dextra latus hoc adapertile tauri. operio. tego, quaſi in oppoſitum pario, à quo operimentum dictum, quod aliquid tegit, & operto frequentatiuum, & opercula. Varro eſſe ſcribit palia, quibus operimur. Ab hoc fiunt adoperio, & cooperio eiuſdem ſignificationis. opperior uero deponens cum duplici pp. ſcribitur, & ſignificat expecto, & quaſi partum differo. Plautus. Mane dum, atque hic opperire. præterea à pario, ueteres perio uerbum actiuum traxere, quod ſignificat aperio. doceo. Vnde periti dicuntur docti experti, ſicut econtrario imperiti indocti, atque inexperti. à quibus peritia, & imperitia deriuātur. ab eo fit cōpoſitum, quod in uſu eſt, experior. Virgilius uos & cyclopea ſaxa Experti, reuocate animos. Modo intelligo, ſentio. Terentius, Nam fuiſſe ergo me miro ingenio expertus ſum. Aliquando tento. inde inexpertum pro intentatum accipimus. Virgilius, Nequid inexpertum fruſtra moritura relinquat. ab experior experti dicuntur periti, & experientia uſus doctrina. Idem, Apibus quanta experientia parcis. expertes uero ignari, rudesq;, & nullam rerum experientiam habentes. Item expertes dicuntur, q nō ſentiunt. Vnde expertem doloris dicimus, qui non ſentit dolorem. expertem mortis, qui non moritur. expertem humanitatis, qui nihil habet humani. ueteres experitos quemadmodum imperitos dicebant. experte aduerbium accipitur pro eo, quod eſt docte, perite. Item experta dixerunt antiqui experta habita. quidam expers non ab experiendo deductum exiſtimant, ſed ab ex & pars, quaſi ſine parte, quemadmodum exſpes dicitur ab ex, & ſpes, quaſi ſine ſpe, ut ſuperius diximus. Item à pario reperio. Vnde Pompeius repertum dici affirmat, quaſi repartum. & in lucem proditum. Eſt autem reperire proprie fortunæ, inuenire uero conſilij. Ouidius, tu non inuenta reperta es. Sed iam uſus obtinuit, ut idem ſit reperio, quod inuenio. ab hoc fit repertor, hoc eſt inuentor. Item à pario comperio, quod ſimiliter ſignificat inuenio. à quo compertor. inuentor. compertum eſt mihi, & explanatum eſt mihi pro eodem accipiuntur, & ſimiliter comperi, & explanaui, quod eſt ueſtigando inueni. ab eodem etiam (ut quidam exiſtimant) pars dicta, quod à toto emiſſa ſit, quaſi à toto parta. quamuis alij à parum potius partem dictam exiſtimant, quod parum ſit reſpectu totius, ut ſuperius oſtendimus. Item Parcæ una litera mutata, quemadmodum de ijs, atque eorum deriuatiuis ſuperius diſſeruimus. ſunt etiam qui par à pariendo deductum putent, quod ſignificat ſimile. ita enim natura comparatum eſt, ut partus ſimilitudinem ferè habeat cum pariente. ab hoc fit par neutri generis, quod modo numerum duorū ſignificat, quaſi inter ſe parium. unde unum par, & duo paria, ſiue bina paria dicimus. Suetonius, Domitianum quæſtorijs muneribus, quæ olim omiſſa reuocauerat, ita ſemper interfuiſſe tradunt, ut populo poteſtatem faceret, bina paria ex ſuo ludo poſtulandi, eaq; nouiſſimo aulico apparatu induceret. modo æquum. conueniens. decens. Quintilianus, Si propter matrimonia uiolata urbes euerſæ ſunt, quid fieri adultero par

Titinnius. næ tu iſtam ædepol īnedia extuliſti pariter, ut dignum fuit. Aliquando ſimiliter. Plautus. Is ex ſe hunc reliquit, qui hic habet filium pariter moratum, ut pater, atque auus eius fuit. parem eſſe idē eſt, quod ſufficere alicui rei, ſiue reſiſtendo, ſiue exequendo. Cicero, Tamen interpellat fletus. repugno quoad poſſum, ſed adhuc pares non ſumus. Quintilianus. Aſpicio par laboribus corpus. paria facere, eſt, quod alibi amiſſum, uel quod aliunde acceptum eſt, alibi, uel aliunde compenſare. Idem. ſic paria faciemus. Tu illic eris uicarius meus, ego hic tuus. Aliquando etiam pares pro duobus accipimus. paribus equis, ideſt duobus Romani utebantur in prælio, ut ſudante altero tranſirent in ſiccum. à par fiunt impar, & diſpar. à quibus imparitas, diſparitas. par impar, genus ludi eſt uulgo noti, cum pluribus numis manu occultatis, petitur, par'ne, an impar eorum numerus ſit. Suetonius, De Auguſto ſcribit ad filiam. miſi tibi denarios ducentos quinquaginta, quos ſingulis conuiuijs dederam, ſi uellent inter ſe poſt cœnam, uel talis, uel par impar ludere. præterea compar, quod idem ſignificat, quod par. Liuius, comparem cladē ad Aegateis inſulas Carthagnienſiū prælio nauali acceptam, qua fracti, Sicilia, ac Sardinia ceſſere. Rhetores compar, quod græci ἰσόκωλον, hoc eſt iſocolon uocant, idem eſſe dicunt, quod duabus, aut pluribus ſententijs breuibus, & inter ſe paribus exigitur, ut eſt illud, nequaquam mihi cum eo res eſt, qui neque finem habet cupiendi, neque modum ſtatuit utendi. Nam & multum deſyderare egentis eſt ſignum, & nihil parcere, egeſtatis eſt initium. Item illud, diuerſum eſt, beneficium dare libenter, & iniuriam facere nolle. Nam dando beneficium, aſſequimur beneuolentiam, non faciendo iniuriam, duntaxat odium uitamus. præter hæc à par parilis, & imparilis deriuantur, hoc eſt par & impar, à quibus parilitas, & imparilitas. Item à pario paro. Nā quæ paramus, quodammodo parere, & proferre uidemur. ab hoc compoſita fiunt apparo, & præparo, quæ inter ſe ita differūt, quod præparare eſt antea ſibi, quæ utilia ſunt, aut fore creduntur parare. Cicero, Facile totius uitæ curſum uidet, ad eamq; degendam præparat res neceſſarias, ut paſtum, ut latibula, ut alia generis eiuſdem. apparare uero eſt ad dignitatem quandam, ſeu uerius pompā. ideo oratores præparare dicuntur, quibus obtinere cauſam poſſint. apparatum uero procemium reprehenditur, quod plus pompæ, atque oſtentationis, quàm utilitatis habere uideatur. ponitur tamen aliquando apparatus pro præparatione, ut belli, & claſſis apparatus. Sed in hoc quædam pompa intelligi uidetur. præterea à paro reparo, quod eſt reſarcio, inſtauro, quaſi rurſus paro. à quo reparatio. & reparamen, & ſeparo quod eſt diuido, diſtraho. à quo ſeparatio, & aliud compoſitum diſſeparo, & quibuſdā literis interciſis diſſipo, quod ſignificat diſiicio, diſtraho. à quo diſſipatio. Martialis, Hæc, quæ puluere diſſipata multo, Longas porticus explicat ruinas. Item diſparo, quod ſimiliter ſignificat ſeparo. Varro. Conuocat omneis bonos, à malis diſparat. Et comparo, quod proprie eſt paro. Cicero, Vt erat inter ſeruos copioſus conuiuium comparet. ponitur tamen aliquādo pro acquiro. Apuleius, Vt ſenectutis mihi uiaticum compararem. Cicero, Omnis authoritas philoſophiæ conſiſtit in beata uita comparanda. Et pro adæquo, coniungo. Plautus. Prende auriculis, compara labella cum labellis. Et pro aſſimilo. Terentius, Ah ne comparandus hic quidem ad illum eſt? Cicero, Neminem tibi profecto hominem ex hominibus aut antepoſuiſſem unquam, aut etiam comparaſſem. ab hoc comparatio

deriuatur, dicimusq; recte comparo tibi illum, comparo te cum illo, & comparo te ad illum. Et pro compono. machinor. Siſenna, eos, qui hoc malum publicum clandeſtinis conſilijs comparauerint. Et pro diſpono. Terentius, an potius ita me comparem non perpeti meretricum contumelias. Et pro emo. Idem, Illum autem uelle uxorem, ut cum deſponderim, des qui aurum, & ueſtem, atque alia, quæ opus ſunt, comparet. Item pro æſtimo. Accius, proin tu id, cui fiat, non qui facit compara. & pro eo, quod eſt do. Cicero, Ex omni gemitu, ac dolore certa merces cōparabatur. Itē à pario parilia uocitata ſacra deæ Palis, hoc eſt telluris, quæ pro partu corporis celebrabantur XVII Calendarum Maij, qui dies natalis erat urbis Romæ. Quippe eo die Romulus augurio capto urbem aratro deſignauerat. Varro tamen parilia, quaſi palilia à Pale uocitata exiſtimat. Palem exiſtimant Veſtam eſſe, Saturni matrem. duæ enim Veſtæ à ueteribus memorantur, altera Saturni mater, altera eiuſdem dei filia, de qua Ouidius. Ex Ope Iunonem memorant, Cereremq; creatam, Semine Saturni, tertia Veſta fuit. confundunt tamen hæc poëtæ alteram pro altera ponentes. Quando eam terram eſſe dicunt, de matre Saturni intelligendum eſt. quando uero uirginem nominant de filia eius, quam ignem eſſe uoluere. Ouidius,

Nec tu aliud Veſtam, quàm uiuam intellige flammam,
Nataq; de flamma corpora nulla uides.
Iure igitur uirgo eſt, quæ ſemina nulla remittit.

Huius ſimulachrum Romani Peſſinunte allatū in æde Victoriæ, quæ eſt in palatio, poſuere. & uirgines ei ſacrarunt, quæ ignem perpetuum conſeruarent. Hæ ſi forte ſtuprum commiſiſſent, uiuæ defodiebantur. à Veſta ueſtales uirgines appellatæ. Veſta uero ἀπὸ τῆς ἑστίας, hoc eſt à foco, in quo ignis alitur. Nam cum pro terra, ſiue deorum matre accipitur, à ueſtitu denominatur, quod uarijs herbis, ac floribus ueſtita ſit terra. & propero feſtino, quaſi ante tempus paro, de quo, & eius deriuatiuis ſuperius diximus. Et perpero, deprauo, quaſi nimis exacte paro. Vnde ꝑperi dicuntur ſtulti. rudes. inſulſi. praui. mendaces. Accius, deſcribere eum miror perperos popularis. hinc etiam perperitudo fit, quod modo prauitatem, modo ſtultitiam ſignificat. Idem, ductabilitate nimia ueſtra hoc facitis, ac perperitudine. Item perperā aduerbium, hoc eſt praue, ſtulte. Plautus, Quidnu ſemper agit perperam. Et impero, de quo ſimiliter cū eius deriuatiuis locuti ſumus. Item à pario fit pareo uerbum, quod proprie ſignificat uideor, quoniam partus, poſtquam extra uterum eſt, uidetur. Virgilius, Cui pecudum fibræ, cœli cui ſydera parent, hoc eſt à quo fibræ, & ſydera cernuntur. hinc appareo eiuſdem ſignificationis. Virgilius, Apparet liquido ſublimis in aëre niſus. Item appareo, præſtò adſum. Virgilius, Hæc Iouis ad ſolium, ſæuiq; ad limina regis Apparent. DE CARPOPHORO EPIGRAMMA. XV.

SVMMA TVAE. Blanditur Domitiano in laudando Carpophoro, qui uenator excellentiſſimus fuit, & ob id chariſſimus principi. ordo eſt. aper fuſus, qui fuit ſumma gloria tuæ famæ ó Meleager, quātula portio eſt famæ Carpophori? quaſi dicat paruula quædam particula eſt gloriæ eius, cum ille aprum tantum interfecerit, hic uero & Vrſum, & Leonem & Pardum. MELEAGRE. Meleager. nam in recto & Meleager, & Meleagrus dicitur. Ouidius. Donec Meleagrus, & unà Lecta manus iuuenum. Meleager filius fuit Oenei regis Aetoliæ ex Althea coniuge, quem cum Althea peperiſſet, animaduertit tres parcas iuxta ignem ſedentes, lanamq; colo trahentes, quæ cum forte ſtipitem igni admouiſſent, auditæ ſunt uerba hæc proferre. O' nunc nate erit æqua tibi cum ſtipite uita. quapropter illis mox diſcedentibus Althea ſtipitem ex igne ſubtraxit, & ne ureretur, diligenter ſeruauit. Meleager uero creuit robore, ac uiribus corporis præſtans. inter hæc Oeneus, cum omnibus dijs ſacrificia pro ſuſceptis frugibus feciſſet, ſolam Dianam inhonoratam reliquit, ſiue ille oblitus huius deæ fuerat, ſiue ita putauerat agendum. ob hoc irata dea terribilem ſetis, ac dentibus immiſit aprum, qui prouinciam Oenei omnem uaſtaret. hic & alia damna inferebat innumera, & arbores radicitus euellens, cum ipſis pomis in terra proſternebat. cædebat præterea pecudes, atq; armenta, nec canes, neq; paſtores eſſe adiumēto poterant, cum ipſi quoq; homines feræ immanitatem formidabant, uix ſe intra tecta tutos putantes. ſed tandem Meleager in feræ perniciem, & canes, & præſtantiſſimos quoſq; uiros è finitimis urbibus conuocauit, inter quos & Atalantis filia Iaſij filij Abantis Arguorum regis, à quo Iaſis dicta, uenit, uirgo & forma, & corporis uiribus præſtans, quæ prima aprum ſagitta uulnerauit, huius amore captus eſt Meleager, qui tandem feram confecit, & illius caput, ac ſetoſum tergum Atalanti, quaſi præmij partem conſorti laudis dedit. Cuius rei inuidia permoti alij, præſertimq; duo auunculi eius, cum ui rapere à uirgine apri exuuias conati eſſent, à Meleagro interfecti ſunt. Calydones ob mortem apri elati lætitia ſacra dijs fecere, dona pro more patrio templis inferentes, inter quos Althea quoque cum ob necem feræ, & filij gloriam lætabunda incederet, poſtquā de cæde fratrum allatus ei eſt nuntius, in furorem acta, ſtipitem tandiu ſeruatum flammis iniecit, quo ardente, pariter & Meleager inteſtinis flammis exuri uiſus eſt. ſunt qui eum tradant Partenopeum filium ex Atalantide ſuſcepiſſe, qui cum Adraſto aduerſus Thebas profectus in bello, deſyderatus eſt. hunc alij non Meleagri, & Atalantidis, ſed Menalippes, & Martis filiū fuiſſe exiſtimāt. mirū eſt Ouidiū hāc Cenei filiā ſcripſiſſe, cū Cenei filiā Atalantā cōſtet uocatā fuiſſe, curſu inſignē, quæ ab hoc Ceneia dicta eſt. Ouid. Talia dicentē molli Ceneia uultu Aſpicit. APER FVSVS. Aper à te proſtratus. tres apri inter portenta à poëtis numerantur. Erymanthius, ſiue Arcadicus, quem Hercules peremit. Olympius, in cuius uenatione occubuit filius Crœſi uulneratus ab Adraſto, & hic Calydonius, quem interfecit Meleager. QVANTA PORTIO. Quam parua pars. CARPOPHORI. Hoc nomen à fructu ferendo declinatum eſt. græci enim καρπὸν fructum, φέρειν ferre dicunt.

duo Carpophori temporibus Domitiani leguntur fuiſſe, alter mango, qui ſenior erat. alter, qui erat iunior, clarus fortitudine. hic Domitiano cariſſimus fuit, quod uiribus eius in feris cōficiendis oblectaretur. ILLE. Carpophorus. CONDIDIT. Abſcondit, magnitudinem ictus oſtendit, in quo totum uenabuli ferrum abſcondit. PRAECIPITI. In ſe ruenti. QVI. Vrſus. FVIT PRIMVS. Principatum & robore, & magnitudine obtinuit. IN ARCE POLI ARCTOI. In ſeptentrionali plaga. Septentrio enim maximos urſos, ac ferociſſimos mittit, uti alias pleraſq; feras. ARCE. Summitate. Arx proprie munitior pars urbis eſt, quæ quoniam in altiori parte fieri conſueuit, inualuit uſus, ut arcem pro monte, & pro quacunq; altitudine ponamus. Ideo autem ſeptentrionalis plaga alta dicitur, quia ſuperſtare nobis uidetur. quippe & polus arcticus ſupra nos eſt, quemadmodum antarcticus, quatenus ad ſitum terræ ſpectat, infra nos eſſe uidetur. ideoq; impediente terra, cerni nō poteſt. Virgilius.

Hic uertex nobis ſemper ſublimis, at illum

Arx ab arceo dicta eſt, quod prohibeat hoſteis accedere. Arcere enim prohibere eſt, ne ij, qui ueniunt, accedant. Virgilius. hoſteiſq; à mœnibus arcent. transferturq́ue aliquando ad incorporea. Cicero. Quæ uis enim eſt, quæ magis arceat homines ab improbitate, quā ſi ſenſerint in delictis nullum eſſe diſcrimen. ab hoc arca quoq; deducitur, quod ab ea clauſa arceantur fures. Eius diminutiuum eſt arcula, & huius aliud diminutiuum arcella. ab hoc arcanum, hoc eſt ſecretum, atq; abſconditum, quod quæ in arca ſunt, cælata ſint, atq; abſcondita. Virgilius. Longius euoluens fatorum arcana mouebo. Pompeius tamen arcani ſermonis ſignificationem tractam dicit uel ab arce, quæ tutiſſima pars urbis erat, uel à genere ſacrificij, quod ab auguribus in arce fiebat, adeo remotum à notitia uulgari, ut ne literis quidem mandaretur, ſed per memoriam, ſucceſſionemq́; hominū celebraretur, ut ab arca, in qua quæ clauſa ſunt, tutò cuſtodiuntur. Item ab arca Arculus deus, qui tutelam gerebat arcarum. & arcera, pluſtrum undiq; tectum, & munitum, quaſi arca quædam magna ueſtimentis ſtrata, qua ægri, aut ſenes portari cubantes ſolebant. præterea ab arceo erciſcor, quo uerbo iuriſconſulti utuntur, cū inter conſorteis hæreditas diuiditur. Vnde erciſcundæ familiæ iudicium dicitur, quaſi arcendæ ab hæreditate, quod fit in bonorum diuiſione. Erctum, citumq́; inter conſorteis in antiquis legum libris legimus, erctum ab arcendo, citum à citando, quaſi citatum. Item ab arceo Ercius, dicebatur Iupiter, qui intra conſeptum domus cuiuſq; colebatur, quem etiam Deum penetralem appellabant. quidam tamen Hercium per aſpirationem ſcribunt, & ab hærendo dictum malunt. arceſſo eiuſdem ſignificationis. & arcus, quod miſſis ſagittis non ſinat hoſtem accedere. à cuius ſimilitudine arculata uocabantur circuli, qui ex farina in ſacrificijs fiebant. Item arculi circuli, quos capitibus imponebant ad ſuſtinenda commodius uaſa, quæ ad ſacra publica capitibus portabantur. Item ab arceo arcula dicebatur auis, quæ in ſacrificijs aliquid fieri uetabat. præter hæc cōpoſita ab eo fiunt coërceo, quod eſt cogo. à quo carcer. & carceres, de qbus ſuperius diximus. & aberceo, prohibeo. Tu damni noſtri cauſa fuiſti. Tu nobis ſarcito, ut debes. ab hoc fit ſarcina, quæ proprie eſt utenſilium, & eorum, quæ ad cultum pertinent, ueluti faſcis, quem quis in itinere faciendo portare poſſit. hinc milites, cum caſtra mouere uolunt, ſarcinulas colligere dicuntur, & qui in aliam domum migrant, ſarcinas ſuas componere. per metaphoram tamen ſarcinam pro inutili onere ponimus. Aurelius. Et hanc corporis ſarcinam aliquando deponerem. hinc ſarcinator cuius fœmininum eſt ſarcinatrix. ſignificatq; proprie eum, qui plurimum ueſtium ſumit. Aliquando etiam pro ſutore accipitur. Luci. Sarcinatorem eſſe ſummum ſuere centonem optime. Item à ſarcio compoſitum reſarcio, quod eſt inſtauro, interpolo, & quaſi nouam formam induco. hoc enim proprie interpolare eſt, immutare ſcilicet, & nouam formam fingere, dictumq́; interpolo, quaſi interpolio, & ab arte fullonia tractum, qui poliendo uetera quæque in nouam ſpeciem mutant. Cicero. Aliquid demendo. mutando. interpolando. Plautus. Illic me homo interpolabit, meumq́; os finget denuo. interpolando inquit Cicero, hoc eſt renouando. & Plautus. interpolabit, hoc eſt renouabit. Plynius. At Hercule Alexandriæ, ubi thura interpolantur inquit, hoc eſt purgantur, cernuntur, quaſi reuocantur. Vlpianus. Vbiq; curant ædiles, ne emptores à uenditoribus circūueniantur. præſumptum eſt enim ea mancipia, quæ rudia ſunt, & ſimpliciora eſſe, & ad miniſteria aptiora, & dociliora. trita autem mancipia, & ueterana difficile eſt reformare, & ad ſuos mores formare. quia igitur uenalitiarij ſciunt facile decurri ad nouitiorum emptionem, idcirco interpolant ueteratores, et pro nouitijs uēdant, interpolant inquit, hoc eſt ornant. fingunt. renouant. ut nouitij eſſe uideantur. ab hoc interpola dicuntur noua inuenta, & (ut ita dicam) renouationes artium, & aliarum rerum. Plynius. Salluſtius. Vicit tamen in Senatu pars illa quæ uero pretium, aut gratiam anteferebat. Terentius. Ego pretium ob ſtultitiam fero. Liuius. Si malos imitabor, tum pretium pro noxa dabis. proprie tamen pretium eſt, quod pro re empta datur. Terentius. DE ELEPHANTO CAESAREM ADORANTE EPIGRAMMA. XVII.

QVOD PIVS, ET SVPPLEX. Rurſus blãditur Domitiano, quod ab Elephanto adorari uiſus ſit, tribuẽs hoc diuinitati principis. Ordo eſt. qđ hic elephas, qui modo erat tam metuendus Tauro, nũc pius, & ſupplex adoret te o' Cæſar, facit hoc non iuſſus, & nullo magiſtro docente, ſed quia deum te eſſe intelligit. ELEPHAS. Elephãtus, ſiue elephas (utroq; enim modo dicitur) maximum terreſtrium animalium eſt, proximumq́; ſenſibus humanis obedientia in magiſtros, officiorum memoria. adorat regem, genua ſubmittit, coronas porrigit, & quod in homine quoque rarum eſt, probitatem præ ſe ferre uidetur, prudẽtiam. æquitatem. religionem. ſolis quoq;, & lunæ uenerationem, ſiquidem in Mauritaniæ ſaltibus ad quendam amnem, cui nomen eſt Anulo, niteſcente luna noua elephantorum greges deſcendunt, ibiq; ſe purificantes ſolẽniter aqua circunſperguntur, atq; ita ſalutato ſydere in ſyluas reuertuntur. Romæ iuncti primum ad currum fuere Pompeij Magni africo triumpho. Nam prius liber pater eos ſubiugata India iunxerat. Germanici Cæſaris gladiatorio munere quoſdam inconditos motos edere uiſi ſunt ſaltantium modo. Vulgare in ijs fuit arma in altum iacere, gladiatoris congreſſus exercere, per funeis incedere, pleniſq; hominum triclinijs ita libratis ueſtigijs per lectos ire, ne quis potãtium attingeretur. tradunt etiam non ignobiles authores quẽdam ex ijs ductus græcarum literarum didiciſſe, & eius linguæ uerbis ita ſolitum perſcribere. αὐτὸς ἐγὼ τάδ᾽ ἔγραψα λάφυρά τε κελτ᾽ ἀνέθηκα. ideſt ipſe ego hæc ſcripſi, & ſpolia celtica dicaui. prædam in ſe expeti ſciunt ſolos denteis, quæ aliqui cornua appellarunt. quãobrem eiectos aliquo caſu terra defodiunt. hoc ſolum ebur eſt, in cætero corpore uilitas oſſea, quanquam oſſa quoque aliquando in laminas dentiũ penuria ſecuerunt. circunuenti à uenantibus primos denteis cõſtituunt, quibus ſunt minimi. poſtquam feſſi ſunt, impactos arbori frangunt, hac præda ſe redimentes, quemadmodum facere de teſticulis Caſtorem tradunt; adeo quibuſdam animalibus exploratum eſt, quare ab hominibus petantur. tradunt præterea elephantos homine obuio in ſolitudine, & ſimpliciter oberrante, clementem, placidumq́; demonſtrare uiã, ueſtigio uero hominis prius quàm ipſo homine animaduerſo inſidiarum metu contremiſcere. olfacere. ſubſiſtere. circunſpectare. iraſci, nec calcare, ſed erutum proximo tradere. illũ ſequenti pari modo uſque ad extremum, tunc agmen circumagi, & directa acie reuerti. gregatim ſemper incedunt. ducit agmen, qui ſenior eſt, cogit ætate proximus. flumina tranſituri minimos præmittunt, ne maiorum pondere atterente alueum altitudo gurgitis augeatur. imponuntur eis nomina, eaq; intelligunt. Cato unum, qui in punica acie fortiſſime fuerat præliatus, Sutrum tradidit uocatum altero dente mutilato. Antiochus duos habuit in bellicis uſibus celebres, Aiacem, & Patroclum. Cumq́; aliquando uadum fluminis experiretur, renuit Aiax tranſire, qui ſemper dux agminis fuerat. Tum pronuntiari iuſſit Antiochus eius fore principatum, qui prior tranſiſſet. Tranſiuit itaque Patroclus donatus ob id phaleris argenteis, quibus id animal maxime gaudet, & reliquo omni primatu. Aiax mortem ignominiæ præferens inedia uitam finiuit. Mirus nanque in ijs pudor eſt, uictiq; uictorum uocem fugiunt. Pudore nunquam, niſi in abdito co=

eunt. mas quinquennis, fœmina decennis. ineunt biennio quinis diebus, nec amplius. Sexto die perfunduntur amne, nec aliter ad agmen reuertuntur. Adulteria non nouere, nec ulla propter fœminas prælia committunt. Amoris tamen uim eſſe in ijs conſtat. Traditur unus amaſſe in Aegypto mulierem corollas uendentem. Alius adoleſcentem quendam Syracuſanum nomine Menandrum in exercitu Ptolemæi, quem quoties non uideret, dolorem inedia teſtabatur. item alius unguentariam quandam forma præſtantem. Amoris indicia in omnibus fuere, gaudium à conſpectu, blanditiæ inconditæ, Stipes populi ſeruatæ, & in ſinum amantis effuſæ. Elephantos Italia primum uidit Pyrrhi regis bello, & Boues Lucas, ut ſupra diximus appellauit, in Lucanis uiſos anno urbis quadringenteſimo ſeptuageſimoſecundo. Roma in triumpho ſeptem poſt annis, eadem plurimos anno quingenteſimoſecundo. Victoria L. Metelli in Sicilia de Pœnis capti centum quadragintaduo ratibus traiecti fuere, quas doliorum conſertis ordinibus impoſuerant, quos in circo interfectos iaculis tradunt inopia conſilij, quoniam neque ali placuiſſet, neque regibus donari. Clara fuit unius è Romanis dimicatio aduerſus Elephantum. Nam cum Annibal captiuos Romanorum dimicare inter ſe coëgiſſet, unum, qui ſupererat, obiecit elephanto, pactus dimitti, ſi belluam interemiſſet. Solus ergo in arena congreſſus, magno Pœnorum dolore interfecit. Annibal, quod famam eius dimicationis contemptum Elephantis allaturam intelligebat, miſſis poſt uictorem equitibus, necari eum iuſſit. Proboſcis eorum, quæ manus appellatur, facillime cæditur. Romæ primum pugnaſſe Elephantos in circo compertum eſt. Claudij Pulchri ædilitate, anno urbis quingenteſimo quinquageſimoquinto. item poſt annos uiginti Lucullorum ædilitate Curuli aduerſus tauros, & Pompeij altero conſulatu in dedicatione templi Veneris uictricis uiginti numero, ſiue (ut alij uolunt) decem & ſeptem Getulis ex aduerſo iaculantibus, mirabili unius dimicatione, qui pedibus confoſſis, genibus repſit in cateruas, arrepta ſcuta in altum iaciens, quæ ſpectantibus uoluptati erant, circumacta in orbem, quaſi arte, non furore belluæ iacerentur. Altero uno ictu occiſo, propter quod uniuerſi eruptionem tentauere non ſine uexatione populi, qui clauſtris ferreis circundatus erat. Qua de cauſa Cæſar dictator ſimile poſtea ſpectaculum editurus, Euripis arenam circundedit, quos Nero princeps ſuſtulit, ut loca equitibus adderet. Pugnauere & Cæſaris dictatoris tertio conſulatu uiginti contra pedites quingentos, iterumq; totidem turriti cum ſexagenis propugnatoribus eodem quo priores numero peditum, & totidem equitum ex aduerſo dimicante. Tanta huius animalis clementia narratur aduerſus minus ualida, ut in grege pecudum occurrentia manu dimoueat, nequid obterat imprudens, nec niſi laceſſiti noceant, infirmos, aut feſſos, uulneratos'ue in medium agmen recipiunt. Capti celerrime manſueſiunt hordei ſucco. Domiti militant, & turreis armatorum in dorſis ferunt, magnaq; ex parte orientis bella conficiunt, proſternunt acies, armatos proterunt, ijdem minimo ſuis ſtridore terrentur. Decem annis geſtare in utero uulgus exiſtimat. Vnde ortum eſt prouerbium. Celerius Elephanti pariunt. cum tarditatem ſignificare uolumus. Ariſtoteles biennio parere tradidit, nec amplius, quàm ſingulos, plureisq; uiuere ducentis annis, quoſdam etiam trecentis, iuuentam eorum ſexageſimo incipere. Olei potu tela, quæ eorum corporibus inhæſerunt, decidere traduntur. Mandunt ore. ſpirant, & bibunt, odoranturq; haud improprie appellata manu. Murem mirum in modum odere, & ſi pabulum in præſepio poſitum attingi ab eo uiderunt, faſtidiunt. Dentibus ingens pre-

tium, ex quibus deorum ſimulachra fieri ſolita. Callum manus in ciborum delitijs habebant. in extremis Africæ, quæ confinis Aethiopiæ eſt, poſteis domorum ex dentibus faciunt. Dimicatio ijs cum ſerpentibus maxima eſt, ut ſupra diximus, cum de Cinnabari tractaremus. Setarum nullum tegumentum elephanti habent, nec in cauda quidem ad abigendum muſcarum faſtidium, quod etiam tanta uaſtitas ſentit. Sed habent cancellatam cutim, & inuitantem id genus animalium odore. Ergo cum extenti muſcarum examina receperunt, arctatis in rugas repente cancellis, comprehenſas enecant. inflationem, ac profluuium alui, nec alios morbos ſentiunt. Ab hac elephantorum inflatione, ſiue à cancellata cuti, elephantiaſis morbus dictus eſt, qui & elephantia nuncupatur à noſtris. rarus in Italia, frequentiſſimus in quibuſdam regionibus, qui inter longiſſimos numeratur, totum corpus afficiens, ita ut oſſa quoque uitientur. Summa pars corporis crebras maculas, crebroſq; tumores habet. Rubor harum paulatim in atrum colorem conuertitur. Summa cutis inæqualiter craſſa, tenuis. dura. mollisq; quaſi ſquamis quibuſdam exaſperatur, corpus emacreſcit. Os. ſuræ, pedes intumeſcunt. Vbi uetus morbus eſt, digiti in manibus, pedibusq; ſub tumore conduntur, febricula oritur, quæ facile tot malis obrutum hominem cõſumit. item ab elephanto elephantinus, ut elephantina pellis. elephantini dentes. & elephantium, quod fit ex ebore combuſto, de quo ſuperius diximus. Elephas etiam, ſiue elephantus maris bellua eſt ingens in gaditano freto, candidam proboſcidem habens. PIVS. Religioſus. SVPPLEX. Subnixus genibus, quod facere elephantum ſuperius diximus. METVENDVS. Timendus. Sunt qui metuo, & timeo ita ſeparent, ut metuamus eos, qui nos amant. Timeamus etiam inimicos. Terentius, & metuebat abſentem patrem. Plautus. Quid nos tanquam hoſteis times? Varro. Metuo dictum putant à quodam motu animi, cum id, quod malum caſurum putat, mens refugit. Cumq; uehementius in mouendo, ut ab ſe abeat, foras fertur, Formido, ut diximus, appellatur. A' metuo metus deducitur, qui eſt (ut Vlpianus definit) de inſtanti, uel futuro periculo mentis trepidatio. Ab eo fit diminutiuum meticulus. A' quo meticuloſus, & meticuloſe aduerbium. A' timeo uero fit timor. timidus. à quo timiditas. & aduerbium timide. Et notandum quod dicimus timeo tibi tanquam amico, hoc eſt, ne tibi aliquid mali accidat. & timeo te tanquam inimicum, nequid mihi mali facias. Quidam timidum à timente ſic diſtinguunt, ut timidus ſit, qui ſemper timet. Timens, qui ad tempus formidat. item à timeo tumultus (ut quidam putant) deducitur, quaſi timor multus. Nihil enim aliud eſt tumultus, quàm perturbatio tanta, ut maior timor oriatur. Vnde bella italica, tumultus italici dicti fuere. Hinc fit tumultuo uerbum, quod eſt in perturbatione ſum. & tumultuoſus, qui turbas excitare ſolitus eſt. & tumultuarius, quod proprie ſignificat extemporaliter, ſine præmeditatione. unde & oratio tumultuaria dicitur. & tumultuoſe, ac tumultuarie aduerbia, ideſt perturbate, & extemporaliter. SENTIT. Intelligit. cognoſcit. Sentire proprie eſt ſenſu percipere, quod ad corpus duntaxat, pertinet. Vnde quinq; corporis ſenſus appellati ſunt, Viſus. auditus. odoratus. guſtus, & tactus. Aliquando ſentire ponitur pro intelligere. Cicero. Nam & ipſe animus ſentit neſcio quid in ſe eſſe diuinum. Nonnunquam pro iudicare. Plynius iunior. Cupio enim abs te intelligere quid ſentias. Hinc ſententia deriuatur, quæ modo pro iudicio, ſiue potius iudicato accipitur. Vnde ſententiam ferre, ſiue ſententiam dicere iudices affirmamus, cum ea mente quid pronuntiant, ut ſecundum id diſcedere liti-

gantes à tota controuerſia uelint. Modo ſignificat id, quod animus ſentit, hoc eſt credulitatem. Vnde ex animi noſtri ſententia loqui, uel euenire aliquid dicimus. Modo capitur pro eo, quod uerba ſignificant. Idem, Tam obſcure loquitur, ut nulla ex uerbis eius ſententia colligi poſſit. Nonnunquam etiam ſententias uocamus lumina ipſa orationis, præſertim quæ in clauſulis ſunt breuiter collecta. Et à græcis γνῶμαι uocantur, ut quocunq; ab eo nomine deducto, quod ſimiles ſint conſilijs, atque decretis, & hæ interdum ad rem tantum referuntur. Vt nihil eſt tam populare, quàm bonitas. interdum ad perſonam. Vt qui uult omnia ſcire, neceſſe habet multa cognoſcere. Aliquando non ſunt ſimplices, ſed rationem quoq; ſubiectam habent, ut in omni certamine, qui opulentior eſt, etiam ſi accipit iniuriam, tamen quia plus poteſt, facere uidetur. Quandoq; duplices ſunt. Vt obſequium amicos, ueritas odium parit. Plerunq; fit ex diuerſis. Vt mors miſera non eſt, aditus ad mortem eſt miſer. item, tam deeſt auaro quod habet, quàm quod non habet. Nonnunquam per interrogationem fiunt. Vt uſque adeò ne mori miſerum eſt? Hinc orationem, quæ huiuſmodi lumina crebra habeat, ſententioſam dicimus. Senſus quoque licet proprie corporis ſint, ut ſupra diximus, tamen conſuetudo iam tenuit, ut mente concepta ſenſus uocaremus, quę à ueteribus Senſa dicebantur. Cicero. Quod exprimere dicendo ſenſa poſſumus. Plynius. Nihil enim tam ridiculum, quàm uerborum ſonitus inanis ſine ſenſu, ac ſcientia. A' ſenſu fit ſenſibile, tam quod ſentit, quàm quod ſentitur. A' quo ſenſibilitas. & ſenſificum, quod ſenſus cauſam præſtat. Macrobius. Spiramentum ſenſificum, ad ſua quæq; loca naturali lege ducentes. Et ſenſile pro ſenſibile. & ſentina pars nauis inferior, qđ eius fœtor ſentiatur. A' qua ſentinor, & ſentinum, de quibus ſuperius diximus. & ſentis ſpina, quod à tangentibus quamprimum ſentiatur. A' quo ſenticoſum ſpinoſum dicimus. interdumq; pro aſpero ponitur. Lucilius, Quam ſenticoſa uerba pertorquet turba. Et ſenſim aduerbium, paulatim, quaſi cum meditatione, & ſenſu. Quinque ſenſus corporei idcirco ita uocati ſunt, quia per eos tanquam per quaſdam feneſtras animus ſentit. Huius enim ſedes, & habitatio in cerebro eſt. De cauernis autem cerebri, quas uentriculos cerebri antiqui uocauerunt, ſeptem paria neruorum, quas græci συζυγίας, hoc eſt coniunctiones uocant, oriuntur, & ſpiramentum ſenſificum ad ſua quæq; loca deducunt. ut ſenſum è uicinis, ac longe poſitis membris animalis hauriant. Primum par neruorum talium oculos petit, & agnitionem ſpecierum, ac colorum diſcretionem illis præſtat, quæ referant. Secundum in aureis ſe diffundit, unde oritur notitia ſonorum. Tertium naribus inſertum ad odorem percipiendum. Quartum palatum tenet ad guſtum, atque ſaporem. Quintum per totum corpus diffunditur. ut mollia. aſpera. frigida. calida diſcernantur. Sextum, ſtomachum petit, ut quæ deſunt appetat, & quæ ſunt ſuperflua reſpuat, ſeq; ipſe moderetur. Septimum par neruorum uitali medullæ ſenſum infundit, quæ id eſt in animali, quod in naui carina, & adeo cæteris uſu, ac dignitate præſtat, ut longum cerebrum à philoſophis uocitetur. Ex hac ergo, quaſi ex cerebro diuerſi naſcuntur meatus, qui cordi, & iecori, & pulmoni uireis miniſtrant, neruis pedum, manuumq; uirtutem ingerunt, & ut ſucceſſio procuretur, pudendis quoque, & uteris mulieribus opem ſubminiſtrant. A' ſenſus fit diminutiuum ſenſiculus. Quintilianus, inde minuti, corruptiq; ſenſiculi, & extra rem petiti. A' ſentio compoſita fiunt aſſentior, quod eſt conſenſum præſto. A' quo fit aſſentor, hoc eſt adulor, & quaſi omnibus conſenſum præſto, ut ille apud Terentium, Ait, aio. negat, nego. Differuntq; hæc tria, aſſentor. adulor.

blandior, quod aſſentari proprie eſt uoce, uel laudando, uel aſſentiendo captare. Adulari quoquo modo uel uoce, uel geſtu fauorem quærere. Blandiri proprie tactu. Veruntamen ad alios quoque ſenſus transfertur, & nonnunquam ad animum. Quintilianus, Tu non cogitas, quemadmodum ſuſpenſa manu ſonantem blande cardinem flectas. blande inquit, hoc eſt ſuauiter. idem. Blandiar iudices pauliſper calamitatibus meis, & ſic agam tanquam inuenerim utrunque ſanum. Confunduntur tamen hæc, & ferè pro eodem plerunque ponuntur. Ab adulor, adulator, & adulatrix, & adulatio deducuntur. A' blandior, blandus. & blanditiæ. & blandiculus. & blandicellus diminutiua. Vnde blandicella uerba apud Næuium, & alios legimus. & blande, & blandicule aduerbia. & compoſitum ſubblandior. Plautus, non matronarum, ſed meretricum officium eſt, uiris alienis ſubblandirier. & blandidicus, qui blande loquitur. Plautus. Nunc mihi blãdidicus es, heri in tergo meo treis facile corios contriuiſti bubulos. Blanduſia Sabinenſis agri regio, in qua fuit ager Horatij poëtæ. Ab aſſentior aſſenſus. ab aſſentor. aſſentator & aſſentatrix, & aſſentatio. in genere blandientium adulatorum, atque aſſentatorum Paraſiti ſunt, ita enim uocantur, qui ad uoluntatem eius, in cuius contubernio ſunt, loquuntur, & faciunt, nihil repugnantes cibi, & uentris gratia. à quo nomen habent. Nam παρὰ apud græcos ad ſignificat σιτίον cibus. σιτεία ſagina. A' paraſitus fit diminutiuum Paraſitaſter, quod nõ ſignificat paruum paraſitum, ſed paraſitorum imitatorem. in aſter enim deſinentia nomina non diminutiua ſunt, ſed imitationem quandam ſignificant eius, à quo deſcendunt, ut ſuperius diximus. παρὰ etiam græca præpoſitio pro apud. abſq;. penes. dis. re. præ. Ab tam in appoſitione, quàm in compoſitione accipitur. Hinc parabola ſimilitudo. Paradigma exemplum, quod tribus modis fieri ſolet. A' pari. Virgilius. Ac ueluti magno in populo, cum ſæpe coorta eſt Seditio. A' maiori ad minus. idem. Qualiter expreſſum uentis per nubila fulmen. A' minore ad maius. idem. Si potuit maneis accerſere coniugis Orpheus Threicia fretus cithara. Paragoge deductio, ut cum dicimus dicier pro dici, lucrarier pro lucrari. Paranymphus, auſpex, de quo diximus. Paragraphe præſcriptio. Paratheſis appoſitio. Paralyſis diſſolutio, & langor neruorum. A' quo, qui eum morbum patitur, paralyticus. Parallelus, quaſi alternus. à quo lineas æque diſtanteis parallelas uocamus. ideoq; ſegmenta mundi, quæ nos circulos dicimus, græci parallelos nominant. Paradiaſtole dilatatio. Eſt enim figura, per quam rem aliquam per interpretationem dilatamus, ut cum aſtutum, ſapientem, prodigum, liberalem uocamus. Paranomaſia agnominatio, ut cum dicimus abire non obire te conuenit. Paraſceue, apparratus. Parentheſis, interpoſitio. Parœmia prouerbium. Parapetaſma uelum, de quo ſuperius diximus. Parodos tranſitus. Paroxiſmus, ſtimulatio, concitatio. παροξύνειν enim incitare, urgere, ſtimulare eſt. Paradromis, ambulatio, ſiue xyſtus, de quo ſuperius diximus. Parazonium gladij genus ad zonam accingi ſolitum. Martialis.

Militiæ decus hoc, gratiq; erat omen honoris,
Arma tribunitium cingere digna latus.

Parochus auſpex, ſiue paranymphus, qđ ante uehicula erat, quæ græce ὀχήματα dicuntur. uehiculis enim ſponſæ duci ad uirum ſolebant. Parotis apoſtema, quod ſecundum aureis oritur, quæ græce ὦτα dicuntur. Parectatæ, qui de pueritia ueniunt ad pubertatem. Lucil. inde parectatæ chlamyes, ac barbula prima. Varro. Parrectatæ adſunt, mulierq;, & Venus caput. Paraſangæ apud Perſas uiarum menſuræ

ſunt. præterea aſſentio. præſentio, idem quod ſentio. Præſentio, anteſentio, anteuideo. à quo præſenſio præcognitio, & quaſi prouidentia. & diſſentaneum diſcors, atque diſſentiens. Nigidius. Eum locum facit diſſentaneum. Conſentio, conuenio. à quo conſenſio, conſenſus. & conſentaneum, hoc eſt conueniens. Conſentanee, conuenienter. Et conſentia ſacra, quæ ex conſenſu multorum ſint ſtatuta. item à diſſentio diſſentaneum. idem. Eum locum facit diſſentaneum, NVMEN TVVM. Diuinitatem tuam, hoc eſt te deum eſſe. Conſtat ſane Domitianum ita appellari uoluiſſe. Nam cum procuratorum ſuorum nomine formalem dictaret epiſtolam, ſic cœpit, Dominus, & deus noſter hoc fieri iubet. Vnde inſtitutū in poſterum, ut ne ſcripto quidem, ac ſermone cuiuſquam aliter appellaretur.

DE TIGRIDE DILANIANTE LEONEM EPIGRAMMA. XVIII.

AMBERE SECVRI. Blanditur Domitiano de Tigride, quæ leonem dilaniauerat, rem anteactis temporibus inuiſam. Rurſus hoc tribuens principis numini. TIGRIS. Appoſitiue magna gloria ab hyrcano iugo, hoc eſt quæ ī Hyrcania gloriæ principatum obtinuiſſet ob magnitudinem, ferocitatemq́;. Tigris hyrcani atque indi ferunt, Sed in Hyrcania ferociores ſunt. Virgilius, hyrcanæq́; admorunt ubera tigres. Ex omni beſtiarum genere ſolæ ferè pantheræ, & Tigres macularum uarietate ſpectantur. Tigris eſt uelocitatis tremendæ, & tunc maxime cognitæ, cum capitur. Totus eius fœtus, qui ſemper numeroſus eſt, abſente matre capitur ab inſidiante homine, quammaxime pernici equo inſidente, & in recentes de induſtria paratos ſe ſubinde inferente. At ubi uacuum cubile in reditu reperit fœta (mas enim ſobolis curam non habet) fertur præceps odore ueſtigia perſequens. Raptor appropinquante fera, unum ex catulis abijcit, apprehendit illa morſu, & quaſi pondere aucta celeritate ad cubile reportat, iterumq́; conſequitur, donec raptor nauim ingreſſus irritam faciat illius in litore feritatem. Hinc tigris nomen huic feræ impoſitum, ſiquidem Medi tigrim ſagittam appellant. unde flumen quoque mira celeritate decurrens, Tigris appellatus eſt in regione Armeniæ minoris, fonte conſpicuo ortus in planitie, ubi tardior fluit. hoc eſt uſque ad Medorum fines Diglito appellatur, tum incipit uocari tigris, quod ueluti ſagitta uolare uideatur. influit in lacum Arethiſſam, omnia illata pondera ſuſtinentem, & nitrum nebulis exhalantem. Vnum ei piſcium genus eſt, & hoc tranſcurrentis fluuij alueo non miſcetur, ſicut nec è tigri piſces in lacum tranſnatant. Fertur autem & curſu, & colore diſſimilis, tranſuectuſq́; occurrentes tauro monte in ſpecu mergitur, ſubterq́; lapſus ab altero latere eius erumpit. quem locum Zoroandam nominant. Eundem eſſe paleæ, aliaq́; diuerſa oſtendunt. Hinc labra & oris, & aliarum rerum extremitates uocamus, quæ in homine etiam labia dicuntur, & fœminino genere labiæ. Terentius. Continuo accurrit ad me, quàm longe quidem incuruus tremulus, labijs demiſſis gemens. Ab hoc fit ſublabro uerbum, quod ſignificat intra labra immitto. Næuius, iam ego illis ſubiens ſublabrabo eſui illud ſinciput. & diminutiuum labellum, quod modo de paruo hominis labio dicitur. Plautus, Conſere labella labellis. Securus enim dicitur, qui ſine cura eſt, quaſi ſeorſum à cura. Hinc aliquando pro contemptore accipitur. Virgilius, ſecurus amorum Germanæ. idem. Securi pelagi, atque mei. Ab hoc fit ſecure aduerbium. & ſecuritas nomen, hoc eſt quies. tranquillitas. Cura aliquando ſtudium, & diligentiam ſignificat, ut ſalus tua eſt mihi curæ, hoc eſt ad ea, quæ ad ſalutem tuam pertinent, omne ſtudium, diligentiamq́; adhibeo. Quanta me cura, & ſolicitudine afficit. & ita inuicem hæc duo diſtinguntur, quod cura proprie eſt in ſpe bonorum, ſolicitudo uero in metu malorum. Dicta autem eſt cura, quod cor urat. Quidam curam, & curationem, & curaturam ita ſeparant, ut cura mentis ſit, curatio medicinæ. Curatura diligentiæ. Terentius. reddunt curatura iunceas. Verum hæc ſæpenumero confunduntur. A' cura fit curioſus, qui nimis affectate cuncta perquirit, etiam quæ ad eum non attinent. Difficilius enim alij alijs morbis curantur. interdum reficio. Vnde curare corpus, cum de hominibus loquimur, eſt cibo, lauacroq́; & alijs ſimilibus operam dare. Curiales uero menſæ uocitabantur, in quibus immolabatur Iunoni, quæ Curitis appellata eſt non à cura, ſed ab haſta, quā manibus ferebat. hæc enim Sabinorum lingua dicitur curis. Quemadmodum Romulus Quirinus eſt dictus, quod haſtam ferre ſolitus erat. à quo Romani quirites nuncupati. Nunc quoque pari ratione Romana curia dicitur pontificis maximi, patrumq́;, & minorum pontificum conuentus,

quod in ea totius orbis terrarum, & chriſtianæ reipublicæ negotia curentur, nec minus profana, quàm ſacra. à qua qui eam ſequuntur, curiales apellantur. A` curo præterea fit compoſitum procuro, quod interdum idem quod curo ſignificat. Apuleius, Hunc enim equulum ſuum curioſe nimis procurantem inueni. interdum aliena negotia gero. unde procuratores dicti, quemadmodum Vlpianus definit, qui aliena negotia mãdato domini adminiſtrant, poteſtq; uel omnium rerum, uel partis, uel tantum unius eſſe procurator, conſtituiq́; uel coràm, uel per nuntium, uel per epiſtolam. unde literæ ipſæ, ſiue tabellæ procuratoriæ appellantur, & geſtio ipſa negotiorum procuratio. item à curo cuſtos, qui rem aliquam curat, & tuetur. unde cuſtodem oſtij dicimus, qui curat, nequis iniuſſus ingrediatur, cuſtodem horti, qui hortum tuetur, nec aliquẽ patitur ingredi, aut damnum facere. Cuſtodem furum, qui fures obſeruat, & prohibet. Cuſtodem ſacrorum, qui ſacra miniſtrat, atque obſeruat. Virgilius, At domus herculei cuſtos pinaria ſacri. FERA. Quaſi reuerſa in priſtinam feritatem.

TEMPORIBVS. Tempus quidam eſſe definiunt certam dimenſionem, quæ ex cœli conuerſione colligitur. Alij numerum motus eſſe dixere. Sed neutrum probo. Cur enim ſolis, & lunæ, ac ſyderum motus ſint tempora, & non potius omnium corporum? An uero ſi ceſſarent cœli luminaria, & rota figuli moueretur, nõ eſſet tempus, quo eos gyros metiremur, diceremuſq́; aut æqualibus morulis agi, aut ſi aliàs tardius, aliàs uelocius moueretur, alios magis diuturnos eſſe, alios minus? Quid uero? Non'ne & nos, cum hæc diceremus, in tempore loqueremur? Sed ne corporis quidem motum definiri tempus poſſe exiſtimo. Siquidem corpus aliquando mouetur, aliquando ſtat. nec ſolum motum eius, ſed etiam ſtatum in tempore metimur, & dicimus tantum ſtetiſſe, quantum temporis abijt. Et cum uoto cuiuſdam ſtetiſſe ſol dicatur, ut uictorioſiſſimum prælium perageretur, non'ne ſol ſtabat, tempus uero ibat? Nequaquam igitur corporis motus dici poteſt. Nam numerum motus dicere tempus penè inſania mihi uidetur. Democritus atque Epicurus mundum ex indiuiſibilibus fruſtis, quos atomos uocant, fabricatum eſſe dixere. Dura ſanè, & minime probabilis ſententia. Quantum autem magis fuiſſet improbanda, ſi mundum conſtare ex atomorum numero dixiſſent? non aliter, ac ſi dicerent domum conſtare ex numero lapidum, aut lineam conſtare pũctorum, cum paries ex numeroſis lapidibus, & linea (ut quidam uolunt) ex numeroſis punctis, non ex eorum numero conſtet. At tempus non modo numerus nõ eſt, ſed ne numeroſum quidem, aut numerabile. Arenam. pecuniam. gentem numeroſam dicimus, quia multa numero. uel numerabilem, innumerabilem'ue, quia poteſt, aut non poteſt numerari. Agrum uero, mare. cœlum non numero comprehendimus ſed metimur, quamuis menſura ipſa numero colligatur. Dicimus enim aut indefinite longius eſt hoc tempus, quàm illud, aut definite duplum eſt, hoc ad illud. Sed ſi metimur, quodnam tempus metimur? Tria ſanè tempora affirmant. Præteritum. præſens. futurum. Sed quomodo tria ſunt, cum præteritum iam non ſit. futurum non dũ uenerit. inſtans non perſtet? Non igitur metiri præteritum poſſumus, quia iam non eſt. non futurum, quia non dũ eſt. non præſens, quia nullum eius ſpatium eſt. Quomodo igitur tempus ipſi definiemus? Dicemus'ne cum Cice. tempus definire difficile eſt? An uero diſtenſionem quãdam eſſe affirmabimus? Certe hoc affirmabimus. Sed cuius rei diſtenſio ſit, ignorare nos dicemus. Scimus ſanè nos iſta in tẽpore dicere, diuq; nos iã de tempore locutos eſſe, atq; ipſum diu non niſi mora temporis diu eẽ, ſed quõ hoc ſcimus, qñ quid ſit tẽpus neſcimus? an forte neſcimus, quõ id dicamus. quod ſcimus. An uero animi diſten

ſionem eſſe tempus dicemus? An potius academicorum more. dicemus nos neſcire, quid neſciamus. Ab huius temporis ſimilitudine, quod ſpatia metimur, ſyllabarum quoque in numeroſa oratione tempus appellamus, quod breuiores productiores'ue ſint, & breuiore longiore'ue tempore proferantur. item tempora dicimus quatuor anni tempeſtates. Ver. æſtatem. autumnum. hyemem. item quæ caluariæ ex utroq; latere ſubiacent, quod mouentur, & mobilitate ipſa quibuſdam interuallis quaſi tempora imitantur. Sunt qui ſcribant continuum, ac iuge tempus per accuſatiuum caſum ſignificari. Teren. triginta dies in naui ſumus. Per ablatiuum uero cum aliquo interuallo. Plau. Agrum hunc decennio colui. Sed hoc falſum eſſe doctiſſimorum uirorum authoritate probatur. Cice. ſ.nè, et Virg. ſæpius accuſatiuo, ablatiuo rarius utuntur, & tamen indifferẽter. Aliquando tempore in ablatiuo pro eo, quod eſt intra tempus uſurpamus. Cice. Paucis diebus eram miſſurus domeſticos tabellarios. idem. biduo, aut ad ſummum triduo periturum, hoc eſt intra paucos dies, & intra biduum, uel triduum. Et quandoq; in hoc genere ſermonis omittimus poſt. ut intra decẽ dies, quàm uenit, confecit omne negotium. Paucis diebus, quàm Rhodum appulſus eſt, duxit uxorem. ideſt poſtquã uenit, & poſtquam appulit, quæ exempla apud hiſtoricos frequẽtiſſima ſunt. Pro tempore aduerbialiter uſurpamus, ideſt pro ratione temporis. Cum tempore, ideſt cum mora, et ſpatio temporis. In tẽpore, opportune. Ex tempore, ſubito, quaſi extra tẽporis cõmoditatem. a tempus deriuatur tempeſtas, quod modo ſimpliciter pro tempore ponitur. Eius contrariũ intempeſtiuus. A` quo intempeſtiuitas. & intempeſtiue, hoc eſt importunus. importunitas. importune. Veteres etiã tempeſtum pro tempeſtiuum. intempeſtum pro intempeſtiuo uſurpauere. Vnde nox intẽpeſta, de qua ſupra diximus, qđ minime tempeſtiua ſit rebus agendis. item à tempus temporariũ dicimus, quod non eſt perpetuum, ſed ad tempus durat. Plyn. Opus maximum omnium, quæ unquam fuere humana manu facta, nõ temporaria mora, uerum etiam æternitatis deſtinatione. Hinc temporarium theatrum, de quo ſupra diximus. Quidam in hũc ſenſum temporale etiam uſurpant. Temporarium etiam, & temporale, & temporaneũ dicimus, quicquid ad tempus attinet. Vnde extemporariũ, ſiue extẽporale, ſiue extemporaneũ pro ſubitario accipimus, ut extemporariam ſiue extemporalẽ orationẽ. hoc eſt impræmeditatam, ac ſubitariã. A` tẽporaneo etiã contemporaneũ dicimus eiuſdẽ tẽporis, quẽ nonnulli græca uoce ſynchronũ appellant. Quæro utrum hoc adduxerit cœli temperatura, an terræ bonitas. & temperantia, quod homo per eam affectiones animi temperet, ac moderetur. Definitur enim hoc modo. Temperantia eſt rationis in libidinem, atq; in alios non rectos impetus animi firma, & moderata dominatio, quam græci σωφροσύνην uocant. Eius partes ſunt continentia, per quam cupiditas conſilij gubernatione regitur. DE NAVMACHIA DOMITIANI. EPIGRAMMA. XXIIII.

I QVIS ADES. Blanditur Domitiano de nauali pugna, quam edidit, Monens ſpectatores ne putent lacum, in quo tanto ardore nauale prælium geri uidebant, uerum mare eſſe, nam & paulo ante ibi terra erat, & mox finito nauali bello, nulla amplius maris ſpecies erat futura. Conſtat ſanè Domitianum (ut Suetoni. ſcribit) nauales pugnas ediſiſſe penè iuſtarum claſſium effoſſo, & circunſtructo iuxta Tyberim lacu, & aliquando inter maximos imbres proſpectaſſe. quod inferius notauit. Martia. dum inquit. Aſpice quàm denſum tacitarum uellus aquarum Defluat in uultus Cæſaris, inq; ſinus.

AB ORIS LONGIS. A' regionibus longe remotis. Ora quando ſine aſpiratione ſcribitur, cuiuſq; rei extremitatem ſignificat. Virgil. Et mecum ingentis oras euoluere belli. Hinc ueſtimentorum extrema oræ dicuntur, & regionum, ac terrarum fines. item ipſæ regiones. idem, Arma, uirumq; cano, Troiæ qui primus ab oris Italiam, fato profugus, Lauinia uenit Littora. Ora etiam funis eſt, quo nauis ad terrã ligatur. Liuius, in ipſis quoq; trapidatum nauibus, dum ne hoſtes cum ſuis irrumperent, trahunt ſcalas, oraſq;, et anchoras ne in mollientibus mora eſſet, præcidunt. Quinti. permittamus uela uẽtis, & oram ſoluentibus bene precemur. Hora uero cum per aſpirationẽ ſcribitur, tempus ſignificat. hoc eſt quãcunq; æternitatis partem, ſiue annuum, ſiue diurnum, ſiue nocturnum ſpatium ſignificet. Hinc quatuor anni tempora, hoc eſt Hyems uer. æſtas. autumnus horæ dicuntur. Itẽ partes ipſæ, in quas diſtinctus eſt dies, ſimiliter horæ uocantur. Hæ principio duodecim inſtitutæ ſunt, cuius ordinationis hæc fuiſſe origo memoratur. Quodam tempore Hermes Triſmegiſtus, cum eſſet in Aegypto ſacrum quoddam animal Serapi dicatum, quod in toto die duodecies urinam feciſſet pari ſemper interpoſito tempore. per XII horas diem diuidi debere coniecit. Exinde hic horarum numerus longo tempore cuſtoditus eſt. Poſtea in XXIIII horas diuiſus eſt dies. item Horam ueteres iuuentutis deam uocabant. Ennius. Te Quirine pater ueneror, Horamq; Quirini. Ab hora horologium deducitur, quaſi horarum ratio. Quicquid enim quoquomodo horas indicat, horologium dicitur. Primus horologium ſolarium, in quo umbilici ſolis, quem Gnomonem uocant, umbra horas oſtendit, inuenit Anaximenes Mileſius Lacedæmone, ipſumq; ἀπὸ τῆς σκιᾶς, hoc eſt ab umbra ſcioterion appellauit. Romæ multo ſecius contigit. Duodecim tabulis ortus tantum, & occaſus ſolis nominabatur. poſt aliquot annos adiectus fuit & meridies. Accenſus conſulis eum pronuntiabat, cum è curia inter roſtra, & græcoſtaſin ſolem perſpexiſſet. A' columna ænea ad carcerem inclinato ſydere ſupremam horam pronuntiabat. Sed hoc ſerenis tantum diebus uſq; ad primũ punicum bellũ. Licet enim quidam ſcripſerint primum L. Papyrium curſorem ad ædem Quirini, cum eam à patre ſuo uotam dedicaret, ſolarium horologium ſtatuiſſe ante XII annos quàm cũ Pyrrho rege bellatum eſt, tamen neq; facti horologij rationem, uel artificis ſignificant, nec unde tranſlatum ſit, uel apud quem id ſcriptum inuenerint. At M. Varro primum horologium ſolarium in publico ſecundum roſtra in columna ſtatutum fuiſſe tradit bello punico primo à M. Valerio Meſſala Con. Catina in Sicilia capta deportatum anno urbis quadringenteſimo ſeptuagenimoſeptimo. Nec cõgruebant ad horas eius lineæ, Veruntamen ei annis nonagintanouem paruerunt, donec Q. Mar. Philippus, qui cum L. Paulo cenſor fuit, diligentius ordinatum iuxta poſuit, quod munus inter cenſoria opera gratiſſime eſt acceptum. Sed tunc quoq; nubilo tempore incertæ horæ fuerunt, uſq; ad proximum luſtrum, quo tempore Scipio Naſica primus aqua horas diuiſit æque noctium, atq; dierum, idq; horologium ſub tecto dicauit anno urbis quingenteſimo nonageſimoquinto. Mirum ſanè populum Romanum tandiu indiſcretam lucem habuiſſe. inuentum deinde horologium, quod nunc frequens cernitur, è tenuiſſimis arenis ægyptijs: item è metallis rotis dentatis atq; ponderibus partim umbilicis horas indicantibus, partim teſtantibus tintinabulis. Quinetiam aliud horologij genus ſine aliquo pondere, ui tantum torto calybe, neruiſq; circundato, qui ſeſe paulatim euoluens uice ponderum rotas uertit. item ab hora deriuatur horoſcopus, quod modo ſubſtantiuum eſt, ſignificatq; cœli particulam, in qua ponitur ab aſtrologis horæ, in qua aliquid geſtum eſt, notatio. Aure. ac per hoc ſi tam celeriter alter poſt alterum naſcitur, ut eadem pars horoſcopi maneat, paria cuncta quæro, quæ in nullis poſſunt geminis inueniri. Si autem ſequentis tarditas horoſcopum mutat, parẽtes diuerſos quæro, quos gemini habere non poſſunt. Modo adiectiuum, ſignificatq; omne id, in quo horæ notantur. Plynius. Vaſa horoſcopa non ubiq; eidem ſunt uſui, trecentis ſtadijs, aut longiſſime etiam quingentis mutantibus ſemet umbris. Horam à græco dictam uolunt, nam & illi ὥραν uocant, nomen autem traxiſſe ἀπὸ τοῦ ὁρίζειν, quod terminare eſt. Nam & extremitas cuiuſcunq; rei terminus eſt, et horæ terminant tempora. Hinc & horizon horizontis dicitur circulus, quo uiſio terminatur. CVI LVX PRIMA SACRI MVNERIS IPSA FVIT. Qui ante hũc diem in urbe non fuiſti. Ordo eſt, cui ipſa lux muneris ſacri fuit prima. LVX. Dies. Proprie lux claritatem, ſiue ſplendorem ſignificat. Quoniam autem dies clara eſt, quemadmodum econtrario nox obſcura, ponitur aliquando lux pro die, unde luce, & tenebris pro die, & nocte accipimus, quãuis prima luce, & primis tenebris, non primam diem, ac noctem, ſed primam partem diei, ac noctis ſignificat. Dicimus etiã luci aduerbialiter, ſicut ueſperi. Lux ἀπὸ τῆς λύκης dicta eſt. λύκην enim ueteres græci appellant primam lucem, quæ præcedit ſolis exortus. Home. εὔχεο δ' ἀπόλλωνι λυκηγενέϊ κλυτοτόξῳ, hoc eſt Apollini, qui generat exortu ſuo lucem. λύκη autem à ſole nomen accepit, qui λύκος dicitur, unde annum uetuſtiſſimi græcorum λυκάβαντα appellabant, quaſi ἀπὸ τοῦ λύκου βαινόμενον, hoc eſt à ſole dimenſum. Solem autem λύκον uocari etiam lycopolitana Thebaidos ciuitas teſtimonio fuit, quæ pari religione Apollinem, & lupum coluit, qui græce λύκος dicitur in utroque ſolem uenerans, quod hoc animal rapit, & conſumit omnia in modum ſolis, plurimumq; oculorum acie cernens tenebras noctis euincit. A' lyco, hoc eſt lupo Lycium Apollinem dictum Cleanthes affirmat, quod ſicuti lupi pecora rapiunt, ita ipſe quoq; humorem haurit radijs. Antipater uero lycium nuncupatum ſcribit ἀπὸ τοῦ λευκαίνεσθαι πάντα φωτίζοντος ἡλίου, hoc eſt omnia albeſcant ſole diluceſcente. Quidam tamen λύκον, hoc eſt lupum à lyce, hoc eſt à prima luce, de qua diximus, quæ & lycophos nuncupatur, appellatum exiſtimant, quoniam hoc genus feræ maxime id tempus aptum rapiendo pecori obſeruat, quo poſt nocturnam famem ad paſtum ſtabulis expellitur. Eadem ratione lyncem quoq;, qui ex luporum ceruariorum genere eſt, appellatum exiſtimant, quem putant montium quoq; cõuexa uiſu penetrare. Hinc lyncei oculi dicti, qui acuta acie ſunt. & Lyncurium gemma, de qua ſuperius locuti ſumus, è lyncis urina coacta. Ouid. E' quibus, ut memorant, quicquid ueſica remiſit, Vertitur in lapides, & cõgelat aëre tacta. Lynx rex Scythiæ fuit, qui miſſum à Cerere Triptolemum, ut hominibus frumenta monſtraret, ſuſceptum hoſpitio, quo in ſe gloriam transferret, occidere cogitauit, ob quod irata Ceres eum in lyncem conuertit, feram uarij coloris. Myxa apud græcos proprie humor dicitur è naribus fluens. Vnde & μύξων mucoſus appellatur, hoc eſt nareis humore ſordidas habens. μυξωτὴρ uero naris appellatur. Ex hoc myxa etiam, & myxos pars lucernæ prominens uocatur, ex qua profertur elychnium, quaſi ex naribus mucus. Hinc græci quidem, quoties uolunt elychnium produci, ut luceat clarius, προμύξαι τὸν λύχνον dicunt. Noſtri uero emungere lucernam. Plau. lychnium emunge parumper, ut uideat anus ubi pedes ponat. Latum enim proprie dicitur, quod in largum extenſum ẽ, quaſi prolatum. Item à lato latus lateris. Latera enim proprie dicuntur extremitates, quæ in latum ſunt. græci πλευρὸν uocant. unde trigonon iſopleuron, ſiue trangulus iſopleurus dicitur, qui latera æqualia habet. & pleureſis eſt lateris morbus, cum dolore graui, à quo qui eum morbũ patiũtur, pleuretici uocantur. Hinc ergo dextrũ, ac ſiniſtrũ latus dicimus. à quo latrones uocati olim, quos imperator circa ſe habere conſueuit. Nũc ſatellites dicti, quaſi laterones, quia circa latera legũtur. At nũc uiarũ obſeſſores ita uocantur, qđ à latere adoriãtur. unde latrocinor uerbum, quod modo ſignificat uias diripiendi gratia obſideo. & latrocinium ipſa direptio. & latrocinator, q ita diripit. A` latrone diminutiuum fit latrunculus. à quo latrunculatores uocantur iudices, q de latrocinijs, & alijs maleficijs cognoſcunt. Latrunculi etiam ſiue latrones dicuntur calculi, quibus ludimus ſexdecim ſcrupis gemina acie utrinq; directis, in qbus duo reges ſunt inuicẽ cõtẽdẽtes. duæ reginæ, quatuor eqtes. ſexdecim pedites. quatuor ſatellites. totidem centuriones. Nã ſolſtitio rimoſi fiunt, & ædificijs inutiles. Quin & intritum ipſum eorũ, prius quàm fingantur, macerari oportet. à latere laterculus diminutiuum deducitur. & latericius.

Latericia opera in urbe Roma priuatim non fiebant, cuius rei ratio erat, quia leges plebeiæ nõ patiebantur maiores craſſitudines, quàm ſexquipedales conſtitui loco communi. Cæteri autem parietes, ut ſpatia anguſtiora fierent, eadem craſſitudine collocarentur. Latericij uero ſexquipedali craſſitudine non poſſunt plus una ſuſtinere contignationem. in tanta autem maieſtate urbis, & ciuium infinita frequentia, innumerabileis habitationes opus fuit explicare. Ergo cum recipere non poſſet area plana tantam multitudinem ad habitandum, in urbe ad auxilium altitudinis ædificiorum res ipſa coëgit deuenire. itaq; pilis lapideis, ſtructuris teſtaceis. parietibus cæmentitijs altitudines extructæ ſunt contignationibus crebris, quæ alto ſpatio multiplicatæ, egregias populo præſtiterunt ſine impedimento habitationes. item à latus fit lato uerbũ, quod eſt extendo. à quo laxo frequentatiuum. de quo, & eius deriuatiuis ſuperius locuti ſumus. item compoſita dilato. & latifolium, quod lata folia habet. unde latifolia herba, de qua ſuperius diximus. et latifundium campus ſpatioſus. Latum autem à græco deducitur una litera detracta. nam græce πλατὺς latus dicitur. unde platos latitudo appellatur. Hinc Plato ille philoſophus ob humerorum latitudinẽ nomen ſumpſit, cum antea ex aui paterni nomine Ariſtocles uocaretur. Fuit enim egregio corporis habitu, & in palæſtra ſe exercuit apud Ariſtonem palæſtritem, à quo primum cognominatus eſt Plato. Patrem habuit Ariſtonem, & matrem Parectoniam. Natus eſt Athenis eo die, quo apud Delon Apollo. Studuit picturæ. poemata edidit, & tragœdias. Audiuit Socratem, & poſt eius mortem Cratylum, & Hermogenem. deinde ſe Megaram ad Euclidem contulit. Deinde petijt Aegyptum comite Euripide, & multa à prophetis, ac ſacerdotibus didicit. reuerſuſq; Athenas in Academia habitauit. Ter militauit. ter nauigauit in Siciliã. ſemel uenundatus eſt. adeo autem in omni genere diſciplinarum, præſertimq; philoſophia excelluit, ut & diuinus Plato & philoſophorum Homerus uocatus ſit. item à platos platea, hoc eſt latio in opido uia, in qua conuenire populus ſolet. Græce πλατεῖα dicitur. & Plateæ urbs Bœotiæ. item inſula maris ægæi, unde platæenſes dicti. & platanus arbor à late ſpargentibus ſe ramis. Fuit & alia platanus in Veliterno rure Caij principis, in cuius tabulatis quindecim conuiuas habuit, quam cœnam ille appellauit nidum. Fuit & cortinæ in inſula Creta iuxta fontem platanus utriuſq; linguæ monimentis inſignis, nunquam folia dimittens, ſub qua Iouem cum Europa concubuiſſe fama erat. A platano platanetũ, & platanon deducuntur, locus platanis conſitus, ſicut daphnõ, & lauretum locus conſitus lauris. item platanodes Achaiæ promontorium. & platyphyllon lactariæ genus, de quo diximus, & platicerotes belluæ lata cornua habentes. & platyophthalmus ſtibia à dilatandis oculis, quemadmodum inferius latius dicemus. Tres Romæ circos fuiſſe legimus. Maximum, Flaminium, & Neronis. in hoc ultimo ingentem fuiſſe obeliſcum conſtat, quem nunc Romæ in uaticano cernimus. D. Cæſar circenſibus ludis ſpatium circi ab utraque parte produxit, & in gyrum euripo addito quadrigas, bigasq́;, & equos deſultorios agitari fecit à nobiliſſimis iuuenibus. proprie autem circus appellatur omnis in gyrum ambitus, eiusq́; diminutiuum eſt circulus, definiturq́;, Circulus eſt figura plana una tantum linea contenta, in cuius medio punctus eſt, à quo omnes lineæ ad circunferentiam ductæ inter ſe ſunt æquales, & ita à globo differt, quod circulus eſt rotunda planicies. PERO ME SECVTVM. Præmittit Epiſtolam libro iam tamen à ſe ſcripto, & perfecto, quod facere aliquando ueteres poëtæ cōſueuere, ut Papinius in ſyluis. Tres autem ſunt huius epiſtolæ partes. in prima legentium ſibi beneuolentiam

conciliat, tale ſe in ſcribendo ſecutum temperamentum affirmans, ut neminem læſerit. in ſecunda excuſat laſciuiam carminis authoritate duntaxat poëtarum, qui ſimilia ſcripſere. in tertia hortatur ſeueriores, ut à legendis libellis ſuis abſtineant. IN LIBELLIS. In libris epigrāmatum, quos ſcripſi. ꝑ modeſtiam enim libellos, hoc eſt paruos libros appellat. Liber libri proprie pars corticis eſt, quæ ligno adhæret. unde delibrare dicimus pro eo, quod eſt corticem detrahere. et delibratio eſt ipſa (ut ita dicam) decorticatio. Virg. Huic natam libro, & ſylueſtri ſubere clauſam Implicat. Idē. Vdoq; docent inoleſcere libro. Hinc delubrū ſecundum quoſdam, ut ſuperius oſtēdimus. Item liber dictus, in quo ſcribitur, quia ante uſum chartæ è corticibus arborum uolumina compaginabantur. Vnde & codex ab arborum trūco appellatus eſt. à quo codicillus diminutiuum, ſicut à libro libellus, poniturq; libellus pro epiſtola, ſiue tabella. unde libelliones à ueteribus tabelliones dicebātur. Varro. Tum ad me fuerunt, quod libellionem eſſe ſciebant. Librarij uero ſunt, qui libros tranſcribunt, ſicut bibliopolæ, q libros uendunt. βιβλίον enim græce liber dicitur. à quo, & bibliotheca appellata, quod (ut ait Vlpia.) modo locum ſignificat, in quo libri tenentur, ut cum dicimus, in bibliotheca eſt. modo armarium, ubi libri ſeruantur. Vnde eburneam bibliothecam emiſſe dicimur. modo copiam ipſam librorum, ut Ptolemæum regem dicimus bibliothecam omnium pulcherrimam congregaſſe. & bibliographus librarius. liber etiā modo pro ipſo opere integro accipitur, quantumlibet ſit magnus, etiam ſi contineat æneida, & bucolica, & georgica ſimul, modo pro certa parte operis, ut Virgilij Aeneis in duodecim libros diſtincta eſt. Liber uero liberi adiectiuum eſt, & modo eum ſignificat, qui nulli ſubiectus eſt. cuius correlatiuū eſt ſeruus, modo qui ſine trepidatione, aut reſpectu loquitur, aut facit. interdū etiam qui curis ac negotijs omnibus ſolutus eſt, hæc duo poſtrema ſignificata præclare uno diſticho expreſſit Martialis.

Liber homo es nimium dicis mihi Cheryle ſemper, hoc eſt nimium libere loqueris. In te qui dicit Cheryle, liber homo eſt, hoc eſt uacuus negotys, & quid agat non habens. Hinc liber etiam uocatus eſt Bocchus, qui uini inuentor fuit, quia uino uſi libere omnia loquuntur. ponitur etiam aliquando pro uino, ſicut Ceres pro frumento. Venus pro libidine. unde extat illud prouerbium. Sine Cerere & Libero friget uenus. ab hoc Liberalia Liberi feſta, quæ à græcis dionyſia uocantur. Item liberi filij dicuntur numero ferè plurali, quamuis & ſingulari aliqñ repiatur, diciturq; in plurali etiam de uno filio. filiaue. Caliſtratus liberorum appellatione nepotes quoq;, ac pronepotes, cæteroſq;, qui ex ijs deſcendunt, contineri exiſtimat. Paulus uero iuriſconſultus eos, qui contra formam humani generis conuerſo more procreantur, liberorum appellatione non putat cōtineri, ut ſi mulier monſtroſum quid, aut prodigioſum enixa fuerit. A' liber libertas deducitur, quæ ſeruituti oppoſita eſt. Itē libertas de eo dicitur, qui libere, & ſine reſpectu loquitur, facitq; quæ libet. Hæc à Florentino iuriſconſulto definitur facultas eius, qđ cuiq; facere libet, niſi iure prohibetur, capiturq; ſemper in bonam partem, cum licētia in malam partem capiatur. Quint. Quæ in alijs libertas eſt, in alijs licentia uocatur. Terentius, Deteriores omnes ſumus licentia. Virgilius, Libertas, quæ ſera tamen reſpexit inertem. Licentiam tamen aliquando pro libertate poſitam inuenimus. Salluſtius, Romam legatos ire iubet. Agendarum rerum, ac quocunq; modo componendi belli licentiam ipſis permittit. Libertas etiam dea eſt libertatis, cuius templum in Auentino cōſtitutum fuiſſe hiſtoriæ tradūt. Item à liber libertus deriuatur, qui cum eſſet ſeruus factus eſt liber. Vlpia. eum eſſe libertum definit, quē quis è ſeruitute ad

ciuitatem

ciuitatem romanam perduxit. à liberto fit libertinus, quod eſt adiectiuum nomen, eſtq; relatiuū ingenui, ſicut libertus relatiuum patroni. Libertini definiuntur, q iuſta ſeruitute manumiſſi ſunt, quemadmodum ingenui, q libera matre nati, nec poſtea ſerui facti ſunt. Vnde ita interrogare debemus. Eſt'ne ingenuus, an libertinus, non autem libertus, & cum reſponſum fuerit, Libertinus, interrogamus cuius libertus eſt, non autem libertinus. à libertino libertinitas deducitur, ſicut ab ingenuo ingenuitas. Item à liber fit libero uerbum, quod modo particulare eſt, & ſignificat manumitto, hoc eſt libertate dono, modo uniuerſale, & ſignificat abſoluo. Cicero, Nihil enim mihi antiquius fuit, quā ut te à ſceleratorum hominum calumnijs liberarem. liberare etiam aliquando uſurpamus pro eo, quod eſt addicere, unde in licitationibus rem, quæ uenalis propoſita eſt, plus offerenti addicere, ſeu liberare dicimus, & non modo, qui uendit, ſed etiam qui emit rem ipſam ſic uēditam, liberare dicitur. Hinc liberationis uocabulum Paulus iuriſconſultus affirmat eandem uim habere, quam ſolutionis. liberata à ueteribus pro effata, hoc eſt locuta uſurpari ſolebat. A' libero fit delibero, hoc eſt decerno. ſtatuo. capto enim conſilio, mens à cogitatione liberatur. Neq; enim probabile mihi uidetur, quod Feſtus ſcribit deliberare à libella, qua quid perpenditur dictum. A' delibero fit deliberatio. Item à liber liberalis, quod modo pro benigno, munificoq; accipitur. Vnde liberalitas munificentia dicitur, & liberaliter large. magnifice. Item pro miſericorditer, cuius contrarium eſt illiberaliter, quod ueteres de eo dicebant, qui exceſſiſſet omne genus maleficij. Terentius, Quam is aſpernatur tam illiberaliter. Idem. Factum à uobis immiſericorditer, atque ſi æquum eſt dicere magis aperte, illiberaliter. Et comparatiua, ac ſuperlatiua eorum liberalior. liberaliſſimus. liberalius. liberaliſſime. Vnde liberales diſciplinæ, appellatæ ſunt, quod ſunt libero homine dignæ. modo liberalis capitur pro pulchro, & ingenuæ formæ homine. Item à liber fit liberior, & liberrimus, & aduerbia libere. liberius. liberrime. & liberum arbitrium habere dicimus, cum in poteſtate noſtra eſt id facere, quod uolumus. liberum etiam nobis eſſe dicimus, pro eo, quod eſt in noſtra poteſtate eſſe. Sunt etiam qui à liber libram quoque, de qua, & eius deriuatiuis ſuperius locuti ſumus, deductam exiſtimant, quod ipſa quaſi libera ſit, cum cætera pōdera ſibi ſubdita, & in ea incluſa ſint. Liber autem à libet deriuatum eſſe exiſtimant, quod homines liberi agant, quicquid placet. Libere enim placere eſt, qđ uerbum à labendo tractum eſſe Varro arbitratur, quod quæ placent, in mentem prolabantur. Ab hoc fit libido, quod ſignificat, quicquid libet. Vnde non modo turpium, ſed etiam honeſtarum rerum uoluntas libido appellatur. Salluſtius, Magiſq; in decoris armis, & militaribus equis, quàm in ſcortis, atq; conuiuijs libidinem habent. Terentius, Neq; tuæ libidini aduerſabor, hoc eſt uoluntati. Hinc iram definimus eſſe libidinem eius puniendi, qui iniuria læſiſſe uideatur. Item auaritiam libidinē habendi pecuniam. peruicaciam libidinem quomodocunq; uincendi. iactantiam libidinem gloriandi. Tyrannidem libidinem dominandi. peculiariter tamen libidinis nomen tranſlatum eſt ad immoderatum coeundi appetitum. Nam cum ſimpliciter libido profertur, neq; cuius rei ſit libido additur, illa profecto animo occurrit, qua obſcœnæ corporis partes excitantur. hac enim nulla maior eſt uoluptas, nihilq;, quod magis libeat. hæc enim ſibi non ſolum totum corpus, nec ſolum extrinſecus, uerum etiam intrinſecus uendicat, totumq; commouet hominem animi ſimul affectu cum carnis appetitu coniuncto, atque permiſto, ita ut momento ipſo temporis, quo ad huius uoluptatis extremum peruenitur, penè omnis acies, & quaſi uigilia cogita-

tionis obruatur. Ab hac libidinoſus deducitur, hoc eſt in libidinem propenſus. & libidinoſe aduerbium, molliter, laſciue. Item à libet libentia, hoc eſt uoluptas. gratia. Macro. Cui libentiæ, gratiæq; omnes conuiuiorum incognitæ ſunt. & libens hoc eſt uolens. facilis & libenter, hoc eſt grato animo. à quo libentius, & libentiſſime & Libitina, quæ & libentina dicitur Venus, ſiue Proſerpina unde etiam pro morte ponitur. & quilibet, de quo ſuperius diximus. & quālibet pro quamuis, quantumlibet pro quantum uis. ubilibet pro ubi uis. uterlibet pro uteruis, quomodolibet pro quomodocunq;. ut libet pro utcunq; licentia uero deriuatur à licet, quod modo ſignificat fas eſt. Cicero, Neq; enim licebat locum numini conſecratum turpi flagitio contaminare, modo facile eſt, uel potius poſſibile eſt. Martialis, Piſcinam peto, non licet natare. Nonnunquam concedentis aduerbium eſt, ſicut eſto. Virgilius, licet ingens ianitor antro Aeternum latrans exangues terreat umbras. interdū eſt cōiunctio aduerſatiua, ut etſi. quamuis. quanquam, de quibus ſuperius diximus. à licet licentia deducitur, de qua pauloante diſſeruimus. & licentioſus, qui nimia utitur licentia. & licenter per licentiam. & licito iuſte. & ilicet, ac ſcilicet, & uidelicet, de quibus ſuperius diximus. licentiora etiam dicuntur mancipia nequiora quaſi multa per licentiam facientia. Item licentior epiſtola, in qua nimis libere ſcribimus. Plynius, Licentiore epiſtola narrare conſtitui. Item liceor deponens, & frequentatiuum eius licitor. quod licētia quadam uti in augendo pretio uideamur. Eſt enim liceri, ſiue licitari pretiū augere in auctione facienda. unde fit unum compoſitum polliceor, quod eſt ultro aliquid promitto. à quo pollicitatio promiſſio. hoc tamen intereſt inter liceri, & licitari, quod liceri eſt aut ſine reſpectu aliorum emere uolentium, aut tantum ſemel pretium deferre. licitari uero cum multis, & ſæpius prætium augere, ut emere uolentes ab emendo deſiſtant. Cicero. Non licitatorem uenditor, nec contra, qui liceatur emptor apponet. Tali modo uendere addicere eſt, de quo ſuperius locuti ſumus. à licitor licitatio deriuatur, hoc eſt pretij in auctione oblatio. Aliquando tamen ſine auctione licitatio fit. Curtius de Dario, qui pollicebatur pretium pro capite Alexandri, ſiquis eum occidiſſet. Et cum habetis inquit arma, licitamini hoſtium capita. Item licitari ueteres pro congredi, & pugnare uſurparunt. Ennius, Pars ſaxa iactant, & inter ſe licitantur. Cælius, cum machæra licitari aduerſum eum cœpiſti ſciens. Tractum eſt autem hoc à licitantium, hoc eſt pretium in emptione augentium contentione. impellit nos cognatio uocabuli, ut poſtquam de libet diximus, de libo etiam dicamus. libare igitur proprie eſt leuiter deguſtare, & quaſi primis libris attingere, dictum (ut quidam putant) à labijs, quaſi labiare. Virg. Purpureoſq; metunt flores, & flumina libant. per metaphoram tamen aliquando pro leuiter tangere uſurpatur. Idem. Oſcula libauit natæ, dehinc talia fatur. aliquando pro ſacrificare. Idem. Et pateras libate Ioui. Tibul.

Et quodcunq; mihi pomum nouus educat annus.
Libatum agricolæ ponitur ante deum.

Hinc liba dictæ ſunt placentæ ex farre, & melle deorum ſacrificijs aptæ. Virg. Et adorea liba per herbam Subijciūt epulis. Hinc etiam libellum diminutiuum. & libatio. & libamentum, quæ modo deguſtationem, modo ſacrificium ſignificant. & delibo compoſitum, quod modo ſignificat deguſto, modo accipitur pro eo, quod eſt aquam ſulco deriuo. interdum etiam ſacrifico. unde delibatū ſacrificatum dicimus. delibutum uero unctum ſignificat, quaſi oleo imbutū. ſed trāsfertur aliqñ ad animum. Ter. Si te delibutū gaudio reddo, hoc eſt perfuſum. Sunt q putent à libo lito quoq; eſſe deductum, qđ eſt ſacrificijs deos placo. Virg. ſacriſq; litatis, hoc eſt dijs placatis. Nos à græco

potius deriuatum putamus. Quippe græci λιτὴν deprecationem dicunt. Ab hoc quidam lituum nominatum putant baculum incuruum, quo ſedētes augures auibus templa deſignabant, & ab eius ſimilitudine incuruæ bucinæ genus, quia qui canunt, liticines dicuntur, lituum uocitatum. Nos baculū potius à tuba nomen accepiſſe exiſtimamus, quemadmodum ſuperius diſſeruimus. VT QVISQVIS DE SE BENE SENSERIT, NON POSSIT QVERI DE ILLIS. Vt quisquis uitæ conſcientia ſecurus fuerit, non poſſit exiſtimare poëtam de ſe locutum fuiſſe. REVERENTIA SALVA. Honore non læſo. Vereri timere eſt cū pudore quodam erga eum, quem metuimus. Vnde quidam hæc ita ſeparant, ut uereri dicāt eſſe liberi hominis, timere ſerui. quod ille pudoris, hic pœnæ metu teneatur. A uereor fit reuereor, qđ eſt honoro. à quo reuerentia honor, quē tam in uerbis, quam in factis alicui exhibemus. Vnde rem aliquam turpem nominaturi, dicere ſolemus ſalua reuerentia. ſaluo honore. reuerentia ſit auribus ueſtris. honor ſit audientium auribus. Item reuerendus, hoc eſt dignus reuerentia. & reuerēter aduerbium, cum reuerentia. Item à uereor uerendus dignus, quem uereamur. & uerenda pudenda. & uerecundus, modeſtus, qui facile pudore ducitur. & uerecundia pudor. modeſtia, quorum contraria ſunt inuerecundus. & inuerecundia, hoc eſt impudens. & impudentia. Item aduerbia uerecunde, & inuerecunde. præterea uerecundor uerbum, quod eſt uerecundia teneor. Cicero, Alterum cunctantem, & quaſi uerecundantem incitabat. Aliquando tamen uerecundus pro audaci, & cōfidente accipitur, ſiue per antiphraſin, ſiue quod uerecundia abſtinentiam ſcelerum facit. talis uero abſtinentia fiduciam. Plautus, Sic eſt, uera prædico, niſi hoc etiam falſò dici inſimulaturus es, nimis uerecūda es, ſalua. integra. illæſa. à ſano uero (ut Varro exiſtimat) deducitur ſaluus. Sanus proprie dicitur integer. incorruptus. à quo ſanitas, icolumitas. & ſano redintegro. Et inſanus, demens, hoc eſt qui mentem non habet integram. à quo inſania ſtultitia, quæ & inſanitas dicitur. Cicero. Inſipientia autem quaſi inſanitas, eadēq; dementia. Et inſanio uerbum deſipio. interdum tamen inſanire pro eo uſurpatur, qđ eſt carmen conſcribere. Virgilius, Inſanire libet. Nam inſani dicūtur enthei, hoc eſt deo pleni. Idem. Inſanam uatem. Nonnunquam etiam inſanus pro magno accipitur. Idē. inſani feriant ſine littora fluctus. Item à ſanus ueſanus, hoc eſt uecors. crudelis. furioſus. à quo ueſania. uecordia. crudelitas. furor. Itē ſanies, ſanguis corruptus, quod quidam à tabo ſic diſtinguunt, ut illud de mortuo, hoc de uiuo dicatur. Virgil. & ſanie, taboq; fluentis, Complexu miſero longa ſic morte necabat. Item ſanè aduerbium, quod aliquando affirmatiue pro eo, qđ eſt certe ſumitur, ut ita ſanè. Sanè uero proprie tamē ſignificat ualde, quoniam qui ſanus eſt, ualidus eſt. Varro mammam lactis ſugentem paſcere pupum. Hinc pupillus deriuatur, quem Pomponius definit eſſe eum, qui impubes eſt, & deſiit in patris poteſtate eſſe, uel morte uel emancipatione. À quo pupillaris, ut pupillaris ætas. pupillare negotium. itẽ pupilla pars oculi illa parua in media cornea ſita, in qua ita abſoluta uis ſpeculi redditur, ut tam exiguum ſpatium totam imaginem hominis reddat, quæ cauſa eſt, ut pleræq; aues è manibus hominum oculos potiſſimum appetant, quod effigiem ſuam in iis cernentes uelut ad cognata deſyderia tendant. hæc nobis adeo cara eſt, ut locum prouerbio dederit, cum dicimus aliquid pupilla oculi nobis carius eſſe. Pupæ etiam ab hoc appellatæ ſunt puerorum, & puellarum laneæ effigies paruæ, quas dicare olim uirgines Veneri ſolebant. Varro. Itaq; breui tempore magna pars in deſyderium puparum, & ſigillorum ueniebat. Perſius.

Dicite pontifices in ſancto quid facit aurum?
Nempe hoc, quod Veneri donatæ à uirgine pupæ.

NASVM RHINOCEROTIS. Longum ſcilicet ad ſimilitudinem rhinocerotii cornu, quod id animal (ut ſupra diximus) in naribus habet. Vetus eſt prouerbium. Naſus rhinocerotis, de iis, qui ſcicale quemuis irrident, quod homines, quo longiores naſo ſunt, eo maiores ronchos edant, propter quod & naſuti dicuntur. à quo naſutior. naſutiſſimus. Neutro autem genere dixit poëta grande ſophos: ideſt grandem illam, & adulatoriam uocem tot hominum clamantium ſophos. Sic alibi.

Quod tam grande ſophos clamet tibi turba togata,
Non tu Pomponi, cœna diſerta tua eſt.

Sic autem neutro genere grande ſophos inquit, quemadmodum Perſius Pegaſeum melos. GRANDE. Magnum. Veteres grandem non ad corpus, ſed duntaxat ad ætatem retulerunt iam penè adultam. Terentius. An ſedere oportuit domi uirginem tam grandem. Quod ſi natu addatur, prouectiorem ætatem ſignificat, & iam penè ſenilem. Plynius Iunior. Mulier natu grandior, & tot liberorum partus. Hinc granditatem dixerunt maiorem ætatem. Siſenna. Neq; granditatem, neq; merita, neq; ordinis honeſtatem, aut dignitatem tibi eſſe excuſationi. Nunc tamen grandem pro magno ponimus. Ab hoc fit grandio uerbum, quod eſt grandem facio. Plautus. Teſtudineum iſtum tibi ego grandibo gradum. & grandiloquus eloquens, & cum quadam uerborum magni-

Quid tam iſti grandiloqui contra hæc duo, quæ maxime angunt. & grandæuus prouectioris ætatis, hoc eſt grandis æui. & grandeſco, creſco. Plynius. Inſita grandeſcunt facilius. & grando gutta aquæ congelata, quod ſolito grandior fit. à quo fit uerbum grandino. & grandinoſus adiectiuum, unde grandinoſa loca dicimus, in quibus frequentes ſunt grandines. Grando, nix, & pruina ita differunt, quod grando congelato firmius imbre gignitur. Nix humore mollius coacto. pruina autem ex rore gelido. per hyemem niues cadunt. Grandines alijs temporibus, & interdiu magis, quàm noctu, multoq; celerius, quàm niues reſoluuntur, non aduerſante frigore. Rores neq; gelu fiunt, neque ardoribus, neq; uentis, nec niſi ſerena nocte. Eſt autem ros humor, qui ſereno tempore è cœlo fluit. à niue niueum dicimus candidum. & niualem. ut niualis aqua, & niuoſum, in quo ſunt frequentes niues. & ningo uerbum ſicut pluo. & grandino, quod tamen non à niue, ſed à ningue deductum uolunt, quod ueteres pro niue uſurpabant. Lucretius. Albas effundere ningueis. Niuem quaſi nouam dictam nonnulli opinantur. græci enim νέον nouum dicunt. À pruina pruinoſa loca dicimus, in quibus frequentes ſunt pruinæ. Dicta eſt autem pruina quaſi perurina, quod fruges & uirgulta perurat. à rore roſidus deducitur, hoc eſt rore perfuſus. Vnde roſcida mala dicimus, quæ matutino rore humecta ſunt. Virgilius.

Sepibus in noſtris paruam te roſcida mala.

Roſcius uero nomen fuit hiſtrionis omnium nobiliſſimi. pro quo extat Ciceronis illa præclara oratio. à quo omnes in aliqua re perfecti roſcij appellantur.

Excuſſo ſago, in altum iactaberis, quod deriſionis gratia fieri ſolebat (ut abunde ſuperius diximus.) PER AVRAS AETHERIAS. Per flatus aerios. PATIARE. Suſtineas. Patior à græco deducitur. παθεῖν enim apud græcos pati eſt, & eſt commune uerbum. Nam & patior, hoc eſt ſuſtineo te, & patior, hoc eſt ſuſtineor abs te dicimus. Terentius. Deniq; ubi non quit pati. ſignificat autem patior modo ſuſtineo. premor. modo tolero. & æquo animo fero, quod & πατεῖν apud græcos facit, unde eſt trita illa uulgo ſentẽtia εἰ μὲν ἦν μαθεῖν ἃ δεῖ παθεῖν καὶ μὴ παθεῖν, καλὸν ἦν τὸ μαθεῖν· εἰ δὲ δεῖ παθεῖν, τί δεῖ μαθεῖν, παθεῖν γὰρ χρή. hoc eſt, quod ſi eſſet diſcere quæ oportet pati, & non pati, optimum quidem eſſet id diſcere. Si uero pati oportet, quid neceſſe eſt diſcere? pati enim oportet. à patior fit paſſio, quæ & perturbatio, & affectus, & affectio uocatur. quatuor enim ſunt præcipuæ paſſiones, duæ à bonis. Gaudere ſcilicet, & cupere, ſiue ſperare. Hæ enim duæ ſunt opiniones bonæ. una præſentis, altera futuri. Lætitia de præſenti eſt, ſpes de futuro bono. duæ à malis, dolere, & timere, una ſimiliter præſentis, altera futuri. Dolor enim eſt de præſenti, timor de futuro malo. Item à Patior paſſiuum uerbum

apud grammaticos, quod paſſionem ſignificat. ſicut actiuum, quod actionem. à quo fit aduerbium paſſiue. Item patientia tolerantia cum æquanimitate. & patienter æquo animo. Item compoſita perpetior, hoc eſt uehementer patior. & compatior miſereor. à quo compaſſio, quæ & cordolium à dolore cordis appellatur. Paſſus à tribus uerbis deducitur. Patior. pando, & pateo. À patior ſignificat perpeſſum. Virgilius. O paſſi grauiora, dabit deus his quoq; finem. Vnde uuam paſſam dicimus, quæ in ſiccando paſſa eſt ſolem. Plynius. Quin & à patientia nomen acinis datur paſſis. Hinc & uino nomen datum, quod paſſum uocatur. Fit ex uua, quam ſupra diximus à græcis ſticam, à nobis apianam uocari, uuis in uite diutius ſole aduſtis, aut feruente oleo, donec paulo amplius dimidium pondus ſuperſit, tuſaſq; leniter uuas exprimunt. quod ſi quantum muſti expreſſere, tantum aquæ puteanæ adijciant uinaceis, fit ſecundarium paſſum. Sunt etiam qui paſſerem hinc dictum exiſtiment, cuius diminutiuum eſt paſſerculus, quod ob nimiam ſalacitatem comitialem morbum patiatur, ſitq; ob id breuiſſimæ uitæ, mares uix unquam biennium excedunt. fœminis longiuſculum ſpatium. Paſſer ſolitarius ex eo genere, ſed aliquanto grandior eſt, ac ſubnigrior, ſolus per domorum culmina incedens, cantu ſuauis, & ob id ſæpe dedita opera educatus. Eſt & paſſer marinus alia auis, quam uulgo ſtritomellum uocant. À pateo ſignificat patentem, extenſum. Plautus. In portum uento ſecundo, uelo paſſo peruenit. Hinc paſſus appellamus greſſus mutuos, quia ſic pedes pateſcunt. À pando ſignificat deductum. porrectum. diſperſum. Terentius. Capillus paſſus, nudus pes, ipſaq; horrida, quod & expaſſum aliquando dicimus, non autem expanſum, & mutatione unius literæ diſpeſſum. Plautus. Credo ego iſto exẽplo tibi eſſe eundum extra portam diſpeſſis manibus. Depeſſum uero ſiue à patior, ſiue à pando fiat, laceratum dicimus. Terentius. Egone ſi uiuo adeo exornatum dabo, adeo depeſſum, ut uſque dum uiuat meminerit ſemper mei. Quod ſi depexum legamus, ſignificabit cultum, & pexas ueſtes indutum, dictumq; erit à contrario ſenſu. Hinc paſſim aduerbium deriuatur, quod proprie ſignificat ſparſum, non (ut pleriq;, falſo exiſtimant) ubiq;. Nam in prato ubique ſunt herbæ non paſſim. contra grex paſſim paſcitur potius, quàm ubique. Aliquando tamen paſſim pro ubiq; accipitur. Firmianus. Creditur ei paſſim, tanquam cognitæ ueritati, quinetiam, quod mirabilius eſt, pro undique. Idem. Cumq; is numerus condendæ urbi parum idoneus uideretur, conſtituit aſylum. Eo paſſim confugerunt ex finitimis locis. Item pro quomodolibet. Virgilius. paſſimq; in littore ſicco Corpora curamus. paſſim inquit. pro eo, quod eſt prout quiſque uult, ſiue ſine ullo conditionis diſcrimine. paticus uero non à patior deflectitur, ſed à græco παθεῖν, aſpiratione detracta. eſt autem Paticus, qui iniri ſe turpi libidine patitur. Vnde pueri patici, & puellæ paticæ, & per ſuperlatiuum paticiſſimæ dicuntur. Item grandiores natu, ſenesq;, qui ſe magna uoluptate iuuenibus proſtituunt. Iuuenalis. Ille tenet ſpeculum patici geſtamen Othonis, quemadmodum draucus appellatur, qui non propria uoluptate, ſed alterius alterum init, ita à faciendo dictus, quemadmodum paticus à patiendo. Quippe δράω apud græcos facio ſignificat. Qui autem à draucis ſubigi delectantur, ſeq; eis ſponte proſtituunt, Cinædi uocantur ἀπὸ τοῦ κινεῖν τὰ αἰδοῖα, hoc eſt à uirilibus manu tractandis appellati. Solent enim ad excitandam in ſe adoleſcentium, ac iuuenum libidinem pudenda eorum manibus agitare. Quærentes etiam ſummo ſtudio, qui magnitudine uirilis membri cæteris antecellant, & tam obſcœno, ac deteſtando

ſpectaculo,

ſpectaculo, tanquam ſpecie aliqua pulcherrima ſæpenumero oculos paſcentes. Martialis de cinædo,

Vna lauamur, aſpicit nihil ſurſum,
Soſpectat oculis deuorantibus draucos.

Talis fuit Hoſtius, ut Seneca refert, quadra libidinis, non modo mulierum, ſed etiam uirorum appetens, nec tam agendi auidus, quàm patiendi. Hic omnibus balneis agere delectum eorum ſolebat, qui membri magnitudine cæteros anteibant. Fecit quoq; ſpecula concaua reddentia maiorem iuſto imaginem, ſiquidem digitus in ijs brachij craſſitudinem reddebat. hoc autem ita diſponebat, ut dum draucum pateretur auerſus omnes admiſſarij ſui motus uideret, & falſa membri magnitudine, quaſi uera oblectaretur. in alterum huic obſcœnitati ſimilem inuehitur Martialis.

Vnus ſæpe tibi eſt tota denarius arca,
Cum ſit & hic culo tritior ipſe tuo.
Non tamen hunc pictor, non aufert hunc tibi Copo,
Sed ſiquis nimio penè ſuperbus erit.
Infelix uenter ſpectat conuiuia culi,
Et ſemper miſer hic eſurit, ille uorat.

Huius tam deteſtandæ libidinis rationem Ariſtoteles philoſophus à conſuetudine trahit, cuius tanta uis eſt, ut ſæpe in naturam conuertatur. Quibus enim uſu uenit, ut non ante pubẽ, ſed in ea patiendi uitium ſuſtulerint, ijs recordatio eius rei, dum deſyderant, oritur, & unà cum recordatione uoluptas, propter quam geſtiunt, dum patiuntur non minus, quàm cum agunt, & ſæpe patiendo ipſi quoq; genituram emittunt, quapropter mouentur ueluti nati ad patiendũ. Quod ſi cum mollicie accedat naturalis ſalacitas, hæc omnia expeditius neceſſe eſt euenire. Eſt & aliud ſordidiſſimæ uoluptatis genus, quo Cinædi oblectantur draucorum uirilia felantes, hoc eſt ſugentes. Felare enim ſugere eſt, cuius frequentatiuum eſt felitare. à quo felatores dicti. Martialis.

Si felas, & aquam potas, nil Leſbia peccas,
Qua tibi parte opus eſt, Leſbia ſumis aquam. Idem.
Corue ſalutator, quare felator haberis.
In caput intrauit mentula nulla tuum.

Huius contrarium eſt irrumare, de quo ſupra diximus, quaſi penem in rumem immittere. felant cinædi, drauci irrumant. Item alij, qui hoc genere turpiſſimi coitus delectantur, quod ferè ſenibus, & iam effetis ſolet accidere. À felare, & irrumare, Felari, & irrumari paſſiua fiunt. & felatio, & irrumatio. mulieribus etiam hoc uitium accidit, à quo felatrices dicuntur. Paticus aliquando etiam ad inanimata transfertur. Vnde Martialis Paticiſſimos libellos appellat laſciuos, & in quibus de rebus obſcœniſſimis tractatur. Item à πάσχω græco, quod ſignificat patior, paſca deducitur, quod ſignificat ſolẽnem diem, quo agnus primo, deinde IESVS, Hoc eſt ſaluator humani generis, qui & Chriſtus, hoc eſt unctus uocatur, paſſus eſt. Eum diem Iudæi Phaſen, hoc eſt tranſitum nominant, quia tunc ex Aegypto in patriam remigrauere.

TRISTIS ARVNDO. Seuerus, & aſper calamus quamuis Arundo proprie ſit, quæ craſſior, ac longior eſt, ſeriturq; ad uſum præcipue uinearum. calamus gracilis, tenuisq; & tibijs ferè, ac ſcripturæ aptus. Canna maior calamo, ſed minor arundine, & ſemper ferè ſua ſponte proueniens. Columella, Ea eſt autem ſenectus, cum uel exaruit ſitu, & inertia plurium annorum, uel ita denſatum eſt, ut gracilis, & cannæ ſimilis arundo prodeat. à canna Canalis deducitur una litera detracta, quod ſignificat lignum ad cannæ ſimilitudinem cauatum, quo aqua deducitur, & eſt generis fœminini. Virgilius. Currentem ilignis potare canalibus undam. Ab hoc ca-

nalicolæ dicti ſunt forenſes homines pauperes, quod circa canales fori conſiſterent.

Tetigeris. tangere enim, & contingere idem ſignificant. Lucretius. Tangere enim, & tangi, niſi corpus, nulla poteſt res. ſed quoniam tangendo quodammodo moueri uidentur ea, quæ tanguntur, tangere aliquando pro commouere, ac ferire accipimus. Virgilius. nec ſolos tangit Atridas. Iſte dolor. Idem, de cœlo tactas memini predicere quercus, hoc eſt fulmine ictas. Varro. Nonnunquam tuarum me cura fortunarum, cogitatioq; tangit. Lucretius. Nec bene pro meritis capitur. nec tangitur ira. Item quoniam ea, quæ tangimus, uidemus ferè, atq; ſentimus, tangere pro cernere. et intelligere uſurpamus. Lucilius. Neq; prius quàm uenas hominis tetigit, ac præcordia. Cicero. Poſtquam autem conſilia eius omnia tetigi. Eſt etiam quando tangere ſumitur pro circumuenire. Turpilius, at etiam ineptus meus eſt mihi pater iratus, quia eum talento argenti tetigi ueteri exemplo amantis. Pomponius. At ego ruſticatim tangam, urbanatim neſcio. Item pro peruenire, quoniam loca ea contingimus, ad quæ peruenimus. Cicero. Verres ſimulac tetigit prouinciam. à tango fit tactus quartæ declinationis unus ex quinq; ſenſibus. & tactus adiectiuum, cuius contrarium eſt intactus, quod eſt intemeratus, inuiolatus, non tactus. & taxo frequentatiuum, quod ſignificat æſtimo. appretio. à quo taxatio æſtimatio. hoc enim tangendo, hoc eſt ponderando fieri ſolet, & taxatores à ſcœnicis dicuntur, qui alterutrum maledictis tangunt. taxis ueteres pro tetigeris ſcripſere. Varro. Sed caue, ne meum taxis liberum. taxim etiam pro ſenſim uſurparunt. Pomponius. Adoptate clandeſtino tacitus taxim perſpectaui. Item à tango compoſita fiunt attingo, quod eſt leuiter tango. Accius age, age amolire. caue ueſtem attigas. Plautus. Ne attigas puerum iſta cauſa, quando fecit ſtrenue. obtingo euenio. pertingo ualde tango, prætingo, ante tango. contingo modo tango (ut ſuperius diximus.) Virgilius. funem contingere gaudent. modo euenio. Cicero. Quod non modo ſingulis hominibus, ſed potentiſſimis populis ſæpe contingit. SVPERCILIVM. Grauitatem imperatoriam, quæ præcipue in ſupercilio dignoſcitur. ſupercilia data ſunt homini pilis breuibus adornata, quæ quaſi geminis aggeribus munimentum oculis præſtarent, nequid ſuperne incideret, & ſimul ſpeciem præberent. hæc & pariter, & alternæ mouentur, partemq; animi in ſe ſitam habent. his enim negamus, & annuimus. grauitas, faſtus. ſuperbia. ira alibi quidem concipiuntur, ſed hic ſedem habent. naſcuntur in corde, huc ſubeunt, hinc pendent. DOMINVM TERRARVM. Imperium gerens in orbem terrarum.

CONSVEVERE IOCOS VESTRI QVOQVE FERRE TRIVMPHI. Vos imperatores in triumphis etiam ueſtris, quibus nullus maior eſt honor, ſoletis mul-

Ecce Cæſar nunc triumphat, qui ſubegit galliam Nicomedes non triumphat, qui ſubegit Cæſarem. & Auguſto,

Impia dum Phœbi Cæſar mendacia ludit,
  Dum noua diuorum cœnat adulteria,
Omnia ſe à terris tunc numina declinarunt.
  Fugit & auratos Iuppiter ipſe toros.

Sed ſi tantopere efflagitantur, quàm tu affirmas, permittamus uelauentis, & oram ſoluentibus bene precemur. imprecari tamen, quod ab eo componitur, frequentius in malam partem accipitur. Quintilianus. Non imprecamur debilitatem, naufragia. morbos. pauper ſit, & amet quancunque meretricem, & amare non deſinat. ab eodem fit etiam aliud compoſitum deprecari, quod modo ſignificat uehementer precari. Cicero. Quam multorum hic uitam ſit à Sylla deprecatus. Idem. Si quid deliquero, nullæ ſunt imagines, quæ pro nobis deprecentur. modo deteſtari. propulſare, & quaſi precando depellere. Idem. Sæpe precor mortem, mortem quoq; deprecor idem,
  Ne mea ſarmaticum contegat oſſa ſolum.

Ab his precabundus, & imprecabundus deducuntur. Item à precor preces, & precarium, quod ut Vlpianus inquit, eſt id, quod precibus petentis utendum conceditur tandiu, quandiu is, qui conceſſit, patitur. & diſtat à donatione, eo quod, qui donat, ſic dat, ne recipiat, qui precario concedit ſic dat, quaſi tunc recepturus, cum ſibi libuerit precarium ſoluere, & eſt ſimile commodato. Nam & qui commodat rem ſuam, ſic commodat, ut non faciat rem accipientis, ſed ut ei, uti re commodata permittat. Paulus iuriſconſultus. precario habere uidetur, qui poſſeſſionem uel corporis, uel iuris adeptus eſt ex hac ſolummodo cauſa, quod adhibuit preces, & impetrauit. ILLA FRONTE. Illa animi hilaritate. Frons enim (ut ſupra diximus) hilaritatis, clementiæ, ſeueritatis index eſt. THYMELEN. Mulierem ſaltantem, & hiſtrionicam exercentem. Thymele prima ſaltationem in ſcœna docuit. propterea græci θυμέλην ſcœnam uocant, & θυμελικὸν ſcœnicum hiſtrionem. hinc & uxori Latini Thymeles nomen inditum eſt. Latinus mimus fuit Domitiani tempore, principi gratus, quod uel recitandis in cœna dici fabulis, uel iocorum ſuauitate interdum etiam pulſatione Thymeles riſum excitare illi ſolebat. hic inter alias fabulas diſcerptum à canibus Aſcletarionem mathematicum imperatori nuntiauit, qui ſibi hoc euenturum prædixerat. propterea'q; iuſſu Domitiani fuerat interfectus, & accuratiſſime ſepeliri iuſſus, ut uanitas eius artis redargueretur, ſed re-

Item à cenſore cenſorius. Vnde cenſorium officium, cenſoriam authoritatem dicimus, Item cenſorium uirum, qui cenſuram geſſit, hoc eſt, qui cenſor fuit, ſicut prætorium, qui fuit prætor. Cenſores autem à cenſendo uocitati ſunt, quod rem ſuam quiſq; tanti exiſtimare ſolitus ſit, quantum illi cenſuiſſent. cenſere enim exiſtimare eſt. Næuius. Cenſent eo uenturum obuiam Pœnum. Item ab hæreo hæres hæredis, quia qui hæres eſt, hæret, hoc eſt proximus eſt ei, cuius eſt hæres. licet quidā hæredem dictum putent, quod dominus fiat bonorum, quæ ad eum perueniunt. apud ueteres enim hæres dominus dicebatur. Hinc fit bihæres, qui bis factus eſt hæres. & hæreditas, quæ nihil aliud eſt, quàm ſucceſſio in uniuerſum ius, quod defunctus habebat. Et ideo hoc nomine etiam damnoſa hæreditas continetur, diuiditurq; in duodecim uncias. quæ (ut ſupra diximus) aſſis appellatione continetur. hæreditatis nomine neq; legata, neque fidei commiſſa comprehenduntur. adire hæreditatem, & immiſcere ſe hæreditati quidam ita diſtingunt, ut adeant hæreditatem, qui alieni ſunt, hoc eſt qui non ſunt filij, nec filiorum filij, qui uero defuncti ſunt, ſiue filiorum filij immiſcere ſe hæreditati dicantur, ſed hæc confunduntur. ab hæredum etiam nomine hærem Marteam antiqui uocabant deam, quam accepta hæreditate colebant, & eſſe unam è Martis comitibus putabatur. Item ab hærede fit cohæres, qui ſimul hæres inſtitutus eſt. & exhæres, qui extra hæreditatem eſt, hoc eſt, qui hæreditate priuatus eſt, unde fit uerbum exhæredo. à quo exhæredatio, & paſſiuum exhæredor. & hæreditarius, hoc eſt ad hæreditatem pertinens. à
