ALDVS LECTORI S.

Omne inuentum, quàm uis ingenioſum, & conducibile, adulterari longa die, ac potius malitia hominum, qui ſe ſibi ſolum natos arbitrati, ſtudent ſemper, ex alienis incommodis ſua ut comparent commoda, conuerti in malum conſtat: quemadmodum temporibus noſtris accidiſſe uidemus in miro hoc, & quam laborioſiſs. modo ſcribendorum librorum. nam quantum quiſq; commodi ex ea re futurum ſperabat, nemo eſt, qui non perſpiciat: quantum item inde incommodi, quanta bonorum librorum pernicies, quanta ruina & iam ſit, & futura (niſi Deus prohibeat) uideatur, non queo dicere. Primum enim in quorum artificum manus peruenerint ſacra literarum monimenta, uidemus. deinde, qua literatura præditi quidam, libros omnes enarrare: commentari: corrigere audeant: ſcimus. Quamobrem periculum non mediocre eſt: ne beneficium hoc imprimendi libros à Deo immoortali hominibus datum, ipſi, cum liceat uel infantiſſimo cuiq; pro animi ſui libidine temere in quem uult librum graſſari, in maximum maleficium conuertamus, et interitum literarum. Sed de hoc aliâs. non enim breui epiſtola opus eſſet, ſi ſingillatim, et cumulate tractare id uelim. Illud nolo ſilentio præteriri, me, quod in me erit, pedibus, manibuſq; (ut aiunt) facturum, ut laboranti rei literariæ conſulatur. quẽadmodum hoc in libro fecimus: in quo plurima uulnera ope, & labore noſtro ſanata ſunt: licet multa ſint prætermiſſa conſulto, quod non eſſet ſatis otij ad curandum, quis enim in tanta operarum, ac potius inimicorum. (nam tot inimici, quod operæ.) uel feſtinatione, uel ignorantia, uel malitia, aliq̄d mediocri etiam dignum laude queat efficere? Si diem unum, aut biduum, triduum'ue ad ſummum mecum uiueres ſtudioſe lector, mirum diceres, ſic dare, quæ damus, potuiſſe. Sed ſi, quò uolo tandem hoc ſaxum uoluero ſi potuero aliquando parere, quod iandiu, & multos annos parturio, ſpero uolente Ieſu Deo optimo maximo, unde optimum quodq; donum, bonum'q; proficiſcitur, effecturum quod cupio, ac ſtudioſis omnibus, hac noſtra laborioſa prouincia, ſatis, abunde'q; facturum. Habes nunc lector amice diligenter, ac miro ordine typis noſtris excuſum Perotti Sypontini Pontificis cornucopiæ. in quo ſiquid uel à nobis, uel ab ipſo authore erratum fuerit, ignoſcendum eſt. nobis, ob eas ipſas, quas ſupradiximus, rationes. Authori, quia non ipſe, ſed Pyrrhus ex fratre nepos hunc librum ediderit. Morte enim præuentus recognoſcere non potuit ſuas has perdoctas, & laborioſas lucubrationes. quare & ipſe de ſuis hiſce latinæ linguæ commentarijs iure dicere moriens potuiſſet, Emendaturus, ſi licuiſſet, eram. Improbe igitur faciunt quidam in alieno libro ingenioſi, cum in mortuos de nobis benemeritos, inuehuntur. quin potius cum aliquo in loco dormitaſſe authorem, quæ humana eſt natura, inueniunt, non prædicando gloriari, non ſcriptis publicare, ſed taciti, ac ſi ipſi opus compoſuiſſent, emendare deberent, atq; ita gratiam referre benefactori, qui quod habuit, dedit, daturus meliora, ſi potuiſſet: quiq; q̄ maxime potuit, ſtuduit prodeſſe poſteritati. Vale.

PYRRHI PEROTTI In Cornucopiæ, ſiue commentarios linguæ latinæ ad illuſtrem principem Federicum ducem, & eccleſiaſtici exercitus imperatorem inuictiſſimum, Procemium.

Moriens olim P. Maro poeta optimus maximus, librum æneidos, quem tum forte in manibus habebat, teſtamento cremandum reliquit indignum opinor exiſtimans opus imperfectum, & cui non dum ſuprema manus impoſita foret, ad poſteros peruenire. Durum id, atq; difficile uiſum D. Octauio fuit. Hinc enim ſupremæ uoluntati parere iuſq; faſq; ſuadebant, illinc commiſeratio quædam tot laborũ, uigiliarũq; & communis iactura, ne id faceret, hortabatur. Tandẽ uero pietati potius in diuinum uatem, ac commodo poſteritatis, q̄ legum ſeueritati indulgendum ratus, in hæc uerba prorupit, Frangatur potius legũ ueneranda poteſtas, Quam tot congeſtos nocteſq;, dieſq; labores Hauſerit una dies, uiuat Maro doctus ubiq;. Ingratuſq; ſibi, ſtudiorumq; inuidus orbi. Laudetur. uigeat. placeat. relegatur. ametur. Idem mihi nunc uſu uenit Federice imperator. Nam cum iam ſupra quintum annum Pomponius fortunatus uir ſeculo noſtro doctiſſimus, & Romanæ academiæ princeps, ac pleriq; alij ſtudioſi uiri Nicolaũ Perottũ Syponti Pontificem patruũ meũ hortati eſſent, Ut M. Valeriũ Martialẽ optimum quidẽ poetam, ſed uitio librariorũ infinitis penè erroribus plenũ pro communi ſtudioſorũ utilitate emendandum ſuſciperet, aggreſſus eſt ille hanc prouinciã libens, & corollariũ addidit. Etenim lepidiſſimũ poetã non modo emẽdauit, ſed etiã interpretatus eſt. In qua re haud facile dictu eſſet, quos ſuſtinuerit labores, quot noctes inſomnes duxerit, quot græcorũ ſimul, ac latinorũ omni diſciplinarũ genere uolumina euoluerit, tum propter multarũ rerũ, ac reconditarũ in hoc poeta uarietatẽ, quarũ etiã uocabula uix, aut nullo modo intelligi poterant, tum propter magnitudinẽ errorũ, quos emendare ferè ſupra uires hominis fuit, tum uero in primis, q̄d non eſt in eo opere communẽ interpretũ morẽ ſecutus. Sed ita hũc poetam expoſuit, ut ne uerbũ quidẽ reliquerit intactum, uiſuſq; planè fuerit non unũ poetam, ſed uniuerſam linguã latinam uelle interpretari. Omnẽ tamen difficultatem ſuperauit ſtudiũ, & diligentia hominis, quiq; omnia uincit, improbus labor, talemq; poſt tot epotas lucubrationũ fuligines hunc poetã reddidit, ut qui ſupra octingentos annos a nemine fuerat intellectus, iam ab adoleſcentibus quoq; uel mediocriter eruditis poſſit intelligi. Verũ nullis unquã precibus, nullis amicorum illecebris, quinetiã nullis conuitijs adduci potuit, ut lucubrationes ſuas in lucem proferret, emendari duntaxat a ſuo cæteros codices paſſus eſt, plura ẽt locat cognitu difficilia quærentibus aperuit, edere commentarios noluit. Cuius conſilij ſui rationes afferebat huiuſmodi. Si opus ederet, non defuturos qui ſe reprehenderent, q̄d iam & ætate grandior, & dignitate pontifex ad ſtudia poetarũ, a quibus ante uigeſimũ annũ ſeſe ad cœleſtem philoſophiã tranſtulerat, nunc temere uideretur reuerſus. tum multa eſſe apud hunc poetã uulgi iudicio obſcœna, quæ interpretari pontificẽ indecens putaretur. Quãdoquidẽ ſunt nonnulli, qui legere ẽt Martialem nefarium cenſent. Ad hæc non eo aio ſcriptos a ſe commentarios, ut proferrentur in lucem, ſed ſua cauſa dũtaxat, ut quæ tanto ſtudio, labore, uigilijs inueſtigauerat, quoties opus eſſet, haberet in promptu. Iccirco non modo hinc, atq; hinc plenos eſſe totius ſui codicis margines, ſed multa quoq; a ſe ſeorſum non breuiter, & carptim, ut interpretum mos eſt, uerũ longe, diffuſeq; conſcripta ſæpe ẽt ex libris authorũ, qui græce, latineq; ſcripſerũt, ferè ad uerbũ ſumpta, quæ ſi edi oporteret, in grande nimis uolumen opus excreſceret, nec tam unius poetæ quam totius linguæ latinæ interpretatio uideri poſſet. Non deerant autẽ qui eas rõnes ita infringerẽt, nequaquã turpe eſſe pontifici emendare, atq; interpretari eũ librũ, quẽ nõ puduit ſanctiſſimũ Hieronymũ non modo lectitare, ſed etiã teſtimonio eius plerunq; inter ſacras literas uti. Contẽnendũ præterea uulgi iudicium, cuius mos eſt dãnare, quæ neſcit. Nihil apud hũc poetam eſſe non religioſum, & ſanctum, reprehendi ab eo obſcœnitate quadã uerborũ uitia, non laudari, ut mos eorũ eſt, qui hodieq; in templis concionantes, quos uulgo prædicatores uocant, Quod ſi hũc legere nefandũ ſit, certe non minus illos audire. Neminẽ profecto non modo ex poetis, ſed ex omnibus latinæ linguæ authoribus eligi potuiſſe, in quo tanta eſſet & uocabulorũ, & ſententiarũ, & rerũ omniũ copia, tanta ubertas, tanta uarietas. Poſtremo breuitatem tantũ ibi cuſtodiendam eſſe, ubi cauſa poſtulat. Alioquin præuaricationẽ eſſe tranſire, quæ neceſſaria, & utilia ſunt, aut quæ inculcare, infigere, repetere oportet, curſim, breuiterq; attingere. Cõmentarios huiuſmodi eo meliores eſſe, quo longiores, ut inter Demoſthenis & M. Tullij orationes eæ feruntur optimæ eſſe, quæ maximæ. Ob id uero in primis expeti quod nõ modo multarũ rerum cognitionẽ habeant, ſed planè oẽm latinã linguã cõprehẽdere uideantur. nec propterea minus probandos, ſiqua in ijs ex alijs probatiſſimis authoribus ſumpta ſunt. Quãdoquidẽ optimi quiq; ſcriptores idem fecere, Ita deniq; diſpoſitos eſſe, atq; ordinatos, ut non ſit neceſſe aliquos perlegere, ſed tantũ quiſq; ex ijs quærere poſſit, quãtum concupierit. & q̄d quiſq; quæſierit, facile inuenire. illud ẽt pleriq; addebant, niſi cõmentarios ederet, exiſtimaturos omnes, uel nõ recti eum eſſe iudicij, uel inuidere gloriæ ſuæ. inuidere præſentium, poſteriorumq; utilitati. quoniam ea terra præliorum concitatrix fuit, dum ibi gigantum bellum exarſit. duo enim phlegræi campi ſunt, alter in Græcia, ubi cum gigantibus à Ioue pugnatum eſt, alter in Campania, in quo Hercules cum iis prælium commiſit. de quo Strabo, Fortunatus erat et campus nomine Phlegræus, in quo res à gigantibus geſtas fabulæ diuulgant, nullam aliã ob cauſam, ut credi fas eſt, q̃ quod terra ipſa ſuapte natura præliorum concitatrix eſt. de hoc campo ſic ſcribit Plyn. quantum autem uniuerſas terras campus Campanus antecedit, tantum ipſum pars eius, quæ laboriæ uocantur, finiuntur laboriæ uia ab utroq; latere conſulari, quæ à Puteolis, & quæ à Cumis Capuam ducit. q̃dam laborem à labo dictum putant, quod non ſine labore ſurgunt, quæ facile ceciderunt. labare enim ruere eſt, & repente cadere. Virg. labat ariete crebro Ianua. à quo fit labaſco. Terentius, labaſcit uictus uno uerbo. et utrũq; primam ſyllabam correptam habet, reperiturq; etiam labaſcor. Varro, poſtq̃ uidi miſericordia labaſci mentem infirmam populi. labor autem uerbum producit primam ſyllabam, & ſignificat leuiter, ac ſenſim deſcendo. Cicero, non quaſi unum ex hac urbe miſſum, ſed quaſi de cœlo delapſum in hanc urbem intuentur. labi etiam dicimus eos, qui in lubrico figentes ueſtigia in terram ruunt. unde lapſus aliquando pro ruina accipitur, & per translationem eos, qui uel à nimia infirmitate, uel imprudentia deliquerunt, lapſos nominamus. elabi quoq; eſt periculum fugere. nam quẽadmodum anguis lubricus, & murena, et anguilla manu prehenſa lapſu fugiunt, quod eſt è manu elabuntur, ita qui è medio periculo euadunt, elapſi dicuntur. Plau. quid? cum manifeſto tenetur, anguilla eſt, elabitur. Virgilius, Ecce autem elapſus Pyrrhi de cæde Polites. Cicero per trãslationem, hic fratre ſuo cenſore, qui proximus ante me fuerat, elapſus eſt, hoc eſt accuſatorum, ueluti præſentiũ manus effugit. A labor deducitur lubricus, quaſi labricus. eſt autem proprie lubricus, in quo quis inſiſtere, et ingredi non poteſt, quin labatur. quales ſunt herbæ profuſæ ſanguine, marmora leuigata, glacies congelata, & huiuſmodi. hinc per trãslationem lubricam adoleſcentiam uocamus, in qua qui ſunt, facile labuntur. anguilla quoq;, & murena, & ſimilia lubrica dicuntur. et pes lubricus, quod in lubrico eſt, et oculi lubrici, q̃d in lubrico poſiti ſint, ita, ut non poſſint conſiſtere. hinc lubrici (ut quidã exiſtimant) appellati, de quibus inferius diſſeremus. item ab eodem compoſita fiunt allabor, quo poëtæ utuntur pro iuxta nauigo. Virg. Belgica, uel molli melius feret eſſeda collo, uel pro facili. idem, iuuat ire iugis, qua nulla priorum Caſtaliam molli diuertitur orbita cliuo uel pro maturo, idem, ſunt nobis mitia poma, Caſtaneæ molles, et preſſi copia lactis. unde uina mollia dicuntur, ideſt defæcata, et aſperitate carentia. uel pro opportuno, ac tempeſtiuo. idẽ, Sola uiri molles aditus, et tempora noras. uel pro remiſſo, et contemnendo. idem, tua Mæcenas haud mollia iuſſa. uel pro ſuaui, ac iucundo. idem, molleſq; ſub arbore ſomni. uel pro placido. Terentius, Illum ne obſecro inhoneſtum ſenem, & mulierem. LAVDENTVR. Celebrentur, extollantur. laudare. n. aliquando eſt uerbis extollere. Virgilius, laudato ingentia rura. aliquando nominare Plau. id ut ſcias, Iouem ſupremum teſtem laudo Ego. unde illaudatus dicitur, qui ne nominari quidem dignus eſt, hoc eſt illaudabilis, nec unquam nominandus, ſicuti quondam à communi conſilio Aſiæ decretum fuit, uti nomen eius, qui templum Dianæ, de quo hic poëta ſentit, Epheſi incenderat, nequis ullo tempore nominaret. Virgilius, quis aut Euryſthea durum, Aut illaudati neſcit Buſiridis aras? & elaudare ueteres uſurparunt pro eo, quod eſt plus, quàm nominare. Varro, elaudat nomenq; eius millies repetit. quidam tamen illaudatum dictum putant, quod nihil faciat laude dignum. nam ſicut omnis cul-

Virgilius, Præterea fuit in tectis de marmore templum Coniugis antiqui. TRIVIAE. Dianæ, quæ nemorum, & ſyluarum Dea erat, & uenationi indulgebat, propter quod mos uenatorum erat, prædæ partem huic Deæ offerre. Papinius, et diues prædæ tamen accipit omni Exuuias Diana Tholo. Triuia autem dicebatur, qđ triuijs præeſſet, propter quod treis facies habere fingebatur. Ouid. Ora uides Hecates in treis uergentia parteis, Seruet ut internas compita ſecta uias. DISSIMVLETQVE DEVM CORNIBVS ARA FREQVENS. Apud Naſamonas Libyæ populos colebatur Iupiter in forma arietis. in cuius templo erant aræ centum. Virg. Cato, nutrix hæc omnia faciebat in uerbenis, ac rubis ſine hoſtijs, ut Deli ad Apollinis genitiui aram, quidam tamen aras ab ardendo dictas exiſtimant, quod in ijs uictimæ adolerentur. ab hac ara nonnulli aream deductam exiſtimant, quod ſicut hæc ara pura eſt, ita areæ in urbe, ſiue in domo loca pura ſunt, ideſt ſine ædificio, uel qđ ſicut aræ flammis, ita areæ ſolis ardore torrentur. et area ubi ſegetes purgantur ſine herbis, quamuis hanc quidam ab ariditate uocatam putant, quod exaruerit, nec poſſit quicquam generare. Virgilius, Area quamprimum ingenti eſt æquanda cylindro, & uertenda manu, & creta ſolidanda tenaci ne ſubeant herbæ, neu puluere uicta fatiſcat. ab area diminutiuum eſt areola. hara autem cum aſpiratione ſtabulum eſt porcorum. Cicero, ex hara productæ, non ſchola. nam ouium, boum, aliorumq; huiuſmodi clauſtra, & receptacula mandram uocamus. Iuuenalis, & ſtantis conuitia mandræ Eripiunt ſomnum Druſo. eſt etiam hara, ſi Seruio credimus, auis quædam auguralis. à qua haruſpex, & hariolus ſunt deducta. ego uero nihil uſquam de hac aue memini me legiſſe. neque apud græcos Ariſtoteles, aut Theophraſtus, neque apud nos Plyn. mentionem eius facit. itaq; potius aruſpicem ab ara, hoc eſt uictima, quæ ad aram ducitur, inſpicienda dictum exiſtimo. hariolum uero, quaſi fariolum, ſicut hanula, quaſi fanula, hoc eſt parua fana appellantur aſpiratione, ut plerunque fieri ſolet, pro F litera poſita. eſt enim hariolus, qui diuina mente fatur, quæ neutra ſunt. neq; mihi ratio Seruij obſtare uidetur, quod ara deorum primam ſyllabam productam habet. aruſpex uero correptam, cum hoc in alijs plerisq; uideamus accidere, ut in curru, quod primam ſyllabam productam

Area etiam ab huius, de qua diximus, areæ ſimilitudine uocatur morbus capitis cum profluuio capillorum, de quo inferius dicemus. quoniam uero ariditatis mentionem fecimus, ſciendum eſt, quod areo uerbum ab ara deducitur, in qua, quæ dijs imolabãtur, torreri ſolebant. nam arere, torrere, ac ſiccari eſt, ſiue torridum, ac ſiccum eſſe, à quo aridũ ſiccum dicimus, & ariditatem ſiccitatem, & aride aduerbium, & comparatiua, ſuperlatiuaq; eorum. Item diminutiua aridulum, & aridule. item arenam, de qua ſuperius diximus, et (ut quidam putant) arenã à nimia eius ariditate. item ariſtam, quæ propriæ eſt prima ſpicæ pars. Virgilius tamen poëtice pro frumento poſuit, Chaoniam pingui glandem mutauit ariſta. aridum etiam per metaphoram aliquando pro eo ponimus, quod irrigari deſierit. Ply. non horti hyeme aridi ſeruantur. itẽ pro nimio, ſiue horrifico, cum de ſono loquimur, quod ea, quæ arida ſunt, cum frangi cœperint, nimium, atq; horrificum ſonum edunt. Varro, frigus calore, atq; humore aritudinẽ miſcet. item ab areo aſſum deducitur, hoc eſt ad ignem torrefactum. proprie enim aſſum dicitur, quod eſt ſine pigmento ſaporis alicuius, quemadmodum merum ſolum dicimus, unde aſſa uoce ueteres dixerunt ſola uoce linguæ tantummodo, aut uocis humanæ non admiſtis alijs muſicis. Varro, in conuiuijs pueri modeſti, ut cantarent carmina antiqua, in quibus laudes erant maiorum, & aſſa uoce, & cum tubicine. Cato, melos autem in cantibus eſt bipartitum, unum, q̄d eſt in aſſa uoce, alterum, quod uocant organicum. item ab areo, areſco. exſiccor, & compoſita perareo, exareo, ſubareo, inareo eiuſdem ferè cum areo ſignificationis. item areſacio, quod eſt exſicco, & areſio, exſiccor. ſunt qui non ab ara, ſed per contrarium ſenſum ἀπὸ τοῦ ἀρδεύειν, quod ſignificat irrigare, aridum deriuatum putent, quod minime ſit irrigatum. & ab arido areo poſtea deductum, & ſimiliter ardeo, quod quæ arida ſunt, facile ardeant. FREQVENS. Crebra. centum enim aræ erant (ut ſupra diximus) in templo Iouis Ammonis, quem ſub arietis ſpecie colebant. q̄d hoc modo tradunt inſtitutum. cum Liber pater per deſerta Libye exercitum duceret, uniuerſa iam Aſia deuicta, & ſiti admodũ laboraret, imploraſſe à patre auxilium dicitur. quo facto, apparuiſſe ei extemplo arietem, quem dum fugientem ſequitur, perueniſſe illo duce ad fontem amœniſſimum, quapropter deſyderio potitum exiſtimaſſe arietem illum fuiſſe Iouem, eiq; templum miræ magnitudinis in arena conſtituiſſe, & deum uocaſſe Ammonem, hoc eſt Iouem arenarium. græci enim ἄμμον arenam uocant, unde eſt frequens illud apud eos prouerbium de ijs, qui fruſtra in re difficili laborant, ἄμμον μετρεῖς, hoc eſt arenam menſuras. ſunt qui dicant lingua ægyptia Ammum Iouem dici, hinc corrupto nomine Ammonem uocitatum. alij tradunt Ammonem dictum ab Ammone quodam paſtore, qui primus illic templum ædificauit. frequens, modo crebrum ſignificat, ſiue de loco ſiue de re animata dicitur, ut frequens miles, frequens Senatus. ideſt creber. copioſus. multus. item frequentes domus, frequentes aræ. hoc eſt crebræ, multæ. modo quod ab alijs frequentatur, ut frequens locus, frequens templum, in quo multi conueniunt, & quod multi frequentant, frequentarium ueteres dixere pro frequentem. ab hoc fit frequento uerbum, & paſſiuum eius frequentor. frequentare eſt uel ſæpe adire, uel cum multis adire. frequentari uero uel ſæpe adiri, uel à mul-

tis adiri. hinc fit frequentatio, & frequentia pro conuentione, & concurſu. & apud grammaticos frequentatiuum uerbũ, quod aliquid frequenter fieri ſignificat. Item frequenter aduerbium pro crebro, & infrequens dicitur, uel parũ frequentatum, ut infrequens forum. i. in quo pauci conueniunt, uel rarum, ut phœnix infrequens auis, hoc eſt quæ rara reperitur, ex quibus apparet falſum eſſe, quod ſcripſit Valla, aliud ſignificare frequens, cum loco adiungitur, aliud cum adiungitur perſonæ. DISSIMVLET. Fingat. ſimulo, & diſſimulo differunt. ſimulamus enim eſſe, quæ non ſunt. Cicero, ſimulabat ſe Romam rediturum, cum in Africam nauigaturus eſſet. diſſimulamus ea non eſſe, quæ ſunt. Virgilius, Diſſimulare etiã ſperaſti perfide tantum poſſe nefas? A ſimulo fit ſimultas, hoc eſt odium, quod qui ſimultates exercent, inter ſe ſimulata loquuntur, quamuis alij ſimultatem dictam uelint à contrario, quia minime ſunt ſimul. item ſimulator, ſimulatio, & ſimulanter, ſicut à diſſimulo diſſimulator, diſſimulatio, & diſſimulanter. Salluſtius. ſimulator, ac diſſimulator. item à ſimulo fit inſimulo, quod eſt crimen ingero, à quo inſimulatio falſi, aut ueri criminis incuſatio. Terentius, ſi herum inſimulabis malitiæ male audies. & ſimulto uerbum, quod eſt odium, hoc eſt ſimultatem exerceo, & ſimulachrum, quod ſit ficta imago alicuius. ſimulachra enim principio ex deſyderio mortuorum orta ſunt, ut quæ iam defecerant, uiuere uiderentur. ſimulatio græce εἰρωνία, hoc eſt ironia dicitur, frequẽs apud latinos uocabulum, unde ironice loqui dicimus, cum aliquid quaſi deriſionis cauſa per contrarium efferimus. Virg. Egregiam uero laudem, & ſpolia ampla refertis Tuq;, puerq; tuus, magnum, & memorabile nomen, una dolo diuum ſi fœmina uicta duorum eſt. Horatius. Optat ephippia bos piger, optat arare caballus. ſimulo autem à ſimul deductum eſt, quod eſt aduerbium congregandi. nihil enim aliud eſt ſimulare, quàm ea, quæ abſunt, ſimul eſſe oſtendere. aliquando tamen ſimul geminata reperitur, & habet quaſi eandem uim, quam cum, & tum, ſiue partim. Quint. ſimul ut pleniori obſequio demererer amantiſſimos mei, ſimul ne uulgatem uiam ingreſſus alienis demum ueſtigijs inſiſterem. Virgilius, Obſtupuit ſimul ipſe ſimul perculſus Achates. Cicero pro ſimul poſuit. unà. Vnà & id, quod facio, probabit, unà & in hac cauſa profecto neminem præponendum mihi eſſe exiſtimabit. ab hoc codẽ aduerbio fit ſemel, quaſi unà, non diuiſim. nam q̄d ſemel fit, nullam recipit diuiſionem. aliquando tamen ſemel pro cito uſurpatur Virgilius, qui, ne quid tale uideret, Procubuit moriens, & humum ſemel ore momordit. Et ſimilis, quaſi ſimulis, unde ueteres ſimuliter pro ſimiliter uſurparunt. Plautus, exoſſabo ego eum ſimuliter, ut murenam cocus. Iungitur autem ſimilis aliquando cum datiuo, aliquando cum genitiuo. cum datiuo, cum uel in forma, uel in ætate, uel in fortunis, aut alijs huiuſmodi rebus ſimilitudo eſt. Plynius effigie, ac lineamentis corporis patri ſimilis. Cum genitiuo, quando paritas in alijs rebus eſt, ut puta in doctrina, in moribus, atq; alijs ſimilibus. Cicero, ut aliquorum ſimiles in dicendo ualeamus eſſe. Quandoque tamen hæc apud authores confunduntur. A ſimilis fit ſimilitudo, quæ apud ueteres etiam ſimilitas dicebatur. Cæcilius, uide quid ferat morum ſimilitas. Et diſſimilis, atque abſimilis eiuſdem ſignificationis. & contrarium eius conſimilis, & diſſimilitudo, & ſimiliter, ac diſſimiliter aduerbia. Et ſimitu, quo ueteres pro ſimul utebantur. Plautus, non ego cum uino ſimitu ebibi imperium tuum. idem, ita tres ſimitu res agendæ ſunt, quando unam occeperis. Et ſimilo uerbum, quod eſt ſimilis ſum, iungiturq; cum accuſatiuo Martialis,

Martialis, Cum ſint crura tibi, ſimilent quæ cornua lunæ. Et aſſimilo, quod eſt comparo. Et ueriſimile, quod licet non ſit uerum, ueri tamen ſpeciem habet. Ab eo ueriſimilitudo, & ueriſimiliter. A ſimul fit cõpoſitum inſimul, quod ſignificat unà, & ſimulac, & ſimulatq;, que ſignificant poſtquam. DEVM. Iouem. deus licet facilius ſit dicere, quid non ſit, quã quid ſit, ita tamen deſcribi poteſt. Deus eſt mens uniuerſi. Vel deus eſt quicquid uides totum, & quicquid non uides totum. Vel deus eſt animus p immenſas mundi parteis, omnemq; naturam commeans, atq; diffuſus, ex quo omnia, quæ naſcuntur, animalia uitam capiunt. Vel deus eſt infinita mens, quæ per ſeipſam mouetur. Vel deus eſt præſtans quædam natura, qua nihil eſt melius, cuius prouidentia mundum, quem condidit, aſſidue gubernat. Simonides, cum ab eo Hiero tyrannus quæſiuiſſet, quid eſſet deus, deliberandi ſibi ſpatium unum diem poſtulauit. Cum idem ex eo poſtridie rogaret, biduum petijt. tum ſæpius idem petente, duplicauit ſemper numerum dierum, tandem uero interroganti Hieroni cur ita faceret, quia quanto inquit, diutius conſydero, tanto mihi res uidetur obſcurior. Deus (ut quidam putant) à dando dictus eſt, quia hominibus dat quicquid commodum eſt. Alij deum dictum uolunt, quod nihil ei deſit uel à græco θεός, quod deum ſignificat, uel ἀπὸ τοῦ θεῶ, quod eſt uideo, ſpeculor, quod peruigil dei oculus omnia contempletur, & uideat. uel ἀπὸ τοῦ δέομαι, timeo, quod mortalibus ſit timendus. Statius, Primus in orbe deos fecit timor. Deum, & diuum quidã indifferenter capiunt. Alij uolunt deos perpetuos eſſe, diuos uero ex hominibus factos, propter quod diuos imperatores uocari. Varro diuos perpetuos eſſe ſcribit, qui propter ſui execrationem timentur, ut ſunt dij manes. Ego diuum adiectiuũ eſſe exiſtimo, & ſignificare diuinum, quod etiam dium dicimus, quaſi ἀπὸ τοῦ Διός hoc eſt à Ioue genitum, uel quia ueteres in ſingulari dium dicebant, hoc eſt deum. Vnde nunc quoq; in plurali à dio dicimus dij, ſicut à deo dei. Item medius fidius ſicut mehercules, hoc eſt per Deum Fidium. Nam. Fidius deus eſt, qui fidei præeſt. Plautus, per deum Fidium credis iurato mihi. A deo deitas fit, hoc eſt, diuinitas. Et delubrum (ut quidam putant) quod eſt locus, in quo dei ſimulachrum dedicatum ſit. Nam ſicut locum, in quo figerentur candelæ, candelabrum dixerunt, ita in quo deum ponerent, delubrum. Quidam etiam delubrum aream ante aras deorum cauſa aſſumptam. Alij quod uno tecto plura complectitur numina, ut capitolium, in quo eſt Minerua, Iupiter, Iuno. Nonnulli templũ, in quo aqua currit, à defluendo. Sunt etiam qui delubrum dei ſimulachrum eſſe affirmant, à delibrato ligno, ita appellatum. A diuo fit uerbum diuino, quod eſt auguror. proprium enim dei eſt futura prædicere. Ab hoc fit diuinatio prouidentia futurorum, quamuis diuinatio etiam dicitur interdum iudicium, quod redditur ſuper conſtituendo accuſatore, eo quia diuinare quodammodo oportet iudicem, qui nam idoneus accuſator ſit. item diuinitas, ſicut à deo deitas, & aduerbium diuinitus, & diuinipotens. Apuleius, ſaga inquit, & diuinipotens cœlum deponere. terram ſuſpendere, fonteis durare. monteis diluere, manes ſublimare, deos infimare, ſydera extinguere, tartarum illuminare. Item diues. nam qui diues eſt, quaſi deus nihil indigere uidetur, teſte Varrone. à quo fit diuito, hoc eſt diuitem facio. Accius, nihil credo auguribus, qui aureis uerbis diuitant alienas, ſuas ut auro locupletent domos. Turpilius, dij me diuitant. & diuitior comparatiuum. Cicero, inde ille licentior, & diuitior fluxit Dithyrambus. Et diuitiæ,

quæ ita ab opibus differunt, quod diuitiæ ſint ut utare, opes ut alijs opitulando colare. Cicero, Sunt ergo diuitiæ ad neceſſarium uſum, opes uero ad magnificentiam. & Dis ditis Pluto, quod diuitiæ omnes è terra ſint, uel quod omnes in terram redeant. Vnde Pluto ipſe apud Claudianum inquit. ſemperq; tenemus, Quod ſuperi tenuere ſemel. Ditem etiam ueteres diuitem dixerunt, unde ditior, & ditiſſimus, & diteſco, quod eſt diues fio. Et ditio imperium. prædiues, ualde diues. ditare, diuitem facere. Dium etiam ueteres dixerunt diurnum ſub cœlo lumen, unde nunc quoq; ſub dio fieri dicimus, quod non fit ſub tecto. Ab hoc dies dictus eſt, à quo diecula diminutiuum. Cicero, præterea dieculam adderem, & ſubdiale, quod ſub dio permanet. Plynius, ſubdialia pauimenta græci inuenere. à quo etiam diurnus, ſicut à nocte nocturnus, & diu aduerbium pro die, à quo interdiu. Plautus, nec noctu, nec diu quietus. & diurnare, quo ueteres uſi ſunt, pro diu uiuere. quemadmodum perennare. & iandiu, quod ſignificat olim, quoniam diu quoq; aliquando pro longo tempore ponitur. Vnde fit diutius, hoc eſt longiori tempore, & diutiſſime, longiſſimo tempore, & diutile diminutiuum, quod ſignificat aliquandiu. Gel. Cum diutile tacitus cogitando fuiſſet. & tandiu, tanto tempore, & quandiu, quanto tempore. Et diutinus, ac diuturnus eiuſdem ſignificationis, hoc eſt continuus. Cicero libertatis deſyderio, tedioq; diutinæ ſeruitutis. Et biduum, triduum, quatriduum, pro ſpatio duorum, triũ, & quatuor dierũ. à quibus biduanum. triduanum. & quatriduanum deducta ſunt. Et pridie, & poſtridie aduerbia, quaſi primo die. Et poſtero die. Etenim pridie eſt, quaſi heri, non tamen præſentis diei. Et poſtridie quaſi cras, non tamen præſentis diei, ſed alicuius alterius, aut præteriti, aut futuri. Præteriti ſic. pridie, quàm intrares mare, ſerena lux fulſit. futuri ſic. pridie, quàm ducas uxorem, amicos conuocato. ideſt præcedenti die, quo intraſti mare, aut duces uxorem. Item poſtridie, quàm pater mortem obijt, epulum feci. & poſtridie, quàm uxorem duxero, mihi abeundum eſt. hinc deducuntur pridianus, & poſtridianus, qui pridie, aut poſtridie alicuius diei eſt, ſicut poſtriduanus, qui poſt idus eſt. Sed poſtridianus in uſu non eſt, pro quo abutimur craſtinus non ſolum pro die ſequenti hodiernum, ſed pro quolibet alio. Virgilius, Si uero ſolem ad rapidũ, lunaſq; ſequenteis Ordine reſpicies, nunquam te craſtina fallet. Hora. Eodem modo abutimur heſternus pro pridiano. Terentius. iure heſterno panem atrum uorent. Item à die fit hodie, quaſi hoc die. à quo hodiernus, ſicut ab heri heſternus, & à cras craſtinus. & quotidie, hoc eſt omnibus diebus. à quo quotidianus. & propediem, quaſi propè eſt dies. Cicero, & præſens propediem loquar. ideſt cito. Et perendie, quod ſignificat diem, qui craſtino proximus fuit, uel erit, quaſi perempto uno die. Cicero. ſcies igitur cras, aut ad ſummum perendie. Vnde dies perendinus dicitur ab hinc tertius. Et comperendinare conferre in longum de die in diem, à quo fit comperendinatio. Macrobius. ne nonarum, aut iduum religionem nouella comperendinatione corrumperet. Dies uero comperẽdinata à ueteribus dicebatur iudicium in diem tertium conſtitutum, & pridem quaſi prius die. ſignificat autem modo longo tempore prius, modo paruo. De paruo, Plynius, ipſi uero pridem uidemus ea omnia præter pubertatem in filio Cornelij Taciti equitis Romani. Paulus iuriſconſultus. Et non mirum eſt, ſi peculium quoq; defuncti pridem filij defertur. Vlpianus, queritur enim ordinem tenere, quem pridẽ habuit. De longo Apu-

leius. quod pridem Plato affirmauerat. Eiuſdem ſignificationis ſunt iampridem, quod ab eo fit, & dudum. iandudum. nuper. iandiu. omnia enim interdum de paruo tempore, interdum de longiori dicuntur. De paruo, ut ſi dicam, dudum intraui. nuper intraui. iandudum te expecto. iampridem ueni. Boetius, hic autem, quod nuper diximus. Curtius, qui nuper ab Alexandro miſſi erant. Cicero, quàm multa de balneis, quæ nuper ille uendiderat. Ab hoc Nuperum deriuatur, quod ſignificat recens. nouum. Plautus, Recens captum hominem nuperum, nouitium. Et nuperrime aduerbium, quod ſignificat recentiſſime, & nuperrimus, recentiſſimus. Seneca, Iampridem te expectantes ibi ſederamus. De longiori Macrobius, iandudum inquit, hæc quæſtio ab Ariſtotele & præpoſita eſt, & ſoluta. Plynius, ſomno uero, ac ſecuritatibus iandudum hoc fuit, quod illa Helena ante cibum miniſtrauit. idem, quod maiores noſtros iampridem feciſſe manifeſtum eſt. idem, Quod genus nuper, & patrum fere noſtrorum memoria inuentum eſt. Quod ſi cum pridem, aut dudum, non, uel quàm, uel ita addamus ſignificat ſemper multo tempore ante. idem. medica non pridem uenit in Italiam, ideſt non multo tempore ante. Cicero, quàm pridem nomen Fannij detuliſti. hoc eſt, quàm multo tempore ante. idem, noſtra autem ciuitate non ita pridem dominatu regio liberata. ideſt non multo tempore ante. Plautus, quàm dudum è foro aduenisti domum, non ita dudum. Aliquando tamen iandudum, & iampridem à poëtis pro continuo ponuntur. Virgilius, iandudum ſumite pœnas. Lucanus, Tollite iampridem uictricia tollite ſigna. Et perdius tota die aliquid agens, ſicut pernox tota nocte uigilans. & diæta cœnaculum, in quo æſtate cœnatur ad umbram, hyeme ad ſolem, quod & cœnatio dicitur, quamuis aliqui à græco deductum hoc nomen uelint. Varro ita appellatum exiſtimat, q̃ in ea die edatur. In hortis ferè ædificari ſolebat, licebatq; teſtatori diætam in hortis uxoris ædificatam diruendam legare ſi fieri id ſine fundi detrimento poſſet, cum alioqui diruendã domum teſtamento legare fas non eſſet. Ab hac diæta diætarij uocabantur, qui in aliena cœnacula furandi gratia ſe dirigebant, quos Vlpianus ſcribit plus, quàm fures eſſe puniendos. itaq; aut ad tempus relegandos, aut in opus publicum dãdos, aut fuſtibus cædendos. Diæta etiam diarium, hoc eſt unius diei cibum ſignificat. Et apud græcos pro iudicio arbitrorum accipitur, & pro loco, in quo arbitri conueniunt. Quapropter & ipſos arbitros græci diætatis uocant. Et diarium à die deductum eſt, quod modo cibum unius diei ſignificat (ut diximus) modo hiſtoriam, quæ per ſingulos dies ſcribitur, & à græcis dicitur ἐφημερὶς, hoc eſt ephemeris. Iuuenalis, in cuius manibus ceu pinguia ſuccina tritas Cernis ephemeridas. quemadmodum annales dicuntur, cum res geſtæ plurium annorum obſeruato cuiusq; anni ordine componuntur. Nam hiſtoria utrunq; comprehendit, definiturq; rerum geſtarum expoſitio. Item meridies quaſi medidies, hoc eſt medius dies dictus, quod nunc mediam lucem ſignificat. Veteres etiam de nocte meridiem dicebant, hoc eſt eam partem noctis, qua totius diei dimidium eſſet. Ab hoc fit meridianus, & pomeridianus, quod ad meridiem, uel poſt meridiem pertinent. Quintilianus, pomeridianis ſcholis Ariſtoteles præcipere artem oratoriam cœpit. Et meridio, ſiue meridior uerbum, quod aliquando eſt meridianum cibum capio. Plautus, ientando, meridiando, commeſſando, pergræcando uitam ducere. hinc merenda dicta eſt cibus, qui ſumitur ante cœnam. Aliquando capio meridianum ſomnum. Cornelius Celſus, lõgis diebus meridiari potius ante cibum utile eſt. Sin minus poſt, cum per

hyemem potius totis noctibus conquieſcere. Suetonius de Caligula, gloriatusq; eſt expergefactæ ſomno Ceſoniæ quantum egiſſet, dum ea meridiaret. Idem de Nerone, miſſos à Meſſalina uxore Claudij, qui eum meridiãtem quaſi Britanici æmulum ſtrangularent. item à die æquidiale dictum. Sic enim ueteres dixerunt, quod nunc dicimus æquinoctiale, quia nox diei potius, quàm dies nocti adnumerari debet. Sic etiam æquidium, quod nunc æquinoctium. item à die diluculum, hoc eſt aurora, quod tum dies luceſcere incipiat. Dies apud Romanos à media nocte incipiebat. Apud Athenienſes ab occaſu ſolis ad alium occaſum. Apud Babylonios à ſolis ortu. Sumitur autem dies tribus modis. Vno continet ſemel reuolutionem primi mobilis, quæ fit horis. xxiiij. Alio modo dicitur dies ab ortu ſolis ad occaſum. ille naturalis, hic artificialis nominatur. Tertio modo dicitur dies tempus interminatum. Virgilius. Multa dies, variusq; labor mutabilis æui Rettulit in melius. & iuriſconſulti, bima, trima, quadrima die pro tempore biennij, triennij, quadriennij dicunt. & ad idem non uenit, ideſt præſtituto tempore non uenit. Et in hac ultima ſignificatione frequentius eſt fœminini generis. Virgilius, iamq; dies infanda aderat. Ab eoq; fit diminutiuum Diecula pro paruo tempore. in maſculino autem genere tempus determinatum plerunq; ſignificat, ut heſterno die ad te ueni. Nudius tertius, & nudiusquartus à die dicta ſunt, quaſi nunc eſt dies tertius. nunc eſt quartus, ſemperq; de præterito dicuntur. Dierecti quoq; à die uocati ſunt crucifixi, ſi Marcello credimus, quaſi ad diem erecti. Varro, Apage in dierectum à domo noſtra iſtum inſanitatem. Pompeius tamen ſcribit dierectum dici per antiphraſin apud ueteres, uolentes ſignificare in alium diem. unde dierecta aduerbialiter dicimus. Plautus, quin tu i dierecta cum ſucula, & cum porculis. Dierecta inquit, quaſi in malam diem. Sunt etiam qui inducias à die dictas exiſtiment, quaſi in diem uti iam. Varro inducias ita definiuit, induciæ ſunt pax caſtrenſis paucorum dierum. Et alibi, induciæ ſunt belli feriæ. Græci ſignificantius ceſſationem iſtam pugnæ pactitiam ἐκεχειρίαν nominant, quaſi manuum continentiam. item à dies dieſpiter dictus Iupiter, quaſi diei pater. Sicut Dijouis appellatus eſt, quaſi diem iuuans, quod homines die, & luce quaſi uita ipſa iuuaret. unde Lucetium quoq; nominatum à ueteribus legimus. Nundinas quoq; à die dictas eſſe manifeſtum eſt, quaſi nouendinas. ita enim nundinæ à Romanis inſtitutæ ſunt, ut octo quidẽ diebus in agris ruſtici opus facerent. Sed lege hortenſia effectum eſt, ut faſtæ eſſent, quo ruſtici, qui nundinandi cauſa in urbem ueniebant, lites componerent. Nefaſto enim die prætori fari non licebat. Nundinarum originem quidam Romulo aſſignant, quem communicato cum T. Tatio imperio, ſacrificijsq;, et ſodalitatibus inſtitutis, nũdinas quoq; tradunt adiecisse. Alij diem nundinarum exactis regibus celebrari cœpiſſe commemorant, quia pleriq; ex plebe repetita Seruij Tullij memoria, ei nundinis parentarent. Primis autem Calendis, & Nonis omnibus nundinæ cauebantur, nam quoties incipiente anno dies cœpit, qui addictus eſt nundinis, omnis ille annus infauſtus, luctuoſis caſibus fuit, quæ opinio lepidiano tumultu maxime confirmata fuit. Nonis autem conuentus uniuerſæ multitudinis uitandus exiſtimabatur, quoniam populus romanus exactis etiam regibus hunc diem nonarum maxime celebrabat, quem natalem Seruij Tullij exiſtimabat eſſe, quia, cum incertum eſſet, quo menſe Seruius Tullius natus eſſet, nonis tamen conſtaret eſſe natum, omnes nonas celebri notitia frequentabant. ueriti ergo qui diebus præerant, nequid multitudo collecta ad deſyderium regis nouaret, Nonas à nundinis ſegregandas eſſe duxerunt. Nundinas etiam nundinum neutro genere appellatas inuenimus. Liuius, poſtq̃ uero comitia decemuiris creandis in trinundinum indicta ſunt. Trinundinus autem dies, uel Trinundinum, ſiue trinum nundinum, dicebatur dies tertiarum nundinarum, qui prædici antea ſolebat, ut notior eſſet uniuerſis. idem eſt enim dicere trinundino, & tertijs nundinis, & in trinundinum, hoc eſt in tertias nundinas. Nundina uero Romanorum Dea erat à nono die naſcentium nuncupata, qui luſtricus appellatur. Seneca, cum in dies augeretur audacia. quotidie autem etiã ſine incremento dicitur, Cicero, quotidie, uel potius in dies breuiores literas ad te mitto, ideſt non modo quotidie breuiores, ſed etiam in dies breuiores. Feciales autem uiginti conſtituti, qui de rebus huiuſmodi cognoſcerent, iudicarent, ſtatuerent. üdem bello confecto fœdera feriebant in hunc ferè modū. Fecialis Regem rogabat. iubés ne me rex cum patre patrato eius populi fœdus ferire? iubente Rege, Sagmina dicebat te Rex poſco. Rex reſpondebat. Puram tollito. Fecialis ex arce uerbenam puram tollebat, poſtea Regem interrogabat. Rex facis ne me tu regiū nuntium, populiq; romani quiritiū, uaſa, comitesq; meos? Rex reſpondebat. Quod ſine fraude mea, populiq; romani quiritium fiat, facio. Tum fecialis patrem patratum faciebat, uerbena caput, capillosq; tangens, legibus deinde fœderis recitatis. Audi dicebat Iupiter, audi pater patrate populi talis, audi tu populus talis, ut illa palàm prima, poſtremum ex illis tabulis, ceráue recitata ſunt ſine dolo malo, utiq; ea hic hodie rectiſſime intellecta ſunt. illis legibus populus Romanus prior nō deficiet, ſi prior defecerit publico conſilio dolo malo, tu illo die Iupiter populum Romanum ſic ferito, ut ego hūc porcum hodie feriā, tantoq; magis ferito, quāto magis polles, poteſq;. Vbi dixerat, porcum ſilice percutiebat. ſua deinde carmina alter populus, ſuumq; iuſiurandum per ſuos magiſtratus, ſuosq; ſacerdotes peragebant. hinc etiam fœdus quidam deductum exiſtimant, qđ in fœdere porca feriretur. de quo inferius dicemus, item à fero ferabites pro agreſti. Siſenna partim ferabite partim lauro, ac pinu abundat. item à fero fit ferueo uerbū, quod eſt bullio, feror, agitor, à quo deducitur feruor, qui non modo fit ex igni, & flammis, ſed etiam ex frigore, & uento. Vnde feruere hyemem. feruere æſtatem. feruere mare dicimus, à quo & deferuere, ſiue deferbere pro miteſcere, et placidum fieri. Vir. Omnia tum pariter uēto, nimbiſq; uidebis Feruere. Et feruere opus dicimus, dum ſtudio, et diligentia elaboratur, et hominem ira feruere, aut odio, aut calore, dum ira, aut odio, aut calore incenſus eſt. Vnde à feruendo febris, quāuis aliqui à feritate potius morbi uocitatam uelint. ab hac per diminutionē febricula, à quo febriculoſus. Gellius, non morbus hic febriculoſus, aut nimium grauis. & uerbum febricito, hoc eſt febrem patior. et febrio eiuſdem ſignificationis. et febrilis adiectiuum. Apuleius, Ardore æſtuans febrili. et februare à ferueo dictū, quod eſt luſtrare, purgare. hoc enim adolendo, et flammis feruentibus fieri ſolebat, à quo Februarius menſis uocitatus, quod tum, ideſt extremo mēſe anni populus februaretur. et Iuno februata, ſiue februalis, ſiue februlis, quod ei hoc menſe ſacra fiebant, eiuſq; feriæ erant lupercalia, quo die mulieres februabātur à lupercis amiculo Iunonis, ideſt pelle caprina. Quam ob cauſam is quoq; dies februatus appellabatur, et quæcunq; purgamenti cauſa in quibuſcunq; ſacrificijs adhibebātur, februa appellabantur, & id, quod purgatum erat, februatum dicebatur. Et Februus Ditis pater uocatus eſt, quod ei menſe Februario ſacrificaretur. Quidam tamen hæc non à ferueo uerbo deducta opinantur, ſed à Sabinorum lingua, qui februm, purgamentum dicunt. Item à ferueo feruidus fit, hoc eſt callidus, diligens. Et feruenter aduerbium, diligenter. Et fretum locus anguſtus in mari, ac etiam ipſum mare à ſimilitudine (ut Varro exiſtimat) feruentis aquæ, quod efferueat aqua maris, atq; ebulliat. Vnde transfreto, et transfretatio deducuntur. et fermentum, quod feruendo creſcat. Eſt enim fermētū farina, quæ ſubigitur prius quā addatur ad pultis modum decocta & relicta, donec aceſcat. Vulgo autem nec ſufferuere faciunt ſed tantum pridie aſſeruata materia utuntur. Ab hoc fit fermento uerbum, cuius paſſiuum eſt fermentor. Plyn. Palamq; naturæ eſt acore fermentari.

idem. Cum fieret panis ordeacius cicerculæ farinæ admiſtione fermentabatur. A fermento fermētatio deducitur. Præterea à fero fertū dicitur genus libi, quod ſæpe ad ſacra ferebatur, nec ſine ſtrue altero genere libi, quæ qui afferebant, ſtrufertani appellabantur. A fero arferia aqua, quæ inferis libabatur, ſeu uas uini, quod adhibebatur ſacris. Et fiſcina inſtrumentum ruſticum, quo comportātur fructus, ac res neceſſariæ. eius diminutiuum fiſcella, in qua caſei feruntur, & ab ea fiſcelli uocitati mollis caſei appetitores. quemadmodum catillones dicuntur catillorum liguritores. Ponitur tamen aliquando fiſcella pro boum, mulorumue, aut iumentorum capiſtro. Ply. Fiſcellis capiſtrari boues oportet, ne germinū tenera decerpant. A fero etiā furor, quod qui furore agitantur, huc, atq; illuc temere ferantur. Ab hoc furioſus, furio, furibundus, furiæ, furialis, de quibus inferius dicemus. Et far, quod apud ueteres de omnibus fructibus dicebatur. quia id fert terra, ab eo farina dicta. Et furfur purgamentum farinæ, à quibus farinaceus, et furfureus adiectiua. Et farcio, quod proprie eſt ſaturo, quaſi farre impleo, unde per metaphoram farcire pro implere dicimus, à quo infarcio, & refercio eiuſdem ſignificationis. Item offercio, à quo offertiſſimum, pinguiſſimum. Plau. Sine ſacris hæreditatem ſum adeptus offertiſſimam. Et fertum genus libi, quod dijs in ſacrificijs offerebatur. Perſius, Attamen hic extis, & opimo uincere ferto intendite. Et fartus, & refertus, et farcimen inteſtinum uaria, ac minutim conciſa carne refertum. Et farreum genus libi ex farre factum. Plyn. Cum & in ſacris nihil religioſius confarrationis uocabulo erat, nouæq; nuptæ farreum præferebant. Farreū quoq; apud ueteres horreum dicebant à farre, ſicut granarium à grano, et horreum ab hordeo. & fartores nomenclatores quidam, quaſi infarcirent nomina ſalutatorū in aurem candidati. Et farrago, qua equi, & iumenta uerno tempore purgantur, & ſaginantur, quod primum in farraria ſegete ſeri cœpta ſit, quamuis aliq à farciendo potius, hoc eſt ſaturando dictam farraginem uelint. Et diffarratio genus ſacrificij, quod inter uirū, et uxorem fiebat. Et diſſolutio dicta diffarratio, quia fiebat farreo libo adhibito. Et à farre ſecando per commutationem literæ (ut Varro exiſtimat) falx, & fartilia, quibus implentur ea, quæ decoquuntur. Plynius, iecur anſerinum fartilibus creſcit mira magnitudine. fructus etiam à ferundo dicuntur res illæ, quas fundus, & quæ in fundo ſunt, ferunt. Vnde fructiferum dicimus fructum ferentem, hoc eſt pinguem. fertilem. & fructiferæ arbores appellantur, quæ fructum ferunt, diſtinguunturq; ab ijs, quæ neq; feruntur, neq; fructum ferunt. & propterea infelices arbores dicuntur. Et fructifico, quod eſt fructum facio. & fructificus, ſiue fructuoſus, qui fructum, hoc eſt utilitatem præſtat. Et Fructiſica fructuum dea. Et frutex, qui ab herba, & arbore differt. Eſt enim frutex, qui ad iuſtam magnitudinem arboris non aſſurgit, et ſtatura ſimilis eſt multis herbis, ſed non demoritur, neq; areſcit, ut herba. uerum perennis eſt. à quo fit fruticor uerbum, hoc eſt pullulo, & quaſi frutices emitto. Cicero, exciſa eſt enim arbor, non euulſa. itaq; quaſi fructicetum uides. Vnde fruticari pilum per metaphoram dicimus, & frutetum, & fruticetum, ubi multi frutices ſunt, ſicut uinetum, & oliuetum, ubi multæ uites, & multæ oliuæ. ueteres pro fructu fœminino genere etiam fructam dixerunt, & in genitiuo fructuis pro fructus. Varro. Quæro utrum fructuis, an delectationis cauſa uendatis. Dicebaturq; ſpecialiter fructus oleum iuſtum ex oliuis expreſſum. quod uero poſt molam primum fluebat, flos fructus uocabatur. Et fruges, quod eſt generale nomen, & non modo frumenta, legumi-

naq; complectitur, ſed quicquid ex fructu terræ in alimoniam uertimus. Vnde frugiferæ arbores dictæ ſunt, quæcunq; fructum ferunt. à quo fit defrugo uerbū, quod eſt omni fructu ſpolio, omnem fructum exhaurio. Plyn. Oraculum illud magnopere cuſtodiendum, ſegetem ne defruges. Columella. Conſtat enim ſegetem nimia defrugatione exinaniri. Pompeius tamen, & Seruius, & Donatus, frugis uocabulum à frumine deductum exiſtimant, eſt autem frumen eminens ſub mento gutturis pars, qua cibus in aluum demittitur à ferendo cibo appellatum, et alio modo dicitur rumen, à quo fit Rumino uerbum, ſiue ruminor, quod eſt reuomo, ac rurſus conſumo, à quo ruminatio deducitur, per quā demiſſus cibus reuocatur, ac māditur. Et Rumina dea, quæ rumæ præeſt, hoc eſt pueris lactētibus. Rumam ueteres uocabant mammam, à qua rumare pro lactare dictum eſt, quaſi mammam in rumen immittere. unde et irrumare deductum fœdæ ſignificationis uerbum, quod penis in os quaſi ſugendus immittatur. Et ſubrumi agni dicuntur, qui adhuc ſub mamma habentur. Et Ruminalis ficus, ſub qua lupa Remo, & Romulo dicitur mā mam præbuiſſe, quæ et Rumula uocitata eſt. Ouidius quæq; uocatur Romula nunc ficus, Rumula ficus erat, ſiue quod ſub ea pecudes æſtatis tempore frigora captantes herbas ruminare conſueuerunt. Quidam ſtrumam quoq; à ruma dictam exiſtimant, quaſi ſtruēs rumam, morbus eſt, quem uulgo à ſcrofis, ut opinor, quæ eo morbo afflictantur, ſcrofulam uocant, tumor ſcilicet, in quo ſubtus concretæ quædam ex pure, & ſanguine quaſi glandulæ oriuntur. Strumoſi dicuntur, qui id uitium patiuntur. Et ſtrumoſa pars corporis, quæ eo læſa eſt, interdum tamen ruminor per metaphoram accipitur, pro reuoco in memoriam. Varro, non modo abſens de te ſæpius cogitabit, ſed et ruminabitur humanitatem tuam. Liuius nemo hæc noſtræ ruminabitur mulieri. Veteres in nominatiuo frux, pro fruge dixerunt. Varro, frux, legumen, triticum, à quo frugi indeclinabile nomen deriuatur. Sunt autem frugi homines, quo græci χρησίμους appellant, qui in omni re motus animi moderantur. Vnde eſt Piſonis illius cognomen tantopere celebratum. inde etiā frugales dicuntur, et frugalitas dicta, quæ motus animi appetētes regit, & ſedat, moderatamq; in omni re nouit ſeruare conſtantiam. Et frugaliter aduerbium, temperate, modeſte, et frumentum, quaſi frugimentum, et fruor quaſi ex eſu frugum delectationem capio. Vtor enim, & fruor differunt, quod uti, ſi cum homine iungatur, conuerſari eſt. Cicero, cuius patre familiariter utebar, ideſt cum quo familiariter conuerſabar. Si uero cum alijs iungatur, eſt uſum habere. Martia. Vtere lactucis, et mollibus utere maluis. hinc uſus fit, qđ interdū ipſam utendi ſignificationem habet. Vir. nam neq; erat corijs uſus. interdū conſuetudinē, conuerſationem. Terē. ſic mihi eſt uſus. Quint. mulierem, cum qua longus illi fuerat uſus. Vnde uſu uenire, pro accidere ponimus. Ply. id enim frequenter uſu uenit, ut mali bonis præferantur. Aliquādo ponitur pro opus eſt. Vir. nūc uiribus uſus, nunc manibus. Item quia ſolemus uti rebus, ut ex ijs utilitatem percipiamus, uſus aliquando, pro utilitate accipitur. Apuleius. Cum id ex uſu meo non eſſet. Hinc utilis, et utilitas dicuntur, & aduerbium utiliter. Item apud iuriſconſultos uſus fructus dicitur, cum res aliqua non noſtra eſt, ſed ꝑinde ex ea fructū, atq; utilitatem capimus, ac ſi noſtra eſſet, definiturq; ab Vlpiano ius alienis rebus utendi, fruēdiq; ſalua rerum ſubſtantia. Abuti uero eſt perperam uti, ſiue nimis licenter uti. Cicero, noli abuti nimis patientia noſtra. Vnde abuſus, & abuſio dicuntur, cum aliqua re per licentiam male utimur. Item abuſum dicitur, qđ utendo conſumptū eſt. Plau. ubi illa, quæ dedi ante abuſa, ſi ea durarent mihi, mulier mit-

teretur ad te. Et uſucapio abuſa dicitur acquiſitio, ſiue adiectio dominij per continuationem poſſeſſionis longi temporis definiti, ut puta triginta, aut quadraginta annorum, ſi res immobilis ſit, quam poſſidemus. item trium annorum, ſi res mobilis ſit. Recentiores primam illam præſcriptionem uocant, hanc uero uſucapionem. Ita enim dicitur uſucapio, ſicut pignoricapio. Cato, hæc pignoricapio ob æs militare facta eſt, quod æs tribuno ærario miles accipere debeat. Et uſito, & uſurpo eiuſdem ſignificationis. à quibus uſitatio, & uſurpatio dicuntur. Cicero, poſt inuenta concluſio eſt, qua credo uſuros ueteres illos fuiſſe, ſi iam nota, atq; uſurpata res eſſet, qua inuenta, omnes uſos magnos oratores uidemus. & uſura, quæ modo pro uſu accipitur. Seneca, ſi mihi unus diecula uſuram ꝓmiſiſſet. modo ſignificat fœnus, à quo fœnerator, à quibuſdā uſurarius dicitur. Frui autem eſt ex re, qua utimur, delectationem capere. Vnde fieri poteſt, ut eadem re unus utatur, alter fruatur, ut ſi per æſtum duo frigida aqua manus lauēt, alter, ut abluat ſordes, alter, ut frigiditate illa oblectetur. Hēt hoc uerbum tria ſupina. Fruitū unde fruitio fit, quo uerbo theologi utuntur, uoluntq; ad Deum tantum referri. Et fretum, unde fit fretus, ideſt cōfiſus. Quint. tua fretus humanitate id egerā. Et frutum, ut paulo mox oſtendemus. A fruor fit fruiſcor, ſicut à fateor fatiſcor. Lucilius, æque fruiſcor ego, ac tu. Et ꝑfruor. quod eſt in totum fruor. Et defruor, omnem fructum ꝑcipio. A quo defrutum appellatum, uini genus huiuſmodi. Decoquitur muſtū ad tertiam partem menſuræ, quod ſyreum dicitur. Græci ἀπὸ τοῦ ἑψεῖν, quod eſt decoquere, ἕψημα uocāt, noſtri à ſapiditate (ut arbitror) ſapam nominant. hoc ſi ad dimidiā partem decoquatur, fit defrutum, quod omnis fructus ex eo muſto detractus ſit, frutum quoq;, & frutam ueteres dixerunt paſſiue eum, ſiue eam, quibus nos frui contigiſſet. Vnde frutinal dictum eſt, templum Veneris frutæ. Cato etiam fruniſcor profruor, & frunitum dixit prudentem, hoc eſt eū, quo perfrui liceret, ſiue econtrario infrunitum inſipientem, ac ſtolidum, qui nulli uſui eſſet. Sed nos frunitum, et infrunitū à græco potius deducta exiſtimamus. nam græci φρόνιμον prudentem, ἄφρονα dementem dicunt. item à ferendo frumentum dictum ſiue (ut quidam putant) à frugibus, quaſi frugimētū. Frumenta autem dici putant quæcunq; emittunt ariſtas. à frumento, fit frumentor uerbum, quod eſt frumentum colligo. Vnde frumentatio collectio frumenti, & frumentator, qui frumentatum profectus eſt. Et frumentarium, quod ad frumentū pertinet. ut frumentarius ager. frumentariū cribrum. frumentaria lex de frumentis, ſicut agraria de agris. Item à ferendo fruſtum cuiuſq; rei particula, qđ facile feratur. Virg. Pars in fruſta ſecant, ueribuſq; trementia figunt. M. Cato, fruſto panis conduci poteſt, uel uti taceat, uti loquatur. unde fit aduerbium fruſtatim, et fruſtillatim. hoc eſt minutatim, et per fruſta. item Plautus, fruſtullū, et fruſtillum uſurpat pro paruo fruſto. Fruſtra quoq; aduerbiū hinc deductum quidā exiſtimant, quod ſignificat incaſſum, quaſi imperfecte. à quo fit fruſtro uerbū, quod eſt fallo, deludo. & paſſiuū eius fruſtror, quod etiam deponens reperitur. Vnde ſunt uerſus illi uetuſtiſſimi poëtæ ab A. Gel. commemorati. Nam qui lepide poſtulat alterū fruſtrari, Quē fruſtratur, fruſtra eum dicit, fruſtra eſſe. Nā qui ſeſe fruſtra, quem fruſtrari ſentit, Qui fruſtratur, is fruſtra eſt, ſi non ille eſt fruſtra. Quidam tamen hæc à frangendo potius deducta exiſtimant. A ferendo etiā furca dicta, inſtrumentū, quo ſtramenta feruntur, à quo bifurcum, & bifurcatū, et bifurcatim, et furcifer. à quo trifurcifer. Plautus, tu triū literarū homo uituperas me, & fur trifurcifer. Et furculā, et furcillā deducimus, & furcalis, quo utimur ad extrahendum fimum.

item ferax abundans, à quo feracitas, pro abundantia deducitur. Ply. ut tam ferax bonarũ artium ſeculum uideremus. & fertile eiuſdem ſignificationis, à quo fertilitas, & fertiliter aduerbium, et Feronia nemoris dea à ferẽdis arboribus. Tradunt enim, cum nemus eius aliquando fortuito arſiſſet incendio, & ob id transferre inde ſimulachrum incolæ uellent, ſubito nemus euiruiſſe. Vir. & uiridi gaudẽs Feronia luco. Sunt qui ſcribant circa tractus Campaniæ, ubi circæi ſunt, Iouem coli ſolitum, qui Anxurus dicebatur, quaſi ἄνευ ξυροῦ, hoc eſt ſine nouacula, quia barbam nunquam raſiſſet. & Iunonem, quæ Feronia uocabatur. Fontem autẽ fuiſſe in Cãpania iuxta Tarracinam, quæ aliquando Anxur eſt dicta. Sed illud magis conſtat ſub monte Soracte urbẽ fuiſſe Feroniã. et in ipſo monte eiuſdem nominis deam, quam finitimi mira religione uenerabantur. Erat in eo loco templũ eius, mirificum ſacri genus habens, nam qui eius nomine afflabantur, nudis pedibus ſuper incenſos carbones, & calidiſſimum cinerem ſine aliqua offenſione ingrediebãtur. ingens eò mortalium multitudo cõueniebat, & celebritatis eius, quæ quotannis fieri ſolebat, gratia, et ſpectaculi. Et ferentarij milites leuis armaturæ, qui quicquid opus eſſet auxilio ferrent, excurſu leui, armis grauibus minime impediti, uel ab auxilio ferendo, uel quod fundis, et lapidibus pugnarent, quæ tela feruntur, non tenentur. Cato eos ferentarios dixit, qui tela, ac potiones militibus pugnantibus miniſtrabant. hi et uelati uocabantur. Velare enim licet proprie cooperire ſit, unde & uelum pro tegmine accipitur, et uelivolum mare dicitur, per quod uelis uolatur, & uelivolæ naues, quæ uelis uolãt, unde et reuelare nudare ẽ, atq; detegere, aliquando tamen pro ligare accipitur. Pompo. Reſte uelet gulam. Aliquando pro ueſtire. Illum muliẽbri uelatus toga. Velati ergo uocitati ſunt milites, qui ueſtiti, et inermes exercitum ſequebãtur, & in demortuorum locum ſubſtitui ſolebant. hi poſtea mutatis literis uelites appellati ſunt. Et uelitaris pugna dicta, quæ fundis, ac lapidibus, interdũ etiam haſtis fieri ab inermibus ſolet. Hinc uelitor uerbum deductum eſt, pro contendo, et iurgor, et uelitatio contentio. Plautus, neſcio quid uelitati eſtis inter uos. A. Gel. Cum inquinatiſſimis hominibus non eſt conuitio decertandum, neq; maledictis aduerſum impudentes, et improbos uelitandum, quia tantiſper ſimilis, et compar eorum fias, dum paria, et conſimilia dicas, atq; audias. A uelitor uelitatim aduerbium deducitur, quod ſignificat per ſaltus, & interualla, quod uelites fundis, ac lapidibus pugnando, huiuſmodi ſaltibus utantur. Siſenna. Nos una æſtate in Aſia, & Græcia geſta icirco continentia literis mandauimus, ne uelitatim, aut ſaltuatim ſcribendo, lectorum animos impediremus. Item à fero feciales dicti, quod apud eos belli, pacisq; ferẽdæ ius erat. neq; enim licebat bellum alicui inferre, niſi hi et iuſta cauſa ſuſceptum declarauiſſent, & prius indixiſſent. Varro, itaq; bella tarde, nec magna licentia ſuſcipiebant, qđ bellum nullũ, niſi pium putabant geri oportere, & prius quã indiceretur bellũ ijs, à quibus iniurias factas ſciebant, Feciales legatos res repetitum mittebant quatuor, quos oratores uocabant. idem. ſi cuius legati uiolati eſſent, qui id feciſſent, quamuis nobiles eſſent, ut ciuitati dederentur, ſtatuerunt, fecialesq; uiginti, qui de rebus cognoſcerent, iudicarent, & ſtatuerent, conſtituerunt. Sunt tamen, qui feciales à faciendo uocitatos exiſtimant, quod apud eos belli, ac pacis faciendæ ius eſſet. Item ferrum à ferendo quidã dictum putant, quod in agros colẽdi gratia feratur. ego à feriendo potius appellatum arbitror, quod cætera eo feriantur, hoc eſt domentur. Ab hoc ferrugo dicitur, quæ proprie eſt rubigo ferri, ſicut ærugo rubigo æris. Plyn. ſudor uirgæ cornu arboris, lamina candente ferrea exceptus non contingente li-

gno illita, quæ inde ferrugo incipiẽtes lichenas ſanat. Rubigo atq; ærugo, ut Marcel. ſcribit, idem ſunt, ſed falſum hoc eſſe oſtendit Pl. qui de auro ſcribit. Super cætera non rubigo ulla, non ærugo, nõ aliud ex ipſo eſt, quod conſumat bonitatẽ. Non coniunxiſſet utrunq; hoc loco Ply. niſi inter ſe differrent. Dicendum eſt igitur, rubiginem eſſe, quæ in metallis ſitu quodam contrahitur arida, & rubra, metallum paulatim abſumens, qualem in ferro uidemus. Dicta rubigo à colore. Veteres enim robum, rubeum dicebant, & bouem ircirco robum ruſtici uocabant, unde et materia, quæ plurimas huius coloris uenas habet, dicta eſt robur. & homines ualentes, ac boni coloris robuſti. Græci hanc ἐρυσίβην uocant, quod apud eos quoq; ἐρυθρὸν rubeum dicitur, hinc uitium illud, quod ſegetes occupat, robigo dicitur. quod ut illa ferrum, atq; alia metalla, ſic iſta ſegetes exurit. Vnde & Robigus deus, & Robigalia dicta, qđ huic deo ſacrificia fierent, ne robigo ſegetes occuparet, & Rubigo dea. Ouidius. Flamẽ in antiquum lucum Rubiginis ibat. Aerugo uero eſt, quæ in metallis ex humore contrahitur non rufa, et ſicca, qualem diximus robiginem eſſe, ſed uiridis, atq; humida, dicta ab ære, quod proprie æris ſit ærugo, ut ferri ferrugo. Scribit Ply. æs muliebribus menſtruis contactũ graue uirus odoris accipere, & æruginem. ex lapide quoq;, ex quo coquitur æs, ærugo deraditur, quemadmodum ex lapide, ex quo coquitur ferrum, rubigo. ſed in omnibus metallis, præſertim, quæ non pura ſunt, et ærugo ſimul, et rubigo eſſe poſſunt. Ferrũ diuturno ſitu rubiginem contrahit. Si atro, aut omphaco, aut alio acri tangatur, ſtatim ærugo inceſſit. hoc ipſum accidit in argento, niſi purum, putumq; ſit, et in ære, atq; alijs metallis. itaq; eadem ſæpe metalla & rubiginoſa eſſe, & æruginoſa conſpicimus. æruginem græci ἰὸν χαλκοῦ nominant. ferruginem ἰὸν σιδήρου, ideſt florem æris, ac ferri. Nõ recte interpretatus eſt noſter Hieronymus locum illum in ſacris literis. καὶ ἔδωκε τῇ ἐρυσίβῃ τοὺς καρποὺς αὐτῶν, καὶ τοὺς πόνους αὐτῶν τῇ ἀκρίδι. Et dedit æruginí fructus eorum, et labores eorum locuſtæ. Rubigini enim interpretari debuit, non æruginí. A rubigine rubiginoſus dicitur. ſicut ab ærugine æruginoſus. Ferrugo etiam per metaphoram dicitur color rufus ſubniger, qualis eſt hyacinthi floris, à colore ferri, dum eſt rubiginoſum. Vir. Cum caput obſcura nitidum ferrugine texit. Ab hoc fit ferrugineus. idẽ, en ferrugineus hyacinthus. manifeſtus eſt Marcelli error, qui ferrugineum colorem cæruleum eſſe ſcripſit. A ferro etiam ferreum deducitur, quod ex ferro eſt, & ferrariũ, quod ad ferrum attinet, unde fodinas ferrarias dicimus, ſiue ſimpliciter ferrarias, ſicut ærarias, argentarias, aurarias, loca, in quibus ferrum, æs, argentum, aurumq; effoditur, et ferramentum, inſtrumentum ferreum. unde ferramenta fabrilia, et ferramenta tonſoria dicimus, et ferratum, cui ferrũ inditum eſt. unde ferrata ſpicula, ferratas lanceas, ferratas ſagittas nominamus. Et ſaxum ferratum natale oppidum meum in Piceni, atq; Vmbriæ finibus ſitũ, à ferro uocitatum eſt propter fodinas ferrarias, quas eo in loco multas fuiſſe earũ reliquiæ oſtendunt. Et urbs Sentinum à ueteribus dicebatur à Sentino amne iuxta mœnia labente, quem nunc quoq; Sentinum incolæ uocant. Itẽ à ferro ferrumen uocitatũ, qđ gluten ſignificat, et ferruminatio conglutinatio, atq; iunctura. Sed proprie ea, quæ fit in metallis, quãuis et ad alia trãſferatur. et ferruminare eſt metalla coniungere, ac, ut ita dicã, conglutinare. licet de alijs etiam dicatur. Pl. Nãq; ſurculo ſup bina oua impoſito, ac ferruminato albi glutino ſublata ceruice medio æqua utrinq; libra deportãt alió. Idẽ. Garris Arabiæ odpido muros, domosq; è maſſis ſalis faciunt aqua ferruminantes. Idẽ. ſine ferrumine ſuo cementa componẽtes. A fer-

rumino conferua herba deducitur, de quã inferius dicemus. Ferrum uiuum uulgo dicitur, quod ex magnete lapide uirus accepit, idq; mira quadam utriuſq; natura longo tempore retinet, aliud apprehendens ferrum, ut aliquando annulorum cathena ſpectetur. Fero ipſum à græco deducitur, etenim græci quoq; φέρω dicunt, à quo tam apud illos, quàm apud nos pheretrum dictum, quo uel cadauer fertur, quod & à capiendo capulus appellatur, unde Plautus capularem ſenem nominat morti uicinum, uel aliquid aliud cum pompa. Liuius, Spolia ducis ſuſpenſa fabricato ad id apte pheretro gerẽs in capitolium aſcendit, ibiq;, cum ad quercum paſtoribus ſacram depoſuiſſet, templum deſignauit, & addidit cognomen Iupiter pheretrius. Rudes ſunt, qui hunc locum deprauant, pro pheretro, ferculo ſcribentes, cum & nomen ipſum pheretrij Iouis pheretrum eſſet ſcribendum, & græci quoq; pheretra uocant argentum, aurum, gemmas, imagines principum, ſpolia hoſtiũ, & cætera, quæ in pompa feruntur. Deprehenditur etiã hoc loco Plutarchi error, qui non à ferendo, ſed à feriendo dictum Iouem pheretrium ſcribit, & Pompeij Feſti, qui ideo appellatum cenſet pheretrium Iouem, quod pacem ferre putaretur, quoniam ex templo eius, quod Romæ primum à Romulo ædificatum eſt, ſumebant ſceptrum, per quod iurarent, & lapidem ſilicem, quo fœdus ferirent. Vnde præfericulum dictum uas æneum, ſine anſa patens, ueluti peluis, qđ præferre in ſacrificijs ſolebant. Item oſtendo. Apuleius, Et uultu impatientiã præferens. Infero, facio, quaſi contra fero. unde inferre bellum. inferre iniuriam dicimus. à quo infenſus dicitur, qui ira in alium elatus ē, & odium gerit, & infeſtus tum is, qui alicui malum infert, et plus quàm inimicus eſt, iamq; aduerſus eum fertur, q̃ is, cui aliunde malum impendet. Cic. dolebam iudices, et acerbe ferebam, ſi huius ſalus ob eam ipſam cauſam eſſet infeſtior, qđ is meam ſalutem, atq; uitam ſua beneuolentia, præſidio, cuſtodiaq; texiſſet. hinc infeſtare eſt crebris curſibus moleſtiam inferre. et ſigna infeſta dicuntur, quæ aduerſum tendunt, hoc eſt uexilla in hoſtem euntia, ut moleſtiã inferant. & infeſtatio, moleſtatio. unde infeſtuminare ueteres dixerunt, pro mare latrocinando infeſtare. Nigidius tamen non ab inferendo, ſed à feſtinando dictum infeſtum affirmat. Nam qui inſtat, inquit, alicui, eumq; properans urget, & opprimere eum ſtudet, atq; feſtinat, uel contra de cuius periculo, & exitio feſtinatur, is uterq; infeſtus dicitur ab inſtantia fraudis, quam uel facturus alicui, uel paſſurus eſt. Virgilius, Multa dies, uariuſq; labor mutabilis æui Rettulit in melius. Plerūq; etiam renouo, & quaſi rurſus fero. Idem, Rettulit & priſcos docuit celebrare penates. A' refero relatiuum grammatici dixere, quod aliquid ſuperius dictum referat, ut qui. quæ. quod. Item dialectici, quod aliquid referat, ſine quo nec ipſum poſſit conſiſtere, ut pater, & filius. dominus, et ſeruus, relatiua ſunt, quia nec pater eſſe poteſt, niſi filium habeat. nec

dominus, niſi ſeruum, & talis (ut ita dicam) reſpectus, relatio uocatur. A relatiuo fit relatiue aduerbium. Notandum autem, quod relatiuum ſæpe ad ſe antecedens trahit, idq; fit ſæpius antecedente poſtpoſito, nec apud poëtas modo, ſed etiam apud oratores. Quintilianus, Timeo, ne quos porrexerim cibos, uenena fiant. Ouidius, cæcidere manu quas legerat herbas. In quo etiam habita eſt ratio uetuſtatis. Cicero, Sed hoc non concedo, ut quibus rebus gloriamini in uobis, eaſdem in alijs reprehendatis. Virgilius, Vrbem quam ſtatuo, ueſtra eſt. Refero acceptum, idem eſt, quod fateor me accepiſſe, & tam in bonam partem capitur, quàm in malam. Cicero, Vitam acceptam refert clementiæ tuæ. Idem, Omnia denique, quæ poſtea uidimus (quid autem mali non uidimus?) ſi recte ratiocinabimur uni accepta referemus Antonio. Acceptum fero, eſt habeo pro recepto, & fateor me accepiſſe, quod non accepi, cum nulla ſolutio interuenerit. unde acceptilatio dicta eſt, quam Iuſtinianus per interrogationem, & reſponſionem fieri dicit. referre impenſum, eſt rationẽ de expenſis uel facere, uel reddere. Præterea refert in tertia duntaxat perſona pro utile ẽ, capitur. Plyn. Quippe uictimas cædi ſine precatione non uidetur referre, nec deos rite conſuli. Item pro intereſt. Virgilius, Præterea iam nec mutari pabula refert, & in his duobus non cum re præpoſitione componitur fert, ſed cum hoc nomine res, quaſi res fert, ideo cũ mea. tua. ſua. cuia nominatiuis coniungimus. ut mea refert, res mea fert. tua refert, res tua fert. ſua refert, res ſua fert. cuia refert, res cuia fert. Alioqui cum genitiuis ſemper iungimus, ut Platonis, et Socratis refert. ideſt res Platonis, & res Socratis fert, quod ſimiliter accidit in hoc uerbo intereſt, cum compoſitum ſit ex in, & re, et eſt, quaſi in re eſt. Dicimus enim mea intereſt, hoc eſt mea in re, ideſt utilitate eſt. tua intereſt. tua in re eſt. Platonis, & Socratis intereſt, in re Platonis, ac Socratis eſt. & cum hoc uerbo coniuncta mea. tua. ſua. cuia. ablatiui caſus, non nominatiui ſunt. Interdumq; ſeparatim ponuntur. Plynius, Arborum ſucco manantium picem, reſinamq; aliæ ortæ in oriente, aliæ in Europa feruntur, quæ intereſt Aſia utrinq; quaſdam habet. hoc eſt, quæ in medio eſt ſiue inter utranq; partem eſt. Res ſanè ſtatum, ac conditionem ſignificat. unde res publica, & res priuata dicitur. & res meæ, res tuæ, bonæ, aut non bonæ uocantur. Cicero. id enim rebus noſtris minime conducebat, hoc eſt ſtatui noſtro. Aliquando res eſt, quæ à perſona diſtinguitur. Vnde loca argumentorum ſunt à rebus, & à perſonis. nonnunquam diſtinguitur à uerbis. Horatius. Verbaq; prouiſam rem non inuita ſequentur. Interdum accipitur pro contentione, atque commercio, ut res eſt mihi cũ latrone nefario. & res eſt mihi cum homine agreſti. Plerunque pro cauſa. unde dicimus ea re. qua de re. quam ob rem. quas ob res, ideſt propter quam cauſam. & propter quas cauſas, et ea de re, ideſt ob eam cauſam, & ab re. ideſt ſine cauſa. Vnde res comperẽdinata dicitur, cum cauſa, hoc eſt iudicium in diem tertium conſtitutum eſt, & reus, qui in rem, hoc eſt cauſam, ac iudicium uocatus eſt. à quo reus ſtipulando eſt, qui ſtipulatur. reus promittendo, qui ſuo nomine quid pro altero promittit. ad hæc reus uoti eſt, qui ſuſcepto uoto ſe numinibus obligat. Damnatus autem uoti, qui promiſſa uota iam ſoluit, & ſunt propria ſacrorum uerba. Virgilius, Conſtituam ante aras,

uoti reus. reum agere, eſt accuſare. reum peragere, eſt condemnare. reatus eſt culpa, et crimen. Item pro coitu. Terentius, Miles, cum quo tum rem habebã. et pro cenſu. Idem, eius frater aliquantulum ad rem eſt auidior. Horatius, Nunquam ſic facies rem. & pro imperio. Virgilius, Poſtquam res Aſiæ, Priamiq; euertere gentem Immeritam uiſum ſuperis. & pro utilitate. Plynius, Quod ex eius re magis, quàm noſtra eſſet. Poſtremo res dicitur, qua ſubſtantia, qualitas, actio comprehenduntur, quod dialectici tranſcendens uocant. Paulus, Rei appellatio latior eſt, quàm pecuniæ, quia etiam ea, quæ extra computationem patrimonij noſtri ſunt, continet, cum ſignificatio pecuniæ ad ea referatur, quæ in patrimonio ſunt. A res fit reor uerbum, quod eſt exiſtimo, opinor. nam et opinari putare eſt. à quo opinio, & opinatio, hoc eſt exiſtimatio, iudiciũ. & inopinatum, quod præter opinionem accidit, & opinabile, quod opinione concipi poteſt. cuius contrarium eſt inopinabile. opinio græce δόξα dicitur. à quo paradoxa dicuntur, quæ admiratione digna ſunt, & opinionem hominum ſuperant. δόξα etiam gloriam ſignificat. unde εὐδοξία uera gloria dicitur. & Eudoxus, proprium nomen, quaſi gloria inſignis. fuit patria Cnidius, filius Aeſchinis, geometer, & aſtrologus ſummus. didicit geometriã ab Archita. primus hic (ut aliqui tradunt) annum compoſuit, poſt quem Hipparchus. poſtea Cæſar. fuit & alius Eudoxus Rhodius hiſtoricus. Item alius Siculus Agathoclis filius, poëta comicus. Ratus, putans. Interdũ etiã certus, ac firmus, unde ratum habere, ac ratificare eſt approbare, ac confirmare, quod actum eſt. Veteres id ratare dicebant. à quo factum irritare, quod eſt infringere, nec ratum habere. Vnde irritum dicitur, quod improbatum eſt. & irritum aduerbium, pro fruſtra. per metaphoram quoq; irritare eſt ad nihilũ redigere. Virgilius, Irrita perpetua ſoluent formidine terras. Hinc ritum uocatum exiſtimant morem, et approbatam conſuetudinem, quã omnes ratam habent. à quo rite aduerbium, quod ſignificat bene, & ſecundũ ritum. Item rituales Hetruſcorum libri, in qbus ſcriptum eſt, quo ritu urbes condantur, aræ, ædesq; ſacrentur. curiæ, tribus, & centuriæ diſtribuantur. Si uero irrito penultimam productam habet, ſignificat incito. ſtimulo, uel ab ira, quaſi in iram prouoco. uel ab irruendo, à canum ſimilitudine, qui in eos, à quibus prouocantur, irruunt. Virgilius, Irritatq; uirum telis, & uoce laceſſit. Suetonius. Princeps, qui delatores non caſtigat, irritat. Et rates hinc dicuntur connexæ, & recte compactæ inuicem trabes, quæ per aquam trahuntur, & abuſiue à poëtis uſurpantur, pro nauibus. Virgilius, Diſiecitq; rates. hinc etiam ratio deriuatur, quæ eſt motus animi, uera à falſis diſtinguens, à qua fit ratiocinatio, quæ à græcis συλλογισμὸς dicitur, definiturq; oratio, in qua quibuſdam poſitis, & conceſſis, neceſſe eſt per ea, quæ poſita, & conceſſa ſunt, aliud euenire. & rationale rationis capax. & rationabile cum ratione. Et ratiocinor συλλογίζω. Rationem habere, ſi cum genitiuo iungatur, eſt habere reſpectum, ut habenda eſt ratio ſalutis, ratio honoris, ratio rei familiaris. Si uero iungatur cum ablatiuo præpoſita cum præpoſitione, eſt habere negotium. Cicero. Rationem habet cum terra. quæ nunquam recuſat imperium. Rationem conſtare, proprie eſt æquam, legitimamq; rationem oſtendi, aut apparere oſtendi poſſe. Plynius, Mirum eſt qua ſingulis diebus in urbe ratio aut conſtet, aut conſtare uideatur, pluribus, cunctisq; non conſtet. Ratiſſimum à rato ſuperlatiuum eſt. Recula à re diminutiuum eſt, hoc eſt parua res. Reicula uero dicitur ouis, aut æta-

te,aut

te, aut morbo grauis. Reapſe ueteres dicebant pro reipſa. Pacuius, ſi non eſt ingratus reapſe, quod feci. Item à re deducitur rego, quaſi rẽ populi ago, à quo regula, quæ, ut Paulus definit, rem, quæ eſt, breuiter enarrat. propter quod dicunt regulam eſſe breuem rerũ præceptionem. Regulam etiam aliquando pro norma ponunt, qua lineæ diriguntur. hanc ſimul cum torno, et claue Theodorus Samius inuenit. Sed de ijs, quæ à rego fiunt, deriuatiuis inferius diſſeremus. & uerus, quaſi non fictus, non ſimulatus, ſed ipſa res. ue enim auget, ut in ueſtibulum, uehemens, & deriuatiua à uero, de qbus inferius dicemus. Item à fero confero, quod aliquando ſignificat ſimul fero. Cicero. Omnes meas curas, cogitationesq; in eam conferebam. Aliquando contello. Virgilius, Et conferre gradum, & procedere longius audet. Interdũ confero. Idem. Ergo etſi conferre manum furor, iraq; monſtrat. Nonnunquam comparo. Cicero, quæ conferri cum eorum ſtudijs poteſt. Sæpe etiam proſum. Plynius, Et ad tuſſim in uino ſumptum maxime confert. Quandoq; transfero. Idem. Ad hoc nos ſtudium potiſſimum contuliſſemus. Hinc. Collatiuum ſacrificium dicitur, quod ex collatione offertur. Et collatiuum uentrem, magnum, ac turgidum Plautus nominauit, quia in eum omnia edulia congeruntur. Et Collatia oppidum, ac collatina porta, & Collatina Dea, de quibus inferius dicemus. Item à fero deductum eſt ſuſque deque fero, quod & Suſque deque habeo dicimus, ſignificat autem animo æquo ſum, & quod accidit non magnifacio, & interdum negligo, atq; contemno. Multa præterea à fero compoſita fiunt, quæ enumerare omnia difficile foret. ut Legifer, ferens leges. Scutifer, ferens ſcutum. ſignifer, ferens ſignum. Mortifer ferens mortem. peſtifer, ferens peſtem. Furcifer, ferens furcam. Hi enim furciferi dicebantur, qui ob leue dictum cogebantur à dominis ignominiæ magis, quàm ſupplicij gratia circa uicinias furcam in collo ferre ſubligatis ad eã manibus, & prædicare peccatum ſuum, ſimulq; monere cæteros, nequid ſimile admitterent. Terentius, Hoc uis tibi ut credam furcifer? Fatifer, idem quod mortifer. Ouifera, quæ fert oua. fœtifera, ferens fœtum. Pomifera arbor, ferens poma. Baccifera, ferens baccas. Glandifera, ferens glandem. Frugifera, ferens fruges. Odoriferum. ferens odorem, quod & odoratum dicitur. Luctiferum, ferens luctum. Letiferum, ferens mortem. Letum enim mors eſt, ſiue à contrario ſenſu, quod minime læta ſit, ſiue à leo uerbo, quo ueteres utebantur, nunc ſolo compoſito eius utuntur, quod eſt deleo, quia mors omnia deleat. à quo deletile dicimus, non quod deleatur, ſed quod deleat. Varro, Spongiam deletilem. & deletionem, conſumptionem Lucilius. Deletionem noſtri ad unum exercitus. Monſtriferum, ferens monſtrum. oſtentiferum, ferens oſtenta. Portentiferum, ferens portenta. Stelliferum, ferens ſtellas. Opiferum, ferens opem. ſalutiferum ferens ſalutem. Plynius, Folia fraxini iumentis mortifera, cæteris ruminantium innocua, in Italia nec iumentis nocent, contra ſerpẽtes uero ſucco expreſſo ad potum, & impoſita ulceribus opifera. margaritifera, quæ fert margaritas. Idem, Concharum genera, inter quæ & margaritiferæ Cochleæ, & mille alia huiuſmodi. IN ASTRA. Ad aſtra. In enim cum accuſatiuo iuncta, aliquando intra ſignificat, ut in nauim ingreſſus, in domum profectus, ideſt intra nauim, & intra domum. Aliquando contra. Plynius. Cum mihi ſermo in adulterum eſſet, hoc eſt contra adulterum. Et Virgilius. Quid meus Aeneas in te committere tantum, Quid Troës potuere? modo pro. Idẽ, Accipit ĩ Teucros animum, mentemq; benignam. Nonnunquam ad, ut hoc loco, & apud Virgilium. Impulit in latus, ideſt ad latus, & Lucanũ. In puppim rediere rates, pro ad puppim. Quã-

do uero hæc præpoſitio ablatiuo adiungitur, eandem uim habet, quam apud græcos ἐν, ut in Italia, in urbe, in tempore, & aliquando ſignificat, uel pro ad, ut hoc eſt in re tua. ideſt ad utilitatem tuam, uel pro utilitate tua. In compoſitione uero aliquando priuatiua eſt, ut indoctus. iniuſtus. inutilis, impius. impurus. Aliquando intentiua, imprimo. incurſo. irrumpo. impugno. incumbo. Illud in hac præpoſitione notandum, quod in marmore inciſæ ſunt literæ dicimus. in gemma. in lapide. in ligno. non autem in marmor. in gemmam. in lapidem. in lignum. E diuerſo uero in æs, non in ære. Liuius. Prius, quàm urbẽ ingrederẽtur leges decemuirales, qbus duodecim tabulæ eſt nomen, in æs inciſas in publico propoſuerũt. ASTRA. Cœlum. pars pro toto. Aſtrum græcum uocabulum eſt. Græci enim ἄστρον uocant, quod à noſtris dicitur ſydus. Sydus, & ſtella differũt, quod oſtendit Cicero, cum inquit, quæ ſydera, et ſtellas uocatis. Stellæ enim ſunt ſingulares, quæq; non admiſtæ alijs, ſolæ feruntur. Sydera uero, quæ ad aliquod ſignum complurium ſtellarum compoſita ſunt, ut Aries. Taurus. Andromeda. Perſeus, & ſimilia. Vnde ἀπὸ τοῦ συνειδεῖν, hoc eſt à ſimul uidendo dicta ſunt, quod plures ſtellæ ſimul conſpiciantur. Et ἀπὸ τοῦ πλανᾶσθαι, hoc eſt ab errando Planetæ, unde huiuſmodi ſtellas quidam Errones uocitauere, quod modo ad auſtrum ferũtur, modo ad Septentrionem, modo cum mundo. modo contra mundum. Stella uero uel à ſtando appellata eſt, quod ſtare ſtellæ uideãtur, uel, qđ aliqui ſenſerunt, & tanquã nimis curioſum à Quintiliano reprehenditur, quod ſit quaſi luminis ſtilla. hoc eſt gutta. Apuleius. Et ſanguinis eruptionem utriculo admoto excipit diligenter, ut nulla ſtilla cõpareret uſquam, quãuis Palæmon Vicentinus inſignis grammaticus interrogatus quondam, quid inter ſtillam guttamq; intereſſet, gutta inquit, ſtat, ſtilla cadit. A ſtiria autem per diminutionem dicta eſt ſtilla. Stiria proprie eſt aqua frigore concreta pẽdens, ſtillanſq; guttatim. Plynius, Diſtillantes hyberno gelu ſtirias. Virg. Stiriaq; impexis induruit horrida barbis. Item ab eadem dicitur Stiricidium ſicut à ſtilla Stillicidium, ubi è tectis guttæ fluunt. Item ſtillicidiũ ab Vlpiano ita diſtinguitur à flumine, quod ſtillicidium ſtillatim cadat, flumen continue fluat. A ſtilla fit ſtillo uerbum, quod aliquando ſignificat guttatim fluo. Martialis, Viuebant laceri membris ſtillantibus artus. Aliquando guttatim emitto. Plynius. Frutex eſt reſinam ſtillans. Ab hoc fit diſtillo, quod ſimiliter aliquando eſt paulatim fluo. Vnde fluxus humoris à capite diſtillatio dicitur. Aliquando guttatim extraho humorem, unde diſtillare flores, diſtillare herbas, hoc eſt humorem ex ijs paulatim extrahere dicimur. & Diſtillatio, humoris extractio. & Subſtillum tempus dicitur, quod ante pluuiam, uel poſt pluuiam eſt, non ſiccum, ſed humidum, quod aut iam ſtillet, aut non dum ſtillare deſiſtat. Eandem differentiam græci faciunt inter Aſter, & Aſtron. Aſter enim ſtella una eſt, Aſtron ſignum ſtellis coactum, quod nos ſydus uocamus. Quandoq; tamen authores ſydus pro ſtella uſurparunt. Cicero, Itaq; neſciunt hos ſyderum errores. Idem. Nam cum duo ſint genera ſyderum, quorum alterum ſpatijs mutabilibus ab ortu ad occaſum commeans, nullum unquam curſus ſui ueſtigium inſectat, alterum autem conuerſiones duas iiſdem ſpatijs, curſibuſq; conficiat. Quintilianus, Quid hæc fulgentium ſyderum ueneranda facies, quæ quadam uelut infixa, ac cohærentia perpetua ſemel capta ſede collucent. Alia toto ſparſa cœlo uagis curſis certis emetiuntur erroribus. Stellam nunquam pro ſydere poſuere. A ſtella fit uerbum Stello, quod eſt luceo, & quaſi ſtellas facio. à quo fit participium, Stellans hoc eſt lucens. Martialis.

Et numeroſa linunt ſtellãtem ſplenia frontem, & Stellor paſſiuum. Plynius. Quoniam ſtellarum hyadum & numero, & diſpoſitione ſtellantur. hinc ſtellatum ſtellis plenum, & ſtelliferum ſtellas ferens, utrũq; cœli epithetum eſt. Sed ſtellatum proprie dicitur, cum ſerenum eſt, & ſtellæ ubiq; uideri poſſunt. Item à ſtella Stellio uocitatus eſt, quem medici noſtri temporis magno errore putant lacertum eſſe, cum longe aliud animal ſit. eſt enim lacerta minor, à græcis ἀσκαλαβώτης, hoc eſt Aſcalabotes dicitur, quod apud eos ἄσκαλος circulus eſt, ſtelliones autem circulis quibuſdam depicti ſunt. & ueluti lucentibus guttis, in modum ſtellarum, unde ſtelliones à noſtris uocitantur pleni lentigne ſtridoris acerbi. Romani uulgo nunc Tarantulas uocant. Ab hoc animali ſtellionatus crimen apud iuriſconſultos nomen ſumpſit, cuius cognitio, ut Vlpianus ſentit, ad præſidem ſpectat, cum ſcilicet aliquid dolo factum eſt, ut ſiquis rem alij obligatam diſſimulata obligatione per calliditatem alij diſtraxerit, aut ſiquis merces ſuppoſuerit, uel corruperit. aut ſi impoſturam fecerit, cuius nulla ordinaria pœna eſt, ſed extraordinarie plectitur. Cauſa autem nominis ſecundum quoſdam hæc fuit, quod qui huiuſmodi criminis rei ſunt, aſtu & dolo, uelut quodam ſtellionis medicamento homines fallunt. fit enim è ſtellione malum medicamentum, etenim, cum mortuus eſt in uino, faciem eorum, qui biberint, lentigne obducit. Propter quod in unguento necant eum formæ muliẽrum inſidiantes, cuius rei remedium eſt oui luteum, & mel, ac nitrum. Nos autem cauſam nominis ueriorem hanc eſſe exiſtimamus, quod nullũ animal fraudolentius inuidere homini tradunt. ideo nomen hoc uerſum eſt in male dictum, & quoties inſidiatorem aliquem ſignificare uolumus, ſtellionem nominamus, à quo Crimen ſtellionatus à ueteribus eſt deductum. Scit ſtellio nihil tuniculæ ſuæ in comicialibus morbis præferri. iccirco eam ſimulatq; exutus eſt, deuorat. Propter hoc obſeruant cubile eius æſtate, quod eſt in locis hoſtiorum, feneſtrarumq;, ac cameris, uel ſepulchris. Ibi uere incipiente caueas ex fiſſis arundinibus textas opponunt, quarum illi anguſtijs gaudentes, quo ſe facilius exuant, per eas egrediuntur, quapropter dimiſſa tunica, remeare non poſſunt. Eſt & alius ſtellio ex araneorum genere, qui ſimili modo aſcalabotes à græcis dicitur, & Colotes, & Galeotes, lentiginoſus in cauerniculis dehiſcentis, per æſtum terræ habitans. hic maiorum noſtrorum temporibus in Italia uiſus non fuit. Nunc frequens in Appulia uiſitur. Aliquando etiã in Tarquinenſi, & Corniculano agro. et uulgo ſimiliter Tarantula uocatur. Morſus eius perraro interimit hominem, ſemiſtupidũ tamen facit, & uarie afficit, Tarantulam uulgo appellant. Quidam cantu audito, aut ſono, ita excitantur, ut pleni lætitia, ac ſemper ridentes ſaltent, nec niſi defatigati, ac ſemineces deſiſtant. alij ſemper flentes, quaſi deſyderio ſuorum miſerabilem uitam agant. alij uiſa muliere libidinis ſtatim ardore incenſi, ueluti furentes in eam proſiliant. quidam ridendo, quidam flendo moriantur. Multa ſunt araneorũ genera, omneſq; græco uocabulo, ſed apud latinos uſitato phalangia dicuntur. Vnum genus eſt formicæ ſimile, ſed multo maius, rufo capite, reliqua parte corporis nigra, albis guttis reſperſum, uiuit maxime circa furnos, & molas. Ictus eius, quàm ueſpæ acerbior eſt. Eſt ſecundum phalangij genus, quod lupum uocant. Item tertium lanuginoſum grandiſſimo capite, quo diſſecto, inueniuntur intus uermiculi duo, adalligatiq; mulieribus ceruina pelle ante ſolis ortum impediunt conceptum, propterea hinc Araneus Atocus dicitur, græci enim ἀτόκιον, hoc eſt Atocium, uocant omne medicamentum, quod ſterilitatem inducit. Quartũ quoq; Phalangij genus. Rhachinon dicitur ore

nigro, minimo, ſubalbo, pedibus breuiſſimis, tanquam imperfectis dolorem morſu, qualem ſcorpio facit. Quintum genus Aſiortion diſtinctum uirgulis albis, cuius ictus genua labefactat. Sextum cœruleum eſt, lanugine nigra, caliginem concitans, & uomitus araneoſos, hoc eſt in quibus telæ araneæ conſpiciuntur. Septimum à Crabrone tantum penna differens, quod ad maciem perducit. Mirmecion octauum formicæ ſimile capite, aluo nigra, guttis albis diſtinguentibus. A terra fit terreus, qđ ex terra eſt, ut uas terreum. Terrenus, & terreſtris, quod uel in terra natum eſt, uel in terra uiuit, uel aliquid cõe cum terra habet. ut terrenũ, ſiue terreſtre animal, terrena labes, terreſtris exercitus, terreſtres copiæ, & terrigena, qđ ex terra natum eſt, unde terrigenæ gigantes dicuntur. & terricola, qđ colit, hoc eſt habitat terras. & Terentum locus in campo Martio, qđ in eo ara Ditis patris in terra occultaretur. erat hic locus Diti, ac Proſerpinæ ſacer, in quo omnium qui aut naſcerẽtur, aut morerẽtur, nomina ſcribi ſolebant, quoties ciuitas luſtrabatur, quæ res initiũ habuit huiuſmodi. Cum ingenti peſtilẽtia urbs uaſtaretur, Valeſius uir locuples, ſed ruſticæ uitæ duobus filijs, & filia ad deſperationẽ morbo laborantibus, aquã calidã à foco petebat, ubi genibus nixus, lares familiares orauit, ut puerorũ piculũ ĩ eius caput

Galli enim hoc nomine ſignificant galeam, unde milites, qui galeis utuntur, dicti ſunt alaudæ. Legionis alaudarum meminit Cæſar in commentarijs. Alauda à græcis uocatur κορύδαλος. κόρυς enim galea eſt, quidam hanc parcum quoque dici exiſtimant, ſed falſum eſt. Parcus enim auicu=

Item à terra terræmotus dicitur, cum terræ incluſo ſpiritu contremiſcunt, magno ſæpe habitantium damno, alibi proſtratis urbibus, alibi hiatu profundo hauſtis, alibi egeſtis molibus, alibi emiſſis amnibus, nonnũquam etiam ignibus, & calidis fontibus, alibi auerſo fluminum curſu, quod ipſi noſtra ætate Calliſto pontifice maximo in Appulia, atq; Campania uidimus, tanta earum prouinciarum ruina, ut fuerint, qui de natali ſolo relinquẽdo perpetuo cogitauerint. Item à terra tellus, per diminutionem deducitur, quod proprie deam terræ ſignificat. ponitur tamen pro ipſa terra. Item tripudium, quaſi terræ pauium. Cicero, ſed quia cum pulli paſcuntur, neceſſe eſt aliquid ex ore cadere, & terram pauire. Terripauium primo, poſt terripudium dictum eſt, deinde tripudium. cum igitur offa iam cecidit ex ore pulli, tum auſpicanti tripudium ſoliſtimum nuntiatur. Hanc unam rerum naturæ partem propter eximia in nos merita matris cognomento ueneramur. Hæc enim naſcentes nos excipit, natos alit, ſemelq; editos perpetuo ſuſtinet. At terra mitis, benigna, indulgens, miniſtra hominum, quæ coacta non generat? quæ ſponte non fundit? hæc nobis odores, ac ſapores præparat, hæc ſuccos, hæc fructus, hæc colores, hæc bona fide creditũ reddit fœnus, hæc noſtri cauſa cuncta alit, & ſemper homini noua parturit, hæc frugem, uinum, carnem, lignum, lapidem, herbam, ferrum, æs, argentum, aurum, cæteraq; metalla, margaritas, gemmas, & quicquid uitæ hominum nõ modo utile, ac neceſſarium, ſed etiam decorum, ac iucundum eſt, abunde ſuppeditat. Secundum elementum eſt aqua, quæ ſecundum quoſdam ab æqualitate dicta eſt. nihil enim eſt illa, dum quieſcit, æquabilius, ut ego ſentio, quaſi à qua uiuamus. Aqua enim, & ignis humanam uitam maxime continent. Vnde aqua, & igni interdici ſolebat damnatis. aquam, & ignem ſumebant nuptæ, & qui funus proſecuti fuerant, redeuntes ignem ſupergrediebantur aqua aſperſi, quod purgationis genus uocabant ſuffitionem. Hoc elementum cæteris omnibus uidetur imperare. Terras enim deuorant aquæ, flammas necant, ſcandunt in ſublime, & ipſum quoq; ſibi uendicant cœlum. Quid eſſe mirabilius poteſt, quàm ſtare in cœlo aquas? At illæ non modo in tantum altitudinem perueniunt ipſæ, ſed ſecum piſcium quoq; examina, & lapides rapiunt. Eædem cadentes omnium terra naſcentium cauſa fiunt. fruges, arbores, frutices iuuant. migrant in cœlum, ut uitalem animam deferant herbis. Sed, ut de cæteris taceamus, Perottæ, quas ipſi paucis ante annis non mediocri opere, ac ſumptu in agro uiterbienſi deduximus, letargicos, & hydropicos, & colicos curant, luxatis ſtatim ſanant, collutæ dẽtes ſiſtunt, ſcabiem, lichenas, uitiligines mira celeritate tollunt, cruditati medentur. famem ſublato omni faſtidio inducunt, fœcunditatem mulieribus afferunt, Venerem, ſi debilitata fuerit, excitant, calculorum uitia diſcutiunt. Lymphaticos ſudando mox ſanant. aptiſſimæ ſtomacho, neruis, uniuerſo corpori. Ab aqua fit aquor uerbum, quod eſt aquam haurio. ſiue aquam fero. Curtius, Cum miles aquatum profectus eſſet. Virgilius, Sed circum tutæ ſub mœnibus urbis aquãtur. à quo fit aquatio, hoc eſt aquæ uectio. Aquilex, qui aquã colligit. Varro. An hoc præſtat Hero filius Diogenis, quod ille è uentre aquam emittit? an hoc te iactas? At hoc pacto utilior te thuſcus aquilex. & aquilegium collectio aquæ. Plau. Eius tres ſpecies ſunt. Item ab aqua aqualiculus dictus eſt, quod proprie uas eſt, in quo porci ſorbent, per metaphoram uero pro uentre uſurpatur. Perſius, Cũ tibi calue Pinguis aqualiculus propenſo ſexquipede extet. & aquarium, ſiue aquariolum locus, in quem ſordida aqua iactatur, qui & lauacrina à lauando appellatur, & aqualis uas ad aquam tenendam, quod & matula dicitur, & matella, & matellio. Mei loci, atque ordinis hominem haud impurum. & purifico, à quo purificatio, & quo nonnulli utuntur, purificus. Sunt etiã, qui puto uerbum à puro deductum exiſtimant. Putare enim proprie ueteres dicebant deputare, hoc eſt uacantia ex quacunque re & non neceſſaria, aut etiam non obſtantia, & aliena auferre, atque excidere. Sic putari arbores, ac uites dicuntur. & putamina appellantur ſarmenta, & cortices, & argentum, atque aurum purum, hoc eſt expurgatum excoctumq;, atque omni alia materia carẽs. hinc factum eſt, ut putare pro cogitare, atque animo uoluere capiamus. cogitando enim reſecamus mente quæ falſa, aut inutilia, aut ſuperuacua ſunt & qđ uerum, ac bonum eſt, hinc cogitando hæremus. Terentius, Recte putas. Virgilius, Multa putans, ſortemq; animo miſeratus iniquam. Ob eandẽ cauſam, & putare pro conferre, & colligere uſurpamus. Plautus. Idem, imputas nobis propitios uentos, & ſecundum mare, ac ciuitatis opulentæ liberalitatem, quæ tantum frumenti uendidit, quantum duobus populis ſatis eſſet. Nonnunquam tamen imputo, pro adnumero, & computo ponitur. quod & ipſum à puto componitur. Vlpianus, præterea ſi matrem aluit pupilli tutor, putat Labeo imputare eum poſſe, ſed eſt uerius, nõ niſi per quem egenti dedit, imputare eum oportere. Quidam pudorem à uerecundia ſic ſeparant, ut pudor ſit rei turpiter actæ, uerecundia uero etiam recte facti, atque honeſti. Ab hoc fit pudibundus, qui pudore ducitur, & pudibunde aduerbiũ, cum pudore, & pudẽda, uirilia, quæ & uerecunda dicuntur. & pudicus, caſtus. à quo pudice aduerbium, caſte. & pudicitia, caſtitas, quorum contraria ſunt impudicus, & impudice. ponitur & pro religioſa munditia, ac puritate. Virgilius, Caſta pudicitiam ſeruat domus. Item pro dea gentilium. Ennius leuiter rubentem auroram pudoricolorem appellauit. Ab eodem etiam pudet uerbum deducitur, quod à piget ita diſtingunt, ut pudere ſit in ijs, quæ turpiter fiũt, pigere in ijs, quæ cum malo, damnoq;. pudere ad dedecus, pigere ad dolorem refertur. Pudet enim eius, quod turpe eſt. piget eius, quod dolet, ac moleſtum eſt. Alij pudere uerecundiæ eſſe dicunt, pigere pœnitentiæ. Terentius, Fratris me quidem pudet, pigetq;. Salluſtius, Nam poſtea, quæ fecerit, incertum habeo, pudeat, an pigeat magis. ab hoc fit impudicus, hoc eſt temerarius, qui nullo pudore ducitur. à quo impudenter temere, petulanter, inuerecunde. & impudentia, temeritas. quidam etiam diſpudet uſurparunt pro bis pudet ſeu ualde pudet, ueteres etiam pudeo, et pudefio dixere. Proprie tamen incedere, eſt cum grauitate quadam, & ueluti faſtu ambulare. Virgilius, Regina ad templum magna ſtipante caterua, Inceſſit. Idẽ, Et uera inceſſu patuit dea. Seneca. Tenero, ac molli paſſu ſuſpendimus gradum, nec ambulamus, ſed incedimus. Aliquando incedere, ſubire eſt. Vt inceſſit mihi cupiditas, hoc eſt ſubijt. ab hoc fit inceſſo, qđ eſt accuſo, impeto, moleſto. Gellius, cum me maledictis inceſſeret. Item à cædo ſucciſiuum tempus dicitur, qđ ſubtrahitur à rebus neceſſarijs, ut ad aliquem uſum accommodemus. Gellius, Quantum autem uitæ mihi deinceps deûm uoluntate erit, quantumq; à cura, & à re familiari, procurandoq; cultu liberorum meorum dabitur ocij, omnia ſucciſiua, et ſubſecundaria tempora ad colligendas huiuſcemodi memoriarũ delectatiunculas conferam. Plynius, Homines enim ſumus, & occupati officijs, ſucciſiuiſq; temporibus iſta curamus, ideſt nocturnis, nequid noſtris putetis ceſſatum horis. dies uobis impendimus, cum ſomno ualetudinem computamus. & ſuccida lana à ſuccidendo, qđ talis ſit, qualis ſucciſa eſt, hoc eſt plena ſordibus, impura, nõ lota. Quod ſi lento igni in æneo uaſe ſufferueat, deinde refrigeretur, et pingue illud, quod ſupernatat, in uas fictile colligitur, rurſuſq; priore materia decocta, utraq; pinguitudo frigida aqua abluatur, & in linteo ſiccetur, ac torreatur ſole, donec candeſcat, & translucida fiat. poſthac in ſtamnea pixide reponatur, fit cæſyppum, quod innumeris medicinæ uſibus adhibetur, præſertimq; ulceribus genitalium cum adipe Anſerino hoc Galenus medicus, et alij quidam authores æſopum ſuccidum uocant. Varro tamen ſuccidam lanam à ſudore uocatam exiſtimat, qđ cum tundetur, ſudare oues incipiant. A` ſuccidẽdo etiam ſuccidia deducitur. eſt autem ſuccidia caro ſalita, & in neceſſarium uſum ſeruata, quæ quoties opus eſt, ſucciditur. Cicero, Iam hortum ipſi agricolæ ſuccidiam alteram appellant. Succidium quoq; lardum uocant. Varro ſuccidiam, non à ſuccidendo, ſed à ſuibus edendis nominatam putat, quod pecus primum occidere cœperunt domini, & ut ſeruarent, ſalire. Vnde ſucerdam quoq; à ſue deductam opinatur, quæ eſt ſtercus ſuillum. Titinius. Quid habes, niſi unam arcam ſine claui, eo condis ſucerdas. A` ſuccido quoq; ſubſcudes appellatæ ſunt tabellæ, qbus tabulæ inter ſe configuntur, quia quo immittuntur, ſucciditur. Pacuuius, Nec ulla ſubſcus prohibet compagem. Intercido, in medio cædo, à quo interciſi dies, de quibus ſupra diximus, appellati, quod quibuſdam eorum horis ius dicere liceret, quibuſdam non liceret, & ideo cæſi uiderentur. Recido, reſeco. unde reciſos ramos dicimus, hoc eſt cæſos, reſecatos. & recidua poſt caſum reſtituta, et quodãmodo renaſcentia ab arborum ſimilitudine, quæ ſectæ repullulant, ac nouæ fiũt. Virgilius, Et recidiua manu poſuiſſem pergama uictis. Nam rediuia eſt morbus, cum circa unguem cutis reſoluitur, non ſine dolore id patientis, dicta à rediuiendo. Rediuire enim ueteres pro reſoluere uſurpabant, hæc & neutro genere rediuium appellatur, à græcis dicitur παρωνυχία, nam παρὰ, ad præpoſitionem ſignificat, ὄνυξ dicitur unguis. pterygium uero ulcuſculi genus eſt, quod naſcitur iuxta ungueis. Plyn. Lana ſuccida rediuias ſanat ex aqua frigida. Idem, Cum etiã cum oleo paronichias, & pterygia tollit. Oc-

cĩdo penultima longa interficio, à quo ueteres occiſitantur dicebant, pro frequenter occiduntur. quidam occiſum, & necatum ita diſtingunt, ut occiſus cum ictu, et uulnere ſit, necatus etiam ſine ictu. Vnde uero necatos, nõ occiſos dicimus, qui aliter uſurpant, loquũtur improprie. Ab occĩdo fit occiſio, hoc eſt cædes, &, quo ueteres uſi fuere, occidium. quidam etiam occidionem uſurparunt. Occiſam etiam rem dicimus deſperatam, & perditam. Plautus. Occiſa iam eſt hæc res, hæret hoc negotiũ. Vnde & occiſiorem, & occiſſiſſimum ueteres dixere. Plautus, Occiſiſſimus omnium, qui uiuunt. concĩdo, quod aliquando ſignificat minutatim cædo. Plyn. Caro eius conciſa, ac decocta adhibenda eſt. aliquando frango. Idem. Et nucleus dentibus conciſus, ſupra uulnus imponitur. Ab hoc conciſa oratio dicitur, quæ non continua, ſed ueluti membratim cæſa eſt. Reperitur etiam cedò, prima breui, accentum in ultima habens, qđ modo da, modo dic, ſignificat. Plautus. Cedò hominẽ. Idem, Quid ſit cedò. Sunt qui exiſtiment Cæſenam quoq; Flamminiæ urbem à cædendo appellatam, qđ exiguo intus amne cæſa, hoc eſt diuiſa ſit, uel quod ager eius duobus fluminibus Sapi, ac Rubicone ſit diuiſus. Mirum uidetur adeo maiorum noſtrorũ temporibus in contemptu fuiſſe, ut Cicero duorum ciuium Romanorum, qui deſignati conſules fuerant, indignitatem oſtenſurus, ita ſcripſerit, nam iſti duo uix ſunt digni, quibus alteri Cæſenam, alteri coſſutianarum tabernarum fundamenta credas. A` Cæſena, cæſenas deriuatur. unde cæſenatem agrũ, & cæſenatia uina frequẽter legimus, quæ apud maiores noſtros inter generoſa connumerabantur. Cæditæ tabernæ, nõ à cædẽdo dictæ ſunt, ſed à domini nomine, q Cæditius uocabatur, à quo in uia Appia ædificatæ ſunt. A` cædo ancile quoq; dictum eſſe manifeſtum eſt. Scutum breue fuit, quod regnante Numa Pompilio, cum peſtilens annus eſſet, è cœlo cecidiſſe fertur, ideo ſic appellatum, quia ex utroq; latere erat reciſum, & ſummũ, infimumq; eius latius medio pateret. Eo tempore una ſimul uox audita eſt, omnium potentiſſimam fore ciuitatem quandiu id in ea manſiſſet. Itaq; facta ſunt eiuſdem generis plura, quibus admiſcerentur, ne internoſci cœleſte poſſet. Probatum eſt maxime opus Mamurij Veturij, qui præmij loco petijt, ut ſuum nomen inter carmina ſalij cantarent. ideo Mamurij Veturij nomen in cantibus Romani maxime frequentabant. Circunferebantur autem ancilia menſe Martio à duodecim ſalijs, ita enim Martis ſacerdotes appellabantur, uel à Salio ſamothrace, uel à Salio Mãtineo, uel potius (ut ego arbitror) à ſaliendo, ſiquidẽ gladiolis ancilia pulſantes, ſaltare ſolebant, primo Martis, deinde Mamurij laudes canentes. Plutarchus dubitare uidetur an ab am, quod ſignificat circũm ancile dicatur, quod in orbem eſſet figuratum, an ab ἀγκών, quod eſt cubitus, an uero ab ἄκος, quod ſignificat remedium, quoniam peſtilentiæ remedium fuit ancile. CAESAREO. A` Cæſare ædificato. Amphitheatrum, de quo loquitur, ab Auguſto deſtinatum fuit, à Veſpaſiano ædificatum, à Tito conſecratum. id tamen Domitianus ad gloriam ſuam referebat, iactare in ſenatu ſolitus, & patri ſe, & fratri imperium dediſſe, & illos ſibi reddidiſſe. Quapropter & operibus omnibus, quæ poſt mortem illorum uel reſtituit ipſe, uel perfecit, ſuum duntaxat titulum addidit, ſine ulla priſtini authoris memoria. AMPHITHEATRO. Amphitheatrum locus erat ſpectaculorum gratia, forma rotunda, & ueluti ex duobus conſtans theatris. Vnde amphitheatri nomen impoſitum. theatrum hemicycli ſpecie conſtructum erat, ἀπὸ τοῦ θεῶμαι, quod eſt uideo, appellatum. latine dici ſpectaculum poteſt. Conſuetudo eius à græcis ſumpta eſt. Nam cum agrorum cultores feriatis diebus ſi-

cra diuerſis numinibus per pagos celebrarent. Athenienſes hoc in urbanum ſpectaculum tranſtulerunt, theatrum græco uocabulo appellantes, quod in eo conueniens turba à longe ſine aliquo impedimento ſpectaret. hunc morem poſtea Romani, ut pleraq; alia in urbem tranſtulerunt. Theatrum ita diſpoſitum erat, ut à fronte inter duo cornua Scæna eſſet, dicta ἀπὸ τῆς σκηνῆς, quod apud græcos tabernaculum ſignificat, ita appellatum à facienda umbra, quam græci σκιὰν nominant. unde Scænitæ nobiles Arabiæ populi dicti ſunt, quod tentorijs utantur, & raras, paruasq; habeant domos. per diphthongum ſcribitur conſuetudine potius, quàm ratione. inuenta primo eſt ſcæna inumbrationis gratia, in qua incondita carmina decantabantur, quapropter quidam tabernaculum interpretati ſunt. unde ſcænophegia tabernaculorum feſta dicuntur. Apud ueuſtiſſimos theatralis ſcæna parietem non habebat, ſed frondibus tantum tegebatur, poſtea tabulata cœperunt componere in modũ parietis. unde pmanſit conſuetudo, ut ab ijs, qui theatrales ludos edunt, pegmata componantur. ſcæna à Labeone definitur, quæ ludorũ faciendorum cauſa quolibet loco, ubi quis conſiſtat, moueaturq; ſpectaculum ſit præbiturus, poſita ſit in publico, priuatoq; uel in uico, quo tandẽ loco paſſim homines ſpectaculi cauſa admittantur. Hæc autem uerſatilis erat, aut ductilis. Verſatilis, quæ ſubito tota machinis quibuſdam uertebatur, & aliã picturæ faciẽ oſtendebat. Ductilis, quæ contractis tabulatis hac, atq; illac interiorem picturæ ſpeciem denudabat. Vtrunq; tetigiſſe uidetur Virgilius, Cum inquit, Vel ſcæna ut uerſis diſcedat frontibus. primus Claudius Pulcher ſcænam uarietate colorum adumbrauit, cum antea tabulis pictura nacuis extenta eſſet, quam totam argento C. Antonius, Auro Petreius, ebore Quintus Catulus prætexuit, uerſatilemq; fecerunt locum, quem argentatis corrigijs P. Lentulus Spinther adornauit. à ſcæna fit adiectiuum ſcænicus, unde ſcænicos ludos dicimus, & ſcænicas ueſtes, hoc eſt hiſtrionicas. Item obſcœnum ſecundum Varronem, quod ſignificat turpe, fœdum. quaſi ob ſcænam, qa ad ſcænam turpia perpetrabantur. Virgilius, Obſcænæq; canes, importunæq; uolucres. Alij tamen à græco potius deducunt κοινῶ, quod eſt inquino, unde cœnum, hoc eſt lutum dictum putant. à quo cœnoſus ſordidus, lutoſus. obſcœnum etiam aliquando pro pernicioſo, et uitabili ponitur. Idem, Obſcœnamq; famem, quæ prima pericula uito. Ab hoc fit obſcœnitas turpitudo, & obſcœne aduerbium turpiter, & obſcœno uerbum, quod ſignificat malum omen affero. Nam obſcœnæ uolucres dicuntur, quæ canendo aduerſa ſignificant. propter qđ obſcœnum quidã ex ob, & cantu deductum exiſtimant, quaſi aduerſi, & infauſti cantus. Plautus, ſed quid illuc, quod exanimatus currit huc Leonida. metuo quod illic obſcænauit me falſæ fallaciæ obſcœnauit inquit, hoc eſt obſcœnum, & malum omen attulit. Scæna theatri binis, & ſæpe pluribus contignationibus conſtabat. deinde erat proſcænium pulpitum, ſcilicet ante ſcænam ædificatum, in quo ludi exercebantur. Virgilius, & ueteres ineunt proſcœnia ludi. in medio orcheſtra, in qua ſenatorum ſedibus erant loca deſignata, unde omnium agentium geſtus ſpectari poſſint. Item liberarum, ſociarumq; gentium legatis, quos poſtea uetuit Auguſtus in orcheſtra conſidere, quod quoſdam libertini generis mixti deprehendiſſet. Iuuenalis, Quæq; reportandis poſita eſt orcheſtra cathedris. ſcænæ longitudo ad orcheſtræ diametrum duplex erat. Orcheſtra in cuneos diuiſa, ut mediæ uiæ relinquerentur. Dicta orcheſtra, quod in ea ſaltationes fieri conſueuiſſent. Nam apud græcos ὀρχοῦμαι ſalto eſt. ὄρχησις Saltatio. ὀρχηστὴς Saltator. ὀρχήστρια Saltatrix. Refert Titus Liuius, cum

ludi circenſes Apollini aliquando celebrarentur, & Annibal nuntiatus eſſet circa Collinam portam urbi ingruere, omnes repertis armis eò concurriſſe, quos deinde reuerſos, cũ piaculum ſeſe feciſſe formidarent, inueniſſe ſaltantem in circo ſenẽ quendam, hũc interrogatum dixiſſe minime à ſe intermiſſam eſſe ſaltationem. Itaq; ortum exinde eſſe prouerbiũ, ſalua res eſt ſaltante ſene. In cauea, quæ pars media theatri erat, ſimiliter ſubſellia equitum erant, in cuneos eodem modo diuiſa. In circunferentia hemicycli erant gradus ita diſpoſiti, ut altiores in ambitu ſemper excreſcerent, in ijs plebs promiſcue ſedebat. Quibus non erat ſedendi locus, ij ſtantes in cauea ſpectabant. caueæ theatrorũ nullis fornicibus obductæ, uelis tegi ſolebant. Primus omnium Catullus linteis in theatro umbrã fecit. Primus etiam byſſina uela in theatrum duxit. principio temporaria fiebant theatra. primuſq; M. Scaurus in ædilitate ſua triginta tantummodo diebus ſcænicorum ludorum duraturum theatrum extruxit, opus (ut Plynius inquit) maximum omnium, quæ unquam fuere humana manu facta, ſcænam habuit triplicem. columnas lucullei marmoris trecentas ſexaginta, duodequadraginta pedum altitudine. Signorum inter columnas tria millia. ſummæ colũnæ tabulis erant inauratis. pars ſcænæ inferior è marmore, media è uitro. cauea ipſa octuaginta hominũ millia capiebat. C. uero Curio theatra duo fecit ampliſſima è ligno, quibus inter ſeſe auerſis, ne inuicem obſtreperent ſcænæ, & repente circumactis, ac cornibus inter ſe coëuntibus faciebat amphitheatrum. & gladiatorum ſpectacula edebat. Manſurum uero theatrum è quadrato lapide primus Romæ conſtruxit Pompeius magnus. propter qđ Cornelius Tacitus incuſatum eum fuiſſe à ſenioribus ſcribit, qđ manſuram theatri ſedem poſuiſſet, cum antea ſubitarijs gradibus, et ſcæna in tempus ſtructa foret, ſed parſimoniæ conſilium, quod perpetua ſedes theatro locata eſſet potius, quàm immenſo ſumptu ſingulos p annos conſurgeret, ac ſtrueretur. Nero princeps nobilibus germanis populi Romani magnitudinem oſtenſurus, eos in hoc theatrum populo plenum introduxit. idem etiam aliàs inſano ſumptu inaurauit, ut in eo Tiridatem Armeniorũ regem exciperet. Amphitheatri uero molem primus in campo Martio poſuit C. Iulius Cæſar, quam paulopoſt Auguſtus mauſoleum ædificaturus, deſtruxit. hoc autem amphitheatrum, de quo poëta loquitur, in parte domus aureæ Neronis ædificatum fuit, quam diui Veſpaſianus, et Titus penitus deleuere, unde in ſequenti Epigrammate inquit. Hic ubi conſpicui uenerabilis amphitheatri, Erigitur moles, ſtagna Neronis erant. À theatro theatralis deducitur. & ab amphitheatro Amphitheatralis. unde theatrales, & amphitheatrales ludi dicuntur. Theatrũ figurate aliquando pro ſpectaculo ponitur. Martialis, Quicquid in Orpheo Rodope ſpectaſſe theatro Dicitur, exhibuit Cæſar arena tibi. Item pro multitudine ſpectante, ut magno theatro hæc acta ſunt, ideſt multis ſpectantibus. LOQVATVR. Prædicet. excellat. Proprie loqui eſt uerba proferre, & à dicere differt, quod eſt eleganter, & facunde loqui. Quintilianus, Nam mihi ne dicere quidem uidetur, niſi qui diſpoſite, ornate, copioſe dicit. Cicero, Vt non modo græcarum literarum rudes, ſed etiam docti aliquantum ſe arbitrentur adeptos, & ad dicendum, & ad iudicandum. ideſt & in oratoria arte, & in philoſophia. loquor à loco deductum eſt, quod is, qui loquitur ſuo loco quoque uerbum ſciens ponit. Nam, qui primo incipit iam fari, & uocabula, & reliqua uerba dicit ante, quàm ſuo loco ea ponere poſſit, hunc Chryſippus affirmat non loqui, ſed ut loqui. Quapropter ut imago hominis non ſit homo, ſic in coruis, cornicibus, pueris primitus incipientibus fari,

entibus fari, uerba, non eſſe uerba, qđ loqui non dicantur. À loquor fit loquentia, quod in compoſitione duntaxat uſurpatur, ut breuiloquentia, & multiloquentia, quæ græci βραχυλογίαν, μακρολογίαν nominant. Magniloquentia. grandiloquentia. ſtultiloquentia. blandiloquentia, & ſiqua alia ſunt huiuſmodi. quamuis Valerius Probus grammaticus illuſtris illud ſalluſtianum ſic legendum, & ſic ab eo relictum affirmare ſolitus ſit, ſatis loquentiæ, ſapientiæ parum. quod loquentia nouatori uerborum Salluſtio maxime congrueret, eloquentia cum inſipientia minime conueniret. & loquium, quo ſimiliter in compoſitione duntaxat utimur, ut breuiloquium. multiloquium. ſtultiloquium. à quibus fiunt breuiloquus. multiloquus. grandiloquus. ſtultiloquus. blandiloquus. Item ſoliloquium, quod ſignificat ſermonem illius, qui contemplando ſolus ipſe ſecum loquitur. unde & ſoliloquus dicitur. & anteloquium primus loquendi locus, ſeu principatus loquendi. Macrobius. Hic aſſenſi omnes prætextato anteloquium detulerunt. Item à loquor loquax, hoc eſt uerboſus, garrulus. unde & corui, & aliæ aues, quæ humanam uocem imitantur, loquaces dicuntur. à quo fit comparatiuum loquacior, & ſuperlatiuum loquaciſſimus, & loquaciter aduerbium, & loquacitas nomen, quæ eſt ſtulta, & inanis copia loquendi. Cicero. Dummodo hoc conſtet, neq; infantiam eius, qui rem norit, ſed eam explicare dicendo non queat, neq; inſcitiam illius, cui res non ſuppetat, uerba non deſint, eſſe laudandam, quorum ſi alterum ſit optandum, malim equidem indiſertam prudentiam, quàm ſtultam loquacitatem. loquacitatis uitium in M. Cælio inſectatus eſt Cato, qui inquit, Nunquam tacet, quem morbus tenet loquendi, tanquam ueternoſum uiuendi, atq; dormiendi. quod ſi non conueniat, tamen comuocari iubet, ita eſt cupidus orationis, ut conducat, qui auſcultet. Itaq; auditis non auſcultatis, tanquam pharmacopolam. Nam eius uerba audiuntur, uerum ei ſe nemo committat, ſi æger eſt. idẽ de eodem Cœlio. Fruſto panis conduci poteſt, uel uti taceat, uel uti loquatur. Ob idem uitium, Homerus Therſitem ἀμετροεπῆ καὶ ἀκριτόμυθον, hoc eſt ſine iudicio, & ſine modo loquentem appellabat, & uerba illius multa, & ἄκοσμα, ideſt incompta, ſtrepentium ſine modo graculorum ſimilia eſſe dicebat. Nihil enim eſt aliud ἀμετροεπὴς κολῳός, hoc eſt ſupra modum loquax conturbabat. Eupolis loquacem hominem ita deſcribit. λαλεῖν ἄριστος, ἀδυνατώτατος λέγειν, hoc eſt ad loquendum optimus, ad dicendum ineptiſſimus. Quod Salluſtius noſter imitari uolens, loquax inquit magis, quàm facundus. Item à loquor, locutor deducitur. Gellius. Qui ſunt leues, & futiles, & importuni locutores, quiq; nullo rerum pondere innixi uerbis humidis, & lapſantibus diffluunt. & locutuleius, quod ſignificat eum, cuius lingua tam prodiga, infreniſq; eſt, ut teterrima quadam colluuione uerborum fluat ſemper, & æſtuet. hunc maiores noſtri modo à lingua linguacem, ſiue lingulacem, ſeu lingulacam, modo à blacterãdo blacteronem dixere. Blatire, & blaterare ueteres dicebant incondite, & inaniter loqui. factitia uerba ſunt, à uoce Camelorum tracta. Plautus. Qui malum intelligere quiſquam potis eſt, ita nugis blatis. Idem, Vbi tu es, quæ blaterauiſti iam uicinis omnibus. Quidam uolunt hoc uerbum à græcis deductum, apud quos βλάξ appellatur, qui ſeſe inaniter iactat. & βλακεία iactatio dicitur. quapropter. C. literã addentes, blacteronem, & blacterare ſcribendum exiſtimant. nobis prior ſententia magis placet. Qui hac licentia loquendi utuntur, uocem ex ore mittere dicuntur. Contra, Homerus Vlyſſem ſapienti facundia præditum, uocem ſcribit non ex ore, ſed ex pectore mittere, quod ſeruandũ eſſe ſapienti exiſtimat,

ut non tam inanem ſonum uerborum, quàm ſententiarũ conceptam altitudinem promere uideatur. ideo libertati linguæ uallum eſſe oppoſitum dentium dixit, ut temeritas loquendi non modo cordis uigilijs, ſed etiam dentium excubijs ſeparetur. Ariſtophanes poëta facetiſſimus uaſtam illam, atq; inanẽ hominum inſipientium loquacitatem pluribus uocabulis inſigniuit. ἄνθρωπον ἀγριοποιόν, αὐθαδόστομον ἔχοντα ἀχάλινον, ἀκρατὲς, ἀπύλωτον, στόμα περιλάλητον, κομποφακελορήμονα. hoc eſt hominem agreſti ferocia. ore temerario. infreni. prodigo. petulante. loquacem. futilem, & quadam uerborum congerie, ac faſtu profuſum. Heſiodus uitium hoc deteſtans non uulgandam linguam, ſed recondendam eſſe dicit, quaſi theſaurum. magnam quippe eius gratiam eſſe, ſi parca, & moderata ſit. Γλώσσης τοι θησαυρὸς ἐν ἀνθρώποισιν ἄριστος φειδωλῆς, πλείστη δὲ χάρις κατὰ μέτρον ἰούσης. quod dici latine poteſt. Optimus eſt homini linguæ theſaurus, & ingens Gratia, quæ parcis menſurat ſingula uerbis. Lepide etiam epicharmium illud ſe habet οὐ λέγειν δεινός, ἀλλὰ σιγᾶν ἀδύνατος. hoc eſt, non idoneus ad dicendum, ſed ad tacendum impos, ex quo illud ſumptum eſt, qui, cum loqui non poſſet, tacere non poterat. De hoc genere hominum locutus eſt Euripides, cum inquit, ἀχαλίνων στομάτων, ἀνόμου τ' ἀφροσύνας, τὸ τέλος δυστυχία. hoc eſt effrenati oris, & immoderatæ dementiæ finis eſt infelicitas. Item à loquor locutio, & loquela, quæ ſermonem, & uerbum ſignificat. præter hæc compoſita ab eo fiunt alloquor, quod eſt conuenio. Cicero. Cum pridie eius diei eum allocutus fuiſſem. ab hoc allocutio, & alloquium deriuantur. Circunloquor, per circuitum quendam declaro. à quo circunlocutio deriuatur, quam græci περίοδον nominant, ut ſi elephanti dentem pro ebore dicamus. interloquor aliquid inter agendum definio. à quo interlocutoria ſententia uocatur, quæ non definit controuerſiam. ea enim definitiua dicitur, ſed aliquid obiter decernit ad cauſam pertinens. Obloquor, quod proprie eſt contra loquentem loquor. Virgilius. Nec non threicius longa cũ ueſte ſacerdos Obloquitur numeris. Ponitur tamen aliquando pro maledico, unde oblocutores dicuntur maledici, obtrectatores. & oblocutio, obtrectatio. eloquor, quod aliquando pro loquor ponitur. Virgilius. Eloquar, an ſileam. à quo fit elocutio, quæ eſt ſermonis expreſſio. unde rhetores, & grammatici σχήματα λέξεως figuras locutionis nominant, ſicut σχήματα διανοίας figuras ſententiarum. Aliquando ſignificat dico, quod proprium oratoris eſt. à quo eloquentes dicuntur, qui in dicendi ratione perfecti ſunt. Et eloquentia dictio ex omni parte perfecta, & eloquenter aduerbium pro facunde. ut M. Antonius dicere ſolebat diſertos ſe uidiſſe multos, eloquentem uero neminem. Eloquium quoque ab eloquor dictum, quod modo ſermonem, modo facundiam ſignificat. Aliquando etiam pro elogio ponitur. Eſt autem elogium teſtificatio de aliquo ſiue honoris, ſiue uituperationis cauſa. honoris, Cicero, In quem illud elogium plurimum conſentiunt gentes, uirum eſſe ciuitatis primarium. uituperationis, Quintilianus. Si exhæredatum à ſe filium pater teſtatus fuerit elogio, propter quod is meretricem amaret. pro ſimplici autem ſententiæ ſuæ teſtificatione. Cicero. Solonis quidem ſapientis elogium eſt, quo ſe negat uelle ſuam mortem dolore amicorum, & lachrymis uacare. De eloquio. Plautus, dulci, ac blando eloquio amicam ſolatus. Apuleius, Platonis eloquio monitus non nobis ſolis nos natos eſſe. Claudianus, Eloquio dulces quondam ſolatus amicos. proloquor, decerno. ſententiam fero. à quo proloquium proprie dicitur ſententia, in qua ni-

hil, deſyderatur, ponitur etiam pro exordio, & principio, qđ & anteloquium, ut diximus. & à præloquor præloquium dicitur, & à græco λόγος, prologum. Plautus, exanimauit me prologo ſuo. Differtq; à prologo, quod prologus tantum eſt, ubi aut poëta excuſatur, aut fabula commendatur. Itē prolocutio à proloquor fit, quod pro proloquio ponitur. Colloquor, ſimul loquor. à quo colloquiū, & collocutio pro confabulatione, & collocutores, qui ſimul loquuntur. perloquor quoq; apud aliquos inuenitur pro perfecte loquor, hoc eſt ſermonem perficio. VNVM OPVS. Amphitheatrum ſcilicet. Vnus aliquando numeri principium eſt. Ouidius. Vnus erat toto naturæ uultus in orbe, Quem dixere chaos. Aliquando pro ſolo ponitur. Plautus. Vnus tum domi eram, & fores erāt clauſæ. Aliquando ſignificat præcipuum, ut hoc loco, & apud Virgilium. cadit & Ripheus iuſtiſſimus unus, Qui fuit in Teucris, & ſeruantiſſimus æqui. illud notandū eſt, qđ quando pro ſolo accipitur, cum genitiuo iungitur. Plynius. Accipēſer unus omnium ſquamis ad os uerſis contra aquas natando meat. Ab unus fit unoſe aduerbium, quo ueteres uſi ſunt pro ſimul, & unitas, et unicus. ideſt ſingularis, ut phœnix eſt unica auis, à quo fit unice aduerbium, hoc eſt ſingulariter. et Aduno uerbum, quod eſt in unum congrego, unde Adunati dicuntur, qui ſimul congregati ſunt, & ad unum aduerbialiter ſumptum, quod ſignificat nemine excepto. Curtius. Omnes ad unū periere. Virgilius. Iuppiter omnipotens ſi non dum exoſus ad unum. & unio uerbum, quod eſt coniungo, & quaſi unum facio. unde uniti animi dicuntur, quando unius ſunt uoluntatis, & unitio pro coniunctione, & iunctura accipitur. & unio nomen, quod aliquando concordiam ſignificat. Aurelius. Nam hoc fieri poſſe in tanta animorum unione quis dubitet? Aliquādo margaritum, qđ nullæ duæ margaritæ ſimul reperiantur, ſed ſemper diſcretæ, & unæ. Magnus in ijs hominum luxus ſemper fuit, quas indicus maxime Oceanus mittit. Verūtamen etiam Britanicus, fertiliſſima earum eſt Taprobane inſula, & Perimula Indiæ promontorium. In primis autem laudantur circa Arabiam in perſico ſinu maris rubri. conchæ ſunt haud multum ab oſtrearum conchis diuerſæ, quæ margaritiferæ dicuntur. Hæc, ubi genitali libidine ſtimulantur, pandunt ſeſe, & quodam roſcido conceptu grauidæ fiunt, deinde pariunt margaritas, pro qualitate roris accepti. Si purus influxit, candore conſpicuæ ſunt. ſi turbidus, ſordeſcit & fœtus. Si tempeſtiue ſatiantur, partus grandeſcunt, ſi fulgurat comprimuntur conchæ, & pro ieiunij modo minuuntur. Tonitruis pauefactæ, ac repente compreſſæ faciunt, quæ uocant Phyſemata à bullarum ſimilitudine. græci enim φυσήματα ampullas nominant, ſiue quas nos dicimus bullas. hæ margaritarum quidem ſpeciem habent, ſed aëre inflatæ corpus non habent, concharum abortus dicuntur. Sole rubeſcunt margaritæ, candoremq; perdunt ad ſimilitudinem corporis humani. flaueſcunt etiam ſenecta, ac rugis torpeſcunt, adhæreſcunt conchis, nec ab his, niſi lima auelli poſſunt, quæ ab una parte rotundæ ſunt, ab altera planæ, à tympanorum ſimilitudine, Tympana nominantur. Tympanum quippe inſtrumentum eſt ex una parte planum, membrana clauſum intus uacuum, quod baculo pulſatur. uti eo ſolebant in ſacrificio matris deûm, à quo fit Tympanites genus hydropiſis, de quo ſupra diximus, & tympaniſtria tympana pulſans, & tympanizo, tympana pulſo. Suetonius de Auguſto, Et aſſenſu maximo comprobauit uerſum in ſcæna pronunciatum de Gallo matris deûm tympanizante. uidēs ne, ut cynædus orbem digito temperet? Eſt etiam tympanum uehiculū tectum. Virgilius. Hinc radios triuere rotis, hinc tympana plauſtris.

Item tympanum inſtrumentum, ſeu machina eſt ad hauriendam aquam ſumma celeritate, quod hominibus calcantibus uerſatur ad hortos irrigandos, & ſalinas utile, cuius alterum genus dicitur tympanum dentatum, quo ſimiliter ad haurien das aquas utuntur, ſimile eſt ei tympano, cuius dentes impellendo cogunt fieri molarum circuitionem, & impendens in ea machina infundibulum ſubminiſtrat molis frumentum, & eadem uerſatione farina ſubigitur. Præter hæc Feneſtella, qui nouiſſimo tempore Tiberij Cæſaris claruit, Tympana ſcribit ſe iuuene appellata Patinas, & lances, quas antiqui Magidas appellauerunt. in aqua mollis eſt unio, exēptus, protinus dureſcit. Tradunt huiuſmodi conchas, quaſi apes, examina facere. his duces eſſe, quæ uetuſtate, ac magnitudine præcipuæ ſunt. Eas urinantium cura peti, quibus captis, cæteras palanteis ſtatim retibus includi tum mergi ſale in uaſis fictilibus, quarum eroſa carne, nucleos quoſdam corporum, hoc eſt uniones in ima decidere. Atteruntur uſu, coloremq; in diligentiam mutant. Dos omnis in candore, magnitudine, orbe. leuore. pondere. Qui colore præſtant, exaluminati uocantur. Sunt etiam quos Elenchos appellant, faſtigata longitudine alabaſtrorum figura in pleniorem orbem deſinentes, hos digitis ſuſpendere, & binos, ac ternos auribus fœminarum gloria eſt. Crotalia hæc à ſono uocantur, propter colliſionem ipſam Margaritarum, nam crotala inſtrumenta ſunt quæ manu pulſantur laminis quibuſdam ex ære rotundis ſonum ex colliſione reddentibus, dicta à pulſatione, κρότον enim græci plauſum uocant, & κροτεῖν dicunt pulſare, atq; percutere. utebantur hoc inſtrumento Aegyptij in deorum ſolennitatibus. Virgilius. Copa ſyriſca caput graia redimita mitella, Criſpum ſub crotalo docta mouere latus. Elenchi autem dicuntur, quia græci ἔλεγχον proprie indicem dicunt. etenim quomodo librorum indices & pulchritudine, ac uarietate colorum, & magnitudine literarum libros exornant, & res alias ſui indices, ita hi geſtantium habitum illuſtrare, & quaſi indices eorum uidentur eſſe. Iuuenalis. Auribus extenſis magnos committit elenchos. Magna eorum ſtultitia eſt, qui Cylindrum, & elenchum idem eſſe affirmant. Quippe Cylindri lapilli ſunt teretes, hoc eſt oblongi, atq; uolubiles, inſtar eius columnellæ, qua æquandis areis utimur. huiuſmodi enim formam Cylindrum uocamus, ἀπὸ τοῦ κυλίειν hoc eſt à uoluendo. Virgilius. Area tum primum ingenti eſt æquanda Cylindro. Atqui tali forma non reperiuntur Margaritæ, quas natura, non ars facit, etenim, ſi artificium addas, ſtatim deficit fulgor, in quo omnis earum dos conſiſtit, cæteri uero lapilli magna ex parte fieri teretes poſſunt, utputa Berylli, Smaragdi, & alij ſimiles, quos non auribus ſuſpendere mulieres, ſed circundare collo, aut innectere monilibus, ſiue alijs ornamentis conſueuerunt. Iuuenalis. Tu nube, atq; tace donant arcana cylindros. Idem, Nil non permittit mulier ſibi, turpe putat nil, Dum uirideis gemmas collo circundedit. hos antiqui Cylindros à forma, quemadmodum aliarum figurarum lapillos gemmas uocauere à ſimilitudine gemmarum, quas in uitibus, ſiue arboribus cernimus. Gemmæ enim proprie ſunt pupuli, quos primo uites emittunt, & gemmare uites dicuntur, dum gemmas emittunt. Plynius. de Beryllo. Indi mire gaudent longitudine eorum, ſoloſq; gemmarum eſſe prædicant, qui carere auro malint, & ob id perforatos, Elephantorum ſetis religant, & alios conuenit non oportere perforari, quoniam ſit abſoluta bonitas umbilicis ſtatim ex auro capita comprehendentibus. ideoq; Cylindros ex ijs facere malunt, quàm gemmas, quoniā eſt ſumma commendatio in longitudine. In noſtro mari reper-

ti ſunt aliquando uniones circa Boſporum thracium rufi, ac parui in genere concharum, quas myias uocant, & in Acarnania, quæ pinna uocatur, eos gignit. Itaq; non in ſolis margaritis reperiuntur uniones. In Britania paruos, ac decolores naſci manifeſtum, quoniam diuus Iulius thoracem, quē Veneri genitrici in templo eius dicauit, ex Britanicis margaritis factum eſſe teſtatus eſt. Lolliam Paulinam Caij principis coniugem, uulgatum eſt habuiſſe tunicam ex margaritis ſeſtertio tūc quadringenties æſtimatam. Duos autem conſtat fuiſſe uniones ob eximiam magnitudinem toto orbe celeberrimos. Vtrunque Cleopatra Aegypti regina poſſedit, quæ, cum Antonio edixiſſet, una ſe cœna centies ſeſtertiū abſumpturam, idq; fieri poſſe nequaquam putaret Antonius, additæ ſunt ſponſiones. Poſtero itaq; die magnificam cœnam ſed quotidianam Antonio appoſuit, qui cum eā irrideret, cōputationemq; expoſtularet, Corrolariū id eſſe Cleopatra dixit, conſumpturamq; ſe in ea cœna quantum promiſerat, confirmauit. Inferri itaq; ſecundā menſam confeſtim iuſſit, cumq; ex præcepto eius miniſtri unū duntaxat uaſculum aceti ante eam poſuiſſent, ſpectante Antonio, quid nam agere uellet, detractum ex auribus alterum unionem in uaſculum merſit, ac mox liquefactum abſorbuit, iniecerat alteri manum, ut idē faceret. ſed nequaquam id paſſus eſt ſponſionis eius iudex L. Plancus. uictumq; Antonium pronunciauit. Is poſtea unio, qui ſuperfuit, diſſectus in duas parteis, in utriſq; Veneris auribus Romæ in Pantheo poſitus fuit. Prior hoc idē in unionibus fecerat Clodius tragœdi Aeſopi filius in ampliſſimis opibus hæres relictus, ſingulis unionibus in cœna ad ſorbendum conuiuis appoſitis, unionis nomen maioribus margaritis impoſitum tempore iugurtini belli nonnulli prodidere. Margaritam, & margaritum dicimus, eandem generali nomine uocamus etiam lapillum. Nam lapillus & gemmarum, & margaritarum commune eſt nomē, ſubintelligiturq; pretioſus. Quod ſi maiuſculi fuerint, pretioſi lapides dicuntur. Nam quod Seruius ſcribit, gemmas diuerſi coloris eſſe, Margaritas uero albas, uel gemmas integras, margaritas pertuſas, planè ridiculum eſt. A gemma fit gemmula diminutiuum. Sabinus iuriſconſultus margaritas ſcribit lapillorum nomine non contineri, ſed hoc falſum eſſe multorum exemplo docetur. Curtius, lapilli auribus pendent. idem. pendebant ex auribus inſignes candore, & magnitudine lapilli. Horatius. Nec magis huic intra niueos, uirideiſq; lapillos. Vbi profecto de margaritis, & Smaragdis intelligit. Item ab unus unedo dicta, fructus eſt arboris, ſimilis terreſtribus fragis. Arbor ipſa unedo etiam dicitur, folio citro ſimilis fruticoſa. fructus anno matureſcit, pariterq; ſubnaſcēs floret, prior maturatur. Pomum inhonoratum eſt, ideoq; unedo dicitur, quod unum tantum mandi poſſit, græci κόμαρον, & μεμαίκυλον uocant. A noſtris alio nomine Arbutus appellatur. Virg. Et quæ nos rara uiridis tegit arbutus umbra. Et poma ipſa arbuta dicuntur. Idem, dant arbuta ſyluæ. Sunt qui ſcribant quinquagenum cubitorum altitudine in Arabia reperiri. fructus eius concoctioni difficilis, & ſtomacho inutilis eſt. putant ſuccum foliorum ſudore excitato peſtilentia laborantibus prodeſſe. Item ab unus unà aduerbium fit, quod ſignificat ſimul, & undeuiginti pro decem, & nouem, quaſi uno dempto de uiginti. eodem modo undetriginta, undequadraginta. undecentum, & undeuigeſimus, undetrigeſimus, undequadrageſimus, undequinquageſimus, undecenteſimus, et ſimilia. Et unigenitus filius, qui unicus eſt, quaſi ſolus genitus. ſicut primogenitus, qui primo genitus eſt, etiam ſi alij nō ſunt geniti. Et unanimis, qui unius animi, unius ſententiæ, unius uoluntatis cum altero eſt, unde et unanimem conſenſum dicimus, cum animo-

rum concordia eſt. Ab hoc unanimitas, hoc eſt animorum concordia deriuatur, & unicolor unius coloris. Et unicaulis herba, quæ unum caulem habet, nec in ramulos ſpargitur. Et unicuba mulier, quæ cum uno tantum uiro concumbit. Et uniuira, quæ unum tantum coniugem habuit. Et unicornus animal, quod græce μονόκερως uocatur. Et uniocutus, qui et monoculus dicitur, quod unum tantum oculum habet. Plautus. Vniocule ſalue, græci μονόφθαλμον appellant. Et uniuocum, cuius & nomen commune eſt, & eadē ſubſtantiæ ratio. qđ græce συνώνυμον dicitur. ſicut Aequiuocum, cuius nomen tantum commune eſt, ſed ſubſtantiæ ratio diuerſa. Et à græcis ὁμώνυμον appellatur. homo & Equus uniuoca ſunt, quia ſub uno animalis nomine comprehenduntur, & eadem eſt utriuſq; ſubſtantia. homo uerus, & homo pictus æquiuoca ſunt, quia de utroq; animal prædicatur, ſed ſubſtantia eorum diuerſa eſt. grammatici Homonyma dicunt eſſe, quæ uoce non ſignificatione conueniunt, ut nepos filius filij, uel luxorioſus. Synonyma quæ non uoce, ſed ſignificatione conueniunt, ut enſis, & gladius. Ab æquiuoco, & uniuoco fiunt uerba Aequiuocare, & uniuocare, & æquiuocatio, & uniuocatio nomina. Et Aequiuoce, & uniuoce aduerbia. Et uncia, quod una ſit ex duodecim partibus aſſis. Eſt etiam uncia menſuræ genus exiguæ, à quo quincuncem uocamus uaſculum, quinq; unciarum capax. Martialis. Quincunces puto poſt decem peractos. Et ullus quaſi unus aliquis. ullus enim idem eſt, quod aliquis. Sed hoc ab eo differt, quod nunquā ponitur affirmatiue. Neq; enim licet dicere, ullus homo currit, ſicut aliquis homo currit, ſed ſemper ponitur uel negatiue, ut non erat ullus, qui curreret, uel interrogatiue, ut eſt ne ullus, qui me uocet? uel ſubiunctiue, ut ſi ullus me uocabit, ſtatim adero. Ab hoc fit compoſitum nullus, quaſi non aliquis, uel ne unus quidem, quod ueteres etiā, ningulum dixere quaſi nec ullum. Martius. Nec ningulis mederi queat. Huius ſignificationis eſt nemo. Neq; enim uerum eſt, quod Seruius affirmat, Nemo idem ſignificare, qđ nullus homo, nam ſi ita eſſet, non adiungeretur homo, ut ſæpe fit. Cicero. Vtrum autem ſit nullus, dij immortales ſciunt. hominem quidem ſcire arbitror neminem. Salluſtius. Quo nemo uir melior, nec præſtantior. uerum eſt quod nemo de hominibus tantum dicitur. Plautus. Neminis me miſeret, nam mei miſeret neminem. Et de fœminis. Idem de lanificio mulierem neminem metuo una ætate quæ ſit. Aliquando etiam de dijs. Virgilius. Turne quod optanti diuûm promittere nemo Auderet. A nullus fit nullatenus, quod ſignificat nulla ex parte, nullo modo, & nullibi, hoc eſt nullo loco, & nonnullus, hoc eſt aliquis. & quo quidam utuntur, nulliter, hoc eſt fruſtra. Item ab unus deducitur uniuerſus. quaſi omnis ad unum, hoc eſt ſine aliqua exceptione. Significat autem in ſingulari totus, ut uniuerſus ager, uniuerſa campania. uniuerſus exercitus. In plurali uero omneis coniunctim. aliud enim eſt, ſi dicamus, omnes ſibi domicilium conſtituerunt. aliud uniuerſi ſibi domicilium conſtituerunt, illic ſignificatur domicilium ſibi unumquemq; conſtituiſſe, hic omneis ſimul, unum ſibi pro omnibus domicilium feciſſe. In quam ſignificationem cunctus etiam, & cuncti accipere ſolemus, propter quod cunctos quaſi coniunctos dici exiſtimant, et uniuerſos quaſi in unum omneis redactos. Ab illo fit cunctor uerbum, quod proprie ſignificat differo, moror. tractum abeo, quod cuncti, hoc eſt omnes ſimul ſine difficultate moueri non poſſunt. Ennius, unus homo nobis cunctando reſtituit rem. per metaphoram tamen aliquando cunctari pro dubitare accipitur. Virgilius. Cunctantem amplexu molli fouet. aliquando pro manere. Idem. Reginam thalamo cunctantem. Idem. Cūctanteis glebas ſcri-

bit, pro eo, quod eſt ualidas, magnas, graues. nam quæ grauia, & magna ſunt, ita in loco manent, ut non niſi cum difficultate inde moueri poſſint. A' cunctor fit cunctatio, hoc eſt tardatio, mora, dubitatio. & cunctanter aduerbium, hoc eſt cum mora, & tarditate. Et percunctor, quod ſignificat diligenter inquiro. Plau. Quid iſtuc in mente eſt tibi ex me mi uir percunctarier? percunctari hoc eſt quærẽdo immorari, ſiue percuncta inquirere. Nos tamen non cunctari, & cunctatio, & percunctari, ſed contari & contatio, & percontari cenſemus ſcribi debere, & non à cunctis, ſed à conto deduci, tractumq; eſſe à nautis, qui altitudinem aquæ contis pertentant, hoc eſt teretibus lignis, atq; acutis, qui et fuſtes, et ſudes dicuntur. itaq; contari eſt immorari, & quaſi contis uada rimari. Percontari uero interrogare, quamuis proprie ad finem coarguendi, ut Quintilianus teſtatur, cum inquit, quid enim, tam commune, quàm interrogare, & percontari? quorum utroq; indifferenter utimur, cum alterum noſcendi, alterum arguendi gratia adhiberi uideatur. Interrogare igitur adhibetur noſcendi gratia. percontari uero arguendi. Vniuerſale dicitur, quod ad uniuerſos pertinet. Et uniuerſitas generalitas, Et uniuerſaliter generaliter. Et in uniuerſum pro uniuerſaliter, & quod græci dicunt καθόλου. Quint. In uniuerſum autem præcipere. ideſt generaliter, & in commune præcipere, quod etiam generatim dicimus. Cicero. Infinitum mihi uidetur id dicere, in quo aliquid generatim quæreretur. Aliquando tamen generatim capimus pro eo, quod eſt per ſingula genera. Vir. generatim diſcite cultus, ſicut ſummatim, quod modo ſignificat per ſingulas ſummas. Apuleius. Omnia ſummatim tetigerat. modo breuiter, & omnibus quaſi ſimul comprehenſis. Plyn. Sed ut de hac re ſummatim dicam. Cuius ſignificationis ferè eſt in ſumma, et ad ſummam. Perinde enim eſt, ac ſi diceremus, quod ut ſummatim comprehendã, & magis modo loquendi, quàm ſignificato à ſummatim differunt. Quint. In ſumma non recedo, fas eſt mihi inuitis etiam parentibus pie facere Cice. Ad ſummam ne agam, de ſingulis communem totius generis humani ſocietatem, congregationem, & conciliationem colere, tueri, conſeruare debemus. Differt tamen ad ſummam, & ad ſummum. Nam ad ſummum refertur ad numerum, & aliquando ſine ad, dicitur ſummum, quod perinde eſt, ac ſi diceremus ad plus. Cicero. Vnus, aut ad ſummum duo inuenti ſunt, qui Milonis cauſam non probarent, ideſt non plures, quàm unus, aut duo. Quint. hoc modo dicendi uti frequenter ſolet per aduerbium ſemel. Deniq; ut ſemel finiam, ſic ferè componendũ, cum pronuntiabis, erit. Idem, & ut ſemel omnia complectar. Idem. Et, ut ſemel, quod eſt potentiſſimum dicam, ſecretum me dicendo perit. ideſt in ſumma dicam. Cuius rei cauſa eſt illud ſemel, quod ſignificat uno, ut ita dicam, tempore, uel uno loco pro omnibus, ideoq; accipitur pro immutabiliter, & irreuocabiliter, quia quod ſemel tantum fit, non habet regreſſum, ut rurſus fiat. Idem. Quid hæc fulgentium ſyderum uenerandæ facies, quod quædam ueluti infixa, & cohærentia perpetua ſemelq; capta ſede colluceant, alia toto ſparſa cœlo uagos curſus certis emetiuntur erroribus. Virgilius. Procubuit moriens, & humum ſemel ore momordit. Ouidius. nulla reparabilis arte, Læſa pudicitia deperit illa ſemel. Lucanus. dixitq; ſemel naſcentibus author. Quicquid ſcire licet. In eundem ſenſum Quint. accipit breuiter, & alij quidam præclari authores. Quint. Breuiter tamen longe crudelitatis explicanda ſæuitia eſt, ex omnibus, quæ protuli, leuiſſimum fuit, quod omiſſus eſt. Plyn. A' reliqua uero Gallia, cultu uirorum morum dignatione, amplitudine opum, nulla ei prouinciarum præferenda, breuiterq; Italia uerius, quàm Prouincia. Idem de luſcinia

Spiritus plenus, grauis, acutus, creber, extentus. ubi uiſum eſt, uibrans, breuiterq; omnia tam paruulis in faucibus, quæ tot exquiſitis tibiarum tormentis ars hominum excogitauit. Item ab unus deriuatur uter, quod ſignificat, quis unus ex duobus. poniturq; uel interrogatiue, ut uter ueſtrum hoc fecit? uel indefinite, ut neſcio uter ueſtrum hoc fecerit. hoc eſt quis unus ueſtrum hoc fecit, uel fecerit. Notandumq; eſt in hoc nomine, quod ut alterum eleganter dicimus. Plynius. Vter alteri dixerit neſcio, & uter utrum. ſimiliter Cicero. Vter utri inſidias fecerit. Ab hoc fit Vterq;, quod ſignificat ambo. hoc tamen inter ſe hæc duo nomina differunt, quod, cum utrunq; aliquid feciſſe dicimus, & ab hoc, & ab illo ſeparatim id factum intelligimus, ut uterq; ſibi domum ædificauit, ideſt & hic ædificauit ſibi domũ, et ille. cũ uero ambo dicimus feciſſe, ab utroq; coniunctim id factum oſtendimus, ut ambo ſibi monimentum conſtituerunt, hoc eſt hic, & ille ſimul unum ſibi commune monimentum fecere. propter quod utrunq; alterum uerberaſſe recte dicimus, hoc eſt hunc illum, & illum hunc uerberaſſe. Cice. Quorum uterque ſuo ſtudio delectatus contempſit alterum. Quint. Cũ enim uterq; alteri obijciat, palam eſt utrunq; feciſſe. Eodem modo utrunq; utriq; aliquid feciſſe. Terentius. Quia uterq; utriq; eſt cordi. Hircius, interim diſſenſione orta inter Achillem, & Arſinoën, cum uterq; utriq; inſidiaretur, & ſummam imperij ipſe obtinere uellet. ambos autem alterum uerberaſſe, uel ambos uerberaſſe ambos, non recte dicimus. ſignificaretur enim ambos ſeipſos uerberaſſe. Quod ſi recte loqui uelimus, ita dicendum eſt, ambo ſe mutuo uerberarunt. Ambo à græco deductum eſt, græci enim ἄμφω dicunt. Item ab uter fit utrum aduerbium interrogantis. Plau. Vtrum id uerum putas, an non? Aliquando etiam dubitantis. Seneca. Vtrum id nobis conueniat, animaduertendum, Item uterlibet, quod non ſignificat uterq;, ut quidam ignari exiſtimant, ſed alter ex duobus, hoc eſt uter quem tibi capere libet, ſicut uteruis uter quem tu uis. Quod idem in quiuis, & quilibet accidit, quæ non ſunt uniuerſalia, ut multi exiſtimant, ſed particularia. Nihil quippe eſt aliud quiuis, quàm unum, quẽ tu uis, & quilibet, quàm unus, qui tibi magis libet. hoc enim differunt uteruis & uterlibet, à quiuis, & quilibet, quod illa unum ex duobus ſignificant, hæc unum ex pluribus. Terentius. Ab quiuis homine, cum eſt opus beneficium accipere gaudeas, uerum enimuero id demum iuuat, ſi quem æquum eſt facere, is benefacit. Quintilianus. Periculoſum, & cum cura intuendum genus, quia ſi in proponendo unum quemlibet amiſerimus, cum riſu quoq; tota res ſoluitur, tutius ſic interrogare, ſi hæc actio non ſit, quæ ſit, ſimul enim remouentur omnia, uel cum duo ponentur inter ſe contraria, quorum tenuiſſe utrumlibet ſufficiet. Ecce in eodem loco Quintilianus utrumlibet, & quodlibet uſus altero pro eo, quod eſt unum de duobus, altero pro eo quod eſt unum de pluribus. Hieronymus. Adducetur ad Aaron, uel ad unum quemlibet filiorum eius, quod græce ita ſcribitur πρὸς ἀαρὼν ἱερέα ἢ ἕνα τῶν υἱῶν αὐτοῦ, hoc eſt ad Aaron ſacerdotem, ſeu ad unum filiorum ipſius, quod in cæteris quoq; à libet compoſitis accidit. Etenim quantalibet ſtatura, quantumlibet ſpatium non omnẽ quantitatem ſtaturæ, & ſpatij ſignificat, ſed unam quantam tibi capere libuerit. præterea utrobique aduerbium, quod ſignificat in utroq; loco. Et utrinq;, ex utroq; loco. Et utraq; per locum, & utroq;, ad utrunq; locum. præterea neuter, quod eſt uterq; cõtrariũ, ſignificatq;, nec hic, nec ille. In quo dĩ aduertendum eſt, quod neuter alterum ſemper dicimus. non autem neuter neutrum, ſicut uterq; utrunq;. Nam, ſi ita dicamus, Neuter alterum diligit, hoc ſignificamus, neq; ille hunc diligit, neq; hic

illum, quod ſi neuter neutrum diceremus, ſignificaremus, ne ſe quidẽ ipſum utrũq; diligere. Item ab unus deriuatur unuſquiſq; dictio uniuerſalis, & unuſquiſlibet, ac unuſquiuis, quæ idem ſignificant, quod quilibet. omni loco, ex omni parte, ex omni regione, & unquam quaſi uno quouis tempore, à quo nunquam, ideſt nullo tempore, unde deducitur nonnunquam, quod ſignificat aliquando, & nunquam non, quod ſignificat ſemper. Item uſquam, quod ſignificat alicubi, quaſi uno quouis loco. Et nuſquam nullibi. à quo nonnuſquam alicubi. Et nuſquam non, ubicunq;. Et uſquequaq;, hoc eſt paſſim, quaſi in unoquoq; loco, ſiue in unoquoq; tempore, & uſque quaſi ad unum uel locum, uel tempus, uel aliud huiuſmodi, ut Vſpiam, quod ſignificat uſquam, & unde quaſi de quo uno loco. à quo Vndeuis, & Vndelibet, ideſt ex uno quouis loco, & uſquequò quaſi ad unum aliquod tempus, uel locum. Item ab unus unda deducitur, quod unà ſit, hoc eſt ſimul unita, & in ſe coacta. Vnda enim proprie pars aquæ in ſe collecta appellatur, & in unam partem tendens, ut cum fluctuat mare. unde undoſum pelagus, hoc eſt fluctuoſum dicimus, & undabundum. Gellius. Quibus nihil ſpirantibus, undæ tum factæ diutius tument, & à uento quidem iandudum tranquilla ſunt, ſed mare eſt etiã, atq; etiam undabundum. & undiſonum, quod undis ſtrepat, unde mare undiſonum dicitur. Et undatim, fluctuatim. uel undatim ad ſimilitudinem undarum, & undare, fluctuare, hoc eſt undas facere. à qua ſimilitudine, & aërem, & nubes, & fumum undare dicimus, quoties undarum inſtar mouentur. Ab hoc fit inundo, quod interdum abſolute ponitur, & ſignificat creſco. & extra alueum uerſor. Plynius. Ante, quàm Nilus inundaret. aliquãdo actiue, & ſignificat abluo. Idem. Agros, & ſata omnia inundauit. hinc fit inundatio, quæ pro diluuio ponitur. Seneca. Quidam conflagrationi, atq; diluuio tempus aſſignant. Arſura enim terrena contendunt, quando omnia ſydera in Cancrum conuenient. inundationem futuram, cum eadem ſyderum turba in Capricorno conſiſtet. Item abundo, quod proprie ſignificat affluo, & ſupra modum aliquid habeo. Virgilius, Ergo apibus fœtis idem, atq; examine multo Primus abundare. tractum ab amnibus, qui, quo maioribus, ac crebrioribus imbribus augentur, tanto eriguntur magis, & ideo abundare dicuntur. idem, Preſertim incertis ſi menſibus amnis abundans Exit. ab hoc abundanter, & abunde aduerbia pro copioſe deducuntur. Item Redundo, quod aliquando pro redeo capitur. Plautus. Hoc facinus in tuum redundabit caput. Interdum pro abũdo. Plynius. Redundant opes, uitia rebellant. Item exundo, quod eſt alueum exeo. à quo fit exundatio. Ab unda fit diminutiuum undula, & compoſitum undiſonus, hoc eſt fluctuando ſonitum reddens. & undulata ueſtis, quæ fit ex hircorum, & caprarum pilis potius, quàm lanis, quod ad undarum ſimilitudinem picta ſit, non ut quidam exiſtimauerunt, quod pura ſit, ſic enim ab undis undulatæ ueſtes dicuntur, quomodo à ſcutulis ſcutulatæ. Varro, & à quibuſdam dicitur eſſe imaginis fortunæ ſimulachrum, ab eo, quod duabus undulatis togis eſt opertum, perinde, ut olim reges noſtri undulatas, & prætextas togas ſoliti ſunt habere. Item aliud cõpoſitum undiuomus, hoc eſt aquas uomens. Vnda enim aliquando pro aqua ponitur, ut pars pro toto. Ouidius. & terris miſcuit undas. Item ab unus uncus, ut quidam exiſtimant, quod unicus ſit, cum duo eſſe uideantur. Eſt enim uncus fuſtis, ab uno latere incuruus, ac ſeſe retorquens, ſed hoc falſum eſt, nam uncus à græco fit. græci enim ὀγκοῦσθαι extuberare, & intumeſcere dicunt, & ὄγκον tumorem, à quo ὄγκινον uncum, ſiue uncinum, quodubi incuruatur, quodã

modo tumeſcere, atq; extuberare uidetur. Ab hoc fit uncus adiectiuum, hoc eſt incuruus, à quo aduncus, & uncinatus uncinis armatus. Cicero. Nec ut alæ aſperis, & leuibus armatis, uncinatiſq; corpuſculis concreta hæc eſſe dicat. & inunco uerbum, quaſi unco inuado, & arripio. Lucilius. Aut qui numos triſtis inuncat. Item ab unus deriuatur ungo, ſiue unguo quaſi unum ago. ungendo enim complanatur caro, atq; unitur. Ab hoc fit unguentum, ſiue ungentum, quod non eſt (ut uulgus exiſtimat) tenax illa compoſitio, qua chirurgi utuntur ad uulnera curanda, ſed commiſtio diuerſorum odorum addito oleo, aut balſamo, aut aliquo pingui ad ungenda corpora, deliciarum, & luxuriæ cauſa inuenta. Qui primus unguentum inuenerit, non conſtat. iliacis certe temporibus non erat in uſu. Primum de eo legitur, quod caſtris Darij regis expugnatis, inter reliquum apparatum Alexander unguentorum ſcrinium cepit. IC VBI SYDEREVS. Laudat Domitianum, quod ex una Neronis domo plura ædificia publica in ſolatiũ populi conſtruxerat. INVIDIOSA ATRIA. Odioſa. quia totam urbem occupare Neroniana domus uidebatur, & ad eam ædificandam, ut ſpatia quædam circa eam haberet, urbẽ Nero incenderat, quin etiam horrea quædam propinqua, quod ſaxeo muro conſtructa erant, bellicis machinis aperte fuerat demolitus, & incendium ipſe è turre mecœnatiana proſpectans, ac flammæ pulchritudine lætus, Haloſin ilij ſcenico habitu decantauerat. Inuidere proprie eſt ex alicuius rebus ſecundis dolore affici, tractum à nimis uidendo, quod nimis intuemur fortunam illius, de cuius felicitate ſumus ſoliciti. quapropter minus fortaſſe uſitate, ſed præclare Accius accuſatiuo cõiũxit. Quisnam florem liberum inuidit meũm? ut enim uidere, ſic inuidere florem rectius, q̃ flori dicitur. Nos conſuetudine (ut Cicero inquit) prohibemur. Poëta ius ſuũ tenuit, & dicit audacius. Ab hoc fit paſſiuum inuideor, à quo inuiſus, hoc eſt odio habitus. Cice. Dijs, hominibusq; inuiſus. Itẽ inuidia, & inuidẽtia quæ inter ſe differunt, ut ebrietas, et ebrioſitas. Quippe inuidia eſt, cum inuidetur, hoc eſt actus ipſe inuidẽdi. Inuidẽtia uero eſt ægritudo animi, quæ propter res ſecundas alterius ſuſcipitur, quæ nullam iacturam afferant inuidenti. Nam, ſiquis doleret eius rebus, à quo ipſe læderetur, nõ recte diceretur inuidia. Item inuidus, & inuidioſus, quæ eo modo inter ſe differunt, quo ebrius, & ebrioſus. Inuidus. n. dicitur, q actu alicui inuidet. inuidioſus, qui morbo inuidentiæ laborat. Ouidius. Tempus edax rerũ, tuq; inuidioſa uetuſtas Omnia deſtruitis. interdum tamen inuidioſus paſſiue capitur pro eo, cui habetur inuidia. idem, Pactolonq; petit, quanquã non aureus illo Tempore, nec caris erat inuidioſus arenis. Liuius, Nactus ſuperbum ingenium, immodicamq; linguam, quam irritando, agitandoq; in eas compelleret uoces, quæ ei inuidiæ eſſent, hoc eſt odium concitarent. Hinc inuidioſum pro inuiſo, atq; odioſo accipitur, ut hoc loco, & inuidioſa res dicitur, quæ atrocitatem facti auget, ut maius cõcitet odium. Aliquando etiam inuidioſus actiue accipitur pro odio flagrans. Ouidius. Ante Iouem paſſis ſtetit inuidioſa capillis. idem. Etiam contigerant portam, Saturnia, cuius Dẽpſerat oppoſitas inuidioſa ſeras. Gellius uſus eſt comparatiuo inuidius, pro inuidioſius, hoc eſt concitatioris odij in aliquem. Fortius, atq; inuidius potuiſſe dici non uidentur. Ab inuidia fit diminutiuum inuidiola. Cice. Cum neſcio quid inter eos inuidiolæ exortum fuiſſet. Odium uero ab odi deducitur anomalo uerbo, q̃d ſignificat odio habeo. à quo oſus, & peroſus dicitur, qui odio habetur. Plau. inimicos ſemp oſa ſum optarier. & oſor, qui aliquem odit, & odioſus, modo qui odio habetur. Cice. O' rem grauẽ, & omnibus odioſam. à quo odioſe aduerbium, cum odio. modo moleſtus. Teren. Si porrò eſſe odioſi pergitis. Nam & odium à ueteribus pro moleſtia accipiebatur. In oſus terminata nomina, partim à nomine deſcendunt, partim à uerbo, partim ab utroq;. Et ea quidem, quæ deſcendunt à nomine, habitudinem, ſiue uehementiam, copiamue, aut affectionem ſignificant, ut animoſus. ingenioſus. la-

certoſus. neruoſus. ſaxoſus. aquoſus, q̃d habent in ſe uehementiam, ſiue copiam ſaxorum. neruorum. lacertorum. ingenij. animi. uinoſus. libidinoſus. mulieroſus. ſeditioſus. factioſus. quod amant uinum. libidines. mulieres. ſeditiones. factiones. Rurſus quæ à uerbo ſunt, partim actionem ſignificant, partim paſſionem, partim utrunq;. Voluptuoſus. religioſus, licet à uerbo non ueniant, iſtis tamen ſimilia ſunt, & affectionem ſignificant, ſiue habitudinem, ſiue plenitudinem, ſimulq; actiue accipiuntur, & paſſiue. uoluptuoſus homo, q uoluptatem amat, uoluptuoſa res, quæ plena eſt uoluptatis, qua homo delectatur. ille recipit. hæc recipitur. ita religioſus homo. religioſa ſepulchra. glorioſus. famoſus. imperioſus. licet interdum ſignificent eum, qui plenus ſit gloria, fama, imperiumq; poſſideat, tamen ſepius glorioſum hominem dicimus affectantem gloriam, famoſum, infamem, & turpem. imperioſum, oſtentatorem imperij in exercenda ſæuitia. Quæſtuoſus. ſumptuoſus ab affectione magis, quàm ab habitudine, ſiue plenitudine dicuntur, & ad homines magis pertinent, quàm ad rẽ. Luctuoſus uero magis ad rem, ut res luctuoſa, quæ luctu plena eſt. Moroſus à more, hoc eſt à nimia diligentia, & ſecuritate, ſicut curioſus à nimia cura, ſiue peruerſa cura. & cerebroſus, à peruerſo cerebro. Hora. donec cerebroſus proſilit unus. ideſt inſanus, & puerſi cerebri. Cerebrum, cuius diminutiuum eſt cerebellũ, uiſcerum omnium excelſiſſimum eſt, proximumq; cœlo capitis, ſine carne, ſine cruore ſine ſordibus. hic homo ſenſuum arcem habet. huc uenarum uis omnis à corde tendit. hic deſinit. hic culmen altiſſimum. hic mentis eſt regimen. ab eo proficiſcitur ſomnus. quæ cerebrum non habent, non dormiunt. homo portione maximum, atq; humidiſſimum habet, omniumq; uiſcerum frigidiſſimum, duabusq; ſupra, ſubterq; membranis uelatum, quarum alterutram rumpi mortiferum eſt. Aliud eſſe quàm medullam ex eo percipitur, quod coquẽdo dureſcat. inſunt medio oſſicula parua. uni hominum in infantia palpitat. nec roboratur ante primum ſermonis exordium. Pãnoſus dicitur, qui craſſo panno, ac uili opertus eſt. ATRIA. Prima pars domus, pluralis pro ſingulari. Atrium prima pars domus appellatur, quæ continet mediam aream, in quam collecta ex omni tecto pluuia deſcendit. Dictum atrium, uel quia id genus ædificij Atriæ primum in Hetruria ſit inſtitutum, uel quod à terra oriatur, quaſi aterarium, uel quod atrum ex fumo eſſet propter culinam. in atrio enim tria habitacula erant. Veſtibulum locus ſportularum, qui & ipſe Sportula dicebatur, ubi proponebãtur eo die, quæ dono danda erant. & culina, quanquam ueſtibulum proprie locus ſit ante ædes, quemadmodum inferius oſtendemus. Atrum proprie nigrum ſignificat, unde atritas à ueteribus nigredo dicebatur. Virg. Quinquaginta atris immanis hiatibus hydra. Idem, hic piſcibus atram Improbus illuuiem. Ex hoc atramentum deducitur, cuius duo genera ſunt. Atramentum ſcriptorum, quod & librarium dicitur, & à tectorijs tectorium, quo inſcribendo, ac pingendo utimur, & atramentum ſutorium, quod inficiendis pellibus ſutores uſurpant. Græci à quadam ſimilitudine æris uocant calcanthum. quippe apud eos æs dicitur χαλκόν. uulgo hoc à uitri ſimilitudine uitriolum nominant. fit multis in locis, præcipueq; in Hiſpania à puteis, ſtagniſq; habentibus. id genus aquæ decoquitur, ea admiſta pari menſura dulcis

aquæ, & in piſcinas ligneas funditur. Immobilibus ſuper has tranſtris dependent reſtes lapillis extentæ, quibus adhærens limus, uitreis acinis imaginem quandam uuæ reddit, exemptum triginta diebus ſiccatur. Color eſt cœruleus ſpectabili nitore, uitrumq; eſſe creditur. diluendo fit atramentum tingendis aptum corijs, & hoc factitium uocant. Eſt & aliud genus, quod foſſile dicitur, uarijs medicinæ uſibus adhibetur, præſertimq; in aſtringendo, in quo tanta eſt uis eius, ut ſiurſorum, & leonum ora eo aſpergantur, mordere non poſſint, Hinc etiam atra bilis dicitur, quam græci melancholiam uocant. nã bilis cholera eſt, unde bilioſi dicuntur cholerici. Aphri tamen bilim uocant ſemen humanum humi proiectum, & bilutes ueteres dixere beſtijs ſimileis, quaſi bellutas. Item olus atrum, ſiue in compoſitione oliſatrum, alio nomine hippoſelinum dictum, quod folia habeat ſubnigriora, propter quod Columella pullum olus appellat, atq; oleris pulli radix. quidam etiam ſmyrnium uocant, à ſmyrna. i. myrrha, quod lachryma caudicis ſui myrrha ſit, quidã petroſelinon, quod inter petras, & iuxta maceriam ſeri à ueteribus conſueuerit. Gal. ὀνομάζουσι δ᾽ ἐν ῥώμῃ σαφῶς ἤδη πάντες οὐ σμύρνιον, ἀλλ᾽ ὀλίσαθρον τὸ πετροσέλινον, hoc eſt, uocant iam omnes in urbe Roma non ſmyrnium, ſed oliſatrum herbam hanc, quæ petroſelinũ dicitur, radicem myrrhæ ſimilem odore, habet etiam libanotis, quam alio nomine roſmarinum uocamus. Plyn. Libanotis radicem habet oliſatri, nihil à thure differentem. Sunt qui atriplex quoq; ab atro dictum putent, quod homines pallidos faciat. Pythagoras hãc herbam accuſat, tanquam facientem hydropicos, & morbos regios, & pallorem, ac ne in hortis quidem aliquid circa id, niſi languidum naſci affirmat. Veteres hanc atreplexum dixere. Item ab atro atritatem pro immanitate dictam conſtat, & atratum lugũbri habitu indutum, & atrocem, hoc eſt aſperum, crudelem, quod qui atro uultu ſunt, aſperitatem, ac ſæuitiã præ ſe ferunt. alij tamen atrocem à græco potius appellatum cenſent, quod græci ἀτρώκια appellant, quæ cruda ſunt, uel ab eo, q̃d atroces nihil de ſe timent. φεῖν enim timere eſt. ab atrox fit atrocia, & atrocitas, & aduerbium atrociter. Atraces populi ſunt Aetoliæ, quibus nomen dedit Atrax Aetoliæ filius. Aliquando etiam atrum pro funeſto accipitur, unde atros dies ſupra diximus eos appellari, qui alio nomine communes, & uulgo ægyptiaci dicuntur. Ab atterendo autem atrum dictum eſt, quoniã quæ atteruntur, liuorem contrahũt. Atrium græci uocant αὐλὴν, propter q̃d poëtæ quoq; noſtri aliquando aulam pro atrio uſurpant. Item aulæ, principum domus, hoc eſt regiæ dicuntur. Seneca, Notiſſima uox eſt eius, qui in cultu regum conſenuerat, cum quidam illum interrogaret, quo modo rariſſimam rẽ in aula conſecutus eſſet ſenectutem, iniurias inquit accipiendo, & gratias ſæpe agendo. Ab hac aulæa dicta ſunt uela, & ornamenta, quibus parietes, & aulæ teguntur, quæ parapetaſmata, & periſtromata nominantur, ſicut tapetes, ſiue tapeta, ſeu tapetia dicuntur, quibus equi, menſæ, ſiue pauimenta ſternuntur. Plau. Vt ne periſtromata quidem æque ſint campanica, neq; Alexãdrina belluata conſuta tapetia. Vir. Inſtratos oſtro alipedes, pictiſq; tapetis. Varro. Et minute pictis tapetibus capiunt ſomnos. Ideo autem ab aula aulæa dicta exiſtimant, q̃d primũ in aula Attali regis Aſiæ inuenta ſunt, cui ſucceſſit populus romanus. Genus etiam ueſtimenti eſt, de quo inferius dicemus. Item adulor uerbum, quod eſt uoce, uel geſtu fauorem capio, de quo inferius dicemus, quaſi adaulor, quod hoc in aulis maxime fieri ſoleat. quidã tamen à græco potius hoc deriuatum exiſtimant, hoc eſt ἀπὸ τοῦ δουλεύειν, quod eſt inſeruire. Veteres aulas dicebant, quas nos dicimus ollas, unde aulicocia

uocantur exta, quæ in ollis coquuntur, hoc eſt elixa. & Plau. fabulam ſuam ab aula, hoc eſt olla inuenta aulularium nominauit. Aulula, aulæ diminutiuum eſt, & interdum uocatur auxilla. Eoſdem pecuniam quoq; in atrio tenere ſolitos legimus. unde honoratiores ſerui liminum cuſtodiæ adhibebantur. ab Atrio atrienſes. FERI. Crudelis, quẽadmodum ſupra diximus, hoc autem Neronis epithetum eſt, qui omnium, quos terra ſuſtulit, crudeliſſimus fuit, cuius rei illa eius uox inſigne teſtimonium eſt. Nam, cum quidã in ſermone communi (ut fieri ſolet) dixiſſet ἐμοῦ θανόντος γαῖα μιχθήτω πυρί. hoc eſt me moriente, terra miſceatur igni, immo inquit ἐμοῦ ζῶντος, hoc eſt me uiuente. hinc proprium nomen in appellatiuum commutatum eſt, & nerones nunc crudeles dicimus, & neroniores, crudeliores. REGIS. Domini. rex proprie dicitur, qui regnum poſſidet. regna autem dicuntur integræ regiones, quæ ab uno principe, hoc eſt rege poſſidentur, ut Gallia regnum eſt, & qui Galliã poſſidet, rex Galliæ dicitur. Sic enim diſtinctus erat olim orbis terrarum, ut ſingulæ ferè regiones regna dicerentur, & reges proprios haberent, à quibus & ipſæ regiones appellatæ, quos ad faſtigium maieſtatis non ambitio popularis, ſed uirtus, & ſpectata inter bonos moderatio prouehebat, populi nullis legibus coërcebantur, arbitria regum pro legibus erant. regna, nationes ipſæ, & merũ, ac linguæ ſimilitudo definiebant. Sic Aſſyriorum rex primus Ninus fuit, ſic Aegypti Vezores, ſic Syriæ Tanaus, ſic aliarum nationum alij reges fuere, quibus principio mos fuit fineis imperij tueri, magis quàm proferre. Poſtea uero gerere inter ſe bella cœperunt, ſeq; inuicem regnis ſpoliare. Sic plurium, ac diuerſorum regnorum unus aliquando rex fuit. Quod ſi non in unius regis, ſed in alicuius populi imperium regnum peruenit, fit ex regno Prouincia, quod nomen inde tractum eſt, quod porrò, ideſt longe uicta uideatur. Prouinciæ enim proprie dictæ ſunt longe ab Italia bello acquiſitæ, à quibus prouinciales uocati, qui ex prouincijs ſunt, ſiue (ut Vlpianus inquit) qui in prouincia domicilium habent. & prouinciatim aduerbium, per ſingulas prouincias. Et quoniam prætores ad eas gubernandas mitti ſolebant, factum eſt etiam, ut ipſi magiſtratus, & omne onus nobis impoſitum, Prouincia appelletur. Teren. O' Geta prouinciam cepiſti duram. aliquando etiam diuiſa ſunt regna, & pars una ſubiecta alicuius imperio. Is non rex, ſed regulus dictus eſt, quaſi paruus rex. à quo principes, qui hac etiam ætate urbeis aliquas, aut oppida poſſident, reguli, ſiue generali uocabulo domini, aut principes dicuntur. quamuis proprie reguli ſint filij, aut nepotes regum. Dici tamen reges poſſunt, etiam ſi unius tantum urbis imperium habeant. ſic principio reges Romanorum dicti ſunt, quibus imperium urbis permittebatur. hinc regnum dictum tam ipſa regio ſubiecta, quàm ipſe dominatus. Vnde interregnum proprie appellatur id tempus, quo regnum uacat rege, hoc eſt ante, quàm in demortui locum nouus rex præficiatur. & interrex, qui interea regis locum tenet. per metaphoram tamen interregnum eſt dictum, cum loco magiſtratus interrex creatur. Liuius, cum ſine curuli magiſtratu reſpu. eſſet, patritij coiere, & interregem creauere, contentio conſulesne, an tribuni militum crearentur in interregno, rem complureis dies tenuit. Aliquando rex ponitur pro domino, etiam ſi per tyrannidem occupauerit imperium, ut hoc loco. Eſt etiam quando rex capitur pro potentiore, & eo, quem nobis ueluti in patronum eligimus, quem ſequamur. Martialis, Qui rex eſt, regem maxime non habeat. Columella, An honeſtius duxerim mercenarij ſalutatoris mendaciſſimum aucupium circumuolitantis limina potentiorum, ſomniumq; regis ſui rumoribus

Vnde iuris prudentes dicuntur, qui ius ſciunt. et iuris prudentia, iuris ſcientia. & prudens feci, ideſt ſciens me hoc facere, feci. quemadmodum e contrario imprudens hoc feci, ideſt non putaui me hoc facere, quod feci. hoc tamen inter ſe differunt prudens, & ſciens, quod prudens eſt, qui intelligentia ſua aliquid cognoſcit.

ſciens, qui alterius indicio rem percipit, hoc eſt prudens per ſe, ſciens per alios. Item prudenter aduerbium, quod modo ſcienter ſignificat, modo ſapienter. & imprudentia pro inſcientia. & inſipientia, ſiue ſtultitia. & imprudenter pro inſipienter, & ſtulte. Item à uideo fit euideo, hoc eſt clare, & expreſſe uideo. à quo euidens clarus. & euidenter clare. Item inuideo, de quo unà cum ab eo deriuatis late ſuperius diſſeruimus. Videor tibi recte facere, & non uideris mihi recte loqui. & uidemur uobis male facere, & alia huiuſmodi ſimiliter. Sunt etiam qui auidum à non uidendo dictum putant. Auidus enim proprie dicitur, qui propter nimiam cupiditatem non uidet quid agat. A' quo auide aduerbium, cupide. & auiditas, cupiditas. & aueo, cupio. de quo auarus, qui nimium cupidus eſt pecuniæ. & auaritia, habendi cupiditas. & auare aduerbium, tenaciter. & comparatiua, & ſuperlatiua eorum auarior, auariſſimus, auarius, auariſſime. Quidam etiam auarum, quaſi auidum æris dictum putant. & ab auido ita diſtinguunt, ut auarus ſemper in malam partem accipiatur, Auidus autem etiam rerum honeſtarum dicatur. Salluſtius. Laudis auidi, pecuniæ liberales erant. Auara terra dicitur, cum id, quod in ſe recipit ampliore fœnore non reddit. Auere etiam à nimia cupiditate pro gaudere accipitur. Paulus iuriſconſul. coniunctã, uel diſiunctam orationem accipit ex mente pronuntiantis, quãuis nec coniunctionem habeat, nec diſiunctionem. Coniuncta pro diſiun=

Super pecunia, tutelâue ſua, cum tutor ſeparatim ſine pecunia dari non poſſit, ſed dubitandum uideri poteſt, uerba illa quomodo accipienda ſint, ope, et conſilio, utrum ex ſententia coniungentium, an ſeparantium, uideturq́; melius, quod Labeo ſcribit, ſeparatim accipienda, quia aliud factum eſt eius, qui ope, aliud eius, qui conſilio furtum fecit. Sic enim alij condici poteſt, alij non poteſt. Et ſanè poſt ueterũ authoritatem conuẽtum eſt, ut nemo uideatur furtum feciſſe, niſi & conſilium malignum habuerit, nec conſilium habuiſſe nocendi, niſi & factum ſecutum fuerit. Plau. Tũne etiam id reſciſti miſer? & etiamnum eiuſdem ſignificationis. Plynius. Quod eo magis miror, ſi etiamnum Homero prodente Aegyptus non erat. Item etenim, quod ſignificat quia. et hoc ſolum differt ab enim, quod enim nunquam primum locum ſortitur in oratione. Suetonius. Par enim utriuſq; arrogantia fuit. etenim uero aliquando primum, aliquando ſecundum locum obtinet. Plynius. Etenim multa de hac magi tradiderunt, quæ non ſunt à nobis commemoranda. Seneca. Quis etenim inter tot corporis cruciatus felicem eſſe quẽquam poſſe exiſtimat? PEGMATA. Moles. pluratiuus numerus pro ſingulari eam enim molem intelligit, ſuper qua impoſitus erat coloſſus Domitiani. Pegma græcum uocabulum eſt, etenim ἀπὸ τοῦ πηγῶ, quod eſt figo, πῆγμα dicitur, ſignificatq́; machinam, in qua ſtatuæ collocantur, & quaſi figuntur ad illas ſuſtinendas, ſiue aliud quicquam eiuſmodi. Interdum pegmata cum ludicris producebantur in ſcænam pueris, etiam conſidentibus ex lignis, & tabulis, quæ conſtabant uario picturæ genere. Iuuena. Et pegma, & pueros inde ad uelaria raptos. Claudium tradunt obiecíſſe aliquando beſtijs, qui pegma in ſcænam parum feliciter produxiſſent. Scribit Plyn. Caium principẽ in circum pegma duxiſſe, in quo fuere argenti pondo centum uigintiquatuor. CELSA. Alta, ſublima. de quo ſupra diximus. MEDIA VIA. hoc eſt quod Papinius inquit. Stat latium cõplexa forum. Viam definiunt eſſe dimidiũ actum, qua poteſt ire uehiculum. Paulus iuriſconſultus uiam conſtitui inquit uel latiorem octo pedibus, uel anguſtiorem poſſe, ut tamen eam latitudinem habeat, qua uehiculum ire poſſit. alioquin iter eſſe, non uiã. Abuſiue tamen uſurpamus uiam pro omni loco, per quem habere iter omnibus licet. Plynius. Cum te de uia uocaſſem. Aliquando accipitur pro itinere, hoc eſt pro ipſo actu ambulandi. Cicero. Cumq́; de uia languerem, & mihimet diſplicerem. Interdum pro ratione. Vir. Inueni germana uiam gratare ſorori, Quæ mihi reddat eum. nonnunquam pro conſuetudine. Teren. Sed uia peruulgata patrum quotidie accuſabam. hinc uiatores dicti, qui magiſtratibus parebant, homineſq; ex agris ad magiſtratus frequenter euocabant. Cicero. A uilla in Senatum acerſebantur, & Curius, & cæteri ſenes, ex quo qui eos acerſebant, uiatores nominati ſunt. Item à uia auiũ, & inuium dicitur, per quod iri non poteſt. Vnde auem quoq; quidam appellatam putant, quaſi ſine uia, ut inferius dicemus. & peruium, per quod facile tranſitur. & præuium, quod antecedit. Cicero. Præuius auroræ, ſolis, noctiſq; ſatelles. Item Biuium, quod duas uias habet. triuium, quod treis. quadriuiũ, quod quatuor. Vnde Dianam Triuiam appellatam ſuperius oſtendimus. & triuialis ſcientia grãmatice dicta, quia in triuijs docebatur. Triuialis uero lingua uulgaris, qua in triuijs pueri grammaticam diſcentes utebantur. Item deuium, quod à uia remotum eſt. & deuiare, à uia recta recedere. abuſiue tamen pro deflectere ponitur. & deuius, qui à uia recedit. & dubius, quaſi duas uias uidens, & utrã eligat neſciens. de quo & eius deriuatiuis inferius dicemus. Et uiaticum, quicquid iter agenti neceſſarium eſt. unde eſt illud prouerbium, Suam cuiq; artem pro uiatico eſſe. Veteres tamen aliquando uiaticum pro facultate, ſiue apparatu poſuere. Quint. Claudius in annalibus. ſimul forma, factis, eloquentia, dignitate, acrimonia, confidentia pariter præcellebat, ut facile intelligeretur magnum uiaticum, hoc eſt magna facultas, magnus apparatus. hoc modo græci ἐφόδιον, quod proprie uiaticum, hoc eſt ſumptum uiæ ſignificat, ad aliarum quoq; rerum apparatus traducunt, ac ſæpe ἐφοδίαζε dicunt pro eo, quod eſt inſtitue, inſtrue, aggredere. & obuio, quaſi ad uiam eo. à quo obuius, qui alicui occurrit. & obuiam eo, idem quod obuio, quaſi ad uiam eo. & uiatorium, quod ad uiam attinet. Vnde uiatorium uas, quo iter agentes ferendi potus gratia utimur. Plynius. Vaſa uiatoria ex taxo uinis in Gallia facta mortifera fuiſſe compertũ eſt. Viare quoq; ueteres pro iter facere dixerũt. Via ab eundo deducitur, quaſi ia, quod per eam eatur, quamuis aliqui uiam quaſi ueiam dictam uelint à uehendo, quod per eam fructus ad uillam uehantur. iter à uia differt, quod arctius eſt, quàm uia, nec uehiculum capit, ſignificatq́; etiam ipſum actum eundi, & ab eundo dicitur, cuius ſupinum eſt itum, ſiue ab ito, quod frequentatiuum eſt huius uerbi eo. diciturq́; & in mari iter, & in terra. Virgilius. Hac iter elyſium nobis. Terentius, Ain tu tibi hoc incommodum eueniſſe iter? Non hercle Parmeno uerbis dici poteſt, quantum re ipſa nauigare incommodum eſt. facit in genitiuo iteris. Næuius. ignoti iteris ſumus. Tu te ſcis. Accius. Præſto adſum, exprome quid fers. Nam te longo itere cerno uadere. Veteres etiam itiner dicebant, cuius nominatiuus nunc in uſu non eſt. obliquis autem utimur, cum obliqui huius nominis iter, ab uſu diſceſſerint. Varro, Expectant itiner longum ſermone leuare. Plautus. Quin tu ergo itiner ſequi meum me ſines. iter facere, & iter habere dicimus. Iter facere, ire, proficiſci. Plynius. Cum per eam regionem iter facturi eſſent, quod etiam iter tenere dicimus. Virgilius, quibus aut ueniſtis ab oris, Quóue tenetis iter. habere uero iter, idem eſt, quod iturum eſſe, ut iter habeo ad Cæſarem, hoc eſt oportet me ire ad Cæſarem, uel iturus ſum ad Cæſarem. Cicero. Habebat iter ad Deiotarum regem. At uiam facere, non eſt iter facere, ſed locum, ubi non erat uia, & tranſitus, aperire, ſicut uiam munire eſt reficere, repurgare, interdum lapidibus ſternere, quod proprie ſternere uiam dicimus. Cicero. Ideóne Appius ille cæcus uiam muniuit, non qua populus uteretur, ſed qua poſteri ſui latrocinarentur. Quo uerbo etiam per tranſlationem utimur de corporeis ad incorporea. Quintilianus. Propterea quod plurimi authores, quamuis eodem tenderent, diuerſas tamen uias munierunt, & in ſuam quiſque induxit ſequenteis. Quemadmodum autem munire uiam dicimus, ita munire ripam munire alueum. munire aditum, cum illa uel reficimus, uel paramus. Ab iter fit itero uerbum, quod eſt rurſus aliquid ago, & quaſi per iter factum reuertor. Et iterum, quod eſt rurſus. & itineror uerbum, hoc eſt iter facio, quo Apuleius, & quidam recentiores uſi ſunt. Et itinerarium uiatorium, unde itineraria

itineraria à quibuſdam uocantur commentarij earum rerum, quæ in itinere acciderunt. Et itidem, atq; item, quæ ſignificant ſimiliter, quaſi iterum idem. & obiter quod non eſt, ut Valla, & alij quidam exiſtimauerunt, ſpecialiter, ſed quod uulgo dicitur incidenter, hoc eſt præter propoſitum, quaſi in itinere occurrens. Iuuenalis. Atq; obiter leget. Plynius. Ego plane meis adijci poſſe multa confiteor, nec his ſolis, ſed et omnibus, quæ edidi, ut obiter caueam iſtos Homeromaſticas.

VNAQVE IAM TOTA STABAT IN VRBE DOMVS. Inuidioſa oratio eſt, quaſi uelit ſignificare ea ratione incenſam urbem à Nerone, ut unam domum ædificaret. Alluſitq; ad diſtichon illud de ea factum. Roma domus fiet Veios migrate quirites, Si non & Veios occupat iſta domus. Plynius quoque de ea ſic ſcribit. Vidimus urbem noſtram claudi duabus domibus Caij, & Neronis principum. Tradunt hanc à palatio ad Eſquilias uſq; protenſam fuiſſe, in ueſtibulo eius coloſſus erat erectus. Tãta erat latitudo eius, ut porticus miliarias haberet, & ſtagnum maris inſtar circũ ſeptum ædificijs ad urbis ſimilitudinẽ. Rura præterea aruis, uinetis, paſcuis, ſyluis ornata cum multitudine omnis generis ferarum. Reliqua pars auro picta erat, gemmiſq́;, & unionũ conchis diſtincta. cœnationes eburneis tabulis laqueatæ uerſatilibus, ut flores, & unguenta deſuper ſpargerẽtur. Præcipua cœnationum rotunda, die, noctuq́; inſtar mundi circumagebatur. balneæ marinis, & albulis aquis fluebant. Cum eam perfeciſſet, dixit (ut Suetonius refert) ſe iam quaſi hominem habitare cœpiſſe. Hanc luxuriam notat Poëta in laudem Domitiani. Mos enim ueterum fuit, in laudatione uiuentiũ principum defunctos iam principes damnare, quo uiui admonerentur, nullum locum, nullum eſſe tempus, quo defunctorum principum manes, ſi mali fuiſſent, à poſterorum execrationibus conquieſcerent, ſicq; à uitijs ipſi retraherentur. Merito præterea laudari uidentur uiuentes principes, ſi pariter mortui reprehendantur. Nam cum de malo principe poſteri tacent, manifeſtum eſt timeri præſentem, qđ eadem faciat. Ad hæc damnare priores principes nihil aliud eſt, quàm hortari præſentẽ, ut corruptos longa conſuetudine, ac deprauatos mores reformet, & corrigat. poſtremo (ut inquit Plynius) Nihil non parum grate ſine comparatione laudatur. DOMVS. Neronis ſcilicet. Domus proprie dicitur ædificium ad habitandum factum, quod ex tecto, atq; pariẽte conſtat. ponitur tamen pro habitaculo quocunque, unde & templa, & auium nidos, domos appellamus. Virgilius. Hoſtia nanq; domus patuere ingentia centum Sponte ſua. Idem. Antiquaſq; domos auiũ cum ſtirpibus imis Eruit. Sed hoc notandum quod domus duos genitiuos habet unum ſecundæ declinationis, domi, & alterum quartæ, domus. datiuum ſemper quartæ, accuſatiuum indifferentem, uocatiuum quartæ, ablatiuum ſecundæ. ſed cum utimur domi, locus ſignificatur, in quo quis manet. cũ uero utimur domus, ſignificatur corpus ipſum, atq; ædificium, quod ex parietibus conſtat, & tecto, ut domi maneo, non domus, & partem domus demolitus ſum, ſiue ſuperiora domus aſcendi, non domi. Aliquando domus pro familia capitur, continens pro contento. ut domus meæ imperium habeo. domi, & in domo eiuſdem planè ſignificationis ſunt. Quintilianus, in domo furtum factum ab eo, qui domi fuit. Quidam dicunt domi aduerbiaſcere, ut cum dicimus ſum domi, & ſimiliter alios caſus, ut domum propero, ſeu domo uenio, ſed nomen potius eſſe pronomina indicant, quæ cum hac uoce iunguntur, quæ ſunt mea. tua. ſua. noſtra. ueſtra, & aliena, ut eram domi meæ. tu eras domi tuæ. Ille uiuit domi ſuæ. Nos ſumus domi noſtræ. uos eratis domi ueſtræ. Cicero. Qui cum iſta ætate, et forma alienæ domi nolo dicere. Quod ſiquando hæc pronomina ſupprimantur, tamen ſubintelliguntur, ut domi ero, ideſt meæ. domi eritis. ideſt ueſtræ. & domi eris, ideſt tuæ. domi erimus, ideſt noſtræ. domi erit, ideſt ſuæ. domus à græco deriuatur, græci enim δῶμα. tectum appellant. à domo fit domeſticum, quod modo ſignificat quicquid ad domum pertinet, ut domeſticæ curæ. domeſtici labores. domeſtica negotia. Modo manſuetum, & mite. Plynius. Mite animal, atq; domeſticum. Item domeſtici dicuntur, qui ex eadem domo ſunt, & nobiſcum habitant, hinc fit domeſticatim, quod ſignificat per uarias domos. Item à domo Domicilium, quod habitationem ſignificat longi temporis. Vnde mutare domicilium dicuntur, q migrant, ut aliam urbem habitent. & domuncula parua domus, quæ & domuſcula uocatur, & domuncio. Apuleius. iam deniq; nec larem requiro, nec domuncionem paro. & domo, quod proprie ſignificat manſuefacio, & quaſi domeſticum reddo, unde equorum domitores dicuntur, & domiti, atque indomiti equi, & domitura equorum, ſiue aliorum animalium pro ipſo actu domandi. Plynius. Domitura boum in trimatu optima, & indomitæ gentes, hoc eſt feroces. Domitor etiam domator dicitur. per metaphoram tamen capimus pro uincere, ſuperare, à quo domitos hoſteis dicimus uictos, & domitos populos in poteſtatẽ redactos. Item à domo dominus deducitur, qui domui præeſt. is enim proprie dominus appellatur, qui domus imperium habet, & cui omnis familia paret. ex quo factum eſt, ut dominus, & ſeruus relatiua ſint, & domini appellatio ad omneis eos propagata ſit, qui alicuius rei proprietatem habent. etiamſi uſusfructus alienus ſit. Abuſiue tamen & filijfamilias, & cæteri liberi, qui in poteſtate ſunt, & uſufructuarij domini dicuntur. Item dominus dicitur, cui populi ſubſunt. Virgil. Romanos rerum dominos, gentemq́; togatam. Hinc etiã Dominus dictus à poëtis. Lucretius. At cum membra domnus præſentit frigida ſeruis. Item dubenus. Pacuuius. Tum dubenus ligatos ſeruos peſſime uerberat. Hinc dominium pro imperio, & principatu accipitur, & dominor, hoc eſt imperium gero, et dominatio imperium, et dominatus principatus. Item dominus, qui conuiuium exhibet. Varro. Aut dominum conuiuij, aut uinum, aut aliud qđ laudato. Plautus. Dum cœnitant alij, ego foris eſurio dominus. unde & domina, conuiuatrix nominatur. Lucilius. Primum domina, atque ſodalitia omnia tollantur. dominus etiam amans uocatur, & domina amica. Ouidius. Hæc tibi ſub domino eſt Pyrrhe puella ſuo. Idem. Nam furor in dominam temeraria brachia mouit. Flet mea ueſana læſa puella manu. Item dominus pro marito accipitur. Virg. connubia noſtra Reppulit. & dominum Aenean in regna recepit. Dominos quoq;, et dominas, deos, & deas dicimus. Idem. Et uincti currum dominæ ſubiere leones. Ouidius, & domino ſoluere uota Ioui. Hinc dies dominicus dictus, qui antea dies ſolis dicebatur, quod deo ſacer ſit. Domitius quoq;, et Domitianus à domo deriuari uidẽtur. Item à domo fit compoſitum domiporta, quam græci à ferẽda domo φερέοικον uocant, de qua inferius dicemus. IAM. Iam aduerbium temporis eſt. & idem penè ſignificat, quod tunc. Cicero. ipſa uerba compone, & quaſi coagmenta, quod ne græci quidem factitauerunt, iam neminem antepones Catoni. Aliquando feſtinantis eſt. Terẽtius. Ego iam preſſi cõ mihi. Aliquando hortantis, & ueluti moram increpantis. Vir. iam diua precor interdũ ponitur pro modo, ſiue nũc. Idẽ. Iam iam nec maxima Iuno, Nec Saturnius hæc oculis pater aſpicit æquis. Et p̄ miſerationem. Salluſtius. iam iam animo meo cariſſime frater quanquam tibi immaturo, & unde minime decuit, uita erepta eſt, tamen lætandam magis, quàm dolendum puto caſum tuum. Et per exhortationem. Quintilianus. iam iam commilito quicunque caſus maneet, etiam ſi imperator damnaturus eſt, habes ſolatium, ſatius eſt, quàm à patre occidi. A iam compoſita fiunt iandudū, & iandiu, et iampridem, de quibus ſupra diſſeruimus. & iam olim, quod modo ſignificat iandudum. Cicero, iam olim à principio id ſtatueram, modo aliquādo. Virgilius. At iam olim ſeras poſuit cum uinea frondes. & olim iam pro iampridē. Quintilianus. Olim iam Imperator inter fulgentes uirtutes tuas liuor locum quærit, hoc eſt à longo tempore. Hinc ēt ueſtibulū, quod non eſt prima pars domus, hoc eſt atriū, ut aliq putant, ſed locus ante ianuā domus uacuus, per quē à uia ad ædes itur. Ab illa ergo conſtitutione, & quaſi quadam ſtabulatione ueſtibulum eſt appellatum. Nam ue modo intenſionem ſignificat, ut uetus, uehemens, quorum alterum ab ætatis magnitudine compoſitum eſt, alterum à mentis ui, atque impetu dictum, modo minutionem. ueſcum Lucilius appellat cum edendi faſtidio. quāuis Lucretius ueſcum ſalem dicat ex edendi intenſione, qđ eſt ex ue, & eſca compoſitum. Seruius. Veſtibulum non ab intentiua, ſed à priuatiua ſignificatione dictum exiſtimat, quod per eum locum tranſeant, & nemo ſtet, ut ſicut Veſanus non ſanus, ita ueſtibulum non ſtabulum dicatur. Hinc genus illud philoſophiæ ἀσύστατον dictum, quod latine inſtabile, uel inconſtans poſſumus dicere. Vt enim nihil ſciendum ſit, aliquid ſciri neceſſe eſt. Nam ſi omnino nihil ſcias, id ipſum ſciri nihil poſſe tolletur. Ita qui hæc, uelut ſententiæ loco pronuntiat. nihil ſciri tanquam præceptum profitetur, & cognitum. ergo aliquid ſciri poteſt. In Aſyſtati generis exemplum & illud afferri ſolet. ſomniaſſe quendam, ne ſomnijs crederet. ſi enim crediderit, tamen ſequetur, ut non ſit credendum. Si autem non crediderit, tamen ſequetur, ut credendum ſit. Proprie autem στάσις à nobis dicitur, & quod ab eo componitur κατάστασις. Excepta inde res eſt à toto orbe terrarum, ut memoria hominū prorogaretur, quorum nomina baſibus inſcribi ſolebant. Togatæ effigie apud Romanos ſtatuæ dicabantur. Græci nudas haſtam tenentes faciebant ab Epheborum gymnicis exemplaribus, quas uocant Achilleas. Erantq; & equeſtres, & pedeſtres ſtatuæ. L. Vnde aliquando etiam pro uagina accipitur, quod uelut imago ſit eius rei, quam claudit.

Idem. Curuam ſeruans ſub imagine falcem. Ab imago fit imaginor uerbū, quod proprie eſt alicuius rei ſimilitudinem mente comprehendo. à quo imaginarium dicimus, quod re non eſt, ſed tantum cogitatione comprehenditur, & imaginatio actus ipſe. Item à ſto ſtatuo, quod eſt decerno, ſignificatq; (ut Vlpianus inquit) rem perfectam, & conſummatam, & ideo hæc uerba, quod ſtatuerit, qui iuriſdictioni præeſt, cum effectu accipimus, non uerbotenus. Caius iuriſconſultus reſtituere inquit plus eſt, quàm exhibere, nam exhibere eſt præſentiam corporis præbere, reſtituere uero eſt etiam poſſeſſorem facere, fructuſq; reddere. Ab hoc reſtibilis ager dicitur, qui quotannis reſtituitur, de quo inferius dicemus. Conſtituo, quod aliquando eſt diſpono. Virgilius. Cato ita ſcripſit. Quod ſi uadimonium capite obuoluto ſtitiſſes. quem locum quidam deprauarunt pro ſtitiſſes ſcribentes ſtetiſſes. Ennius, modicam, & modeſtam formam mulieris ſtatam uocauit. Bias cum rogatus eſſet à quodam, deberet'ne uxorem ducere, an uitam uiuere cœlibem ἤτοι inquit καλὴν ἕξεις, ἢ αἰσχράν· καὶ εἰ καλὴν ἕξεις κοινήν. εἰ δὲ αἰσχρὰν ἕξεις ποινήν· ἑκάτερον δὲ οὐκ ἀγαθόν. οὐ ληπτέον ἄρα. Aut pulchram inquit, duces, aut deformem. Si pulchrã, habebis communem, ſi turpem, habebis dolorẽ. Neutrum autem bonum. non eſt igitur ducenda uxor. Omiſit Bias tertium genus inter duo iſta, quæ diſiunguntur, quippe inter pulcherrimam fœminam, & deformiſſimam, media quædam forma eſt, quæ à nimiæ pulchritudinis periculo, et à ſummo deformitatis odio uacat. Ennius igitur eas fœminas incolumi pudicitia eſſe ſcribit, quæ ſtata forma forent. Verum hoc nõ à ſiſto deducitur, ſed à ſto, cum pro quieſco accipitur. Sed Cato eleganter ſtitiſſes ſcripſit, quoniam ſiſteretur uadimonium, non ſtaretur. A' ſiſto compoſita fiunt aſſiſto, quod ſignificat aſto alicui, opis & præſidij gratia, ut medicus aſſiſtit ægroto. Duo ſunt quippe plumbi genera nigrum, & candidum, quod græci caſſiterum appellant. Homerus. χαλκὸν δ' ἐν πυρὶ βάλλεν ἀτειρέα κασσίτερόν τε. Ex albo plumbo non fit argentum, cum fiat ex nigro. Iungi inter ſe plumbum nigrum ſine albo non poteſt, nec hoc ei ſine oleo, ac ne album quidem ſecum ſine nigro. Plumbi nigri duplex origo eſt, aut enim ſua ſponte naſcitur uena, nec quicquã aliud ex ſe parit, aut naſcitur cum argento, miſtiſq; uenis conflatur. Primus liquor, qui in fornacibus fluit, album plumbum eſt, & ſtannum uocatur. Secundus argentum, quod remanſit, galena dicitur. plumbi, & argenti uena communis, quæ & molibdena uocatur & latine dicitur plumbago. Hæc rurſus conflata dat nigrum plumbum, ſtannum illitum æreis uaſis ſaporem gratiorẽ facit, et tollit æruginis uirus, mirumq; quod pondus non auget. Specula olim ex eo laudatiſſima Brũduſij fiebant. Poſtea uti argenteis cœperunt. Si albi plumbi, nigriq; ſingulæ libræ miſceantur, fit ſtannũ, quod argentarium uocant & tertiarium nominant, in quo duæ nigri portiones ſunt, & tertia albi. India neq; æs, neque plumbum habet, gemmiſq; ſuis, ac margaritis hæc permutat. Aqua non liqueſcunt uaſa è plumbo. Sed ſi in eadem aqua calculus, aut æreus quadrans addatur, uaſa uruntur. Caluus orator uiſa inquiete uenerea, ſponte naturæ erumpentia uſque in morbi genus, his laminis traditur repreſſiſſe, & uires corporis ſtudiorum labore cuſtodiſſe. Nero lamina plumbi pectori impoſita, uocem alebat. Fit è plumbo ſpondium, ſicut ex ære, quod deraditur ex parietibus fornacum miſtis ſcintillis, aliquando etiam carbonibus. Scoria tam in plumbo, quàm in argento, ære, & cæteris metallis dicitur quicquid ſubſidet, & quaſi fex eſt metallorum, ſicut ſpuma, quæ ex ferueſcente materia tollitur. Item è plumbo fit pſimmythium, quod nos ceruſam nominamus, uel per ſe in plumbarijs officinis, uel ramentis plumbi tenuiſſimis, ſuper uas aceti aſperrimi impoſitis, atque ita diſtillantibus, quod ex eo in acetum cecidit, arefactum mollitur, & cribratur, iterumq; aceto miſto diuiditur in paſtillos, & æſtate in ſole ſiccatur. Potus eius letalis eſt, ſicut ſpuma argenti. ad candorem tamen fœminarum adhibetur, quæ ex eo dicuntur ceruſatæ. Ceruſa ipſa ſi coquatur, rufeſcit. A' ſtanno ſtanneum dicitur, quicquid ex ſtanno eſt, unde ſtannea uaſa, ſicut plumbea, & argentea dicimus. Item plumbeum nigrum appellamus. Martialis. Plumbea ſelibra. Plautus. Plumbeum hominem liuidum uocat. A' plumbo plumbatio deducitur, hoc eſt ferruminatio. & plumbare, ferruminare eſt. Plynius. Neque argentum ex ſtanno plumbatur, quoniam prius liqueſcit argentum. Et plumbata genus teli, hoc eſt plumbatæ pilæ, quas ueteres peregrino uocabulo manobarbulos uocabãt. à quo et milites ipſi, qui his utebantur, quos manobarbulos inſertos ſingulis ſcutis geſtantes manobarbuli ſunt uocati. hos poſtea Diuus Maximianus, quod ſe fortiter, ſtrẽnueq; in Illyrio geſſiſſent, Iouinianos, et Herculanos appellari uoluit.

Item à ſto ſtatura dicitur, quæ proprie corporis quantitatem ſignificat. Suetonius, ſtatura fuit eminenti, colore pallido. Idem de Nerone, ſtatura fuit propè iuſta, corpore maculoſo, & fœtido. Idem de Othone. Fuiſſe enim & modicæ ſtaturæ, & male pedatus, caluuſq; traditur. Item iuriſconſulti, atque oratores præſtare accipiunt pro polliceri, ne quid alicui fiat incommodi, aut ſi fiat, ſatisfacere, quod uulgo dicitur cautionem dare. à quo præs prædis dictus, qui populo ſe obligat, & interrogatus, an præs ſit à magiſtratu, reſpondet præs, hoc eſt qui promittit ſe, ſiquid incommodi fiat, plene ſatisfacturum. Cicero. Cum id, quod ab homine non potuerit præſtari, euenerit. Præſto' etiam aduerbiũ eſt, nec ferè cum alio uerbo iungitur, quã cum ſum. & apud poëtas cum adſum. Aliquando præſtabile dicitur, quod præſtari poteſt, & præſtolor uerbum. præſtolari enim is dicitur, qui ante ſtando ibi moram trahit, quo' uult uenturum excipere. Primus autem Serenus Lyricus ad inſtar ſcripſiſſe memoratur, item ab inſto inſtitor ex eo (ut Vlpianus inquit) quod negotio gerendo inſtet. Inſtitor enim dicitur cuicunq; negotiationi præpoſitus. unde non multum facit tabernæ ſit præpoſitus, an cuilibet alij negotio, cum interdum etiam ad homines honeſtos afferant merces, & ibi uendant. Sic inſtitor ueſtis uidetur hoc ſydus eſſe, quod, ut pluris, minoris'ue uendatur ueſtis, efficiat. Vergiliæ autem uocantur, quod uere exoriantur. eſt enim circa æquinoctium earum ortus matutinus. hæ à græcis pleiades uocantur à pluralitate, πλείους enim græca lingua plures dicuntur. Significat autem extremum modo initium alicuius rei. Plau. Ab extremo narrare incipiam, hoc eſt à principio. Sic Virg. Et tu ſanguinis ultimus author, ideſt primus. modo finem. Idẽ. Extremum hunc Arethuſa mihi concede laborem. Idem. Triſtis ad extremi ſacrum caput aſtitit amnis. Ponitur etiam aliquando pro ſæuo, peſſimo. Idem. Illam terra parens ira irritata deorum, Extremam (ut perhibent) Cœo, Enceladóq; ſororem progenuit. Extremam inquit, hoc eſt peſſimam, quod non ſine ratione eſſe uidetur, quando quidem medici affirmant deteriores eſſe, qui ultimi naſcuntur. Ab intra quoq; inteſtinus dicimus, quod ſignificat intimum. à quo inteſtina ilia dicuntur, quod interiori corporis parte claudantur. Item inteſtinum odium, uel occultum, uel magnum, hoc eſt cor, et animum premens. Item induſtrium, quod ueteres induſtruum dicebant, quod quicquid ageret, intro ſtrueret, & ſtuderet domi. Eſt enim induſtrius, ſtudioſus, uigilans, callidus. À quo induſtria. ſtudium. uigilantia. calliditas. Item induſium ueſtis genus. de quo inferius dicemus. À quo induſiatus dicitur, qui huiuſmodi ueſtem indutus eſt. Præterea ab in fit infra. À quo inferus, cuius comparatiuum, inferior, & ſuperlatiuũ, infimus. Teren. Ego te eſſe infra omneis infimos puto. Item aduerbia inferius, & infime. Hinc inferi dicti, quibus nihil eſt inferius. Et infernus adiectiuum, qui infra eſt, ſicut ſupernus, qui ſupra. À quo inferne aduerbium, & infernas infernatis, ſicut ſupernas ſupnatis. Ply. et ideo Romæ infernas abies ſupernati præfertur. Et infernus inferorũ locus. À quo infernalis, et infernales furiæ, & inferiæ ſacra mortuorum, quæ inferis ſoluuntur, & inferum mare tyrrhenum, ſicut ſuperum Adriaticum, quod ex urbe Roma uerſus Adriaticum euntes ferè ſemper aſcendunt, quouſq; tranſierint Apenninum, & contra ad urbem, & mare thuſcum uenientes deſcendunt. Sunt qui inſulam quoq; ab infra dictam putant, propter uittas, quæ ex ea inferius pendent. Eſt autem inſula in modum diadematis, à qua uittæ ab utraq; parte dependent. VRBE. Roma ſcilicet. Vrbẽ cũ dicimus, per Antonomaſiam intelligimus Romam, nam proprie hæc urbs dicta eſt, cætera, hac una excepta, oppida ſunt uocitata, uel ab ope, qđ opis cauſa mœnibus cingantur, uel ab opere, quod opus ſunt ad uitam gerendam, uel ab opponendo ſe hoſtibus, uel ab opibus. huius enim rei gratia mœnia conſtituta ſunt, ut homines opes ſuas

eò conferrent,

eò conferrent, ubi nullum eſſet hoſtium periculum. Ab oppida oppidani dicti ſunt incolæ oppidorum, & oppidatim aduerbium, qđ ſignificat per uaria oppida. Item aliud aduerbium oppido, quod ſignificat ualde multum. Plautus, Oppido interij obſecro hercle quantus, quam ualidus eſt. ex eo originem habet hoc uerbum. ruſtici inter ſe confabulantes, quantum quiſq; frumenti faceret, quoties copiam, atque abundantiam eius ſignificare uolebant, dicere ſoliti erant, quantum oppido ſatis eſſet. Hinc uenit in conſuetudinem, ut de quacunque re loquẽtes, oppido pro ualde multum capiamus. Aliquando cum quã iungitur, ſicut præpoſitio per. Gellius, Oppido quam libens id feci. Cæſar, Quibus rebus oppido quam pauci ſub pellibus acquieſcebant. oppidum locus quoq; in circo erat, unde quadrigæ emittebantur. Vrbs autem ab uruo dicta eſt, quod antiqui hetruſco ritu iũctis bobus tauro, & uacca, interiore aratro circum agebant ſulcum, intra quem urbem ædificarent. hoc faciebant religionis gratia die auſpicato, ut urbs foſſa, muróq; munita eſſet, & locum unde terrã fodiſſent, foſſam uocabant. & introrſum factum, murum. Alij ab orbe, & uruo appellatum urbem opinantur, quod ſulcus in orbem duceretur, uruum aratri curuatura dicitur, à quo Vrinare tractum, ſiue urinari, qđ non eſt urinam facere, ut falſo ignarũ uulgus exiſtimat, ſed in aquam mergi, & natando emergere. nam & Vruum ita flexum deorſum eſt, ut redeat ſurſum. Vrinare ergo dictum, quaſi ad ſimilitudinem urui nare, hoc eſt natare. Plyn. Canicularum multitudo circa eas urinanteis graui piculo infeſtat. Hinc urinatores appellati teſte Calliſtrato, qui merces è mari extrahunt leuandi nauigij gratia iactatas. & urna dicta, quod in aqua haurienda urinat, quemadmodum urinator facit, hoc eſt mergitur, atq; emergit. uas quippe aquarium eſt, cuius diminutiuum, urnula, à quo urnarium uocatur menſa quadrata, in qua urnæ cum aqua ponuntur, & urceus (ut Paulus iuriſconſul. affirmat) uas, quo aqua in ahenum infunditur. cuius diminutiuum eſt urceolus. Vrina uero quid ſit, & unde dicatur inferius dicemus. Vrbs à ciuitate ita diſtinguitur, quod urbs mœnia ipſa ſignificat. Virgil. Vrbs antiqua fuit, tyrij tenuere coloni Carthago. ciuitas. colonos. qui ciues dicuntur. Apuleius, Quod omnis ciuitas approbauit. Item uis ciuium. Cicero, Qui ciuitate donatus eſt. Aliquando tamen hæc cõfunduntur, & modo contentum pro continente ponitur. Seneca. Cũ pleraſq; ciuitates uiderimus terræmotu funditus collapſas. modo continens pro contento. Virgilius, inuadunt urbem ſomno, uinóq; ſepultã. Ciuitas à ciuibus appellata eſt, quaſi ciuium multitudo. Ciues autem dicti à coëundo, quod uinculo quodam ſocietatis in unum coëant cœtum, & ſub legibus uiuant. Ab hoc fit ciuile, quod ad ciueis pertinet. Vnde ciuile odium, ciuileis diſcordias, & ius ciuile dicimus, & aduerbiũ ciuiliter, et ciuilitas nomen, quaſi ciuilis mos, et ciuicus ad ciueis ſpectãs, à quo ciuica corona, quã ciuis ciui, a quo ſeruatus fuiſſet, in prælio teſtem uitæ, ſalutiſq; pceptæ dare ſolebat ex fronde quercna, quoniam cibus, uictuſq; antiquiſſimus è quercu capi conſueuerat. Item à ciue conciuis dictus eſt, qui ex eadem, qua ego, ciuitate eſt. Sicut conterraneus, qui ex eadẽ, qua ego terra, uel territorio eſt. Terra enim maior eſt, quàm urbs, oppidumq;, cuius habitatores uocantur ciues, poniturq; pro territorio, & pro regione, ſiue prouincia, ut ſupra diximus. Ab urbe ſuburbia dicuntur dũtaxat plurali numero, frequentes extra urbẽ domus inſtar uici urbani. Vicus proprie pars urbis eſt. quippe Vrbs in uicos, quaſi in minora membra diuiditur. ut ſunt ſuburra, carinæ, eſquiliæ. Nã regiones in urbe Roma circa uiginti fuerunt, quarũ hodie tredecim duntaxat ſeruant nomina, dictæ regiones à ſimilitudine earum regionum, in quas orbis

diuiditur, de quibus ſupra diximus. Vicus appellatus, quod uias circum haberet. uici & olim, & nũc ſupra mille. Extra urbẽ ergo frequẽtes uillæ, ac frequentes domus inſtar uici urbani ſuburbia appellãtur. Item uici. Liuius, incendijs deinde non uillarum modo, ſed etiam uicorum, quibus frequenter habitabant Sabini exciti. À ſuburbio fit ſuburbanum, qđ ſignificat prædium in ſuburbijs, & ſuburbanum meum, & ſuburbana mea, ſi plura ſunt. Talia ſunt, cũ dicimus in Cumano meo. in Thuſculano prædio tuo. in Pompeiano agro Varronis. dicitur etiam Vicus paganus, ſi plures ſimul uillæ, quæ & pagi dicuntur, hoc eſt plures ruſticanæ domus coniunctæ ſint, & aliquo ſpatio remotæ ab urbe, dummodo non ſint clauſæ mœnibus. Nam, ſi mœnibus clauſæ fuerint, caſtella uocantur à Caſtro, quod ſignificat locum muris munitum, & caſtello maius eſt, minus oppido, quamuis caſtellum aquæ conceptaculum dicitur, quod locis opportunis fit, ut ſi aquæ exhauſtæ ſolis ardoribus fuerint, aut uenas ſitiẽs terra conſumpſerit, nihilo minus de receptaculis, hoc eſt caſtellis aqua miniſtretur. Frontinus, Omne plũbum, & omnes impenſæ ad aquæductus, & caſtella, & lacus pertinentes inde erogantur. caſtrum à caſa deducitur, quod ſit coniunctio quædam caſarum. Nam in plurali caſtra locus eſt, ubi milites tentoria figunt, à caſtri ſimilitudine, quod foſſa, uallóq;, quaſi muro circundari ſolent, à quo caſtrenſe dicitur quicquid ad caſtra pertinet. unde caſtrenſis labor. caſtrenſes curiæ. caſtrenſis uigiliæ. caſtrenſe priuilegium. Hinc caſtrenſe peculium uocat Marcellus iuriſconſultus, quod à parentibus uel cognatis in militia agenti donatum eſt, uel quod filiusfamilias, in militia acquiſiuit, quod niſi militaret, acquiſiturus non fuiſſet, & quaſi caſtrenſia bona dicuntur, quæ licet in militia à filiofamilias non acquirantur, ita tamen fiunt illius, ac ſi acquiſita in militia fuiſſent, ut ſunt ea, quæ ex officijs acquiruntur. Item à caſtro, ſiue caſtris procæſtria dicta ſunt munimenta quædam, quæ fiunt ante mœnia caſtrorum, ſiue ante caſtra. Quidã etiam procæſtria aditum, & ueluti portam caſtrorum appellauerunt. à caſtello dicuntur caſtellani, ſicut ab oppido oppidani. Item à uico uicini, non tam hi, qui eundem incolunt locum, quàm qui propè domum noſtram habitant. Hinc uicinia deducitur, & conuicinium, ubi plures inter ſe uicini ſunt. & uicinitas pro propinquitate uicinorum, nonnunquam pro uicinorum multitudine, ut laudanda eſt, uel potius amanda uicinitas. Item uicatim per uarios uicos. hæc enim ferè omnia, quæ in tim deſinunt huiuſmodi ſignificationem habent, ut oppidatim per uaria oppida. cateruatim. gregatim. manipulatim. turmatim. per diuerſas cateruas. diuerſos greges diuerſos manipulos. diuerſas turmas. Domeſticatim. regionatim. municipatim. prouinciatim, per uarias domos. uarias urbis Romæ regiones. uaria municipia. uarias prouincias. Nominatim per nomina ſingulorum, quamuis & de uno dicatur. Plau. Nominatim quis fuerit exprome. quemadmodum uiritim per ſingula capita uirorum, ut Gracchus diuidebat uiritim ſemodia frumenti. & aliquando de uno dicimus. Curtius. Siqs uiritim dimicare uellet, prouocauit. Guttatim, per ſingulas guttas. Plau. Aedepol cor miſerum meum quidem guttatim contabeſcit, quaſi in aquam indideris ſalem. nã gutta minima pars aquæ dicitur, aut alterius liquoris, hoc eſt ſtilla. Vnde gutturnium dicitur uas, ex quo aqua in manus datur, ab eo, quod propter anguſtias guttatim fluat. & guttũ uaſculum, in quo odorifera unguenta ſeruantur, quod inde guttatim ſumantur unguenta. genus etiam poculi guttus erat, quo in ſacrificijs utebantur. À gutta fit guttula diminutiuum. & à guttus guttulus. Plau. Vt guttulam hauriret ex guttulo. Mẽbratim. per membra. Cæſim per inciſionem gladij. Punctim per

punctiones, infixionesq; gladij, ſiue incidendo, & pungendo. Strictim ſingula ſtringendo. carptim hinc, atque illinc ſine aliquo ordine decerpendo. Tractim trahendo, ut ſeries non interrumpatur. Generatim per ſingula genera. Virgilius. generatim diſcite cultus. Speciatim per ſingulas ſpecies. differunt à generaliter, & ſpecialiter, quæ ſignificant omnia ſimul ſub uno genere, aut una ſpecie complectendo. Summatim per ſingulas ſummas. Aliquando tamen dicimus generatim, & ſummatim, & ſpeciatim non per ſingulas ſummas, & ſingula genera, & ſingulas ſpecies ſed per unã, unum'ue, ut dicam de hac re ſummatim. Cicero, infinitum mihi uidetur id dicere, in quo aliquid generatim quæreretur, hoc modo expetenda'ne eſſet eloquẽtia, expetendi honores. Aliquando tamen huiuſmodi aduerbia nihil ab alijs aduerbijs differunt, ut priuatim nihil differt à priuate, nec ſeparatim à ſeparate, nec properatim à properãter, nec diſſimulatim à diſſimulanter, nec ubertim à copioſe, nec affatim ab abundanter, ſiue abunde, nec raptim à feſtinãter, nec curſim à currendo. Vrbium, ſiue oppidorũ aliæ ſui iuris ſunt, nec quicquam commune cum alijs habent, aliæ coloniæ, aliæ municipia. ſui iuris ſunt, ut Roma. Carthago. Thebæ. Athenæ. coloniæ dicuntur, quæ non ueniunt extrinſecus in ciuitatem, nec proprijs radicibus nituntur, ſed quaſi ex ciuitate propagatæ, iura, inſtitutáq; populi Romani, non proprij arbitrij habẽt, ut Bononia, Feſulæ coloniæ ſunt, quæ conditio licet magis obnoxia, & minus libera uideatur, quàm cæterorum oppidorum, potior tamen, ac præſtabilior exiſtimatur, propter amplitudinem, maieſtatemq; populi Romani, cuius huiuſmodi coloniæ, quaſi effigies paruæ, & ueluti quædã ſimulachra eſſe uidentur, unde à colendo coloniæ uocatæ, quod populum Romanum colerent, uel quod ad eas colendas Romani proficiſcerentur. Municipia autem uocabantur, quæ aliunde ueniebant in ciuitatem, & cum ſuo iure uiuerent, muneribus tamen populi Romani, honóribusq; fungebantur. à quo munere capeſſendo nomen ſibi uendicauere, nullis alijs neceſſitatibus, neq; populi Romani legibus aſtricta. Eorũ incolæ municipes uocati ſunt. Primos autem municipes ſine ſuffragij iure cærites factos fuiſſe conſtat, conceſſumq; illis, ut ciuitatis quidem Romanæ honorẽ caperent, ſed negotijs, oneribusq; uacarent, pro ſacris bello gallico receptis, ac cuſtoditis. Hinc tabulæ cærites appellatæ, in quas Cẽſores referri iubebant, quos nota cauſa ſuffragijs priuabant. Quidam etiam cærimonias ab his putant appellatas, quamuis alij à carendo dictas malint, quemadmodum inferius dicemus. De his Strabo ita ſcribit, cærites capta urbe Roma redeũtes Gallos in ſabinis, aggreſſi prælio, armisq; fuderunt, & ſpolia, quæ à Romanis ſponte offerentibus acceperant, ab inuitis ipſi eripuere. Præterea eos, qui ad ſe urbe capta confugerant, beneficijs affectos benigne exceperunt, ſimulq; æternum, atque inextinctum ignem, ſacerdotesq; ueſtales ſummo ſtudio protexere. cuius beneficij Romani ſanè parum memores uidentur fuiſſe. Nam, cum eos ciuitate donaſſent ſuffragiorum tamen iure fungi noluerunt, quos aliqua cauſa ſuffragijs priuabant, ad cæritum tabulas iubebant referri. hunc locum, quam inepte in latinum uerterit Strabonis interpres, operæpretiũ eſt uidere. Cære oppidum fuit Thuſciæ non longe à Tarquinijs, quondam Agylla nominabatur, quæ à Pelaſgis è Theſſalia profectis condita fertur. Verum, cum Lydis, quos poſtea Tyrrhenos uocauere, aduerſus Agyllinos bellũ gerentibus, quidã murum ſubiens urbis nomen percontatus fuiſſet, reſpõſum eſt à quodam Theſſalo è muro χαῖρε, quod ſignificat ſalue, quo ueluti bono omine à Thuſcis accepto, captã urbẽ mutato priori nomine Cære uocauere, à quo Cærites dicti, & cæritiana balnea. Cæretum uero Vmbriæ oppidũ eſt

inter Spoletum, ac Nurſiam, à quo Cæretani appellãtur, totum orbem uano quodam ac turpi ſuperſtitionis genere ludificantes, ob quam cauſam ferè continue peregrinantur. familia, atq; uxoribus domi relictis. Municipiorum iura iam penitus obliterata ſunt. Municipem (ut Vlpianus inquit) facit aut ciuitas, aut manumiſſio, aut adoptio, quoniam municeps, & qui liber in municipio natus eſt, dicitur, & qui in municipio à ſeruitute ſe liberauit, & qui in ciuitatem quancunq; aſcitus eſt. proprie tamen municipes dicuntur, qui in ciuitatem Romanam recepti munerum participes fiunt. Sed abuſiue nunc municipes dicimus ſuæ cuiusq; ciuitatis ciues, utputa. Campanos. Puteolanos. Neapolitanos. à quo municipale ius dicitur priuatum ius uniuſcuiuſq; ciuitatis. Itẽ Municipalia ſacra uocabantur, quæ ante urbem conditam colebantur, & municipale urbanum, & à municipe municipaliter dicimus, quemadmodum à ciue ciuiliter. Ab urbe fit ſuburbium, de quo poſtea dicemus. Et urbicus urbica urbicum. quod ſignificat quicquid ad urbem pertinet, ſicut ruſticus ruſtica ruſticum, quod pertinet ad rus, unde ruſticum poëtam, & urbicum poëtam dicimus, ruſticam domum, & urbicam domum. Martialis, Quod non optimus urbicus poëta. Gellius, Si quod autem poſſet remedium eſſe, ut ne tam aſſidue domus Romæ arderent, uenum hercle dediſſem res ruſticas, & urbicas emiſſem. Item urbanus urbana urbanũ, quod modo eandem ſignificationem habet, quam Vrbicus, Vnde urbanas tribus appellabant, in quas urbs à Seruio Tullo Romanorum rege diſpartita fuerat, ut ſuburra. palatina. exquilina. collina, & alia huiuſmodi. quamuis à principio in tres tantũ tribus diuiſa urbs fuerit, ut poſtea docebimus. Itẽ prædia urbana. mores urbani. curiæ urbanæ, & ſimilia. Vnde ſuburbanum, & anteurbanum deriuantur, de quibus inferius dicemus. modo urbanum dicimus cultum, atq; deſertum, hoc eſt eũ, qui in uerbis, & ſono, & uſu proprium quendam præ ſe fert urbis geſtum, & ſumptam ex conuerſatione doctorum tacitã eruditionem. deniq; cui contrarius eſt ruſticus, hoc eſt inepte, & barbare loquens, & hoc differt à dicaci, quod dicax eſt, cuius ſermo cum riſu aliquem inceſſit, ideo Demoſthenem urbanum fuiſſe dicunt, dicacem negant. A' dicace dicaculus deducitur. à quo aduerbium dicacule. Apuleius, Eadem amatoris ſui uxorem, quod in eam dicacule probrum dixerat, perpetua prægnatione damnauit. Quemadmodum autem urbanum, & dicacem hominem dicimus, ita urbanum, & dicacem ſermonem, unde urbanitas, & dicacitas tam de homine quã de oratione dicitur. eodem modo uenuſtus homo, & uenuſta oratio. lepidus homo, & lepida oratio. ſalſus homo, & ſalſa oratio. inſulſus homo, & inſulſa oratio. facetus homo, & faceta oratio. iocoſus homo, & iocoſa oratio. & uenuſtas. lepor. ſales. inſulſitas. facetiæ. ioci tam de homine, quàm de oratione dicuntur. Hæc autem ita inter ſe differunt, quod uenuſtum uocamus, quod cum gratia quadam, & uenere dicitur. Lepidum quod rotunditate quadam, & breuitate, & quaſi celeritate, atq; acumine uerborum uenuſtum eſt. Quapropter Lælius uir doctrina excellens, quemadmodum id animal, quod lepus uocatur, à leuitate pedum dictum exiſtimat. ita enim leporem in oratione à pedum ſuorum leuitate putat appellatum. habet enim oratio quoq; ſuos pedes ſiue ſoluta, ſiue numeroſa ſit. A' lepido fit lepidior, lepidiſſimus, lepide. illepidus, illepidior. illepidiſſimus, illepide. lepiditas, illepiditas. Salſum in conſuetudine pro ridiculo tantum capimus, quamuis non utiq; hoc ſit, licet ridicula oporteat eſſe ſalſa, nam Cicero. Omne quod ſalſum eſt, ait eſſe Atticorum, non quia ſunt maxime compoſiti. & Catullus, cum dicit, Nulla in tam magno eſt corpore mica ſalis, hoc dicit nihil in corpore eius eſſe ridiculum. Salſum ergo erit, quicquid non

erit

erit inſulſum, uelut quoddam ſimplex orationis condimentum, quod latente iudicio ueluti palato ſentitur, excitatq;, & à tædio defendit orationem. facetum non tantum circa ridicula conſiſtit, cum dicat Horatius facetum Catoni genus natura conceſſum eſſe, Virgilio decens, ſed excultæ cuiuſdam elegantiæ hæc appellatio eſt. Itaq; in epiſtolis Cicero hæc Bruti uerba refert. Nec ulli ſunt pedes faceti, ac delitijs ingrediẽdi mollius. iocum uocamus, quod eſt contrarium ſerio. Nam & fingere, & terrere, & promittere, aliquando iocus eſt. Ab Vrbano urbane aduerbium deducitur, hoc eſt culte, eleganter, & urbanatim pro urbane, modeſte. Pomponius. Ego ruſticatim tangam, urbanatim neſcio. Cæterum quam nos urbem uocamus græci πόλιν appellant. Quamuis πόλις non modo urbem, ſed etiam ciuitatem ſignificet. Vnde politicus ciuilis dicitur, & Conſtantinopolis Cõſtantini urbs. Neapolis noua urbs. metropolis mater urbs, hoc eſt cæterarum urbium caput. Item polio uerbum, quod eſt colo, orno, & quaſi urbano, & politico more, qui ruſtico contrarius eſt, compono. Hinc politum dicimus cultum. ornatum, & ad nitorem deductum. & polite, culte, ornate, & politior, politiſſimus. politius, politiſſime. & politule diminutiuum, quo utitur Plautus, Et politiones agrorum cultus diligentes, ſicut politiones ueſtimentorum, hoc eſt munditiæ, & cultus. & polimenta teſticuli porcorum, cum caſtrantur, quod ad ſimilitudinem ueſtium poliantur, & depolio compoſitum, quod modo polio ſignificat, modo perficio, unde depolitum perfectũ dicimus, quoniã omnes perfectiones antiqui politiones appellabant. Polit tamen aliquando ueteres ſcripſere pro eo, quod eſt pila ludit. Atq; ut cætera ad urbem pertinentia obiter dicantur, mœnia ſunt proprie quæ urbem cingunt. Virgilius, & mœnia pandimus urbis. Significant tamen & alia ædificia. Plautus, Prohibentq; mœnia alia. unde ego fungar mea. & à muniendo dicta ſunt mœnia, quaſi munia. Veteres enim œ & u indifferenter ponebant. Vnde, Pœnio pro punio dixere, & mœrus, pro murus. Virgilius, Atq; ipſis prælia miſcent aggeribus mœrorum. A' mœnibus ſummænium, quaſi ſubmænium dictum, quod ſub mœnibus urbis eſſet. à quo Summænianum, de quibus alibi dicemus. Meniana uero non à mœnibus dicta, ſed à Menio quodã, qui primus id genus ædificij inuenit extenſis tignis ultra columnas, quo ſuperiora ampliarentur, uulgo nunc quoq; Meniana, ſiue Podioli dicuntur. Sueto. Pauci è proximis Menianis ſpectabant. murus quoque à muniendo ſimiliter dictus eſt, ut Varro affirmat. à quo muralis corona appellatur, qua donari ſolebat ab imperatore, qui primus murum ſubijſſet, & in hoſtiũ oppidum per uim aſcendiſſet. hæc aurea dari ſolebat. Et proximurium põtificale pomerium proximi muri. & murcæus Auentinus mons, quod è lapidibus, & ueluti muro conſtaret. à quo Murcia dea, cuius ſacellum ſub Auentino monte erat, & Murmilſionica ſcuta (ut quidam putant) cum quibus de muro pugnabant. Erant enim ad hoc ipſum apta. Muria uero, ſiue muries non à muro, ſed à mari (ut quidam exiſtimant) deducitur. Eſt enim, aqua ſalſamentorum. Murrhinia uero, ſiue murrhina uina dicuntur, quæ myrrha condita ſunt. Laudatiſſima enim apud priſcos fuere uina myrrhæ odore condita, quibus & calamus odoratus addi ſolebat. Fabius, Mittebant uinum pulchrum murrhinũ. Idem, Panem, & polentam, uinum murrhinum. Plautus, Quod ſi opus eſt, ut dulce promant ijdem, ecquid habeant roga myrrhinum, paſſum, defrutum mella. Idem, Vinum & myrrhatum dicebatur, & myrrhata, ſiue murrhata potio, & (ut Varro teſtatur) murrhiola. Myrrha arbuſcula eſt in Arabia præcipue naſcens altitudo ei ad quinq; cubita, nec ſine ſpina, caudice duro, & intorto, craſſioreq; quàm Thuris, corticem lenem

habet, ſimilemq; unedoni. folium rotundius, ſed ſapore Iuniperi. Inciduntur bis ijſdem temporibus, quibus thus. Sudant autem ſponte, priusquã incidantur. Stacten dictam, cui nulla præfertur. Fuit autem Myrrha Cinaræ cypriorum regis filia, quæ patris amore capta clàm cum eo concubuit, quapropter perſequente agnitam patre, in arborem ſui nominis conuerſa eſt. Item Murrhina uaſa dicuntur ex gemma, quæ murrha appellatur. hanc oriens mittit. præcipueq; inſignia quædã loca parthici regni, & Carmania humorem putant eſſe calore ſub terra denſatum. Splendor huic ſine uiribus, nitorq; uerius, quàm ſplendor, ſed in pretio eſt colorum uarietas circumagentibus ſe ſubinde maculis in purpuram, candoremq;, & tertium, qui fit ex utroq;. Sunt qui maxime in his laudent extremitates, & quoſdã coloris repercuſſus, quales in cœleſti arcu ſpectantur; his maculæ pingues placent. tranſlucere quicquam, aut pallere uitium eſt. T. Petronius iuriſconſultus moriturus, inuidia Neronis principis, ut menſam eius exhæredaret, trullam murrhinam CCC Seſtertijs emptam fregit. Sed Nero (ut par erat principem) CCCC Seſtertijs fragmenta emit, & capedinem unam parauit, qua potaret. & muralis herba, quæ uulgo uitreolum dicitur, quod uaſa mirum in modum confricata purificet. Ideo Vrceolaris à ueteribus dicta. eadem parietaria uocatur, quod in muris, ſiue parietibus frequenter naſcatur, & perdicium, quoniam perdices ea præcipue ueſcantur, & helxine ἀπὸ τοῦ ἕλκω, ideſt traho, quoniam cauliculos denſos leuiter rubentes habet, & ſemina in capitibus lappaceis, quæ ueſtibus adhæreſcunt. & Parthenium, quod uirgineum ſignificat, cuius nominis hæc ratio eſt, quod uernula quidam Periclis Athenienſium principis nomine Splanchonoptes, cum forte repſiſſet ſupra altitudinem templi, quod tum Pericles in arce ædificabat, & inde cecidiſſet, hac herba dicitur ſanatus mõſtrata Pericli in ſomnis à Minerua, quæ græce παρθένος, hoc eſt uirgo appellatur. hinc eſt uernula, & nobilis ille ſplanchnoptes, cuius effigies ex ære fuſa inter præclara opificũ opera connumerata fuit. Herbam hanc uarijs ægritudinibus utilem eſſe conſtat, ſed in primis contra ulcera rupta, lapſusq; & præcipitia, ac uehiculorum euerſiones ſingularem. Magicæ uanitas contra tertianas ſiniſtra manu euelli eam iubet, dicíq; cuius cauſa euellatur nec reſpicere. dein eius folium ægri linguæ ſubijcere, ut mox in cyatho aquæ deuoretur. A' παρθένος parthenius etiam, hoc eſt uirgineus mons dictus Arcadiæ à uirginibus, quæ in eo uenari frequenter ſolebant. Eſt etiã Parthenius paphlagonum fluuius. Paphlagones populi è Paphlagonia minoris Aſiæ prouincia. Item Parthenope propriũ nomen unius ex ſirenibus à qua præclara urbs Campaniæ quæ nunc Neapolis dicitur, nomen ſumpſit. hanc Cumani à parentibus digreſſi condidiſſe produntur, qui, cum in eo loco Parthenopes corpus in ueteri monumento conditum repiſſent, nomen eius urbi indidere. Sed poſtquam ob locorum ubertatem, atq; amœnitatem maiorem in modum frequentari ea ciuitas cœpit, ueriti, ne Cumæ deſererentur, diruendi Parthenopen conſilium iniuere, quo facto mox immani peſtilentia uexati, oraculo moniti ſunt, ut urbem reſtituerent, itaque ſubito inſtauratam Neapolim, hoc eſt nouam urbem uocauere. A' Parthenope parthenopeius deducitur. Murus, & paries hoc differunt, quod murus urbis eſt lapideus ambitus. Paries uero domorum. Maceria murus eſt, ſiue paries conſtans ex lapidibus ſine calce, aut alio genere ferruginis. Paulus, Si precario uicinus in tuo duxerit, maceriem interdicto, quod precario habet agi non poterit, nec maceria poſita donatio ſeruitutis perfecta intelligitur. Eadem & maceries dicitur. Extra murũ agger eſt ab aggerenda terra, quæ foditur, & foſſa ab eadẽ ter-

Pomœriū eſt circa murum locus, quem in condendis urbibus, quondam Hetruſci, qua murum ducturi erant, certis circa terminis inaugurato conſecrabant. & hoc ſpatium, quod neq; habitari, neq; arari fas erat, non magis, quod poſt murum eſſet, quàm quod murus poſt id pomœrium Romani appellarunt, ſicut pomœridianū dixerunt pro poſt meridiano. Nam locus pomis conſitus non pomœrium (ut quidam exiſtimant) ſed pomarium appellatur. Ouidius Id metuens ſolidis pomaria clauſerat Atlas Mœnibus. In ſummitate uero murorū pinnæ ab ijs, quas inſigniti milites in galeis habere ſolent, ita dictæ. Pinnæ enim proprie ſunt pennæ, quæ plumæ, hoc eſt molliores, & exiguæ pennæ non ſunt. nam pennæ generale nomen eſt ad plumas, & pinnas. À penna pennatus, & penniger, & pennarium theca pennarum, quibus nunc pro calamis utimur, & impennatus ſine pennis. Quamuis ueteres pennatas, impennataſq; agnas in ſaliari carmine pro ſpicis uſurparunt, quæ habent, quæq; non habent ariſtas. agnas enim nouas uoluerūt intelligi, & bipennis, de quo inferius dicemus. À pluma, plumeus, & plumiger, & puluinus, & puluinar deducuntur. Dictum enim puluinum exiſtimant quaſi pluminum, & puluinar, quaſi pluminar. Eſt autem puluinus, quaſi lectulus quidam exiguus, lana, uel tomento, uel pluma, aut alio genere huiuſmodi plenus, quo utimur in ſedendo. Cicero, Afferri iuſſit puluinos, & omnes in ſuis ſedibus ſederunt. Iuuenalis. & de puluino ſurgat equeſtri. à quo puluinatum dicimus, quod ad puluini ſimilitudinem molle, ac connexum eſt. Plynius, Lanuginoſo, ac puluinato calice. & puluinum in hortis uocamus partem terræ erectiorem ſulcum ex utroque latere ſepientem, qui & Lira uocatur, habet enim ueluti puluinorum, in quibus ſedemus, ſimilitudinem, propter quod & torus à quibuſdam nuncupatur. Plynius, Areis diſtingui, eaſq; reſupinis puluinorum toris ambiri ſingulis tramitum ſulcis, qua datur acceſſus homini, ſcatebriſq; decurſus. Columella, Vlpicum habet, uelut allium plureis cohærenteis ſpicas, hæq; cū ſint diuiſæ, liratim ſeri debebunt, ut in puluinis poſitæ minus infeſtentur hyemis aquis. Puluinaria autem dicuntur, quæ capitibus dormituri ſupponimus ad puluinorum ſimilitudinem. Iuuenalis, Fœda lupanaris tulit ad puluinar odorem. His in templis quoque deorum ueteres utebantur, ut nos quoque hac tempeſtate facimus, in quibus collocabātur numina, ac Deorum imagines, ut eminentiora uiderentur. Item à pluma plumatile, aut clauatum, aut ex plumis factum. Plautus, Comatile, aut plumatile plumis implere, & plumarium ex pluma, unde plumariam culcitram dicimus, quæ pluma plena eſt. & implume ſine pluma, unde implumis culcitra ſine pluma, & implumes aues, nuper natæ. & quæ non dum plumas emiſerūt. Pinnas etiam geſtare gladiatores ſolebant. unde pinnirapi retiarij dicuntur, quod pinnas è galeis marmillonum iacto rete exciperent. Iuuenalis, Hic plaudat nitidi præconis filius, inter Pinnirapi cultos iuuenes, iuueneſq; laniſtæ. huiuſmodi pinnam græco quidem, ueruntamen apud latinos uſitato uocabulo petalum dicimus, quod aliquando ex ære, uel argento, uel auro fieri ſolebat. Plynius, Achamenes Phidiæ diſcipulus æreum petalum fecit, qui uocatur Encrinomenos & ἀπὸ τοῦ πέτασθαι, quod eſt uolare, deducitur. tenuis quippe brattea eſt inſtar pinnæ. À pinna pinnaculum dicitur faſtigium, & ſummitas ædificij in acumen tendentis, ſiue quod ueteres pinnam acutum dicebant, unde bipennis appellata eſt ſecuris, quæ utrinque aciem habet, ſiue quod pinnaculis addi pinna conſueuit, quæ facili motu uentorum indicet flatum, quod ge-

Aliæ centum quinquagenum, ita faſtigatæ, ut in ſummo orbis æneus. et petaſus unus omnibus ſit impoſitus, ex quo pendeant excepta cathenis tintinabula, quæ uento agitata longe ſonitus referant. Petaſi etiam alæ dicuntur, quibus Mercurij talaria nectuntur, & ipſa talaria. Item uela tenuiſſima, quibus uti in theatris ſolebant ex lino æſtiuo tempore, à quibus, qui petaſis utuntur, petaſati uocantur. Suetonius de Auguſto. Aeſtate, apertis cubiculi foribus, ac ſæpe in periſtylio ſaliente aqua, atque etiam uentilante aliquo cubabat. Solis uero ne hyberni quidem patiens. domi quoq; non niſi petaſatus ſub diuo ſpatiabatur. Petaſo autem ea pars ſuis dicitur, quæ ab alis incipit, & coſtas comprehendit qbuſdam ueluti uirgulis pinguibus diſtincta. Martialis de perna. Ceretana mihi fiat uel miſſa licebit De menapis lauti de petaſone uorent. Nam pernæ tam priores, quàm poſteriores coxe dicuntur. Plynius, Caſtrantur ſues poſt bidui inediam ſuſpenſæ pernis prioribus. Ab huius pernæ ſimilitudine piſcis quoq; genus perna appellatum eſt, ex concharum genere circa pontias inſulas frequentiſſimum. Stant pernæ uelut ſuillo crure longo in arena defixæ, hiāteſq;, qua limpitudo eſt, pedali non minus ſpatio cibum uenantur. Dentes in circuitu habent pectinatim ſpiſſatos, intus pro ſpondylo grandis eſt caro. Veteres pernas pedes appellabant, quod nomen hodie quoq; ſeruant Hiſpani. Hinc pernio appellatur morbus pedum ex nimio frigore proueniens, & calcaneum præcipue infeſtans, quem græci χείμετλα uocant. Plynius, Rapum domeſticum perniones feruens impoſitum ſanat, & crudum tuſum cum ſale prodeſt cuicunque uitio pedum. Hinc fit diminutiuum perniunculus. Idē perniunculos curat, & cotyledon cum axūgia. À petaſo fit diminutiuum petaſunculus, de quo Martialis, Muſteus eſt propera, caros ne differ amicos, Nam mihi cum uetulo ſit petaſone nihil. Muſteum petaſonem uetulo præferri oſtendit. Apitius, Ex muſteis petaſonem elixas, cum bilibri ordei, & caricis uigintiquinque, cum elixatus fuerit decarnas, & armillam illius candēti batillo uris, & melle contegis, uel quod melius eſt, miſſum in furnum, melle obligas, cum colorauerit mittis in cacabum. paſſum. piper. faſciculum rutæ, merum temperas. cum fuerit temperatum, dimidium in petaſonem profundis, & alia parte piperati bucellas muſtei fractas profundis, cum ſorbuerit, quod muſtei remanſerit petaſoni refundis. Petaſo ob pinguitudinem facile ranceſcit, ideo uetus improbatur. Muſteus uero pernis longe præponitur. Hic obiter oſtendendum eſt batillum, quod Apitius nominat, ferreum inſtrumentum eſſe, quo pruna colligitur ad ſimilitudinem pilæ, id & batalum, quaſi patulum primo uocatum, deinde patillum per diminutionem dictum. Plynius, Batillis ferreis candentibus ramento argenti impoſito, quod candidum permaneat, probatur, in muris ſunt turres arctæ, atque alta ædificia à terrendis hoſtibus dictæ, ſicut arces ab hoſtibus arcendis, uel quod aſpectu toruæ ſint, hoc eſt terribiles. Toruum quippe terribile dicimus uel à terrendo, uel à tauris. Toruitas enim proprie taurorum eſt dicta, quaſi taurorum acerbitas. Ab hoc fiunt torue, & toruum, & torua aduerbia. Plautus, Quid me torue aſpectas? Apuleius, Cum toruum in eos intueretur. Virgilius. Talibus Aeneas ardentem, & torua tuentem, Lenibat dictis. À turris turritus deducitur, hoc eſt altus, atque excelſus, ut turrita domus alta, ſublimis, & ad turris ſimilitudinem ædificata. Interdum turritus, turribus plenus. à quo turritæ urbes dicuntur, & mater deûm Turri-

Liuius, porta cataracta deiecta clauſa erat. eā partim funibus ſubducunt in tantum altitudinis, ut ſubire recte poſſent. Dictæ cataractæ, quod ex alto defluere uideantur. græci enim καταῤῥεῖν defluere dicunt, unde cataractæ etiam appellantur è terra exeuntes aquæ, & ita ex alto defluentes, ut ruere potius, quàm defluere uideantur, qualem Tyburi cernimus Anienem, & qualeis eſſe in Aegypto Nili cataractas legimus. Item loca ipſa, è quibus exeunt, cataractæ dicuntur, unde in maximis imbribus apertas eſſe cœli cataractas dicere ſolemus. Reperitur autem hæc cataracta fœminino genere, & hic cataractes maſculino. À græcis καταῤῥάκτης maſculinò genere dicitur. À porta diminutiuum fit porticula. Item Angiportum intra urbem eſt uia anguſta non facile peruia, quaſi uicus inter domos. Sed hæc fabuloſa ſunt. Veritas autem hiſtoriæ hoc habet. Oui genus eſt in magna fama Magorum. angues enim numeroſi, ouorum conuoluti ſaliuis, faucium, corporum'q; ſpumis artifici complexu glomerantur. Id ouum anguinum appellatur. Experimentum eius eſſe ſi contra aquas fluitet, uel auro cinctum, certa quoque luna capiendum cenſent, ad uictorias litium, ac regum aditus maxime laudatur. à diuo Claudio principe interẽptus eſt quidã eques Romanus non ob aliam cauſam, quàm ut eã uanitatem Cæſar experiretur. hanc igitur Caducei cauſam eſſe affirmant. ideo Criſtatos angueis in caduceo non eſſe. A' Mercurio mercurialis herba dicitur, quã græci λινόζωστιν uocant, quam hermupoam, quaſi ἑρμοῦ πόαν hoc eſt Mercurij pabulum. Duo eius genera maſculus, & fœmina. ocimo penè ſimilibus folijs. caule cubitali. ramoſo in cacumine. geniculis denſis. naſcuntur in campeſtribus cultis. Mirum eſt, quod de utroque proditur. Item ab Hermes, et Aphrodite, quod Venerẽ ſignificat, Hermaphroditus eſt dictus Mercurij, & Veneris filius. Ouidius, Mercurij puerum, & diua Cythereide natum Naiades idæis enutriuere ſub antris. Cuius erat ſpẽs, in qua mater'q;, pater'q; Cognoſci poſſent, nomen quoq; traxit ab illis, hunc Poëtæ finxerunt, quod uagabundus in Cariam aliquando perueniſſet, limpidiſſimum fontem conſpicatum fuiſſe, quem nympha Salmacis nomine incolebat, hanc ſubito amore eius correptam, cum nullis flectere eum blanditijs, nullis precibus poſſet, tandẽ ſimulato receſſu, poſt ueprẽ latuiſſe, iuuenẽ autẽ, dum abijſſe nympham exiſtimat, nudum fontem intraſſe, q̃d conſpicatam nympham decurriſſe ſubito, & abiectis ueſtibus iuuenẽ arctiſſime complexam fuiſſe. Quamobrem à ſuperis exoraſſe fertur, ut quicunq; eum fontem intraret, idẽ pateretur. quod aliqui ea ratione fictum fuiſſe à poëtis exiſtimant, quia Salmacidis fontis aqua, potanteis eam molleis, atq; effœminatos redderet. Sed hoc falſum eſt. neq; enim molles, & impudici ex ea aqua potantes fiunt, ſed & color fontis plucidus eſt, & ſapor aquæ egregius, aquaq; ipſa ſalubris. Ratio autem fictionis hæc eſt, quod, cum græci eò coloniam deduxiſſent, Caras, et Lelegas inde eiecere. hi autẽ ad monteis fugati congregari inter ſe, ac diſcurrere, latrocinari'q; ſolebant, a-

Ergo ea aqua non impudico morbi uitio, ſed humanitatis dulcedine mollitis animis barbarorum eã famã eſſe adeptam. Ab hoc hermaphrodito, hermaphroditi dicti ſunt oẽs utrunq; ſexũ habentes olim in prodigijs, poſtea in delitijs habiti, et à græcis uocibus, quæ uirum, ac mulierem ſignificant, Androgyni appellati. Ab arma autem deriuatur armo uerbum, quod eſt armis inſtruo. Sall. Armati fores obſidebant. Virg. Tunc quoq; fas nobis Graios armare fuiſſet. Ab hoc armamenta dicuntur, quæ ad inſtruendum aliquid pertinent, ut in nauibus armamenta ſunt, non ſolũ arma, ſed remi. uela. antẽnæ. rudentes. claui. et alia huiuſmodi. Item ab arma armipotens dicitur. et armiger, qui in prælio arma domini ſui gerit. & armitenens, qui arma tenet. & inermis, modo qui armatus non eſt, modo qui ſupplex erat, quod ex hiſtoria tractum eſt, quia qui ſe dedũt, inermes ſupplicant. & armiluſtrium feſtum apud Romanos, quo res diuinas armati faciebant, & ſacrificantes canebant tubis. Item locus, in quo huiuſmodi ludi fiebant. Varro tamen non ab armis, ſed ab ambitu luſtri armiluſtrium dictum exiſtimat, quod ibi circum metas fertur pompa, et equi currunt. Item ab arma armentum deducitur, quod armis aptum, atque idoneum ſit, etenim equi prælijs interſunt, boues, ac maiora animalia armant ex corijs. Ennius fœminino genere armentas dixit. Ab armento armẽtarius dicitur cuſtos armenti. Illud obiter addendum eſt, armos ab humeris differre, humeri enim proprie eorum ſunt, qui recti in cœlum ſpectant, unde ſoli homini inter mortalia humeros eſſe dicimus. Virg. Optimi inter duos pontes lupi capiebantur, propter urbis latrinas, & cloacas, quas inſectantes maxime pingueſcunt, quæ res præcipua cauſa eſt, ut è mari nantes inter fluminum hoſtia meliores ſint, utpote pinguiores. Refert Macrobius Lucilium acrem, & uehementem poëtam oſtendere ſe ſcire hunc piſcem egregij ſaporis eſſe, qui inter duos ponteis captus eſſet, eumq; quaſi liguritorem appellare catillonem. proprie autem catillones dictos guloſos, quaſi catillorum liguritores, & præcipue eos, qui ad pollutum Herculis ultimi conueniebant, quod catillos liguribant. A` catino per diminutionem catillus dictus. catinum autem à capiendo putant deductum, uas eſt eſcariæ menſæ, ubi pultem, aut aliquid iurilenti ponebant, catillatio graue opprobrium obijciebatur hominibus generoſis, ſiqui prouincias amicas populi Romani expoliaſſent, quod bona eorum liguriſſe uiderentur. Refert Ariſtoteles mugilem, & lupum perpetuo inter ſe odio conflagrare. Lupum inquit, in dulcibus aquis natum nonuidimus, ſed ex mari in flumina, ac lacus aſcendentem conſpeximus, propter quod parumper limoſus inuenitur aliquando, quemadmodum cephalus. Non fugit autem ſtagna ſalſa, nec oſtia fluminum, quāuis in profundo maris uerſari ſit ſolitus. At libertinus tricorius ſyrus iſte admaſtigias, qui cum uerſipellis fio, & commuto omnia. Plautus. Verſipellem ſe facit, quando lubet. Scribit Varro Arcadas quoſdam ſorte ductos ſtagnum quoddam eius regionis tranare, ueſtitu in quercu ſuſpenſo, atq; abire in deſerta, transfigurariq; in lupos, & cum ſimilibus feris per nouem annos uictitare. Nec ob aliam cauſam Varro exiſtimat in Arcadia Panem lycæum, & Iouem lycæum nominatos, quàm propter hanc hominum in lupos mutationem. Lupus enim græce λύκος dicitur. à quo lupi nomen deriuatur. & ſimili modo lycæum Arcadiæ montem appellatū, qui Pani deo ſacer eſt, quod magis mihi placet, quàm quod ſcribit Seruius lycæum dictum, quod lupos non ſinat in oueis ſæuire. Lupi caudæ uulgus exiſtimat amatorium uirus ineſſe in exiguo uillo, eumq;, qui capiatur, ſtatim abijcere, nec enim habere uillum, niſi uiuenti detrahatur. A` lupo ceruarius lupus dicitur aliud animal uulgo notum, cuius tanta obliuio eſt, ut maxima etiā in fame mandens, ſi reſpexerit, non recordetur cibi, ſed digreſſus aliū quærat. Item à lupo lupercal dictum, locus, ſiue ſpelunca ſub palatino monte ſacrata ab Euandro Pani deo Arcadiæ, qui Lycæus uocatur, quamuis alij, ita appellatum uelint. uel quod lupa ibi Remum, & Romulum nutriuerit, uel quod ibi per caprum luebatur, hoc eſt ſacrificabatur, ut ſit dictio ex tribus

A` lupo etiā meretrices lupæ appellatæ, quod, ut illi cibi, ita hæ uel libidinis, uel quæſtus appetentes ſint. Unde turpia earū loca lupanaria uocantur. & lupari ſcortari, ac meretricari eſt. Accius. Qui cum meretrice ꝑ uias habitu noſtro lupantur. Hinc datum fabulæ locum uolunt, ut Remus, ac Romulus expoſiti, à lupa nutriti eſſe dicantur, quod, cum uagientes in ripa Tyberis iacerent, à neſcio qua meretrice primum collecti fuiſſe, & primas eius mamillas ſuxiſſe putentur, deinde ad Fauſtulum perueniſſe paſtorem. Alij tamen exiſtimant hanc non fabulā, ſed hiſtoriam eſſe, & geminos infanteis à lupa uere fuiſſe nutritos, quod Marte geniti eſſent, in cuius tutela lupi eſſe dicuntur, ut ideo lupa paruulis ubera admouiſſe credatur, quia filios eſſe dei ſui Martis agnouerat. Lupata quoq; genus freni aſperrimi à lupinis dentibus nomen ſumpſere, qui inæquales ſunt. & propterea morſus eorum aſperrimus. Vir. Preſſiq; negabunt uulnera dura pati, & duris parēre lupatis. Lupinū dicitur quicquid ad lupum pertinet. ut lupini dentes. lupini oculi. lupina rabies. Plynius, Maſurius palmam lupino adipi dediſſe antiquos tradit. ideo nouas nuptas illo perungere poſteis ſolitas, nequid mali medicamenti inferretur. Lupinum quoq; leguminis genus appellamus, qđ nō minus terram appetat, uoraxq; illius ſit, quàm lupus. hoc unum coli non uult, ſeriturq; non arato, & tellurem adeo amat, ut q̄uis frutetoſo ſolo coniectum inter folia, uepreſq;, ad terram tamen radice perueniat. Quotidie cum ſole circumagitur, horaſq; agricolis etiam nubilo die demonſtrat. ter floret. ab omnibus animalibus amaritudine ſua tutum eſt. Maceratum calida aqua in cibo eſt homini. Lupus etiam inſtrumentum eſt aduncum, quo uaſa, quæ in puteum forte ceciderint, extrahuntur. Harpax græco uocabulo, & Harpago nominatur, quod rapax interpretari poteſt. ἀπὸ τοῦ ἁρπάζειν, quod eſt rapere. Item Lupus genus aranei eſt, de quo ſupra diximus, à græcis λύκος appellatus, & herba, quæ aſparagi uice mandi ſolet, quæ & lupus ſalictarius, quod ſalices ad ſimilitudinem uitis aſcendat, & uulgo lupulus dicitur ex aculeatorum genere. Germani ex ea ceruiſiam faciunt admiſta frugibus. Hoc genus potionis, quo pro uino utuntur, quale eſt in Aegypto Zithū celia, & cerea in Hiſpania. horum omnium ſpuma cutem fœminarum in facie nutrit. A` lycos etiā Lycus deducitur proprium uiri nomen. Multi autem hoc nomine clari fuerunt. Unus troianus Virg. Fata Lyci, Alius thebanus ignobilis genere, qui, cum à Creonte Herculis ſocio in exiliū miſſus fuiſſet, Hercule deinde cum Pirithoo ad inferos profecto, regnum Thebarum occupauit. Itē alius Thebarum rex. alius Pandionis filius, qui à ſe Lyciam nominauit. Item à lycus Lycaon Calyſtonis pater Arcadiæ rex, qui, cum ſolitus eſſet hoſpites necare, idq; in Iouem hoſpitem moliretur, in lupum ab eo conuerſus eſt. Fuit & alius hoc nomine Priami filius, pater Pandari. & Lycaſtus urbs Cretæ à Luporum, quæ ibi eſt, multitudine. & Lyciola paſtoris nomen. & Lycimnius frater Aſtioches, & Lycinus propriū nomen, & Lycomedes Creontis filius, & Lycopa urbs Aetholiæ. & Lycon pythagoricus philoſophus, alius Socraticus. tertius Poëta. quartus epigrammaton ſcriptor. & Lycophron Periandri Corinthiorum tyranni filius, qui patri, quod matrem occiderat, nunq̄ conciliari potuit. cumq; patris ætate iam graueſcente in ſucceſſionem tyrannidis uocaretur, reſpōdit ſe nūq̄ Corinthum patre uiuente, rediturum. & Lycopolis urbs Aegypti. & Lyctus oppidum Cretæ ſub Idomenei imperio, à

Fuit & alius Lycurgus Nemeæ regionis rex. Itē alius Rex Thracum, qui, cum Bacchum deum eſſe negaret, uitem amputare conatus, ſibi crura præcidit. unde eum tradunt abſtemium fuiſſe. & lyciſca nomen habens compoſitum à lupo & cane, hoc eſt ἀπὸ τοῦ λύκος, καὶ σκύλαξ. Eſt enim canis natus ex commiſtione canum, luporumq;. Virg. multum latrante lyciſca. & lynx, & lycius Apollo. & lux, de q̄bus inferius dicemus. Item urticæ dicuntur, quod uredinem tactu excitent. Græce hoc genus ἀκαλήφη uocatur, piſcis eſt carnoſæ frondis. nocte uagatur. ueſcitur carne. contrahit ſe primo, mox prænatante piſciculo frondem ſuam ſpargit, cōplectenſq; deuorat. Dum admoueri ſibi manum ſentit, mutat colorem, & contrahitur uis. pruritu mordax. nam tacta uredinem mittit inſtar terreſtris herbæ, quæ ab urendo urtica dicitur, qđ folia eius tacta acerrime urant. quamuis genus urticæ eſt, quod ononium uocant, multo cæteris mitius, & folijs ferè nihil mordentius. Conſtat, ſiquis decocto urticæ pedes hyeme lauerit, eo die non frigeſcere. Si equæ marem non admittant, & urtica infricetur natura, libenter coitum pati. Phanias phyſicus utiliſſimam eſſe urticam ſcripſit in cibis coctam, conditamue, lieni. duritiæ uentris. inteſtinis cacalium. articularibus, & podagricis morbis. arteriæ. tuſſi. uentris diſtillationi. ſtomacho. panis. parotidi. pernionibus. Pectus præterea purgare. urinam ciere. ſanguinē narium ſiſtere. calculos rumpere, uuam reprimere. Nonnunquam etiam à figura piſces nomen accipiunt, ut ſolea, quæ crepidæ ſimilis eſt, quam ſoleam uocamus ex planorum piſcium genere. & Rhombus cōmendatus patinis. à ſolea, & paſſere ſitu tantum corporis differens. etenim dexter Rhombo, re ſupinatus eſt, ſoleæ, & paſſeri læuus. Rhombi mentionem facit Iuuenalis. quem fingit Domitiani temporibus incredibili magnitudine captum fuiſſe. Cum iam ſemianimum laceraret Flauius orbem Vltimus, & caluo ſeruiret Roma Neroni, Incidit adriaci ſpatium admirabile Rhombi Ante domum Veneris, quam dorica ſuſtinet ancon. Impleuitq; ſinus. Themes enim antiquum oppidum Cypri eſt, in quo repertum primo æs, ab eo ſumpſit cognomen. Theocritus in Ecloga, quam pharmaceutriam inſcripſit, mulierem maleficam inducit amore adoleſcentis captam inter multa alia, quibus allicere ſibi amantem conabatur hoc rhombo uſam fuiſſe χὡς δινεῖθ' ὅδε ῥόμβος ὁ χάλκεος ἐξ ἀφροδίτας ὣς κεῖνος δινοῖτο ποθ' ἁμετέρῃσι θύρῃσι. ut Rhombus iſte (inquit) æneus uertitur, ita uertatur meus amans ad meas fores. Eſt ēt Rhōbus cylindrus, item torques, & inſtrumentum illud, quo uertendo mulieres nent, utunturq; eo ſimiliter in Theſſalia mulieres maleficæ ῥομβεῖν græci dicunt uertēdo

Et ſquatina ex planorum piſcium genere; quod propter ſqualorem, hoc eſt aſperitatem cutis ligna ea, & ebur poliantur. hæc in aqua mira ſolertia pinnas exertas mouet, ut Rhombus, ut ſpecie uermiculorũ aſſultanteis piſciculos attrahat. quos propè accedenteis aſſiliat. Et Echeneis, quod nauem retineat. ἔχειν enim tenere eſt, ναῦς à græcis dicitur nauis. Magnus noſtri ſeculi, & ſuperioris error circa hoc uocabulũ fuit omnibus pro echeneis echinus apud Lucanum legentibus. In medijs echinus aquis. in quo præter ſenſum etiam uerſus ipſe corrumpitur, cum echinus primam ſyllabam correptam habeat. Echeneis igitur non echinus legendum eſt, hoc modo, Non puppim retinẽs euro tendẽte rudẽtis. In medijs echeneis aquis, oculiq; draconum. Eſt autem piſcis admodũ paruus in petris uiuens, qui adhærens carinis naueis retardat, ideo ἐχενηίς dictus à græcis. À quibuſdam uero è noſtris latinis remora appellatus, qđ naueis remoretur. Hunc Plyn. ſcribit ob eam cauſam amatorijs ueneficijs infamem eſſe, tum propter iudiciorum, ac litium moram. Sed hæc crimina una laude compenſat, quod fluxus grauidarum utero ſiſtit, partuſq; ad puerperium continet, in cibos tamen non admittitur. Pedes eum habere arbitratur Ariſtoteles. Sed armatæ claſſes imponunt ſibi turrium propugnacula, ut in mari quoq; pugnetur, uelut è muris. Heu uanitas humana, cum roſtra illa ære, ferroq; ad ictus armata ſemipedalis inhibere poſſit, ac tenere deuincta piſciculus. Tenuit et Caij principis ab Aſtura Antium remigantis, ut res eſt etiam, auſpicalis piſciculus. Siquidem nouiſſime tamen in urbem reuerſus ille imperator ſuis telis confoſſus eſt. Nec longa fuit illius moræ admiratio, ſtatim cauſa intellecta, cũ è tota claſſe quinqueremis ſola non proficeret, & exilientibus protinus qui id quærerent, circa nauim inuenere adhærentem gubernaculo, oſtenderuntq; Caio indignanti hoc fuiſſe, quod ſe reuocaret, quadringentorumq; remigum obſequio contra ſe intercederet. Quidam è græcis authoribus hunc alio nomine odinolyontem appelluere ἀπὸ τοῦ λύειν τὰς ὠδῖνας, hoc eſt à partu ſoluendo. Quippe ſale aſſeruatum, & alligatum grauidis partum ſoluere prodiderunt.

Et totæ ſolidam in glaciem uertere lacunæ. Lacus à græco ſumpſit nomẽ, græci enim λάκκον lacum nominant. Piſcis græce ἰχθὺς dicitur, à quo ichthiophagi dicti ſunt populi montanas regiones Indorum habitantes, quos ſubactos Alexander Magnus iuſſit à piſcibus abſtinere, cum antea ſolis piſcibus alerentur, à quibus habẽt nomen, ἰχθὺς enim piſcis eſt, φάγω edo. Sunt præterea in ædibus Sphæriſteria loca rotunda, uarijs luſibus, et uarijs exercitationum generibus apta. Sunt Oeci, in quibus dũtaxat matres familias cum lanificis ſedent. Qui locus etiam gynæcium dicitur, & gynæconitis. Aemilius Paulus, materfamilias apud Romanos primum locum tenet ædium, atq; in celebritate uerſatur. quod multo aliter fit in Græcia. Nam neq; in conuiuium adhibetur, niſi propinquorũ, nec ſedet, niſi in interiore parte ædium, quæ Gynæconitis appellatur, hæc autem ἀπὸ τοῦ οἰκῶ deducuntur, quod ſignificat habito. unde οἶκος domus dicitur, à quo œconomus adminiſtrator rei familiaris, & œconomica, quæ ad rem domeſticam, ac familiarem pertinent. & œconomia adminiſtratio rei domeſticæ, & œconomus uillicus. & œconomo uillicor, & διοικῶ, quod ſignificat adminiſtro, à quo διοίκησις, hoc eſt Diœceſis, adminiſtratio dicta. hinc pontificum Diœceſes dicuntur, in quas adminiſtrandi officium ſuum liberam habent poteſtatem, propter quod à quibuſdam nouo quidem, ſed non inepto uocabulo Diœceſani uocantur. Oecumenicus autem uniuerſalis dicitur, & ad totum orbem pertinens, unde Oecumenicum concilium dicimus. nam græci οἰκουμένην orbem terrarum appellant. Et à ξένος, quod ſignificat hoſpes, hoſpitalia ipſa xenodochia dicuntur, quaſi hoſpitum receptacula. Item ab eodem proxeneta deducitur, quod proprie ſignificat eum, qui inter aliquos eſt conciliator, et medius, ut q̃ in uendendo aliquid, aut emendo medius eſt. Item Xenodotus nomen proprium. fuit hoc nomine excellens apud græcos hiſtoricus, patria Trœzenus. & Xenocrates uir calcedonius Agathonis filius, Platonis auditor, qui in academia Speuſippo ſucceſſit, ſcholam tenuit uigintiquinq; annis, obijt ſecundo, & octogeſimo ætatis ſuæ anno, cum forte in ſartaginem offendiſſet. & Xenophanes uir colophonius (ut Apollodorus refert) Octomenis filius, q̃, cũ eſſet uiginti annorũ, patria pulſus fuit, ſcripſit elegias contra Heſiodum, & Homerum, fuit & alter Xenophanes leſbius poëta, Iambici carminis ſcriptor. Poſt hæc in ædibus ſunt horti. horũ alij in ſolo ſunt, alij penſiles, hoc eſt ſupra ædificia conſtituti. quales à te Federice princeps ſupra regiæ tuæ ampliſſima præſepia ædificati ſunt. tanto artificio, decore, ſumptu, ut ſtuporem potius, quàm admirationem ſpectantibus afferant. In inferioribus hortis diætæ ſunt modo paruæ, modo maiuſculæ, in quibus etiam cubicula fiunt. ſunt ſtibadia, hoc eſt paruæ cœnationes, in quibus ſcriptum eſſe ſolebat, quot conuiuas cœnatio caperet. Martialis. ſtibadium. Accipe lunata ſcriptum teſtudine ſignum, Octo capit. ueniat quiſquis amicus erit. Plynius, In capite ſtibadium candido marmore uite protegitur. Fiebant etiam ſtibadia è tabulis, quæ ebore, atq; auro ornabantur, transferebanturq; de loco ad locum, prout libido animi ferebat, de hoc locutus eſt Martialis, cum inqt, Et teſtudineũ menſus quater hexaclinon, ingemuit atrio non ſatis eſſe ſuo. Heraclinum uocat ſtibadium ſex capiens conuiuas. Sunt Hippodromi, hoc eſt loca ad curſus equorum diſpoſita, quæ ſtatim intrantium oculis tota ſimul offeruntur, hinc, atq; hinc platanos, aut buxos, aut cupreſſos, aut alias arbores perpetuo uirentes habentia, & à curſu equorum appellata. Græci enim ἵππον equum uocant, δρόμον curſum. ſunt xyſti, hoc eſt loca exercitationi corporis accommodata, quas græci παραδρομίδας uocant. à latinis etiam ambulationes dicuntur. Plynius. Ante cryptoporticum xyſtus eſt uiolis odoratus. Cicero. Sed tamen nihil ei reſtabat, præter balnearia, & ambulationem, & auiariũ. Idem. Qua baſis uillæ erat, qua inter columnia ambulationis, ambulacra etiam appellantur. Plynius. Tum fora, atque Gymnaſia, et pro ſuis extẽta porticibus ambulacra miremur. Græci tamen xyſtum uocant porticum ampla latitudine, in qua athletæ per hyberna tempora exercentur. Xenophon ἐν τῷ ξυστῷ περιπατεῖν, à quo xyſtici dicuntur athletæ in xyſtis pugnantes. Suetonius. Nec tamen eo minus aut xyſticorum certationes, aut gladiatorum pugnas ſeueriſſime ſemper exegit ſignificat enim ξυστὸς Spiculum. haſtam. telum. Item adiectiuum eſt, & dicitur ornatus. terſus. politus. Et ſedilia in hortis uarijs locis diſpoſita ſunt, quæ ambulatione feſſos, ut cubiculũ ipſum iuuant, à ſedendo ſedilia appellata, hæc maxima in hypodromo, xyſtoq; conſtituuntur. Vt deniq; illi topiariam facere uideantur, & ederam uẽdere. Extra urbem uero Ager eſt, dictus, ut Varro exiſtimat, quod in eo aliquid agatur, quamuis aliqui à græco potius deriuatum uelint, quod eſt ἀγρός. Eſt autem ager modo territorium, quod urbi circumpoſitum eſt, ut ager romanus, ager leontinus. modo locus in rure, quem colimus, ſiue arando, ſiue conſerendo, & is, q ſeritur frumentis, ab arando dicitur Aruum. Primus ager plurali caret, dum tantum loquimur de ſingularum urbium territorijs, & complectitur nemora, ſaltus, paſcua, mõtes, lacus, flumina, cæteraq; huiuſmodi. Quod ſi dicamus romanos agros, Campanos, leontinos, priuatim ciuium agros intelligimus, in quibus hæc includuntur. Si uero romanum, campanum, ac leontinum agros, prorſus territoria ſignificamus, ideoq; omnia illa cõplectimur. Ab agro fit agricola, hoc eſt cultor agrorum, & agreſtis, qui ſylueſtrem uitam agit, ac feram, ſicut apud græcos ἄγριος dicitur Ferus, unde in compoſitione onager dictus eſt aſinus ferus, de quo alibi dicemus. Item agreſte, quod ad agrum attinet, unde agreſte uocamus, quod in agris, non in hortis naſcitur, aut fit. Sicut campeſtre, quod in campis, ut agreſte olus, agreſte opus, & ſimilia, & agricultor, qui agrum colit, & à colendo etiã colonus dicitur. Et peragro, quod eſt inquirendo circumeo. Virgilius. illa fuga ſyluas, ſaltuſq; peragrat. à quo fit peregrinus, ideſt aduena, & aliena loca peragrans, & peregrinatio itio per alienas terras. & peregrinor uerbum, quod eſt per aliena loca proficiſcor, unde peregrina ſacra dicta ſunt, quæ ex alijs urbibus religionis gratia ſunt aduecta. & peregre aduerbium, hoc eſt peregrinando. Terentius. Peregre profectus. in hoc enim differt peregrinus ab hoſpite, qđ peregrinus ſimpliciter eum ſignificat, qui in ſua ciuitate non eſt, Hoſpes uero eum, qui in aliena ciuitate eſt. Hoſpites ergo uocantur, qui ſiue in priuato, ſiue in publico hoſpitio ſunt, & tam qui recipiunt, quàm qui recipiuntur. Ouidius. non hoſpes ab hoſpite tutus. Cicero. Per dextram iſtam, quam hoſpes hoſpiti porrexiſti. Sed proprie hoſpes dicitur, qui priuatim, & amicitiæ cauſa uel recipit, uel recipitur, unde & pro amico externo capitur. & hoſpitium pro amicitia. Idem, fuit mihi cum illo uetus hoſpitium, hoc eſt amicitia, uel familiaritas, uel me hoſpitante apud illum, uel illo apud me contracta. Hoſpitium etiam diuerſorium ſignificat. Idem. Ex hac uita diſcedo, tanquã ex hoſpitio, non tanquam ex domo. Commorandi enim natura diuerſorium, nõ habitandi dedit. Ab hoſpes deriuatur hoſpitor, quod eſt ſtabulor, diuerto, & hoſpitium, de quo diximus. & hoſpitale hoſpitium, domus, de qua ſuperius diximus. & hoſpitalis adiectiuum, quod modo ſignificat liberalem, & facile ſuſcipientem hoſpitio, aptumq; ad ſeruiendum hoſpiti, modo ad hoſpitem pertinentem, ut hoſpitalis lex, & hoſpitalitas, ipſa facilitas. & (ut ita dicam) benignitas in recipiendo. et hoſpitaliter aduerbium benigne. faciliter & hoſpita, quæ facile ſuſcipiunt, unde hoſpitam terram dicimus, in qua facile ſuſcipimur, & hoſpita æquora, ſiue hoſpita flumina, per quæ nauigari, aut tranſiri poteſt. Virgilius. Puppibus illa prius patulis nunc hoſpita plauſtris. Aliquando etiam hoſpita pro eo, quod eſt uicina accipimus, quia nihil nobis hoſpitio uicinius eſſe poteſt. Inter agrum, fundum, aruum, prædium, & poſſeſſionem hanc eſſe differentiam tradunt. Ager eſt (ut diximus) locus in rure, quem colimus. Aruum, ea pars agri, quæ ſementi datur. Salluſtius. Quia Numidæ pabulo pecoris magis, quàm aruo ſtudent. Quintilianus. Pauper, & diues in agro uicini erant iunctis hortulis. ſed ex omni parte circunuectus diuitis ager, uix tenuem ad greſſus meos ſemitam dabat. Quid agimus? Vndique uallo diuitiarum clauſi ſumus. Hinc horti locupletis. hinc arua inde uineta. hinc ſaltus. Ab aruo aruales fratres dicti ſacerdotes, quos Romulus primus inſtituit, ſeq; inter illos duodecimum Fratrem appellauit, ut arua fruges ferrent, ciq; ſacerdotio Acca larentia, quæ poſtea populum romanum hæredem inſtituit, Romuli nutrix, tribuit albas infulas, & ſpiceam coronam pro religioſiſſimo inſigni, quæ

Fundus etiam pars agri eſt, ſingula enim prata, ſingulæ uineæ. ſinguli horti. ſingula olueta. pomaria. arbuſta. paſcua, ſalicta. nemora. aucupatoria, uenatoria, piſcatoria loca, ſiue uillam, atq; ædificium, ſiue piſcinam, ſiue uiuaria habeant, ſiue non habeant, ſinguli fundi ſunt, & hoc in agro duntaxat. Nam in urbe, oppido. uico. caſtello, quicquid tale eſt, prædium dicitur, à præſtando, ſicut prædes (ut Varro uult) ut alij, à prius dando, ſiue ualde dando. Sunt tamen prædia etiam in agro. Itaq; definire poſſumus, fundum eſſe ruſticam poſſeſſionem. Prædium uero & ruſticam, & urbanam. unde anteurbana prædia uocabantur, quæ urbi erant propinqua. Poſſeſſiones generale nomen eſt, nam & tabernæ, & hoſpitia, & horrea in urbe poſſeſſiones dicuntur, & ſimpliciter omnia bona, quæ uulgo uocantur immobilia. Cicero. Poſſeſſiones notabat & urbanas, & ruſticas. Idem. Etenim iſti callidi æſtimatores prata, & agros magis æſtimant, quod ei generi poſſeſſionum minime noceri poteſt. Dicitur tamen etiam poſſeſſio, non ipſa proprietas, ſed uſus, & actio poſſidendi. Modeſtinus, Quicquid enim apprehendimus, cuius proprietas ad nos non pertinet, aut nec poteſt pertinere, hoc poſſeſſionem appellamus. Fundum à funda dictum quidam exiſtimant. Vnde extant ridiculi uerſus Ciceronis. Fundum uero uocat, quò poſſit mittere funda, Ni lapis exciderit qua caua funda patet. Alij à fundo, quod eſt ima pars uniuſcuiuſq; rei, quod ſcilicet fundus ſit ac fundamentum pecudum, atq; pecuniæ, uel quod fundit quotquot annis multa, uel quod ſit planus ad ſimilitudinem fundi uaſorum. Campus obiter eſt planicies terræ ampla, & grandis, ideoq; ſpecioſæ plateæ, ſiue areæ campi uocitantur, ut Romæ campus Martius. diciturq; à capiendo, quod animalium, ſeu rerum multitudinem facile capiat. ſiue qđ ueteres principio ex agro tantum plano fructus capiebant. Collis eſt exiguus monticulus, ſiue per ſe ſit à monte ſeparatus, ſiue pars montis ita uocatus, quia colles poſt campos cœperunt colere. Ab hoc Collatina dea, quæ collibus præeſt. Hinc urbs Roma ſepticollis dicta, quod ſeptem habeat colles, Palatinum. Quirinalem. auentinum. cœlium. uiminalem. exquilinum, & ianicularem. Iugum, ipſa montis procliuitas, & (ut ita dicam) prona ſupinitas, qualis eſt in colle Cliuus, quamuis cliuus ponatur etiam pro colle mitiore, uelut Cliuus capitolinus. Cliuus, qui ducit ad Ianiculũ, quos in urbe ſcimus colles eſſe, propter quod dicitur ſepticollis. & apud ueteres feſta quædam fiebant ſeptimontialia. Liuius. Quantum in altitudinem egrediebantur magis, magiſq; ſylueſtria, & pleraq; inuia loca excipiebant, ut uero iugis appropinquabat, quod rarum in alijs eſſet, adeo omnia contenta nebula, ut haud ſecus, quàm nocturno itinere impedirentur. Dictus autem cliuus à clino, quod eſt inclino, & iugum à iungendo, quod iungatur, & in acutum arctetur. Ab hoc Iugantinus Deus, qui præeſt iugis. et iugoſum dicitur, quod in iugum acuitur. & decliuis, inclinatus, atq; incuruus. & accliuis, erectus, & in cliuum acuminatus. À quo accliuitas. Cæſar. Ab eo flumine pari accliuitate collis naſcebatur. Item cliuium ueteres difficile dicebant. Vnde cliuia auſpicia uocabantur, quæ aliquid fieri prohibebant. Montes definiunt eſſe terrarum tumores altiſſimos. Diminutiuum montis, eſt monticulus, hoc eſt paruus mons. Sicut colliculus paruus collis, cum per duplex. ll. ſcribitur. Nam ſi per ſimplex. l. ſcribatur colis, ſignificat exiguum, ac tenerum braſſicæ caulem. Diuiditur autem mons in radices, latera. iugum. uerticem pro qualitate locorum. Interdumq; mons pro ſaxo ponitur. Virgilius penſantemq; undis manibus capita aſpera montis, Ferro inuaſiſſet. ſicut aliquando ſaxum pro monte. Idem ſaxi de uertice paſtor. À monte deriuatur montanus, ut montani imbres, montanæ nebulæ. & montoſus, ut montoſa regio, montoſa loca. & montiuagus, qui per montes uagatur. & montigena, qui in montibus genitus eſt. & ſeptimontium, locus ſeptem montes habens. Vnde ſeptimontialia dicta. Ab eminendo quidam montem appellatum exiſtimant, quaſi eminentem, propter quod omne, quod eminet, dici mons poteſt. Virgilius. præruptus aquæ mons. Promontorium quaſi præeminens mons dictum, ſignificat enim montem in mari prominentem. Plynius, promontoria aperiuntur mari, & rerum natura agitur in planum. Idem. À ualle Vallonia dea, quæ uallibus præeſt. Item conuallis, quæ, noſtra ſententia, eſt arcta uallis, & quaſi coniuncta, quales ſunt, quas metaphorice Fauces appellamus, quãuis ab alijs dicatur eſſe planities ex omni parte comprehenſa montibus, uallibuſue. Vnde conuallis appellatur ſciſſio terræ manu facta ad deducendam aquam. Plynius. Flumina ad lauandam hanc materiam iugis montium duxere. Corrogos uocant à corriuatione. Præcepiſſe libramento oportet, ut fruaris quando influat. Itaque altiſſimis partibus dicitur conuallis, & interualla ſubſtructis canalibus iunguntur. Vallare, firmare eſt, atq; munire, & quaſi uallum facere. À quo fit circunuallare. Vallum eſt munitio caſtrorum, quod ex uallis fiat. Vallus ſudis eſt, ſiue palus, cui uitis alligatur. Virgilius. Et uallos primus ſub tecta referto. Solebant autem milites ſudes ſecum geſtare, quibus caſtra muniebant. Idem, Quadrifidaſq; ſudes, & acuto robore uallos. À uallo ueteres ualleſſit pro perierit dixere, quod qui uallo eijciuntur, pro perditis habentur. Item à uallus interuallũ, hoc eſt ſpatium, quod inter palos eſt, uallum caſtrenſe conſtituentes. à quo omne ſpatium interuallum eſt nuncupatum. À uallum uero uallaris corona, qua donari ſolebat, qui primus uallum hoſtium fuiſſet ingreſſus. Vallus etiam per diminutionem fit ab eo, quod eſt Vannus. Cereale hoc cribrum eſt. dictum (ut Varro putat) à uolatu, quod inde dum iactatur, leuia uolent. Virgilius. et myſtica uannus Hiacchi. in hoc etiam ob capacitatem coloni frugum primitias congerere ſolebant, ut Libero ſacrificarent. Ideo poëta myſticam dixit. Quippe myſticum græci dicunt omne id, quo in arcanis deorũ ſacris utimur, qualia erant Bacchi orgia, quæ noctu clàm à ſolis mulieribus celebrabãtur. et myſteria arcana ſacra appellabantur, hinc non ſine myſterio fieri dicimus, quod occulta aliqua, quaſi ſacrorum ratione perficitur. À uannus fit uerbum uanno, À quo euanno, quod eſt uentilo. moueo. Cuius paſſiuum eſt euannor, ſicut uannor à uanno. Lucilius. Nunc molere illa, aut ut frumentum euannetur uis. Varro de re ruſtica. Vt quod leuiſſimum eſt in ea, atque appellatur acus, ac palea, uannatur foras extra aream. Euadne Martis filia fuit ex Thebe uxore Aſopi, uxorq; Capanei, quæ, cum maritum apud Thebas raptum audiuiſſet, in mortis ſtuporem diriguit, deinde, cum funus eius celebraretur, ſe in rogum proiecit. Ouidius. Accipe me Capaneu, cineres miſcebimus inquit. Rupes ſunt præruptæ partes terræ propter altitudinem, ac procliuitatem inacceſſæ. Quapropter non immerito materiæ appellatione ligna comprehenduntur, ſiue quod ex his diuerſa ædificia fiant, ſeu quod græci ὕλην pariter & ſyluam,& materiam uocent. Ab hoc fit materiale, quod materiæ eſt, & materialiter aduerbium. Materialiter enim ſumi aliquid dicitur, cum non forma rei, ſed materia ſignificatur. A' ſylua, ſyluestrem, & ſyluaticum dicimus incultum moribus,atq; aſperum, & Syluanum ſyluarum deum, quem græci Pana uocant. & ſylueculam,ac ſylulam paruam ſyluam,& ſyluicolam ſyluarum habitatorem. & Syluium,quod in ſylua ortus fuerit. Apuleius, ſed iuſſit poteſtas officialem ſuum magna ſeueritudine coërceri, ubi notandum eſt, Officialis quoq; non inelegans uocabulum eſſe pro miniſtro magiſtratus. Idem alibi. Iam enim, fixo ſcias, quemadmodum ſub meo magiſterio mali debeant coërceri, & profuſa in medium ſportula iubet officialem ſuum ſuper piſceis inſcendere, ac pedibus ſuis totos obterere. Poteſtam quoq; ueteres pro poteſtate uſurparunt. Plautus. Neq; deſidiæ in otio operam dediſſe, neque poteſtam ſibi fuiſſe, adeo arte cohibitum eſſe à patre. Item à poſſum poſſibile, quod fieri poteſt, aut non poteſt, qbus uerbis uſi ueteres nõ fuere, nunc autem paſſim omnes utuntur. Item impos, q alicuius rei potis non eſt. Cõpos, qui uel habet aliquid, uel ſuo ſtudio aſſecutus eſt. Accipiturq; & in bonam, et in malã partẽ. Cic. Omniũ deſyderiorũ ſuorum compos factus. Plautus, Cedo manum, accipe erumnarum, et miſeriarum compotem, hoc eſt qui ſimul tecũ erũnas, ac miſerias hẽt. ſic. n. cõpotẽ mẽtis, compotem rõnis dicimus, hoc eſt q mentem, & rationem habet: & impotem, qui non habet. Cicero, Nam quomodo uictores di-

cinus uoti compotes, qui quicquid uolunt faciunt. ſic uictos econtrario uoti impotes, qui non poſſunt facere, quod uolunt. Item poſſideo, quaſi in poſſe, hoc eſt in poteſtate mea habeo. A' quo poſſeſſor, qui poſſidet, cuius fœmininum eſt poſſeſtrix. Afranius, Poſſeſtrix ita dicitur, ita tonſtrix, ita ĩpulſtrix. ita curſtrix. ita planctrix. ita aſſeſtrix. et poſſeſſio, quod modo actum ipſum poſſidendi ſignificat, modo bona, quæ uulgo uocantur immobilia, quemadmodum ſuperius diximus. & poſſeſſoriũ iudicium, quod non ſuper re principali, ſed ſuper poſſeſſione eſt. Et apud grammaticos poſſeſſiuum nomen, quod aliquid ſignificat, quod poſſidetur, ut Euandrius enſis, qui euandri eſt. & regiæ ædes, quæ regis poſſeſſio eſt. Item potior, & potius comparatiua, hoc eſt melior, & melius, quaſi potentior, & potentius, & potiſſimum ſuperlatiuum pro optimo. Præſtant enim, hoc eſt potentiora ſunt, quæ meliora ſunt. Item potius, et potiſſimum, &, quo iuniores quidam utuntur, Potiſſimo, aduerbia, quæ ſignificant magis, & maxime. potius enim de duobus, potiſſimum, ſiue potiſſime de pluribus dicitur, ut hoc potius, quàm illud elegi. et ex omnibus hoc potiſſimum elegi, ideſt magis, et maximè elegi, et quaſi pro meliori, atq; optimo elegi. Item à pote ut'pote aduerbium deducitur, quod confirmantis eſt, & quaſi cauſatiuum. Cicero, Me incommoda ualetudo, quia iam emerſerã, ut'pote cum ſine febri laboraſſem, tenuit. Idem, Ea nos ut'pote, qui nihil contẽnere ſolemus, non ptimeſcebamus, quod perinde eſt, ac ſi dixiſſet, quia, uel quoniã uel quandóquidem ſine febri laboraſſem. & quia, uel quoniam, uel quandóquidem nihil contemnere ſolemus. Sal. Antonius procul aberat, ut'pote qui magno exercitu locis æquioribus expeditus in fugam ſequeretur. Aliquando ſine cum, & ſine relatiuo reperitur. Vt Antonius aberat à bello, ut pote æger, ac iacens. In eadem forma reperitur & quippe. Quint. Si alienum, & ignotum tanquam communis omnium mortalium (Quippe ſub uno parente naturæ cognatio eſt) hominem cibo forte iuuiſſem, pœna dignum uideretur ſeruaſſe perituram animam. Titus Liuius, Notam iudici fabulã petitur, qppe apud quem authorem argumenti peragit. Profecto quoque, & utiq; eodem modo affirmant. Sed utiq; nunquam ferè apud Ciceronem, apud poſteriores frequenter reperitur. Quin. Solent huiuſmodi, negotiatores aliquid proprium, ac priuatum ſtipulari. Vtiq;, cum rem alienam uendant. profecto potius ad reſponſionem adhibetur. Cicero. Quis hæc renuntiatis profecto, qui interfuit. Quod etiam per certe facimus. Idem. Tantam ſolicitudinem bonorum, tantum amorem omnium, in quo meminimus? certe in nullo. et per nimirum. Quint. Demus id, quod nullo modo fieri poteſt, idem. ingenij. ſtudij. doctrinæ, peſſimo, atque optimo uiro uter melior dicetur, orator nimirum, qui homo quoque melior. & per nempe, quod uſitatius eſt. Cicero, Apud quem hæc dico? nempe apud eum, qui, cum hoc ſciret, me tamen ante, quã uidit, reipublicæ reddidit. Aliquando ſine interrogatione ponitur nempe. Horatius, Nempe hoc quæſiſti. Perſius, Nempe hoc aſſidue, iam clarum mane feneſtras Intrat. Quintilianus, Nempe enim in hoc plurimum laboris exhauſimus, ut rhetoricam oſtenderemus bene dicendi ſcientiam, & utilem, & artem, & uirtutem eſſe. Veteres nem quoque aliquando pro nempe ſcripſerunt, quamuis et pro niſi etiam quandoque ſumpſere. Sanè quoque aliquando affirmatiua eſt, ut ita ſanè. Sanè uero nonnunquam pro ualde ponitur, ut homo ſanè nobilis, iungiturq; interim ſuperlatiuo. Suetonius, Bellũ ſanè difficillimum geſſit. quandoq; permiſſiue accipitur. Quint. Tulerit ſanè filius noſter merito pœnas, dederit ſpiritum ſupplicio. nihil de præteritis loquur, quaſi eſto, ita ſit, ut tu uis. Certe quoq;, modo affirmat, modo pro ſaltem

accipitur, ut ſi non tangere, at certe potero uidere. Adiungitur autem illud, at quomodo iungitur ſed, cum tamen alterum eorum ſufficeret. quippe at nonnunquam idem ſignificat, quod ſaltem. Virgilius, At Meſſapus erit. Certe coniuncta cum coniunctione, &, ſemper affimat. Cicero, Et certe contra Cæſarem eſt ingreſſus armatus. Eodem modo ſanè. Quintilianus, Et ſanè quis concipiat, uel declamantis habitum, uel orantis uocem inceſſum. pronuntiationem. illum deniq; animi, & corporis motum? Certe coniuncta cũ ſcio, et ſimilibus uerbis ẽ in õ ſolet mutare. Cicero, Et ſi certò ſcio. Item à potis fit potior uerbum, quod eſt modo teneo, quaſi in poteſtate habeo, modo obtineo, & in poteſtatem uendico. In primo ſignificato ferè genitiuum ſemper requirit. Vt Lacedæmonij rerum diu potiti ſunt, ideſt rerũ imperiũ diu tenuerunt. In ſecundo ſignificato frequẽtius habet ablatiuũ, ut potitus ſum uictoria. potitus ſum amica. i. pugnando, uel laborãdo obtinui uictoriã, uel amicam. Aliquãdo etiã potior pro fruor accipitur. Cicero, Quod ſi his uoluptatibus bona ætas fruitur, libentius primum paruulis fruitur rebus (ut diximus) deinde ijs, quibus ſenectus, etiam ſi non abunde potitur, non omnino caret. Pro eodẽ poſuit fruitur, ac potitur hoc uerbum non modo quartæ, ſed etiam tertiæ coniugationis reperitur. Ouidius, Tuq; tuis armis, nos te poteremur Achille. A' potens quoq; fit omnipotens. à quo omnipotentia. & armipotens. & bellipotens, qui armis, & bello potens eſt. & uiripotens mulier, quæ coire iam cum uiro per ætatem poteſt. & uniuerſipotens dicitur deus, quod uniuerſa poſſit, à quo uniuerſipotentia deriuatur. Poſſum quando caret appoſito, modo accipitur pro potens ſum. Plautus, Non hic, ut poſſit, edit, ſed poſſe cupit, ut edat. modo pro eo, quod diuinari ab alijs malo, quàm exprimere, quale eſt apud Terentium. Amatores mulierum audieram eos eſſe maximos, ſed nihil poteſſe. Item ab eſt tertia huius uerbi perſona fit ambeſt, quod ſignificat circum eſt, nullamq; aliam habet declinationem. præter hæc, à ſum ſumo uerbum deriuatur, quod proprie eſt multum, & penè nimium mihi tribuo, & quaſi ſum mihi. Cic. Quãquam non tantum mihi ſumo iudices, neq; arrogo. ponitur tamen pro accipio, tollo. Salluſtius, Epiſtolam ſuper caput temere poſitam ſumit. Aliquãdo pro eligo. Horatius, Sumite materiam ueſtris, qui ſcribitis, æquam Viribus. Plautus. Sumat aliquem ex populo monitorem officij ſui. Interdum pro conduco. Cicero, Quoad enim peruentum, quo ſumpta nauis eſt, non domini eſt nauis, ſed nauigantium. Veteres etiam ſumo pro impendo accipiebant. Ab hoc ſummũ deriuari quidam falsò exiſtimant. Summum enim per ſyncopen fit à ſupremum (ut inferius oſtendemus) nam ſignificat, quod eſt omnium altiſſimum. Virgilius, Summóq; ulularunt uertice nymphæ. Cicero. Summam aquam attinget enectus ſiti Tantalus. Modo extremum. Virgilius, Venit ſumma dies, & ineluctabile tempus Dardaniæ. Aliquando laudabile, glorioſum. Idem, Me'ne igitur ſocium ſummis adiũgere rebus Niſe fugis? Hinc ſummates appellati ſunt principes ciuitatis, qui & optimates dicuntur. et ſummitas, altitudo. ex quo altior pars montis ſummitas dicitur, & ſumma, quæ eſt ſententiæ alicuius, aut rerum, de quibus uerba fiunt, collectio. Virgilius, Hæc ſumma eſt, hoc eſt præcepti mei ſuccincta collectio. hinc ſummatim. ad ſummã. in ſumma. ſummum ad ſummum, de quibus ſupra diximus. Summitudo quoq; apud aliquos pro ſummitate reperitur. et ſummula, parua ſumma, et ſumme, maxime, excellẽter. Sum pro eũ. Ennius. & pleriq; alij ex ueteribus poſuere. Summanalia appellantur liba farinacea ĩ modũ rotæ facta. Itẽ à ſumo dicitur ſumptus, hoc eſt ĩpenſa, qđ pecunia ĩpẽdatur, uel exponatur. Plyn. Qui eam domũ magno ſumptu ædificauerat. ab hoc fit aliud uer-

bum ſumptifacio. Plautus, Si nunc me ſuſpendam, meam operam luſerim, & præter operam reſtim ſumptifecerim. Item ſumptuoſus, qui prodige pecuniam expendit, et magnos ſumptus facit. & ſumptuariæ leges, quæ de moderandis ſumptibus latæ ſunt, quas Cato cibarias appellauit. Prima omnium de cœnis lata ad populum Lex orchia fuit, quàm tulit Caius Orchius tribunus plebis de Senatus ſententia tertio poſt anno, quàm Cato cenſor fuerat. Hæc numerum tantum conuiuarum præſcribebat. iubebatq;, ut patentibus ianuis cœnitaretur, quo obſeruatio eius uideri poſſet. Poſt hæc, cum plures præſcripto in conuiuio uocarentur, ideóq; authoritatem nouæ legis aucta neceſſitas imploraret, poſt annum uigeſimum ſecundum legis orchiæ, Fannia lex lata eſt anno poſt urbem conditam quingenteſimooctauo, neque eam prætores, aut tribuni, ut pleraſq; alias, ſed ex omnium bonorum conſilio, & ſententia ipſi conſules pertulere, cum reſpublica luxuria conuiuiorum, maiora, quàm credi poſſet, detrimenta pateretur. Quippe eò redacta res erat, ut pleriq; ingenui pueri pudicitiam, & libertatem ſuam uenditarent, pleriq; ex plebe Romana uino madidi in comitium uenirent, & ebrij de reipublicæ ſalute conſulerent. Hæc non conuiuijs tantum, ut orchia, ſed ſumptibus etiam modum impoſuit aſſibus centum præſcriptis, propter quod à Lucilio lepidiſſimo poëta centuſſis appellata eſt. Fanniam legem poſt duodeuiginti annos ſecuta eſt lex Didia, cuius ferendæ duplex ratio fuit, prima, ut non ſola urbs Roma, ſed uniuerſa Italia lege ſumptuaria teneretur, ſecundo, ut non modo qui conuiuia maiore ſumptu feciſſent, ſed etiam, qui ad ea uocitati eſſent, atq; omnino interfuiſſent, pœna legis tenerentur. poſt Didiam lata eſt Licinia à Publio Licinio Craſſo diuite, cuius ferundæ tantum ſtudium ab optimatibus impenſum eſt, ut Senatuſconſulto iuberetur, & tantummodo promulgata ante, quàm trinundino confirmaretur, ita obſeruaretur ab omnibus, quaſi iam populi ſententia cõprobata eſſet. Hæc lex nihil à Didia, ſeu Fannia differebat, authoritas tantummodo per eam quæſita eſt, exoleſcente metu antiquioris, quemadmodum olim de decem tabulis factum fuerat, quarum antiquitas, cum contemni cœpiſſet, eadem illa, quæ ijs legibus cauebantur, in alia legum latorum nomina transferunt. Legis autem Liciniæ ſumma hæc erat, ut calendis. nonis. nundinis liceret cuique in dies ſingulos triginta duntaxat aſſes edundi cauſa conſumere, cæteris uero diebus, ne amplius apponeretur, quàm carnis aridæ pondo tria, & ſalſamentorum libra, & quod ex terra, uite, arbore'ue natum eſſet. Harum omnium legum cauſa fuit nimia luxuria. Quippe uetus prouerbium eſt. Leges bonæ ex malis moribus procreantur. Poſt has ſecuta eſt lex Cornelia, quàm Cornelius Sylla dictator tulit. In ea non conuiuiorũ luxuria prohibita eſt, nec gulæ modus impoſitus, ſed minora rebus facta ſunt pretia, ea opinor ratione, ut gulæ ſeruire etiam qui paruis eſſent facultatibus, poſſent. Sylla Mortuo. Lepidus conſul legem tulit ſumptuariam, quæ Lepidiana dicta eſt. paucis deinde interiectis annis, aliam legem ad populum tulit Antius Reſtio, quæ antia nominata, licet optima eſſet, luxuriæ tamen obſtinatione nullo abrogante obliterata eſt, propter quod Reſtionem ipſum latorem legis tradunt, quandiu poſtea uixit foris non cœnaſſe, ne legem à ſe latam contemni uideret. A' ſumo compoſita fiunt aſſumo, qđ aliquando ſignificat accipio. Cicero, Neque id onus inuitus aſſumpſit. modo nimium tribuo. Idem, Si id mihi aſſumo, uideor id mihi meo iure quodãmodo uendicare. Ab hoc aſſumptio deriuatur. tranſumo, ex alio ſumo. unde, quæ ex primis tabulis tranſcripta ſunt, ſolennitate iuris adhibita, dicuntur tranſumpta. & actus ipſe

tranſumptio. Item tranſumptio figura eſt apud rhetores, quã græci μετάληψιν uocant, cum rem ex alio ad alium tranſmouemus. Demoſthenes, Cum bellum phocenſe conflatum eſſet, et non per me. non dum enim ego ad rempublicam acceſſeram. Cicero. Refertum tribunitijs legibus exhauſtum, à quibus ſit, ipſi ſciunt. Abſumo, & conſumo notæ ſignificationis. Plynius, Sarcophagus lapis eſt fiſſili uena, corpora defunctorum condita in eo abſumi conſtat intra quadrageſimũ diem. ideo nomen habet à carne edenda. σάρξ enim caro eſt, φάγω edo. Quidam ſarcophagum pro ſepulchro uſurpant. Idem, Mitior eſt autẽ ſeruandis corporibus, nec abſumendis, chemites ebori ſimillimus, in quo Darium conditum ferunt. Solinus, Sunt etiam in Lycia ſaxa, quæ uiuentiũ quoq; corpora adalligata conſumunt. Ab his conſumptio, & ſemiconſumptum, hoc eſt magna ex parte conſumptum. et abſumptio deriuatur. Item aliud conſumo primæ coniugationis, quod ſignificat perficio. à quo conſumatum opus dicimus perfectum. & conſumatio perfectio, quod quæ perfecta ſunt, omnia ſibi ſumpſiſſe uideantur. Martialis, Quod magni Thraſeæ, conſumatiq; Catonis. Reſumo, rurſus ſumo. Plynius, Reſumptis poſt longam ægritudinem uiribus. Præſumo, anteccapio. Apuleius, Qui ætatis meæ floſculos præſumpſiſti. Hinc rhetores præſumere pro præoccupare accipiunt. & præſumptionem dicunt, quam græci uocant πρόληψιν, cum id, quod uel in aduerſarij cauſa, uel in iudicis opinione contrarium nobis eſſe, aut fore arbitramur, præoccupamus dicere, & cum ratione diſſoluere. Demoſthenes, atque ego illum iudices arbitror Lycurgum laudatorem producturũ ſcilicet, qui ſit teſtis eius pudori, ac probitati, ſed ego Lycurgum uobis præſentibus hoc unum interrogabo, uelit'ne ſe ſimilem eſſe illius factis, & moribus, qđ ſi negarit, ſatis uobis factum eſſe de ueritate noſtra debebit. Lyſias, Hac oratione ſæpius apud me utebatur, & orabat, ut ſuarum erũnarum miſererer, inopiæ ſubuenirem. Quid multa? Commotus humanitate, precibus deprecantis, qđ petebat, dedi ſolus ſoli, quo minus nota calamitas hominis eſſet. Sed ut paratus ueniſſe uidebatur, iam ſe negabit accepiſſe, & flens uobis ſupplicabit, ut ſe à calumniatoribus eripiatis, Vos autem, cum eum ita agentem uideritis, facitote, ut et illius, & mei memineritis. A' ſum poſtremo fit eſto, quod modo futurum eſt imperatiui, modo aduerbium concedentis. Virgilius, Eſto ægram nulli quondam flexere mariti. Item ſum in præterito facit fui. à quo ueteres fuam pro ſim frequentiſſime uſurparunt. Item fore, quod licet declinatione præſentis ſit temporis, ſignificatione tamen eſt futuri. Cicero, Quos puto iam tecũ eſſe, uel propediem fore. & eodem modo affore. Ouidius, Eſſe quoq; in fatis reminiſcitur, affore tempus. Statius tamen uidetur affore in ſignificatione præſentis temporis accepiſſe, ſenſit manifeſto numine ductos Affore, quos nexis ambagibus augur Apollo. MOLES. Magnitudo. proprie enim moles dicitur res magna, ac magni ponderis. unde moleſtus dicitur, qui alicui grauis eſt, nec ſinit eum quieſcere, à quo moleſtia, ſolicitudo, & grauitas. & moleſte grauiter. & moleſto, ango, ſolicito, & quaſi molem affero. Apuleius, Toties quoq; moleſtatus obmutui. In hunc ſenſum molem accepit. Virgilius, totamq; infuſa per artus Mens agitat molem, hoc eſt magnitudinem mundi. Quoniam uero, quæ magna ſunt, difficilia eſſe conſueuerunt, capitur aliquando moles pro difficultate. Idem, Tantæ molis erat Romanam condere gentem, hoc eſt tantæ difficultatis. Item in mari moles dicitur, quoties excluditur aqua. Accipitur etiam aliquando pro motu. Virgilius, Inde Gyan, ipſam ingenti mole Chimæram Conſequitur. & à mouendo dicitur moles.

à quo fit molior, quod ſignificat uel ingenio, uel corpore moueor ad aliquid agendum, & pro uarietate appoſiti uarie exponitur. etenim moliri claſſem eſt parare. Virgilius, Claſſemq; ſub ipſa Antandro, et Phrygiæ molimur montibus Idæ. moliri iter, eſt peragere. Idem, datum molitur iter. moliri habenas, eſt gubernare. Idem, & manibus molitur habenas. moliri inſidias, eſt meditari. Apuleius, Dum mihi moliuntur inſidias. moliri arcem, eſt ædificare. Virgilius, Moliriq; arcem, & manibus ſubuoluere ſaxa. unde fit demoliri, quod eſt diruere. Cicero, Demoliri ea, quorum altitudo officeret auſpicijs. & amoliri, expellere, ſubmouere. à quo amula uas. & amuletum, de quibus inferius dicemus. Terentius, Proinde hinc uos amolimini nam mihi impedimento eſtis. Moliri etiam ſimpliciter poſitum, inuenire eſt. Plautus, Aliquid moliar, quo me hoc diſcrimine liberem. hoc etiam machinari dicimus à græco μηχανῶμαι, quod eſt inuenio, molior, unde μηχάνημα inuentum, & molimen dicitur, & μηχανὴ molitio, Machina, à quo bellicas machinas uocamus opera fabrilia, quibus in bello utimur. Item ipſa conſilia, quibus decipere hoſtem conamur. ἀπὸ τῆς μηχανῆς etiam dicitur mechanicus, quod ſignificat fabrum, hoc eſt opificem eorum operum, quæ ingenio ſimul, ac manibus fiunt. & mechanica ars fabrilis. unde quidam artes diuidunt in liberales, atq; mechanicas. A machinor, machinator, machinatrix, & machinatio deducuntur. Aliquando moliri paſſiue accipitur pro retardari. Lucilius, Mutilamur, molimur, ſubducimur. Ab hoc fit molimen pro eo, quod molimur. & molimentum pro conatu. Siſenna, Magno cum molimento, ac perpetuo ſono procedunt. & emolumentum utilitas, quam ex opera, & labore, & (ut ita dicam) molimine noſtro aſſequimur. & molitio, ac demolitio, quibus authores frequẽter utuntur. Item mola, qua ueluti mole quadam, frumentum, legumina, & aliæ res quæcunque teruntur. unde molas frumentarias, molas fabarias, et molas olearias dicimus. Quãquam mola etiam far toſtum dicitur ſale conſperſum, quo utebantur ueteres in ſacrificijs. Virgilius, Sparge molam. unde fit immolo uerbum, quod eſt ſacrifico, & quaſi molam ſpargo, à quo immolator, immolatrix, immolatio. & molucrum lignum quadratum, quo ueteres immolabant. Eſt etiam molucrum tumor uentris, qui etiam uirginibus incidere ſolet. Afranius, Virgini tam creſcit uterus, quàm grauidæ mulieri, molucrum uocatur, tranſit ſine dolore. Eſt enim etiam mola à molæ, de qua diximus, ſimilitudine appellata in utero mulieris caro informis, inanima, ferri ictum, & aciem reſpuens, quæ ſiſtit menſtrua, ut partus. & licet ijs quoque accidat, quæ coitu utuntur, quoties menſtrua uitioſa ſunt, aut ſemen uiri ad formandum fœtum debile eſt, atque ineptum, frequentius tamen ijs accidit, quæ à coitu abſtinent ſolitæ aliâs coire, quales uiduæ ſunt. Fit enim in his tumor præter naturam, & ſemen, cum ſanguine miſtum indureſcit in carnem, quamuis aliquando ex ſolo ſpiritu fit mola, quin maior uis caloris ſemen illud cum ſanguine conuertit in ſpiritum craſſiorem, quo ita ſæpenumero uterus intumeſcit, ut prægnantis ſpeciem præ ſe ferat. Mouetur mola, natura tentante eam expellere, quamuis medici motus cauſam aſſignent ſpiritum genitiuum, qui incluſus eſt in ſemine mulieris, ſed huic opinioni philoſophi repugnant. Simile quiddam, & uiris in uentre gignitur, quod σκίῤῥον græci, hoc eſt ſcirrum nominant, hoc ſplenus, et epatis uitio extuberat, præſertim in hydropicis, q̃d eueniſſe Oppio Capitoni prætorio uiro memoriæ proditum eſt. Item à mola fit molo uerbum, & molaris lapis, ex quo mola fit. hunc q̃dam pyritem uocitant, uel quod ei inſit plurimus ignis, quem

πῦρ græci uocant, uel à frumento, quod nominant πυρόν. Eſt tamen aliud pyritarum genus ἀπὸ τοῦ πυρός, hoc eſt ab igne appellatum, quod plurimum ignis habet. & eſt ponderoſum. noſtri modo uiuum modo ignarium lapidem uocant, exploratoribus caſtrorum maxime neceſſarium, quoniam clauo, uel altero lapide percuſſum ſcintillas edit, quæ ſulfure exceptæ, aut fungis aridis. aut folijs mira celeritate ignẽ trahunt. Item molares dentes, quod cibum à cæteris dentibus confractum ipſi molunt. Hi & maxillares à maxillis dicuntur. Sunt enim maxillæ, in quibus fixi ſunt dentes, et inferiores tantum in omni animantium genere mouentur, præterquam in crocodilo, qui mouet ſuperiores. Hæ per diminutionem à malis uocitatæ ſunt. Malæ à mali ſimilitudine dicuntur partes illæ, quæ homini tantum ſunt inter oculos, & buccas ad mali ſpeciem rotundæ. has priſci genas uocabant. Ouidius, Sæpeq; purpureis figere labra genis. Pacuuius, Nunc primum opacat flore lanugo genas. Hinc lex illa duodecim tabularum erat. Mulieres genas ne radunto, ne'ue læſum funeris ergô habento. Dicuntur tamen etiam genæ, quæ ſuperius, inferiusq; ambiunt oculum. Ennius, Pandite quæſo genas, & corde relinquite ſomnum. Plynius, Aquatilia dormire exiſtimant, non oculorum argumento, quia non habent genas, ſed ipſa quiete placita, ſeu ſoporata. Extremus ambitus ſuperioris genæ cilium dicitur. unde ſupercilia appellata. Cilium, uulnere aliquo deductum non coaleſcit. Quadrupedi ſuperiores tantum genæ ſunt, uolucribus inferiores, & quibus molle tergus, ut ſerpentibus, & quadrupedibus, quæ oua pariunt, ut lacertæ. Strutiocamelus alitum ſola utrinq; genas habet, & palpebras. Palpebræ ſunt capilli, quos in genis homines utrinque habent, dictæ uel à palpitando (ut quidam dicunt) hoc eſt tremendo, uel (ut ego ſentio) à palpando, hoc eſt prætentando obiecta. ob hoc enim natura palpebras homini dedit, ut ceu uallum quoddam uiſus eſſet. & prominens munimentum circa occurſantia animalia, aut alia fortuitu incidentia. Palpare, ſiue palpari (utroque enim modo dicitur) proprie eſt leuiter, & quaſi tentando tangere. unde pro adulari frequenter accipitur, et palpatores ex eo dicuntur adulatores. Plautus, Vt palpator nullus eſt, quando occepit blandior. Hinc palpo etiam dicitur. Idem, Palpo percutis. Quidam etiam palpum pro blanditijs uſurparunt. A palpo fit frequentatiuum palpito, quod eſt leuiter, ac frequenter moueor, & quaſi palpando. unde palpitare cor dicitur ob frequentem motum. Plynius, Palpitat certe cor, & quaſi alternatim mouetur. A palpo fit compoſitum expalpo, quod eſt elicio. Plautus, Quid faciam? exora. blandire. expalpa. Idem. Nunc ſeruus argentum à patre expalpabit. Pomponius, Siquid expalpare poſſum ab illo. Defluere palpebras tradunt abundantibus uenere, præter hominem, & ſtrutiocamelum. nulli animali ſunt, niſi quibus & in reliquo corpore pili. Strutiocamelus maxima auium eſt, ſi tamen auis eſt dicenda, cum pennas duntaxat habeat, ut adiuuent ad currendum, cætero uolucris non ſit, nec à terra tollatur. In Africa altitudinem equitis equo inſidentis excedit, celeritatem uincit. Vngulas habet ceruinis ſimiles, biſulcas comprehendendis lapidibus utiles, quos in fuga contra ſequentes pedibus ingerit. Concoquit quæcunque deuorat ſine aliquo delectu. Mira in co ſtoliditas eſt, etenim in tanta corporis altitudine, ſi colla frutice occultauerit, latere ſe putat. Oua eius in pretio ſunt propter amplitudinem pro quibuſdam uaſis habita. Item pennæ, quia conos bellicas, & galeas uarijs coloribus infectæ adornant. Conus proprie à græcis uocatur nux pinea, propter q̃d geometræ eiuſmodi figuram conũ appellant.

Hoc autem differt à meta, ſiue pyramide, quod meta lateribus conſtat, Conus rotunditatem habet ſine lateribus. Hinc conus appellatur curuatura, quæ eſt in ſummitate galeæ, ſuper qua criſtæ ponuntur. & coniferæ arbores dicuntur, quæ conos ferunt, hoc eſt nuces pineis ſimiles. Oui. et coniferæ cypariſſi. Quicquid præterea tali forma eſt, conoides dicitur. Vnde cupreſſus fœmina conoides eſt, quæ in faſtigium conuoluitur. nã mas ſpargit extra ſe ramos, deputaturq; et uitẽ accipit. Græci etiam κωνοφόρους, hoc eſt coniferos uocant eos, qui in Bacchi exercitu, dum in Indiã proficiſceretur, thyrſos ferebãt, quod thyrſi pineæ nucis ſpeciem habeant. Ob hanc cauſam mulieres poſtea in Bacchi ſacris conos, hoc eſt pineas nuces geſtare conſueuerunt. ſiue quod hic fructus cordis ſimilitudinem habeat. Græci autem humano cordi exiſtimãt Bacchum præeſſe, quoniam cor hominis, in quo mens habitat, uino accenditur. A molendo præterea molctrina deducitur, quod piſtrinum olim dici ſolebat, quo tempore tundebantur frumenta, non molebantur. Quidam ẽt molendinum uocant. à quo molendinarij opifices ipſi dicuntur. Item molendinariũ, quicquid ad molendinũ pertinet. unde molendinariam molam, et molẽdinarios aſinos dicimus. Paulus iuriſconſul. aſinam molendinariam, & molam negat ea appellatione contineri. Idẽ autem eſt meta molendinaria inferior pars molæ. Catyllus ſuperior. Piſtrinum aũt à piſendo dicitur. Piſere enim tundere eſt. Varro, Nec piſorem ullũ noſſent, niſi eum, qui in piſtrino piſeret farinam. Vnde piſores, ſiue piſtores ueteres uocabant, tam eos qui frumenta piſebãt, quã qui panes coquebant, ijdem quippe erant utriuſq; rei artifices. Ab eodem etiam piſtillum dicitur, quo quid in mortario piſitur. & piſtura actus ipſe piſendi. Plyn. Piſtura nõ oium facilis. Quippe et Hetruria ſpicam farris toſti piſente pilo præferrato fiſtula ferrata. & ſtella intus denticulata, niſi intenti piſant, concidantur grana, ferroq; frãgantur. Secundum quoſdam molæ dictæ ſunt, quod res molẽdo fiant molliores. Quidam molam, non à mole, ſed à græco dictam exiſtimant, quod eſt μύλος. unde μύλος ἐλαιῶν mola olearia nuncupatur, quã nos trapetum diximus appellari. Ab hac deducitur amylon, q̃d ſine mola fiat ex omni tritico, ac ſiligine. optimum uero ex trimeſtri fit, inuentum primo in inſula Chio. Id ita fit. Madeſcit triticum aqua dulci in uaſis ligneis, ita, ut totum tegatur. quinqes in die mutatur aqua, ita, ut miſceatur pariter emollitum ante, q̃ aceſcat, linteoq;, aut ſportis ſiccatum tegulæ infunditur, quæ illita ſit fermento, atq; ita in ſolo dẽſatur. probatur leuitate. leuore. candore. recentia. Moloſſa autẽ pars Epiri eſt, à Moloſſo Pyrrhi, & Andromaches filio ſic nominata. Ab ea uero fit moloſſus adiectiuum. Moloſſus etiam pes eſt ab eius patriæ ſaltatione ita nominatus. VENERABILIS. Digna ueneratione, ſicut amabilis, dignus amore. Nomina enim, quæ in bilis deſinunt à uerbis uenientia, aliquando infinitiuum paſſiuum eius uerbi ſignificant cum dignus, ut ſpectabilis dignus ſpectari. formidabilis, dignus formidari. admirabilis, dignus qui admirationi ſit. Aliquando infinitiuum, uel actiuum, uel paſſiuum cum poteſt, uel natura aptum eſt, ut riſibilis, qui poteſt, uel natura aptus eſt ridere. Hinnibilis, qui poteſt, uel natura aptus eſt hinnire. Item penetrabilis, q̃ poteſt, uel natura aptus eſt penetrari. Stabilis, qui poteſt, uel natura aptus eſt diu ſtare. Poſſibilis dicitur, q̃ fieri poteſt, nec aliorum regulam ſeruat. propterea id nonnulli cum ſuo compoſito, quod eſt impoſſibilis, tanquam parum latina reſpuerũt. Venerabilis à ueneror deriuatur, quod eſt colo, ſignificatq; eum, qui cultu, & ueneratione dignus eſt. Plyn. Vir grauis, & ipſa iam ſenectute uenerabilis. Idem & uenerandus dicitur. Seneca. Vocẽ æſtimatione dignam, & omni ſeculo uenerandã.

Poëtæ ueneratum quoq; aliquando pro uenerabili, ſeu uenerãdo poſuerunt. Virgilius, Curſuſq; dabit ueneratã ſacerdos. Veneror autem compoſitum exiſtimant à uenia, & oro, ut ſit uenerari, quaſi ueniam orare. ab eo fit ueneratio pro honore, et cultu. & ueneranter aduerbium. Apuleius. Et ab eo ueneranter exceptus paululum quieui. Quidam etiam uenerabiliter uſurparunt. CONSPICVI. Clari, ſpectandi. Specio uerbum in uſu apud ueteres fuit pro aſpicio, uideo. Vnde augures ſpecere, hoc eſt inſpicere aues dicebantur. & ſpectionem auium pro contemplationem, & inſpectionem. Ennius, Vos epulo poſtquam ſpexit, & ueſtiſpici, cuſtodes ueſtium ſerui, quod frequenti diligentia ueſtes inſpiciebant. Plautus, Tum familia tota, ueſtiſpici, unctor, auri cuſtos. Afranius, Noui non inſciam ancillulam ueſpere, & ueſtiſpicam. ab hoc fit frequẽtatiuum ſpecto, quod interdum uideo ſignificat. Virgilius, Heu magnum alterius fruſtra ſpectabis aceruum. Interdum inſpicio, caueo. Plautus, Spectandum ne tibi annulum det, neq; roget. Aliquando approbo. Terentius, Spectandæ, an exigendæ ſint uobis prius. Cicero. Non igitur ex ſingulis uocibus philoſophi ſpectandi ſunt. Nonnunquam tendo, ut hic ad mortem ſpectat, hoc eſt quaſi reſpiciendo tendit. Cicero, ad extremum ſi ad perniciem patriæ res ſpectabit, patriæ ſalutem antepones ſaluti patris. Quintil. Et quod ad peſſimum ſpectat euentum, miſerabilis ſis oportet, ut amator eſſe uidearis. Hinc ſpectabilis dicitur ſpectatione dignus, & quaſi admirabilis. Apuleius, Iubet conſtrui pulchrum, ac ſpectabilem currum. & ſpectatus probatus, cuius ſcilicet ſpectata iam uirtus eſt. Virgilius, ſunt nobis fortia bello Pectora, ſunt animi, & rebus ſpectata iuuentus. & ſpectatores, qui ad ludos ſpectandi cauſa conueniunt. Plautus, Nunc ſpectatores Iouis ſummi cauſa clare plaudite. Item generaliter quicunque aliquid aſpicit, eius rei ſpectator dici poteſt. & ſpectaculum, quod modo ſignificat id, quod ſpectatur. Virgilius, Nocte pluit, tota redeunt ſpectacula mane, modo ipſam ſpectationem. Cicero, O graue, acerbumq; ſpectaculũ. Aliquando locum, qui ad ludos ſpectandos ædificatur, quem ſupra diximus pluratiuo numero foros appellari. Sueto. De ſpectaculo excitatus deſcendit. Liuius, Tum primum circo, qui maximus dicitur, deſignatus eſt locus, diuiſa loca patribus, equitibuſq;, ut ſpectacula ſibi quiſque facerent, fori appellati. Item à ſpecto compoſita fiunt aſpecto, & circunſpecto, quod eſt frequenter aſpicio. à quo circunſpectus dicitur, non qui circunſpicitur. hunc enim conſpicuum, uel circunſpicuum uocamus, ſed, qui circunſpicit, & in omnem partem ſpectat, hic eſt prudens, & ſagax. Plynius, Quis eo acutior? quis circunſpectior? expecto, præſtolor, quia dum uenturum aliquem præſtolamur, an ueniat, frequenter aſpicere ſolemus. Plautus, Domi te expecto. Aliquando tamen expectare accipimus pro moram trahere. Virgilius, Tyria Charthagine, qui nunc Expectat. nonnunquam pro deſyderare. Idem. Expectate uenis. Cice. Nihil unq̃ expectatius fuit. Hinc fit expectatio, quæ modo præſtolationem, modo moram, modo deſyderium ſignificat. In expectatione enim eſſe aliquem dicimus, dum eum cum ſpe, & deſyderio expectamus. Proſpecto, proſpicio. deſpecto, deorſum aſpicio. Apuleius, In puteum forte deſpectans. ſuſpecto, modo ſurſum aſpicio, & tunc à ſurſum componitur. Martianus, Oculiſq; ſuſpectans ſydera. modo deorſum aſpicio, & tunc à ſub deducitur. Martialis, Sed ſuſpectat oculis deuorantibus draucos. Itẽ à ſpecio fit ſpecimen, quod eſt argumentum quoddam. & probatio, ſiue exemplar. Seneca. Virtutis ſpecimen, & patriæ ornamentum. Virgilius, Tale dabit ſpecimen. & ſpecies, quæ modo formam ſignificat, & ueluti effigiem rei, eſtq; uocabulum medium. Idem, neque enim ſpecie,

fama'ue mouetur, hoc eſt nec præſenti deformitate, nec rumore mox futuro. Specioſus tamen ſemper in bonã partem accipitur, hoc eſt pro pulchro, quemadmodum formoſus. licet forma medium uocabulum ſit. Virg. O' formoſe puer, nimium ne crede colori. Vlpianus tamen ſpecioſas perſonas dici affirmat clariſſimas perſonas utriuſq; ſexus. Item eorum, qui ornamentis ſenatorijs utuntur, modo ſpecies pro aſpectu, & re uiſa accipitur. Virgilius, Non tulit hanc ſpeciem furiata mente Corebus. modo definitur, quod dicitur de pluribus differentibus numero, quomodo genus, quod dicitur de pluribus differentibus ſpecie ut puta animal genus eſt, qđ de homine. elephanto. equo. auibus. piſcibus. reptilibus. alijſq; ſpecie differentibus prædicatur. Homo uero eſt ſpecies, quoniam de Socrate. Platone. Ariſtotele. Fabio. Catone. Cicerone, alijſq; non ſpecie ſed numero differentibus dicitur, ob eam rationem ita appellata, quod multorum collectio una quaſi uiſione comprehẽdatur. Hinc ſpeciale, & ſpecificum pro particulari accipiuntur, & ſpecialiter, ac ſpeciatim pro particulariter, quod quidam etiam ſpecifice dicunt. & ſpeculum, in quod aſpicimus, ac ſpeciem, hoc eſt effigiem noſtram contemplamur, quod datum nobis à natura fuit, non, ut pilos è ſupercilijs, aut barba uelleremus, nõ ut faciẽ inficeremus coloribus, non ut rugas traheremus, ſed ut noſmetipſos noſſemus, & formoſi deuitaremus infamiam, deformes redimendum ſciremus eſſe uirtutibus quicquid corpori deeſſet, propter quod Socrates hortari adoleſcenteis ſolebat, ut ſeſe, frequenter in ſpeculo intuerentur. Nam ſi inquit formoſi eſtis, elaborandum eſt, ut dignũ ea ſpecie ſitis, ſin autem deformes, ut eã deformitatem uirtute, ac bonis artibus tegatis. quamuis aliæ quoq; ſint ſpeculi utilitates longe præſtantiores. in primis enĩ, quid pulchrius eſt, quàm naturam eius ſpeculari, & rerum ad id pertinentium rationes inquirere? cur concauum maiorẽ uera effigiem reddat. conuexum minorem. planum æqualẽ? Cur concauum modo intra, modo extra ſpeciem repræſentet, modo rectam, modo conuerſam. Conuexũ uero, planumq; ſemper eandem, & eodem modo. Cur concauum non lucem tm̃, ac radios conuerſum ad ſolem reflectat, ſed etiam calorẽ emittat talem, ut facilius accendat, quã aliquis alius ignis. Planum uero, lucem tantum reflectat ſine calore. Conuexum nec lucẽ, nec calorem? Ad hæc, quia imbecilli oculi, quod ſuſtinere cominus ſolem non poſſent, formam eius, habitumq;, & uerum illum igneum colorem contemplari non ualebant, inuentum eſt ope, atq; adiumento ſpeculi non modo orientem, occidentemq; illum conſpicere, uerum etiam ſupra nos ſtantem, & nullo rubore perfuſum, ſed candida luce fulgentem. Præterea duorum ſyderum occurſum, quem defectum, uel defectionem ſolis, ſiue græco uocabulo eclypſim nominamus, quo interpellari aliquando dies ſolet, quis unquam cernere potuiſſet, aut cauſam eius cõprehendere? niſi liberius in ſpeculo ſolis, lunæq; imagines uideremus. Taceo, quod iuuenis in ſpeculo ſe uidẽs admonetur flore ætatis tempus illud diſcendi eſſe, & fortia audiendi. Senex uero, ut quæ canis indecora ſunt, deponat, et de morte imminente iam cogitet. Quid quod uiri fortes cicatrices ſuas, ſiquas in facie habent, ſpeculis contemplantes memoria uirtutis excitantur. Audiui ego ſæpenumero Federice princeps te, quoties faciem tuam in ſpeculo contemplaris, nullo amiſſi luminis deſyderio affici, ſed læto, ac ſereno uultu modo uerba illa proferre θάῤῥει φιδέριχε, καὶ σαυτὸν βλέπε φανερῶς, ἵνα τῆς ἀρετῆς καθημέραν μνημονεύῃς, hoc eſt bono animo ſis Federice, teq; ipſum manifeſte aſpice, ut uirtutis tuæ continue memineris, modo ita dicere. Dij boni, quos ego uel uirtutis, uel fortunæ ſocios habeo. Philippos. Horatios. Annibales. Sertorios. Expergiſcere, expergiſcere aliquando Federice, & illos non mo-

Illud uero ex meipſo uideor augurari, te quando peruiglem iſtum tuum oculum in ſpeculo contemplaris, non mediocri lætitia affici, quod ſcias per omnem iam Italiam prouerbij loco haberi, Plus unum Federicum, uno oculo uidere, quã cæteros omneis principes duobus. Illa præterea Sertorij uerba frequẽti tecum uſurpare ſermone. Alij non ſemper uirtutis ſuæ inſignia ſecum ferunt, ſed haſtas. torques. coronas domi relinquunt. Ego uero, rei militaris inſignia mecum aſſidue porto, eoſdemq; & uirtutis meæ, & fortunæ habeo ſpectatores. Ad hæc igitur comparata eſt materia excipiendarum imaginum potens, & inuenta ſunt ſpecula ex ferro. plumbo. argento. cryſtallo. uitro. miſtiſq; materijs. Quinetiam natura ipſa nobis ſpecula parauit, quæ ſemper eſſent in promptu. Fons cuiq; perlucidus, & quieſcens aqua, ac leue ſaxũ imaginem reddit. Virgilius, Nec ſum adeo informis, nuper me in littore uidi, cum placidum uentis ſtaret mare. A' ſpeculo ſpecularis lapis dictus, quod ad ſpeculi ſimilitudinem luceat, atq; imaginem reddat. finditur in tenuiſſimas cruſtas. hunc olim tantum citerior Hiſpania mittebat, poſtea Cyprus, et Sicilia, & Africa miſere. Eſt et in bononienſi agro breuis. maculoſus complexu ſilicis alligatus. nunquam uiſus eſt quinque pedum longitudine amplior. Humorem hũc terræ exiſtimant cryſtalli modo glaciari in lapidemq; cõcreſcere. Huius olim ramentis circum maximum ludis circenſibus ſtrauere, ut eſſet commendatio candoris. Item à ſpecio ſpecula dicta, de qua aliquid conſpicimus. Virgilius, ſpecula Miſenus ab alta. à quo ſpeculor uerbum, quod proprie eſt indago, perquiro, & ueluti è ſpecula proſpecto. à quo ſpeculatores dicti, qui uel è ſpeculis aſpiciunt, uel in bello ante exercitum explorandi gratia mittuntur. & præſpeculor uerbum, ante ſpeculor. Suetonius de Cæſare Exercitum neq; per inſidioſa itinera duxit unquã, niſi præſpeculatus locorum ſitus. per metaphoram tamen ſpeculari accipimus pro ſcrutari, et exacte conſyderare. à quo ſpeculatio, conſyderatio. Specus quoq; à ſpecio deriuatur, quod locus ſit (ut Vlpianus definit) ex quo deſpicitur, uel quod uox in eo repercuſſa hominem ibi alterum uideri faciat. Dicimuſq; hic ſpecus, hæc ſpecus, & hoc ſpecus. Item hoc ſpecu, & in plurali hæ ſpecus. Item ſpecium, cuius diminutiuum eſt ſpecillum. A' ſpecio deducitur inſtrumentum teres, ac paruum, quo medici ad tentandam uulnerum, aut fiſtularum uiam uel profunditatem, utuntur. Pacu. Vt medici faciunt, qui prius ſpecio uulnus tentant. Connelius Celſus. Ante omnia autem dimitti ſpecillum in fiſtulam conuenit, ut quò tendat, & quàm alte perueniat ſcire poſſimus. Hinc oricularium ſpecillum dicitur, quod curandis auribus adhibetur. A' ſpecu, ſiue ſpecilli ſimilitudine ſpiculum telum dicitur ad ſimilitudinem ſagittæ. Item ipſa ſagitta. à quo ſpiculor, configo. & ſpiculator carnifex. & ſpica, quod ad ſpiculi ſimilitudinem acuta ſit, diciturq;, & maſculino, & neutro genere ſpicus, & ſpicum. Eſt enim proprie cum per culmi folliculum, ideſt extremum tumorem ariſtæ adhuc tenues in modum ſpiculi eminent Abuſiue tamen, & de maturis frugibus hæc uocabula dicuntur. A' ſpica, ſiue ſpico fit ſpico uerbum, quod ſignificat ſpicas emitto. Item inſpico, quod eſt ad ſpicarum, & ariſtarum ſimilitudinem incido, uel fodio. Virgilius, Ferroq; faces inſpicat acuto. & ſpiceus. Idem, Spicea iam campis cum meſſis inhorruit. Item ab eodem ſpina, hoc eſt ſentis, qđ ad ſpiculi ſimilitudinẽ acuta ſit. à quo ſpineũ, qđ ex ſpina eſt, ut corona ſpinea, & ſpinoſum, ſpinis abũdans, et ſpinus pirorũ arbor, qđ ſpinis referta ſit. Idẽ, & ſpinos pruna ferẽteis. Item à ſpecio compoſita ſunt aſpicio, qđ eſt uideo, Virg.

Aſpice bis ſenos lætanteis agmine cygnos. A' quo fit aſpectus, ideſt intuitus, atq; effigies cuiuſq; animalis, ut horridus aſpectu, hoc eſt uiſu horribilis, & qui effigiem habet horrẽdam. Transferturq; etiam ad inanimata. Plynius. Prærupta rupes, & aſpectu horrida. Deſpicio, quod proprie eſt deorſum aſpicio. Quintil. Nullam ego res humanas deſpicere prouidentiam reor, hoc eſt rerum humanarũ curam habere. Quoniam uero ea, quæ contemnimus, quaſi deorſum, & ad pedes noſtros proiecta aſpicere ſolemus, capitur deſpicio pro contẽno. Cicero. Deſpectus ab omnibus, ac pro nihilo habitus. Ab hoc fit deſpicuus, hoc eſt intentus, uigil, cuius exempla apud Apuleium frequentiſſima ſunt, & deſpicientia, & deſpectus quartæ declinationis pro contemptu. Expicio, cuius frequentatiuum eſt expecto, quod proprie ſignificat obſeruo, quaſi diligenter aſpicio. Terentius. Expecto. quid uelis. Quoniam uero aſpicientes aliquid diligenter manere diutius eodem loco ſolemus, expecto aliquando pro maneo uſurpatur. Virg. Tyria Carthagine, qui nunc Expectat. Martialis. Expectant, curæq;, cathenatiq; labores. Item pro deſydero, quoniam quæ deſyderamus cum uoluptate aſpicimus. Idem. Expectate uenis. & proſpero, quoniam quæ ſperamus, quaſi cũ præſentia aſpicere uidemur. Idẽ. ſed illos Expectata ſeges uanis eluſit ariſtis. Ab hoc expectabũdus, & expectatio deducuntur. Suſpicio, ſurſum aſpicio. Virg. & faſtigia ſuſpicit urbis. Ab hoc fit ſuſpicor notæ ſignificationis. dictum, quod cum timore quodam ea uidemur aſpicere, de quibus dubitamus. Virgilius. ſuſpectaq; dona Præcipitare iubet. Hinc fit ſuſpicio, quod, ſi cum uenio iungatur, ſem p paſſiue accipitur, ut ueni in ſuſpicionem, ideſt factus ſum ſuſpectus. & ſuſpicioſus tam qui ſuſpicatur, quàm qui ſuſpectus eſt. Proſpicio, longe uideo, quaſi porrò ſpecio. unde fit proſpectus. hoc eſt libera, & non impedita proſpectio. Item proſpicientia, hoc eſt, cura. prouiſio. nam & proſpicio pro curo. & pro uideo capitur. Plynius. Nam & rebus illius non minus, q̃ meis proſpiciebam. & proſpicuus intentus, ac uigil. Præſpicio, ante uideo. inſpicio, cerno, introſpicio, ĩtrorſum aſpicio. Reſpicio, retro aſpicio, ſiue rurſus aſpicio, ſiue aſpicio. à quo fit reſpectus, qđ modo ipſam (ut ita dicam) reſpectionem ſignificat. Plautus. & me reſpectu tenuit. modo rationem, qua ad aliquid agendum mouemur. Plynius. Namq; eo reſpectu commotus abſceſſerat. Conſpicio, cerno. unde fit conſpectus pro aſpectu. Virg. Vix è conſpectu ſiculæ telluris in altum, Vela dabant læti. & conſpicilium inſtrumentum. quod adhibemus oculis, ut res maiores uideantur. Plautus. Vitrum cedo, neceſſe eſt conſpicilio uti. & conſpicuus adiectiuum, quod modo ſignificat ſagacem, perſpicacem, acutum. Quintilianus. Conſpicuus, ſagax, callidus. modo clarum, & qui ab omnibus conſpicitur, quemadmodum hoc loco Martialis conſpicuum amphitheatrum appellat. Deſpicio, pro uideo, diſcerno. hinc diſpicientia, hoc eſt diſcretio, conſyderatio. Perſpicio. intueor. animaduerto. à quo perſpicax, hoc eſt conſyderatus, acutus. unde perſpicaciter aduerbium, quod eſt conſyderate, acute. Item perſpicuus, clarus, translucidus. ut aqua. uitrum. cryſtallum, alijq; translucentes lapilli. à quo aduerbium perſpicue, hoc eſt clare. unde perſpicuam quoq; orationem dicimus, hoc eſt claram, atque apertam. & perſpicuitas à quibuſdam, ſicut perſpicacitas uſurpatur. illud ſplendorem, ac facilitatem, hoc conſyderationem, & acumen ſignificat. Præter hæc aruſpex à uictimis in ara aſpiciendis. is enim eſt aruſpex, qui inſpectis extis, futura prædicit, qui & extiſpex dicitur. à quo aruſpicium, inſpectio extorum ſicut extiſpicium. & ars ipſa aruſpicina, quæ extiſpicina quoque dicitur. Item auſpicium ab inſpiciendis auibus, cum per inſpectionem captabãt auſpicium. hinc factum eſt, ut dicimus auſpicia, ductum, atque

principium, quæ à ſolo duce capiuntur. à quo fit auſpicari, qđ non modo ſignificat auſpicium capere, ſed etiam incipere, nec in bonam tantum partem accipitur, quod frequentiſſimum eſt, ſed etiam in malam. Plynius. At homo infeliciter natus, manibuſq;, pedibuſq; deuinctis animal cæteris imperaturum à ſupplicijs uitam auſpicatur. nam quando non eſt uerbum, ferè ſemper in bonam partem accipitur. Terentius. Haud auſpicato huc me attulit. ideſt non feliciter, & quaſi repugnantibus auſpicijs. Quintil. Itaq; apud illos Homerus, ſic apud nos Virg. auſpicatiſſimum dederit exordium, hoc eſt feliciſſimum. auſpex dicebatur, qui nuptijs præerat celebrandis, quia auſpiciũ pro nuptijs capere ſolebant. Adhibebaturq; hic pro parte mariti. ſicut pronuba, quæ præeſt et ipſa nuptijs celebrandis, pro parte uxoris. Aliquando etiã pro eo ponitur, qui dux militiæ eſt. Horatius. Nihil deſperandum teucro duce, & auſpice. Virg. Auſpicium pro poteſtate poſuit. Communem hunc ergo populum, paribuſq; regamus Auſpicijs, ab eo, quod præcedit id, qđ ſequitur, quod iiſdem auſpicijs creati conſules parem habent poteſtatem. Inter auſpicium, & augurium quidam hanc differentiam faciunt, ut auſpicium ſit auium conſpectio, et quod ex uolatu auium, & uocibus ſignificatur. Augurium uero, quod rerum omnium coniecturas prudenter, ac diligenter complectitur. & tamen augurium quoque ab auibus, ac gerendo dicitur, quaſi auigerium, ſiue ab auium garritu. Hinc augur, qui futura præuidet. & auguro, atque auguror uerbum eiuſdem ſignificationis. quãuis aliqui ita diſtinguant, ut auguro dicamus, cum præſagio mentis futura colligimus. Virg. Et ſiquid ueri mens augurat opto Auguror uero, cum futura ueris captamus augurijs. Ab eodem auguraculum ueteres dicebant, quã nos arcem uocamus. quod ibi aues publice auſpicarentur. Auguſtum quoq; inde dictum opinantur. etenim proprie auguſtum tectum augurio conſecratum ſed per metaphoram ponitur pro nobili, & ſacro, ac maieſtatis pleno. Vnde auguſti dicti ſunt omnes Romani imperatores poſt Iulium Cæſarem ab Octauio Auguſto, qui primus meruit hoc cognomen, ſicut à Iulio Cæſare dicti ſunt Cæſares, et omnes Albani reges dicti ſunt Syluij à Syluio Aſcanio Aeneæ filio. et Aegyptij reges dicti ſunt Ptolemæi. Perſæ, Arſacidæ. Latini, Murani. Auguſtum quidam ab auium geſtu, alij à guſtatu dictum putant, quia aues paſtæ id ratum fecerunt. ERIGITVR. Eleuatur, ædificatur, in altum tollitur. de quo ſupra diximus. AGER. Qui in ædibus Neronis erat incluſus cum ſyluis, atque nemoribus. SVPERBVS. Ingens, magnificus, excellẽs. ſuperbus à ſuperbiendo dicitur. Superbio autem à ſupereundo. unde quicquid in aliqua re excellit. ſuperbum dicere poſſumus, quaſi ſuper alia iens. Virgilius. Ceciditq; ſuperbum Ilion, hoc eſt nobile, magnificum. hinc aliquando pro elato ponitur, atq; alto. Idem. Et greſſus glomerare ſuperbos. Idem. Quinq; adeo magnæ poſitis in cudibus urbes Tela nouant, Aruina potens, Tyburq; ſuperbũ. Aliquando pro ornato. Idẽ. Barbarico poſtes auro, ſpolijſq; ſuperbi. Interdũ pro opulento. Idem. ſimul enſe ſuperbũ Rãnetem aggreditur, qui forte tapetibus altis Extructus. Hinc fit quod ſuperbum aliquando et pro arroganti, ac truculento accipimus. Idẽ. Stirpis Achilleæ faſtus, iuuenemq; ſuperbũ. Idem. te Turne ſuperbum Cæde noua quærens. et pro uitabili. Idem. Floribuſq; affixa ſuperbis Ora uirũ triſti pẽdebãt pallida tabo. Et pro iniquo. Idẽ. Quos illi bello profugos egere ſuperbo. Antiqui etiã ſuperbos propter pompam funeris, quemadmodũ ſupra diximus, mortuos dixere. Plautus. Faciam ego hodie te ſuperbum, niſi abis, & mox addidit, auferere, non abibis. Item à ſuperbio, quod eſt efferor, extollor, Sup̃bia deriuatur, quæ definitur ſupergre-

diens elatio mentis, ex quã naſcitur arrogantia, nam niſi præceſſerit occulta elatio mentis, non ſequitur aperta iactantia. Item ſuperbe aduerbium, hoc eſt elate arroganter, & ſuperbiloquens, qui ſuperbe loquitur. à quo ſuperbiloquentia, elatus, atq; arrogans ſermo. Cicero. O' ſcelera, animiq; impotentiam, & ſuperbiloquentiam. Ennius pro ſuperbe ſuperbiter ſcripſit. TECTA. Domos, quas Nero incendi fecerat, ut domos ſuas ædificaret. Tectum proprie pars domus eſt, ea ſcilicet, quæ domum tegit. ponitur tamen frequentiſſime pro domo, ut hoc loco, & generaliter pro omni loco, in quo tecti homines poſſint habitare. unde ſpeluncæ. tuguria. præſepia. caſæ. & generaliter omnia ædificia, tecta dicuntur. Vnde architecti, & architectores dicti, qui ædificandi ſcientiam habent. & architectura ædificandi ſcientia dicitur. Plyn. Grande, & Archimedi, machinalis ſciẽtiæ teſtimonium. hinc fit architectari, quod eſt componere, machinari. Cice. Vt optime poſſit architectari uoluptates. A' tegendo autem tecta appellantur. Tegere proprie operire eſt. cuius contrariũ eſt nudare. detegere. Plyn. Hæ plantæ paluſtri arundine per hyemem tegendæ ſunt. per metaphoram tamen tegere pro celare accipimus. Mar. Quod tegitur maius creditur eſſe malum. Virgil. Vix adeo agnouit pauitantem, & dira tegentem ſupplicia. Quemadmodum e contrario nudare pro indicare uſurpamus. Idem. traiectaq; pectora ferro Nudauit. A' tego fit etiam tegmen, quod etiam tegimen dicitur. tegmentumq; pro quacunq; re aliquid tegente. & tegulum eiuſdem ſignificationis. Plyn. Ab hoc fit miſeratio, quæ eſt ſignificatio miſericordiæ, qua ex alicuius infelicitate mouemur. Item à miſerendo fit miſericors, qui ex alicuius calamitate dolorem animo ſuſcipit. Is, cum aliquando ueteranum quendam notum ſibi in militia conſpexiſſet, in balneo dorſum, ac poſteriores parteis corporis pariẽti atterentem, percontatus eum fuiſſe dicitur, cur ſe marmoribus diſtringendum dediſſet, cumq; ille idcirco hoc à ſe fieri reſpondiſſet, quod ſeruis careret, & ſeruis eum, et pecunia liberaliter donauit. Paucis uero interiectis diebus, cum complures ſenes ad prouocandam principis liberalitatem eodem ueniſſent, ſeq; pariẽti identidem attererent, euocari eos iuſſit, & alium ab alio mutuo confricari. Heliogabalus brachteariorum, hoc eſt eorum, qui bracteas, ſiue per diminutionem bracteolas, hoc eſt tenuiſſimas ex auro, uel argento, uel alio metallo laminas faciebant, quorum ars bractearia uocatur, & quod bracteis tegitur, bracteatum dicitur. & uitrariorum, & pellionum, hoc eſt eorum, qui ueſtes pelliceas, & alia ex pellibus opera faciunt. & clauſtrariorum, ideſt eorum, qui claueis, & cætera, quæ ad claudenda hoſtia pertinent, laborant. & argentariorum, & aurificum, aliarumq; artium uectigal maximum inſtituit, ex eoq; iuſſit thermas tam à ſe fundatas, quàm ſuperioribus principibus factas populi uſibus exhiberi, ſyluas in thermis publicas deputauit. Ipſe thermis frequentiſſime uſus eſt cum populo, æſtate maxime, & ſæpe uiſus eſt cum balneari ueſte domum reuerti. E contrario Alexander promiſcua balnea in urbe prohibuit. Item M. Aurelius Antonius à quodam philoſopho monitus, lauacra miſta traditur ſubmouiſſe ea lege, qua et defluenteis matronarum mores compoſuit, & ſederi in ciuitatibus, equis, uehiculiſq; prohibuit. Idem in balneis pedes uinxerat, à capite in aërem ſpirare unguentum dictitans, à pedibus uero in nareis prodire. MVNERA. Thermas inquit appoſitiue munera, hoc eſt dona data populo. donum. munus. & præmium ſic ſeparat Donatus, quod donum, & munus, tam ante factum, quàm poſt factum dari dicit. Præmium non niſi poſt factum. Donum uolũtarium eſſe, præmium deberi. donum dijs dari. munus hominibus. præmium uiris fortibus, Donum à liberali homine. præmiũ à præclaro. Terentius. Quoduis donum à me, & præmium optato. at Martianus. Inter donum, & munera hanc differentiam facit, quod munus eſt id, quod neceſſario ſubimus lege. more. imperio eius, qui iubendi habet poteſtatem. Donum autem, quod nulla neceſſitate iuris, ſed ſponte præſtatur. & ſi non præſtatur, nulla reprehenſio, & ſi præſtatur, plerunq; eſt laus. Paulus uero munus tribus modis accipi putat, uno pro dono. unde munera dari, ac mitti dicuntur. Alio pro onere, quod cum remittitur, uacationem militiæ præſtat. unde immunitas appellatur. Tertio pro officio, à quo munera militaria uocantur, & milites quidã munifici. & municipes, qui in ciuitatem recepti munera nobiſcum faciunt, de quibus ſupra diximus. Munus mea ſententia proprie eſt donum, dictum (ut Varroni placet) quod qui mutuo animo ſunt, id dant officij gratia, nec à dono differt, niſi cum per metaphoram, uel pro officio ponitur, quoniam officia, aut à principibus, aut a rebus publicis muneris loco dari conſueuerunt, uel pro ludis, qui à principe populis, quaſi muneris loco exhibentur. Martialis de muliere leonem in ludis necante, Priſca fides taceat, nam poſt tua munera Cæſar, Hæc iam fœminea uidimus acta manu, uel pro onere, quia munera, hoc eſt officia ſine labore, atque onere exerceri non poſſunt. A` munere muneralis lex appellata, qua Cincius cauit, ne cui liceret munus accipere. Plautus. Nec muneralem legem. neque lenoniam rogo, fuerit necne flocci exiſtimo. Munem officioſum ueteres dicebant. Item eum, qui onera populo ſoluit. unde munia dicuntur obſequia lege debita, et officia. Item immunis, qui ab huiuſmodi onere liber eſt. & immunitas exemptio ab onere. Munuſculorum dies appellabantur quinquatrijs Idibus Iunijs, quia is dies feſtus erat tibicinum colentium Mineruam. quinquatrijs proprie dies feſtus erat Mineruæ martio menſe, quo tempore matronæ inter ſe inuicem munera miſſitabant, & cœnas ſeruis apponebant, ut uiri ſaturnalibus. Item à munere fit munero uerbum, quod eſt dono. Macrobius, Ianus, cum Saturnum claſſe prouectum excepiſſet hoſpitio, & ab eo edoctus peritiam iuris, ferum illum, & rudem ante fruges cognitas uictum in melius redegiſſet, regni eum ſocietate munerauit. Ab hoc fit remunero, ideſt retribuo. redono. & munificus, liberalis, quaſi munera large præbens. & munificentia, liberalitas, & munifice, liberaliter, & munerarius, quem græci agonothetam uocant, qui ludos gladiatorios populo præbet, unumq;, uel plura parua gladiatorum ad ſpectacula pugnatura producit, quæ res munus gladiatorum appellatur. quia populo tanquam munus donatur. & qui fa-

milliam gladiatorum habet, gladiatoreſq; domi inſtruit, ac poſtea uendit. à laniando dicitur laniſta. Gladiatores dicuntur generaliter omnes, qui gladijs pugnant, etiam diſcendi gratia ante, quam in ludum producantur. Specialiter uero inter gladiatores ſunt retiarij, qui aduerſus mirmillonem pugnabant. dicti à rete, quod ſub ſcuto gerebant, ut Mirmillonem inuoluerent. Mirmillones dicebantur gladiatores, qui genere quodam gallicæ armaturæ utebantur, quod mirmillonium nominabant. unde galli ante mirmillones nominabantur, in quorum galeis piſcis effigies erat. Solebant autem retiarij aduerſus mirmillonem pugnantes hæc uerba cantare. Non te peto, piſcem peto, quid me fugis galle? Cuius ludi inuentorem fuiſſe tradunt Pyttacum Mitylenæum unum ex ſeptem ſapientibus. Hic enim, cum de finibus inter Athenienſes, et Mitylenæos contentio eſſet, creatus imperator, cum Phrynone Athenienſium duce, qui pancratiaſtes fuerat ſingulari certamine pugnauit, in quo cum rete ſecum ſub clypeo geſtaſſet, Phrynonem eo, dũ non cauit, inuoluit, eoq; perempto tutatus eſt agrum, quamuis poſtea orta rurſus de eo contentione, electus controuerſiæ iudex Periander, Athenienſibus adiudicauerit. Digna certe memoratu eſt illa Pedonis urbanitas de mirmillone, nam, cum retiarium conſequeretur, nec feriret, uiuum inquit capere uult. Item à munis fit communis, qui omnium eſt, quaſi omnibus conſentiens. à quo communitas. & aduerbium communiter, pro quibus ueteres munitas, & muniter uſurparunt. Siquidem apud ueteres munes, & munifici, non à largitione, quæ ignota erat, dicebantur, ſed ita appellabantur conſentientes ad ea, quæ amici uellent. Pacuuius. Nam quia tum largitio multis ignota erat, munificus nemo putabatur, niſi pariter uolens. Lucilius Munifici, comeſq; amicis noſtris uideamur uiri. A` munis fit munico uerbum, quo antiqui utebantur. et à communis communico. à quo communio, & communicatio deducuntur. quando quod eſt, aut eſſe poteſt priuatim, fit uniuerſorum, & actus ipſe communicandi. unde in communione bonorum eos eſſe dicimus, qui ſimul uiuunt. & redditus ſuos, ac lucra communicant, hoc eſt communia faciunt. Item à munus per diminutionem fit munuſculum, hoc eſt paruum munus, & munio uerbum, quod eſt proprie inſtruo. orno. & quaſi muneribus compleo. à quo compoſitum communio. & mœnia. & murus, de quibus ſupra diximus. & monile ornamentum gutturis. Quãuis aliqui hoc à monendo potius deductum uelint, ut inferius dicemus. hoc etiam ſegmentum uocatur, quod quibuſdam bracteolis, quaſi præſegminibus conſtet. Vnde ſegmentatæ ueſtes dicuntur bracteolis argenteis, aureiſue depictæ. Iuuenal. Segmenta & longos habitus. Plau. Quàm pulchre ſegmentatam ueſtem. unde opera quoq; ex ligno uermiculatim depicta, ſegmentata dicuntur. Iuuenalis. Et ſegmentatis dormiſſet paruula cunis. ſegmentatis inquit, hoc eſt præſegminibus, ideſt tenuiſſimis ligneis ramentis, ac uerſicoloribus depictis. quamuis etiam intelligere liceat ſegmentatis, hoc eſt ſegmento tectis. Item ornamentum equorum à collo in pectus præpendens, & mundus, hoc eſt ornatus muliebris, quaſi munitus, quamuis alij à mouendo hunc dictum uolunt, quod mundus id genus ornatus ſit, quod ſumitur, ac deponitur. Mundum etiam neutro genere ueteres dixerunt. Lucilius. Legauit quidam uxori mundum omne penumq;. ab hoc mundus adiectiuum, hoc eſt purus. terſus. politus. à quo immundus, impurus. obſcœnus. & mundo & mundifico uerba, hoc eſt depuro. detergo. & mundicia, quæ & mundicies dicitur, hoc eſt lautitia. & contrarium eius immundicia, ſiue immundicies, & munde, atque immunde aduerbia. Vlpianus mundum muliebrem eſſe dicit, quo mulier mundior fit, contineriq; eo, ſpeculum. matulas. un-

guenta. uaſa unguentaria. & ſiqua ſimilia ſunt. unguenta autem, quibus unguntur ualetudinis cauſa, mundo muliebri non contineri. Item ab hoc mundo cœlum ipſum appellatus eſt mundus. Nam ſicut græci κόσμον, quod apud eos ornatum ſignificat, ita nos à perfecta, abſolutaq; elegantia uocauimus mundum, & ab hoc quatuor elementa, & quicquid cœli ambitu continetur, ſimili appellatione mundum nominamus. à quo mundanum dicimus, quod mundi eſt. Vnde interrogatus philoſophus, cuias eſſet, mundanum ſe eſſe reſpondit. Mundum gentiles ter in anno patere putabant, poſtridie uulcanalia. & ante diem tertium Nonarũ Octobris. & ante diem ſextum Iduum Nouembris. Inferiorem enim eius partem conſecratam dijs manibus arbitrantes, clauſam omni tempore exiſtimabant, præter eos dies, qui ſupraſcripti ſunt, quos dies etiam religioſos iudicauerunt. ea de cauſa, quod ijs diebus, quæ occulta, & abdita religionis deorum manium eſſent, in lucem proferrentur, nihil eo die in republica geri uoluerunt. Itaque per hos dies non cum hoſte manus conſerebatur, non exercitus ſcribebatur, non comitia habebantur, non aliud quicquam in republica, niſi quod ultima neceſſitas coëgiſſet, adminiſtrabatur. A` coſmus uero græca uoce coſmographia deducitur, hoc eſt mundi deſcriptio, ſicut geographia dicitur terræ deſcriptio. & topographia loci deſcriptio. Item coſmeta, quod latine ornator, ſiue ornatrix interpretatur. Iuuenalis. Ponunt coſmetæ tunicas. Item microcoſmus paruus mundus, quo uerbo frequenter utitur Ariſtoteles pro homine. Coſmus etiam excellens unguentarius fuit, à quo unguenta dicta ſunt coſmiana. Idem. Et Coſmi toto mergatur aheno. Petronius. Affer nobis inquit alabaſtrum Coſmiani. Item a munio fit præmunio, quod ſignificat ante munio. uel ualde munio. & munimen munitio, ac munimentum eiuſdem ſignificationis, cum ſcilicet caſtra, oppida, turres aliæue huiuſmodi contra aduentum hoſtium muniuntur, ſiue uallo, & foſſa, ſeu alio quouis modo. Nam monimentum à monendo deriuatur, ſignificatq; quicquid mortui cauſa ædificatum eſt, uel quicquid ad memoriam alicuius eſt factum. unde ſepulchra. ſtatuæ. tituli. libri. cæteraq;, quæ nos rei alicuius præteritæ moneant, monimenta dicuntur. Virgilius. ueterum monimenta uirorum. Idem. noſtri monimentum, & pignus amoris. Per metaphoram tamen monimenta aliquando dicuntur cellæ meretricum, quod quaſi ſepulchra ſint. Martialis. Abſcondunt ſpurcas & monimenta lupas. VELOCIA. Repentina, quia Diuus Titus thermas iuxta amphitheatrum mira celeritate ædificauit. Suetonius. Amphitheatro dedicato, thermiſq; iuxta celeriter extructis munus edidit apparatiſſimum, largiſſimumq;. Velox celer dicitur à uolando, quaſi uolox. à quo uelocitas, celeritas. & uelociter, celeriter. Item comparatiua, & ſuperlatiua uelocior. uelociſſimus. uelocius. uelociſſime. Volo autem proprium eſt alas habentium. ſed per metaphoram, & naueis, & eos, qui celeriter currunt, uolare dicimus. Virgilius. Humilis uolat æquora iuxta. Idem. Ecce uolat, calcemq; terit iam calce Diores. Terentius. Ne fruſtra illic expectet, uola. Hinc ueliuolum mare dictum, quod per id uelis uolatur. Virgilius. Reſpiciens mare ueliuolum. Item ueliuolæ naues dicuntur, quod uelis uolant. Volare, & nare reciproce ponuntur. Virgilius. uelorum pandimus alas. idem de apibus. Nare per æſtatem liquidam. cum nare proprium piſcium ſit. à quo fit frequentatiuum natare. unde compoſita ſunt adnatare, quod eſt allabi. Circunnatare. obnatare. ideſt contra natare. Tranatare, quod & tranare dicitur. ideſt natando tranſire. enatare, hoc eſt extra natare. Prænatare, ante natare. innatare, ſubnatare. ſupernatare, ſupra undas ſto, non mergor. Renato, rurſus

Idem. huc pauca ueſtris annauimus oris. & inno. Idem. Et fluuium uinclis innaret Clœlia ruptis. & trano, de quo ſupra diximus. Et conno, ſimul nato. à quo connatio dicitur, ſicut à connato connatatio. Plautus. Connationis noſtræ conſcius, hoc eſt quod eandẽ adiremus mulierem. Idem. Connatat nobiſcum, hoc eſt riualis eſt. A` nando etiam Neptunnus dictus (ut Ciceroni placet) & amnis a circum nando, hoc eſt fluendo (ut quidã putant) Varro tamen ab ambiendo dictum amnem affirmat, quod amnes hoc eſt flumina, omnia circumeunt, propter q̃d cornuta à ueteribus pingebantur. Ab amnis antemna (ut quidam exiſtimant) quaſi anteamna. & Interamna Vmbriæ urbs, quod inter duos amneis ſit conſtituta. Item à nando Natrix ſerpentis genus, quod in aqua quoq; uenenum ſpargit. Cicero. Vt natricum, uiperarumq;. Lucanus. Et natrix uiolator aquæ. Itẽ natrix herba eſt, cuius radix euulſa uirus hirci redolet, hac in Piceno utuntur, ut abigant à mulieribus faunos, ſiue fatuos, quorũ ludibria pati eas p̃ noctem opinantur. Nec mirũ id uideri debet. purgat enim eo humore, quo labefactata mens nocturnis uiſis decipi ſolet. Natrix quoq; dici poteſt mulier natans ſicut natatrix, & natator mas. Natare aliquando ueteres pro nauigare accipiebant. à quo natinatio dicebatur negotiatio. & natinatores ex eo negotioſi uocabantur. & naſſa à natando appellata, uaſis genus, quò qui intrauerit piſcis, exire non poteſt. Plautus. Nunq̃ ex iſta naſſa hodie eſcam petam. Naſamones populi ſunt Libyæ nauium ſyrtibus inuolutarum ſpoliatores, Lucanus, hoc tam ſegne ſolum, raras tamen exerit herbas. Quas naſamon gens dira legit, quæ proxima ponto Nudus rura tenet, quem mundi barbara damnis Syrtis alit, nam litoreis populator arenis Imminet, & nullos portus tangente carina. Nouit opes, ſic cum toto commercia mundo, Naufragijs Naſamones habent. Item naricam à nando quidam dictam putant, q̃d eſt genus piſcis minuti. Nã naritia inſula eſt in mari ægæo, quæ fuit Vlyſſis. Item natatus à natando fit pro ipſo actu natandi, qui & natatio dicitur. quamuis natatio etiã pro piſcina, ſiue lauacro (ut ſupra oſtendimus.) Sunt qui nares etiã, ac naſum à nando deriuata exiſtiment, q̃d per ea innatet, atq; enatet ſpiritus. Quidam hoc à græcis tractum exiſtimant, apud quos ῥύγχος ro-

Ponitur autem ronchus pro deriſione, uel quia deridentes roſtra labijs effingimus in acutum extendentes, uel quia quẽadmodum propter ſomnum, ita propter nimiũ riſum naſus humore impletur, plenus hunc ſonum reddit, quod notari ex epigrammate poteſt, quod adoleſcentes ex Phædro luſimus. Mercurium hoſpitio mulieres duæ illiberali, & ſordido receperant, Quarum una in cunis paruum habebat filium, Quæſtus placebat alteri meretricius. Salluſtius. Prorſus in facie, uultuq; uecordia inerat. Ab hoc fit uultuoſus, hoc eſt triſtis. Cicero. In quo, cum effeceris, nequid ineptum ſit, aut uultuoſum. Quidam exiſtimant faciem, non os tantum, & oculos, ac genas dici, quod græci πρόσωπον uocant, ſed formam, & modum, & facturam quandam corporis totius à faciendo dictam, ſicut ab aſpectu ſpeciem. & à fingendo figuram, quod præclare oſtendiſſe Plautus uidetur, dum inquit. Sed earum nutrix, qua ſit facie mihi expedi. Statura non magna, corpore aquilo, ipſa eſt ſpecie uenuſta. ore, atq; oculis pernigris. quamuis autem uultus proprie ad animũ, facies ad corpus referatur, ut mœſto uultu. irato uultu. longa facie. breui facie. eſt tamen quando utroq; uti liceat fœdata facie. fœdato uultu. ſciſſa facie. ſciſſo uultu. conuerſa facie. conuerſo uultu. Ipſius quidem hercle ducem neuult. & malo, quod ſignificat magis uolo. Plautus. Mori mauult, quàm in ſeruitute uitam agere. Volumen quoque à uolendo dictum nonnulli opinantur, quod in uoluminibus, hoc eſt libris ſcribentium uoluntas appareat, ſed melius ſentiunt, qui uolumen à uoluendo nominatum exiſtimant, quod maiores noſtri in libris arborum, hoc eſt. codicibus ſcribebant, & libellos illos quo ferrent commodius, complicabant, ideoq; uolumina appellarunt libellis ſimiliora, q̃ libris. Eſt enim proprie uolumen pars codicis, ut puta Metamorphoſeon liber in quindecim uolumina diſtinctus eſt. Ouidius. Sunt mihi mutatæ ter quinque uolumina formæ. hinc et euoluere librum di-

Aliquando rapio, ſuffuror. & tunc à uola deducitur, ut ſit inuolare, quaſi intra uolam tenere. eſt enim uola media pars manus, ſiue pedis, à quo galli uolema appellant pira bona, & grandia, eo quod impleant palmam. Subuolo, latenter uolo, ſiue latenter rapio. reuolo, reuertor, retro uolo. Conuolo, ſimul uolo. Item à uolo ſis ueteres dixerunt pro ſi uis. et ſultis pro ſi uultis. Itẽ ab eodem (ut quidam exiſtimant) uoluo deriuatur, uolando enim quaſi uolui alæ uidentur. ab hoc uoluens dicitur, qui uoluit. uolubilis, qui facile uoluitur. uoluto, quod proprie ſignificat uoluo. unde uolutabra dicuntur loca, in quibus ſe apri uoluunt. Virgilius. Sæpe uolutabris pulſos ſylueſtribus apros Latratu turbabis agens. Aliquando uolutare capitur pro eo, quod eſt mente uoluere, & cogitatione perquirere. Idem. Idem. Sint ergo matrices robuſti corporis, quadratæ, pectoroſæ, magnis capitibus. Eſtq; uterus duntaxat in muliẽribus. Nam quod Virgilius de equo inquit, uterumq; armato milite cõplet, ideo fecit, quia dicturus erat fœta armis. Apud Cæcilium uter pro uterus legitur. Nunc uter creſcit, non poteſt celari. Dicta autem uulua eſt, quod fœtus inuoluat. Vulua ſuum, qua ueſcimur, ſecto partu melior eſt, quàm edito. Eiectitia uocatur illa, hæc porcatria. illa amplior eſt. icirco inquit Horatius. Nil melius turdo, uulua nil dulcius ampla. Volua quoque in fungis dicitur tunica illa, quæ fungum inuoluit. Plynius de boleto. Voluam enim terra ob hoc prius gignit, ipſum poſtea in uolua, ceu in ouo, eſt luteum. Nec tunicæ minor gratia in cibo infantis boleti. Item à uoluo fit aduoluo, quod eſt agglomero. & circumuoluo notæ ſignificationis. & deuoluo, deorſum uoluo. & reuoluo, explico. & inuoluo, quod proprie ſignificat glomero, per metaphoram tamen aliquando pro implico capitur. Cum uerborum quibuſdam inuolucris uteretur. Idem. Scite enim Chryſippus, ut clypei cauſa inuolucrum, uaginam autem gladij, ſic præter mundum cætera omnia aliorum cauſa eſſe generata. & conuoluo, ſimul uoluo. à quo conuoluolus uermis, qui & uoluox dicitur, de quo inferius dicemus. Vulgus quoq; à uoluendo deductum quidam exiſtimant, quod ſtulte huc, atq; illuc uoluatur. Eſt ènim proprie uulgus, & maſculino, & neutro genere ignobilior multitudo. Virgilius. ſæuitq; animis ignobile uulgus. Vnde uulgarem dicimus uilem, ac communem. & uulgo, ac diuulgo uerbum, hoc eſt omitto, ac uile, & quaſi commune omnibus facio. Plautus. Item à uoluo uulga, quod numos, aliaq; res inuoluat. Eſt enim uulga, quam etiam bulgam ueteres dixere, ſacculus ſcorteus, ſiue ex alia materia, in quo ferre uel pecuniam, uel alia uiæ neceſſaria ſolemus. Lucilius. In uulgam penetrare piloſam. Varro. Vt uiaticum ex Arcula adderem in uulgam. Eſt etiam uulga, ſiue bulga folliculus ad brachium pendens gerendæ pecuniæ gratia. Lucilius. Cui neque iumentum eſt, nec ſeruus, nec comes ullus, bulgam, & quicquid habet numorum ſecum habet. cum bulga cœnat. dormit. lauat. Item bulgam aliquando pro uulua, hoc eſt matrice poſuere. Idem. Ita ut quiſq; noſtrum è bulga eſt matris in lucem editus. et econtrario uulua pro ſacculo ponitur. Item à uoluendo, uulnus, quod uoluendo, hoc eſt uibrando fiat. Diſtatq; ab ulcere, quod ulcus per ſe naſcitur. dictum (ut quidam putant) ab olendo, eſtq; tecta & clauſa malignitas. Virgilius. Quam ſiquis ferro potuit reſcindere ſummum Vlceris os, alitur uitium, uiuitq; tegendo. à quo fit ulcero, dilanio, & quaſi ulcus facio. & exulcero, quod proprie eſt ulcus dilanio. per metaphoram tamen capitur pro exaſpero. exacerbo. Cicero. Ita mihi animum exulcerauit. Item ulciſcor. quod eſt uindico. unde ultio, quod uindictam ſignificat. & ulcerariæ herbæ dicuntur, quæ ulcera excitant, ut Marrubium herba notior, quàm indicari oporteat, quæ exulcerare ueſicam exiſtimatur. græci praſion. alij lynoſtrophon, quidam philopeda, nonnulli philocares nominant. Vulnus autem eſt hians, patensq; apertura corporis ictu facta. Virg. Preſſi'ue oculos, aut uulnera laui Veſte tegens. Ab hoc fit uulnero, qđ proprie eſt ſaucio. transfertur tamen ad animum, & ſignificat ango. unde & uulnus animi pro angore accipimus. aliquando etiam pro damno. Plynius. Maximũ illi fortuna uulnus intulerat, duobus filijs immatura morte ſublatis. A` uulnero fit conuulnero, & uulnerarius medicus chirurgus, quod uulnera curet. Præter hæc à uolatu tardo uultur dicta, nota auis, & propter magnitudinem corporis tarde uolans, nidificat in excelſiſſimis rupibus. Fœtus eius ferè bini conſpiciuntur. quidam auem hãc parere tradunt oua tria, uno ex his reliqua oua, nidumq; luſtrare, mox abijcere. Sunt qui exiſtiment uulturem triduo

ante, aut biduo uolare, ubi ſunt cadauera. Ab hoc fit uulturinus adiectiuum, ut uulturina caro. Romani augures immuſſulum uulturis pullum eſſe exiſtimauerunt, ſicut ſanqualẽ oſſifragæ, de qua inter aquilarum genera dicemus. Alij tamen immuſſulum putarunt aquilæ pullum dici, prius quàm albicare cauda incipiat. Vultur etiã Appuliæ mons eſt notiſſimus. Item à uolando uulturnum deriuatum putant, uentus eſt, qui ab oriente hyberno ſpirat. Græci miſto nomine, quod inter notum & eurum ſit εὐρόνοτον, hoc eſt euronotum nominant. Et loligo (ut Varro exiſtimat) quaſi uoligo. uolitat enim hic piſcis extra aquam ſe efferens, quod & pectunculi faciunt ſagittæ modo. Ex mollium piſcium genere eſt, ſicut ſæpia, et polypus. his caput inter pedes, & uentrẽ, pediculi octoni omnibus. Sæpiæ, & loligni pedes duo ex his longiſſimi, & aſperi, quibus ad ora admouent cibos, & in fluctibus ſe uelut anchoris ſtabiliunt. Cæteri autem curti ſunt, quibus uenantur. Lolignem nunc uulgo calamarium uocant, à Thecæ calamariæ ſimilitudine. habet enim oſſicula duo, quaſi cultrum & calamum. Item cruorem nigrum atramenti modo, quod, ubi ſenſit ſe apprehendi, effundit: atque ita infuſcata aqua cerni non poteſt. À loligo fit loliguncula diminutiuum. Plautus. Emito ſæpiolas. loliguncalas. & miluus ſecundum quoſdam à molli uolatu, quamuis alij factitiũ hoc nomen potius à uoce uelint. auis eſt nota ex accipitrum genere. Notatum eſt eam, quamuis rapaciſſima ſit, & ſemper famelica, nihil eſculenti rapere unquam ex funerum ferculis. Eadem uidetur artem gubernandi docuiſſe caudæ flexibus, in cœlo monſtrante natura, quod òpus eſſet in profundo. Latet hybernis menſibus, & ſolſtitijs afficitur podăgra. À miluus fit miluinus adiectiuum. Ab huius auis ſimilitudine, & piſcis miluus appellatur, ſubiens in ſumma maria, & uagando aliorum piſcium prædam agens. Vulcanum quoq; plerique nominatum exiſtimant, quod canus, hoc eſt candidus uolet. uolat enim flamma, & candida eſt. Vulcanus autem ignis eſt. deum hunc, & Iouis filium fuiſſe ex Iunone ueteres finxerunt, qui, cum deformis natus eſſet, nec ei Iuno arriſiſſet, præcipitatus à Ioue fuit in inſulam Lemnon, ubi à Thetyde, & Euthimone Oceani filia ſuſceptus, ac nutritus eſt, uno claudus pede ex caſu factus. Alij à ſimijs educatum uolunt. Deorum hic faber fuit, et Ioui fulmina, ac cæteris dijs arma contra gigantes fabricauit, fecit monile Hermiones. coronam Ariadnes. Arma Achillis, & Aeneæ, aliáq; complura, quæ ſupra ingenium humanum fuiſſe exiſtimata ſunt. non tamen ob hæc ad deorũ menſam admiſſus eſt, & cum Ioui ſupplicaſſet, ut ſaltem Mineruæ nuptijs iungeretur ab ea ſpretus eſt. unde Virgilius. Cui non riſere parentes, Nec deus hunc menſa, dea nec dignata cubili eſt. Poſt hæc Venerem habuit uxorem. Cicero præter hunc alios duos Vulcanos commemorat, alterum Cæli filium, alterum Nili, q ab Aegyptijs, Aegypti cuſtos exiſtimatur. À Vulcano fit uulcanius adiectiuum. unde uulcaniam tellurem, & uulcanias inſulas dicimus. Item a uolo deducitur uelum, quod uela uentis agitata uolitare uideantur. Varro tamen à uellere dictum mauult, quod ex ouium uelleribus fierent uela, quibus homines tegebantur, quamuis nauium uela ex lino, aut ſparto fierent. Item ea, quibus theatra tegebantur, quæ & uelaria uocabantur. Papinius. Iam uelaria linea pluebant. À uelo uelabrum dictum locus in urbe Roma iuxta Auentinum montẽ, quod ratibus, ac uelis eò ueherentur, quidam tamen non à uelo, ſed à ueho uelabrum ſicut uelaturam pro uectura uocari exiſtimant. Item auentinum, nam olim mons iſte paludibus erat ab reliquis diſcluſus, itaq; eo ex urbe aduehebantur ratibus (ut Varro teſtatur.)

ſunt tamen qui auentinum dictum ab auibus putent, quæ ſeſe Tyberi in eum locũ recipiebãt, uel à rege Auentino albano, quod ibi ſit ſepultus, uel ab aduentu hominum, quod commune latinorum omnium ibi Dianæ templum ſit conſtitutum. Ouidius. Luna regit menſes, huius quoq; tempora menſis Sciuit Auentino luna colenda iugo. Ab hoc fit uelo uerbum cum ſuis deriuatiuis, de qbus ſupra diximus, quæ ſunt uelatus. ueles. uelitaris. uelitor. uelitatio. à quo aduelitatio. uelitatim. Reuelo, à quo reuelatio. et præterea uelamen, quod modo pro ueſte accipitur, modo pro quacunque re aliquid uelante. & uexillum, quaſi paruum uelum pro ſigno, quo in exercitu, aut claſſe imperatores utuntur. unde uexilliferi, & uexillarij dicuntur ſigniferi. Veſtem quoque à uelando dictam Varro exiſtimat, quod corpus uelet, ſiue indumentum ſignificet. Virgilus. Necnon threicius longa cum ueſte ſacerdos, ſiue barbam. unde inueſtes imberbes appellamus, uel ſicut quidam uolunt impuberes, ut econtrario ueſticeps dicatur puer, qui iam ueſtitus eſt pubertate. Ab hoc fit ueſtiarium locus, in quo ueſtes uel ſeruantur, uel uenduntur. et ueſtiarius, qui ueſtiario præeſt, ac ueſtes uendit. & ueſtiplicia mulier, quæ complicat ueſtes. & ueſtio uerbum, & ueſtitus, & ueſtiſpicus, ac ueſtiſpica ſeruus, ſiue ancilla cuſtodiens ueſtes, & ueſtigium, quod ueluti indumentum ſit pedis. Eſt enim proprie ueſtigium impreſſio pedis, ideſt ſignum, qđ à pede relinquitur. Virgilius. Et gradiens ima uerrit ueſtigia cauda. Veſtigium etiam ſignificat extremam partem inferioris pedis. Idem. Veſtigia primi alba pedis, frontemq; oſtentans arduus albam. Item ueſtigium pro indicio ponitur cuiuſcunque rei, quod ſcilicet ueſtigia indicio ſint, illic eum affuiſſe, cuius ueſtigia ſunt. Liuius. Pecuniam ex theſauris Proſerpinæ noctu clàm ſublatam, nec ad quos pertineat facinus ueſtigia ulla indago. & perueſtigo, atq; inueſtigo, quæ ſignificant quærendo inuenio. Cicero. Ipſa tractatio, & quæſtio quotidie ex ſe gignit aliquid, quod cum deſidioſa delectatione ueſtiges. Idem. Noſſe regiones, intra quas uenias, & perueſtiges, quod quæras. Terentius. Nihil eſt tam difficile, quod quærendo inueſtigari non poſſit. Hinc ueſtigabundus, ueſtigator, perueſtigator & inueſtigator deducuntur. Et Veſtimentum, quod ita à ueſte differt, quod ueſtis generaliter dicitur, ut Stragula forenſis muliebris, Veſtimentum uero particulariter, ut pallium. tunica. penula. Iuriſconſulti ueſtem definiunt eſſe quicquid induendi. præcingendi. amiciendi, inſternendi. tegendi. accubandi gratia paratum eſt. Alij nihil exiſtimant ueſtem à ueſtimento differre, & ueſtimenta dicunt eſſe non modo lanea. linea. bombycina. ſerica. ſed etiam ſcortea. frondea. ſcirpea. pălearia, & ex quacunque materia facta ſint ad corpus tegendum. Multa earum genera ſunt. Virilia, quibus ſoli uiri utuntur. Muliebria, quibus ſolæ muliĕres. puerilia, quæ ſolis pueris conueniunt. Famuliaria, quibus utuntur ſerui, atque ancillæ. Scænica, quibus comœdi. tragica, quibus tragœdi. citharœdica, quibus citharœdi. Hiſtrionica, quibus hiſtriones. paraſitica, quibus paraſiti, & huiuſmodi alia penè infinita. Aliquando quod à barbaris ſumpta ſint, barbara habent nomina, ut quæ à Parthis ſumpta ſunt, Saraballa dicuntur fluxæ ueſtes, & ſinuoſæ, quæ à Germanis Renones, ueſtes pelliceæ, quibus in caſtris utuntur, quæ ab Hiſpanis ſtrigia. Plautus. Nudus eſt, iurat ſe triobolo ſtrigium oppignoraſſe. Quæ à Sardis maſtrucæ. Idem. Maſtrucatus, & plenus puluere. Item quædam interius ſumuntur, ut ſubucula dicta, quod ea ſubter induamur, quædam exterius,

ut ſupparus, ſiue ſupparum (utroq; enim modo dicitur) quod eo ſuper induamur. Eſt autem togæ genus leuis, atq; anguſtæ. Afranius. Puella non ſum ſupparo ſi induta ſum. Lucanus. Suppara nudatos cingunt anguſta lacertos. Ponitur tamen aliquando ſupparum pro ſinu, & rugatura, pannorum. Idem, imáq; pandens ſuppara uelorum perituras accipit auras. Induſium quoq; interius ueſtimentum erat, quod mox ſupra ſubuculam ſumebatur. dictum quaſi intuſium. Plautus. Induſiata. Patagiata. ſicut pallium, & palla uocata ſunt, & foris ſupra induſium, ſiue ſubuculam tunica erat, ueſtis apud Romanos quidem breuior, & ſine manicis. Nam his, quæ manicas haberent, longiores propè, uſq; ad digitos, & propterea græco uocabulo chiroditæ nominarentur, uti Romæ, atq; in omni Latio uiros indecorum fuit. Solis fœminis id genus longe, lateq; diffuſum conuenire exiſtimabant ad ulnas. cruráq; aduerſus oculos protegenda. Viri ſubcriſpas tantum, ac breues tunicas ſumebant citra humeros deſinentes, quod genus græci uocant. ἐξωμίδας tunicas illas longas, & manicatas, quaſi fœmineas, Cicero & Virgilius exprobrant. Cicero, Manicatis, ac talaribus tunicis. Virgilius. Et tunicæ manicas, & habent redimicula mitræ. Plautus, manuleatam tunicam habere hominem decet. Horatius. Malcinus tunicis dimiſſis ambulat. eſt qui inguen ad obſcœnum ſubductis, uſque facetus. Quintilianus. Cui latus clauus non erit, ita cingatur, ut tunicæ prioribus oris infra genua paululum, poſterioribus ad medios poplites uſq; perueniant. Nam infra muliĕrum eſt, ſupra centurionum. Erat & aliud genus tunicarum, quibus antiqui Romanorum utebantur, quas Colobia uocitabant, quod manicis eſſent mutilata. Nam græci κολοβὸν truncum, ac mutilatum dicunt. Item alia tunica adaſus dicta, quæ ab humeris non erat conſuta. À tunica fit tunico uerbum, hoc eſt ueſtio. Varro. Hæc lanigeras detonderi docuit, tunicareq; homulum. eius paſſiuum eſt tunicor, unde tunicati dicuntur, modo qui tunicas induti ſunt, modo expediti, & nullam aliam ſupra tunicam ueſtem habentes, quales dum ruri ſumus incedere ſolemus. Iuuenalis, tunicati fuſcina Gracchi. Martialis. O ſoles, ó tunicata quies. Dicta autem tunica eſt (ut Varro ſentit) quod corpus tueatur. Amphimala tunicæ erant Gauſapinæ ex utraq; parte uillos habentes, quæ & gauſapia dicebantur, Patauij ex lanis eius regionis, quæ mediocres ſunt, texi olim ſolita recta tunica, ita contexta erat, ut uel uti rigens ſtaret, hac tirones, & nouæ nuptæ ſimul cum toga pura induebantur. Prima hanc contexuit Tanaquil, quæ, & C. Cæcilia uocitata eſt, cuius lanam cum colo, & fuſo in templo Anci Martij longo tempore duraſſe tradit Varro. Ideóq; à Romanis inſtitutum, ut nubentes uirgines comitaretur colus compta, & fuſus cum ſtamine. Chalaſis tunicæ genus erat (ut quidam putant) quod græci χάλασιν uocant à laxitate. Alij dicunt nodum eſſe tunicæ muliĕbris, quo connexa circa ceruicem tunica ſubmittitur. Supra tunicam uaria ueſtimentorum genera ſumebantur. In primis toga propria Romanorum, à qua Romani togati dicuntur. Virgilius. Romanos rerum dominos, gentemq; togatam. Vnde ante ambulones, hoc eſt hi, qui principes ciuitatis in forum officij gratia deducebant, ac deinde domum reducebant, quoniam id togis amicti faciebant, togati uocabantur. Iuuenalis. turbæ rapienda togatæ. Martialis. At tibi non multum eſt, unum ſi præſto togatum. Hi per diminutionem etiam togatuli uocabantur. Item à toga epitogium dictum pallij genus, quod ſupra togam ferebatur, compoſitum nomen è latino, & peregrino. ſicut epiredium ex duobus peregrinis hoc eſt ἐπὶ

græca præpoſitione, & reda uocabulo gallico, quod ſignificat uehiculum. Cicero. Quod ſi tuam heri redam non habuiſſem uarices haberem. Iuuenalis. trito ducunt epiredia collo. Non diſſimile eſt huic aliud uehiculi genus, quod eadem lingua gallica Benna appellatur, unde combennones dicuntur in eadem Benna ſedentes. item togatæ uocatæ ſunt comœdiæ, quæ ſcriptæ ſunt ſecundum ritus, & habitum hominum togatorum, hoc eſt Romanorum, ſicut græcas fabulas ab illorum habitu palliatas appellamus. etenim græci ſupra tunicam pallium ferebant. Romani frequentius togam, propter quod à tegendo toga uocitata eſt, pallium quod palàm ſit, & foris, cum ſub eo tunica eſſet. Quoniam uero in pace duntaxat togæ uſus erat. nam in bello depoſita toga, ſeu pallio, chlamydem, aut lænam, aut aliud militaris ueſtimenti genus ſumebant, factum eſt, ut toga interdum metaphoricæ pro pace ſumatur, ſicut arma pro bello. Cicero, Cedant arma togæ, concedat laurea linguæ. Plynius. Vt dubium ſit togáne, an bello præſtantior fuerit. In fòro autem maxime togis utiuiri ſolebant. Nam principio communis hæc ueſtis fuerat tam marium, quàm fœminarum. Varro. Quas nunc in foro, prius etiam in lecto habebant togas. Ante enim fuit commune ueſtimentum, & diurnum, & nocturnum, & muliĕbre, & uirile. Poſtea uiris tantum relictus eſt togæ uſus, ſolæq; adulterij damnatæ muliĕres ignominiæ ergò cauſa induere cogebantur. Iuuenalis. talem Non ſumet damnata togam. Martialis. Coccina famoſæ donas, & ianthina mœchæ. Vis dare, quæ meruit munera, mitte togam. Togarum uaria genera erant. In primis toga prætexta, quæ à uirili diſtinguebatur, quoniam prætexta duntaxat adoleſcentes utebantur ferè uſq; ad ſextumdecimum annum, deĩnde uirilem togam ſumebant. Seneca. Quantum credis me accepiſſe gaudij, cum depoſita prætexta ſumpſiſti uirilem togam. Cicero. Ego autem à patre ita eram deductus ad Scæuolam ſumpta uirili toga, ut quoad poſſem, & liceret à ſenis latere nunquam diſcederem. fuit tamen tempus, quo prætexta non adoleſcentes, ſed uiri, qui magiſtratum gererent, utebantur. Quippe Tullus Hoſtilius Romanorũ rex tertius, debellatis Hethruſcis ſellam curulem, lictores, & togam pictam, atq; prætextam, quæ inſignia magiſtratuum Hethruſcorum erant, Romam tranſtulit. Sed poſtea Tarquinius Demarati filius quintus Romanorum rex, cum de Sabinis egiſſet triumphum, quoniam eo bello filius eius annos quatuordecim natus hoſtem manu percuſſerat, & pro concione illum laudauit, & prætexta, ac bulla aurea donauit, inſigniens puerum ſupra annos fortem, præmijs uirilitatis, & honoris. Nam ſicut prætexta magiſtratuum, ita bulla triumphantium geſtamen erat. Genus ſanè togæ erat prætexta, cui purpura prætexebatur. Togam uero prætextam ea ratione adiunctam, ut ex purpuræ rubore ingenuitatis pudorem præ ſe ferrent. A Prætexta prætextati dicti, qui prætexta utuntur, ſicut à toga togati. Prætextati autem ſunt quãdiu uirilem togam non ſumpſerunt. Hi pro maleſactis non ſoluebant multam, ſed anguillarum tergoribus uerberari ſolebant. Nefas autem his erat obſcœno uerbo uti, ideoq; prætextatum appellabant ſermonem, qui nihil obſcœnitatis haberet. prætexta pulla nulli alij licebat uti, quàm ei qui funus faciebat. Primus autem prætextati cognomentum adeptus eſt Papyrius puer. Mos olim ſenatoribus erat in curiam cum prætextatis filijs ingredi, quoties in Senatu de re aliqua acturi eſſent, quod ſi in poſterum diem prolata res foret, placuit nequis rem, ſuper qua ſermo habitus foret, nũtiaret, prius quàm decreta eſſet. Mater Papyrij, qui cum patre in curia fuerat, quid nam in ſenatu actum à patribus foret, filiũ rogat. ille nefas eſſe id dicere reſpondit, fit illa cognoſcendi q̃d actum eſſet auidior, filiumq; importunius urget. Tum ille actum in Senatu confingit, Vtrũ reipublicæ utilius uideretur, unuſne ut duas uxores haberet, an ut duobus una nupta eſſet. Ea re intellecta, mulier domo egreditur rem cæteris narrat. Poſtridie magnus matrumfamilias numerus ad Senatum confluit, omneſq; fluentibus lachrymis obſecrant, una potius ut duobus nupta ſit, quàm ut unus uir duas habeat uxores. Admiratur Senatus rei nouitatem, ac ſtupet. Tum puer Papyrius rem aperit. Id poſtea cognomen in omnem eius familiam translatum fuit. Item à prætexta prætextæ dictæ ſunt fabulæ. Horatius, Vel qui prætextas, uel qui docuere togatas. Togatarum enim fabularum ſpecies tot pene ſunt, quot palliatarum. Quarta ſpecies planipedes græce dicitur Mimus. Ideo enim latine planipes uocatur, quia actores pedibus planis ideſt nudis proſcænium introibant, non, ut Tragici actores, cum cothurnis, neque, ut comici, cum ſoccis, quod olim non in ſuggeſto ſcænæ, ſed in plano orcheſtræ poſitis inſtrumentis mimicas actitabant. Togata prætexta à tra-

gœdia differt, quod in tragœdia heroes introducuntur, ut Pacuuius tragœdias heroicis nominibus inſcripſit Oreſtem, Chryſen, & his ſimilia. In prætexta autem introducuntur magni uiri, inſcribunturq; Brutus. Decius. Marcellus, & huiuſmodi. Togata tabernaria à comœdia differt, quod in comœdia græci ritus inducuntur, græcæq; perſonæ, in illa uero latinæ. in hac maxime excelluiſſet Afranius. niſi argumenta fœdis puerorum amoribus inquinaſſet. Atellana à ſatyrica differt, quod in ſatyrica fere ſatyrorum perſonæ introducuntur, aut ſiquæ ſunt ridiculæ ſimiles ſatyris. In Atellana obſcœnæ, turpeſq; perſonæ. Mimus eſt ſermonis cuiuslibet ſine reuerẽtia uel factorum cum laſciuia imitatio, dictus quaſi ſolus imitetur, μιμοῦμαι imitor. Nam & ſi alia poëmata idem faciant, ſolus tamen mimus, quaſi priuilegio quodam quod fuit commune poſſedit. Mimus etiam hiſtrionem ſignificat, quod mores, geſtus, ac naturas hominum imitetur. Togæ præterea alia quoq; genera erant. Toga Regia, quæ & undulata dicebatur, qua Seruius Tullus Romanorum rex uſus fuit, facta primo à C. Nam quod queſtus es, plures te teſtes habere, qui quot in ea dubij puncta tuleris. Aliquando etiã punctum pro ſuffragijs, & fauore accipitur, quoniam lege, quæ tabellaria dicta eſt, ueteres ſuffragia non ſcribebant, ſed puncto notabant. Omne tulit punctum, qui miſcuit utile dulci, hoc eſt ſolus ſuffragia iudicum tulit, qui & utile, & dulce ſcripſit, quoniam prodeſſet, & delectaret. Geometricum uero punctum, quod in nullas partes diuidi poteſt, protractum, lineam efficit, ideſt corpus unius dimenſionis. Longum enim eſt, qđ ſine lato, ſine alto, duobus punctis ex utraque parte ſolam longitudinem terminantibus continetur. hanc lineam ſi geminamus, alterum mathematicum corpus efficitur, qđ duabus dimenſionibus extruitur, longo, latoq;, ſed alto caret. Punctis autem quatuor continetur, per ſingulas ſcilicet lineas binis, & hoc græci ἐπίπεδον, noſtri planum ſiue ſuperficiem uocant. A quo ſuperficiarius appellatur, ut Paulus iuriſcon. ait. Quod ſi hæ duæ lineæ fuerint duplicatæ, ut ſubiectis duabus duæ ſuperponãtur, adijcietur profunditas, & hinc ſolidum corpus efficitur, dictum à græcis στερεὸν, quod ſine dubio octo angulis continetur,

Varro. Vitruuius. Gellius. Macrobius. Pompeius, & ipſe, cuius teſtimonio utitur, Pollux ſole clarius oſtendunt. deceptus eſt homo rudis, & craſſus, ratione nominis, qđ teſſera appellatur, cum græci τέσσαρα quatuor dicant, nec intelligere potuit, non ideo teſſeram uocari, quod quadratam figuram habeat, quod genus noſtri quadrata appellant, ſed quod omni ex parte quadrata ſit quod genus quadrantalia nominamus. Talus proprie oſſis genus eſt in articulo pedis uentre eminens, concaua in uertebra, ligatum ſolidiſſimis neruis, quadratum forma, altera parte concauum, altera ferè planũ, eſtq; in poſteriori ſuffragine duntaxat, nunquã in prioribus pedibus, nec eſt homini, aut alijs animalibus habentibus digitos, nec ſolidas habentibus ungulas, ſed tantum biſulcis. Eſt conchæ genus, quod pinna dicitur, naſcitur in limoſis, ſubiecta ſemper, nec unquam ſine comite, quem pinnotherem uocant, alij pinnophylacem. hic in aliqbus paruus eſt piſciculus, cui nomen ſquilla eſt. Hinc ſtipendium æs militare appellatum à ſtipe pendenda, & ſtipendiarij milites, quod eam ſtipem pendebant. Ennius, Pœni ſtipendia pendunt, pecuniam quoq;, quam uel in ærarium reponebant, uel Dijs offerebant, ſtipem ueteres dixere. Item quod mendicis ad ſuſtentationem infelicis uitæ porrigitur. Hinc qui pecuniam rogat, & qui ſpondet ſtipulari, ac reſtipulari dicitur, quod uerbum poſtea ad omnes rogationes, quæ ſolenniter fiunt, translatum eſt, & ſtipulatio rogatio dicitur, & ſtipulator, qui rogat ſiue rogatur. Dicimus autem ſtipulor abs te actiue, hoc eſt rogo te, peto abs te, & ſtipulor abs te paſſiue, hoc eſt rogor abs te. à quo fit Aſtipulor, quod ſignificat aſſentior. A ſtipo, ſtiparium dicimus quicquid ad ſtipandum pertinet, ut ſtiparius malleus. & conſtipo uerbum quod eſt condenſo, & ſtipes fuſtis terræ defixus, qui quoniam pullulare aliquando conſueuit, putant aliqui ſtirpem ab eo dictum, ſtirps enim fœminino genere originem ſignificat. Item ſtypula à ſtupa deducitur, ſiue quod ſtupæ inſtar uratur, ſiue, quod ea quoq; ſtypari tectorum rimæ conſueuerunt. Eſt autem ſtypula calamus frumenti, ut puta tritici, hordei, farris, & ſimilium, quod ſcilicet continet ſpicam. quod unam duntaxat ſtypulam habet unicalamum frumentum dicitur. Stypulæ intermedia dicuntur genicula, & aliquando genua à ſimilitudine genuum animalis. Plynius. Frumenta quædam in genu tertio ſpicam incipiunt concipere. idem. genicula ſunt tritico quaterna. farri ſena. hordeo octona. Ab hoc geniculatum dicitur, quod frequentibus geniculis conſtat, ut eſt herba, quæ heliotropium uocatur, ob id genicularis herba ab aliquibus nominata. & geniculatim frangi, aut aliud fieri dicimus, hoc eſt ꝑ ſingula genicula. Stypula in campo remanet frumento demeſſo. Itẽ ea pars, quæ è frumento demeſſo, contuſa ſpica ſuperſtat, ſimiliter ſtypula generali uocabulo appellatur. Acus autem iſtud, quod diximus, ſtypulæ genus uocatur à ſimilitudine acus, qua ſuimus. Acus autem ab acumine. Acumen, & acuo, & acies, ab acone græco uocabulo, quam latine dicimus cotem. Dicitur autem acies cuiuſcunq; rei acumen, & quaſi ſummum, unde aciem ferri dicimus, aciem oculorum, aciem exercitus. Ab acuo acutus deducitur, notæ ſignificationis, quod etiã ad incorporea transfertur, ut acutum ingenium, acutus uiſus. Et acieris ſecuris ærea, qua in ſacrificijs ſacerdotes apud ueteres utebantur. Et acer, qđ proprie acutum ſignificat. Cicero, acri homo ingenio. Per metaphoram tamen aliquando pro ueloci uſurpatur, Virgilius. Calidumq; animis, & curſibus acrem. Aliquando pro ſeuero. Cicero. Ab hoc acrimonia deducitur, hoc eſt uiuacitas animi, acumen ingenij, et mentis ſeueritas. & acriter aduerbium, acute, uehementer. fortiter. ſeuere, & eorum comparatiua, ac ſuperlatiua. item alacer ſiue alacris. (Vtroque enim modo dicitur) quod modo feſtinum ſignificat. quaſi alis acer. Teren. Quid tu es triſtis, quidue es alacris, modo lætum, & ueluti in ſpẽ aliquam geſtientem. à quo alacritas dicta mutatio quædam uultus in aliquam ſpem geſtientis. Cicero, uir ergo temperatus, conſtans, ſine metu, ſine ægritudine, ſine alacritate. nulla libidine uexatus. Ab hoc fit alacriter aduerbium. Itẽ ab acer acerbus, quod proprie incoctum, & non dum maturum ſignificat. unde poma acerba, et acer-

Ab hoc fit acerbitas, quod modo amaritudinem ſaporis, modo cruditatem, modo ſæuitiam ſignificat, & acerbe aduerbium, amare, immature, crudeliter, & comparatiua, ſuperlatiuaq; eorum. Item acer arbor, quod acria in ea artificum ingenia exerceantur. Eſt enim ampliſſima arbor, & operum elegantia, ac ſubtilitate, primum poſt citrum locum obtinet. Menſæ inde acernæ dicuntur. Martialis de menſa acerna, nõ ſum criſpa quidem, nec ſyluæ filia Mauræ. Sed norunt lautas & mea ligna dapes. Plura eius genera ſunt. Album, quod præcipui candoris gallicum uocatur, in tranſpadana Italia, et trans alpes naſcens, alterum criſpo macularũ diſcurſu, qui cum excellentior ſit, dicitur pauoninum à caudarum pauoninarum ſimilitudine. Martialis, de lecto pauonino, Nomina dat ſpondæ pictis pulcherrima pennis Nũc Iunonis auis, ſed prius Argus erat. Hoc in Iſtria, rhetiaq; præcipuũ eſt. E uiliori genere à uenarum craſſitudine craſſiuenium uocitant. græci ſitu diſcernunt, campeſtre. candidum. nec criſpum glicon uocant, criſpius, duriusq; quod in montibus naſcatur, montanum. tertium genus appellant Zigam rubentem fiſſili ligno, cortice liuido, & ſcabro. hoc alij proprij generis eſſe malunt, et latine carpinum nuncupant. pulcherrimum eſt bruſcum, multoq; etiam excellentius moluſcum tuber. utrunq; huius arboris. Sed bruſcum intortius criſpum, moluſcum ſimplicius ſparſum. & ſi magnitudinẽ menſarum caperet, haud dubie prælatum à ueteribus citro fuiſſet. propter paruitatem intra pugillares tantum & lectorum laminas ſit tit. E bruſco menſæ quoq; factæ ſunt nigreſcentes. reperitur et in Alno tuber nota arbore, ſed tanto deterius, quanto alnus ipſa diſtat ab acere. Item acetum, quod nihil aliud eſt quàm acre uinum. à quo acetoſum, et acetoſitas, & acer pro ipſa acetoſitate. & acetaria, herbæ, quæ ad excitandum appetitum cum aceto manduntur. & acidum pro acetoſo, cuius diminutiuum eſt acidulum. & acetabulum, de quo inferius dicemus. Veteres acetare ſcripſerunt pro commouere, & quod nunc dicimus agitare. præterea ab acuo fit acupedius, de quo inferius dicemus. & acinus granum. & aceruus, quod eſt cuiuſq; rei congeries in acutum elata. Acus etiã piſcis genus eſt, de quo diximus. Item genus inſtructæ aciei, qđ ea pars militum uehementiſſima ſit ad nocendum hoſti acumine telorum. Item inſtrumentum ad ornandum caput. quod & per diminutionem acicula dicitur. Ab acu autem cum paleam ſignificat, fit acero uerbum, quod eſt paleis inficio, itaq; aceroſum frumentum dicimus immundum, et non ſine paleis, à quo & panis, qui ex eo fit, aceroſus dicitur, & aceratum lutum, quod paleis immiſtum eſt ad tuguria facienda. et obacero, quod eſt loquendo alterius ſermonẽ moleſto. impedio, quaſi paleas ori obijciendo. Item à ſtupa ſtupeo deriuatur, à quo ſtupor, quæ eſt quædam alienatio ſenſuum, quod ſcilicet ſenſus conſtypentur. hinc ſtupefacio, & ſtupefio, & ſtupidus, qđ modo ſtupefactum ſignificat, modo inſenſatum. unde ſtupentia, ſiue ſtupida membra dicuntur, quando uel paruum, uel nullum habent ſenſum. Item obſtupeo, & ſtupeſco, & obſtupeſco, et ſubſtupeo, et ſubſtupidus, et obſtupefacio, et obſtupefio notæ ſignificationis. Item à ſtupa ſtupeũ dicitur, qđ ex ſtupa eſt, ſicut à lino lineũ, qđ ex lino. Linum græca uox eſt. græci enim λίνον nominant. ab hoc, qui lini artem exercet linarius à nobis dicitur, à græcis λινοπλόκος, & linteum hoc eſt pannus lineus, quod græce λίνουν dicitur, à quo fit diminutiuum linteolum, et linamentum quoq; ſignificat, quod eſt filum ipſum, quod ex lino uoluendo trahitur. Plynius. Delphini adipe linamenta accenſa excitant uuluæ ſtrangulatu op-

Item à lino licium dictum filum, quo in tela textrices implicant ſtamen. à quo licio uerbum cum eius deriuatiuis, atq; compoſitis, de quibus inferius dicemus. Et Linus proprium nomen quamuis primam corripiat. Hic Mercurij ex Vrania muſa filius fuit, ut Hermodorus affirmat. Virgilius tamen ab Apolline genitum dicit. Et linea, quæ proprie ſignificat filū illud, quo fabri materiarij utuntur ad ſignandam materiam, quod ex lino fiat, à græcis dicitur σταθμὴ, & quoniam ab hac, ſi rubrica, uel alio colore intincta fuerit, figura deſignatur longa ſine latitudine, atq; altitudine, ea quoq; figura à græcis γραμμὴ à noſtris linea dicta eſt. item ea, quā non colore, ſed animo imaginantur geometræ, de qua paulo ſuperius diſſeruimus. Antiqui pictores penicillo tenuiſſimā lineam ducere pulchrum putabant. Tradunt Apellem excellentiſſimum pictorem, cum aliquando Rhodum ad Protogenem alium pictorem auidus cognoſcendi opera eius adnauigaſſet, quoniam fama tātum hominem prius cognouerat, ſtatim officinam illius petiſſe. Aberat tum ipſe, relicta domi anicula, quæ tabulam unam ſatis amplam ad pingendum paratam cuſtodiebat, hanc rogatam, foris eſſe Protogenem reſpondiſſe, interrogaſſeq; à quo quæſitum illi referret. Ab hoc Apellem dixiſſe, arreptoq; penicillo, lineam per tabulam duxiſſe ex colore ſummæ tenuitatis. Reuerſum deinde Protogenem, & re, uti geſta fuerat, ab anicula cognita, operis ſubtilitatem contemplatum, ueniſſe Apellem dixiſſe, et ipſum tunc alio colore tenuiorem in illa ipſa lineam duxiſſe, & abeuntem præcepiſſe aniculæ, ut ſi ille rediſſet, oſtenderet, diceretq; hunc eſſe, quem quærebat. Reuerſum poſt hæc Apellem, quoniam uinci erubeſcebat, tertio colore lineas ſecuiſſe, nullo ſubtilitati loco relicto, confeſſum Protogenem ſe abeo uictum, in portum, ut hoſpitem quæreret, deuolaſſe. Tradita deinde poſteris hæc tabula magno omnibus miraculo fuit, nihil aliud continens, quàm lineas uiſum effugientes, & tamen omni opere nobilior habita. Conſumpta eſt priore incendio domus Cæſaris in palatio. Fuit Apelli ꝑpetua conſuetudo, nunquam tam occupatam diem agendi, ut non lineā ducendo, artem exerceret, ex quo natum eſt prouerbium, cum ſignificare uolumus non eſſe fruſtra tempus terendum. Nulla ſit dies ſine linea, nec lineam hodie duxi, hoc eſt nihil feci. À linea fit lineo uerbum, quod eſt lineam duco, & linearis, ad lineam pertinens. unde & linearis pictura uocata eſt, quam primus Philocles ægyptius, uel Cleantes corinthius inuenit lineis circum umbram hominis deductis. Sic enim inuentam primo picturam cōſtat ab Aegyptijs, ut nōnulli putant, ut alij à græcis, uel apud Sicyonios, uel apud Corinthios. Primi enim eam exercuere Ardices corinthius, & Telephanes ſicyonius ſine ullo colore, ſpargentes tamen lineas intus, itaq; γράφειν, hoc eſt ſcribere dicti ſunt, & γραφὴ tam ſcripturam, quàm picturam ſignificat, & γραφεὺς tam ſcribam, quàm pictorem, & γραφεῖον ſtilum, & γραφιοθήκη graphiarium, hoc eſt thecā, in qua ſtili reponuntur, quibus & ſcribere ſimul, & pingere ſolebant ante, quàm penicilli, & colores inuenirentur. Latini quoq; græcos ſecuti, huiuſmodi linearem picturam Graphidem nominauere. Plynius. Graphidis ueſtigia extant in tabulis, ac membranis, ex quibus proficere dicuntur artifices. Item ab hac linea lineamenta, hoc eſt extremitates ipſæ, & quaſi lineæ quædam corporum, per quas hominis forma dignoſcitur, à lineari pictura tracta, in qua per ſolas lineas effigies hominis cognoſcebatur. Item lino uerbum, quod proprie eſt leuiter aliquid induco, & quaſi lineam duco. Vnde interlinire dicimus ſuperinducto atramento, aut alio liquore ſcripturā aliquā, picturamue deſtruere. Cicero tabulæ ſunt in medio, ſe corruptas, atq; interlitas eſſe clamāt. hinc talis inductio litura dicta. à lino litera, quod in ſcribendo illinitur, hoc eſt leuiter inducitur atramentum, quāuis alij literam quaſi legiteram dictam uelint, quod legēti iter præbeat. Itē à lino litus, de quo ſupra diximus. & lido uerbum (ut ꝗdam putant) quo ueteres utebantur pro eo, quod eſt cōfringo, deleo. à quo fit allido, hoc eſt impingo, & elido, quod proprie ſignificat e ſfringo. exprimo. diſſipo. Bilinguis qui uel duas linguas habet, uel modo unum, modo aliud loquitur. Eodem modo trilinguis, & quadrilinguis. Bilinguem etiam pro fallaci accipimus, hoc uitium ad mentem referentes. Vnde Brutij Italiæ populi Lucanis uicini Bilingues uocitati ſunt, & græce loqui dicti, quēadmodum Brutij appellati, quod quaſi bruti, & obſcœni ſunt. brutum enim dicitur qđ tardum, ſtolidū, & ſine ſenſu eſt. ren. Itidem patria qui obligurierat bona. Non recte Donatus ligurio à græco deductum ſcribit λιγυρὸν, quod ſuaue interpretatur. ſunt, qui lixam quoque à liguriendo quæſtum dictum uelint. Sic enim ſcribit Pompeius. Lixæ ſunt, qui exercitum ſequuntur quæſtus gratia dicti, quod extra ordinem ſint militiæ, eisq́; liceat, quod libuerit. Alij eos à Lixa appellatos credunt, quod & ille Herculem ſit ſecutus. quidam à liguriendo quæſtum. At Marcellus elixum eſt, inquit, quicquid ex aqua mollitur, uel decoquitur. Nam lixam aquã ueteres eſſe dixerunt. Vnde & lixæ dicti, qui militibus aquã ad caſtra, uel ad tentoria ſolent ferre. Varro, in pauimento non audes facere lacunam, at in humum calceos facis elixos. Nos uero (quod utriuſque pace dictum ſit) lixas eſſe affirmamus eos, qui uilioris quæſtus gratia exercitum ſequuntur, ut puta lauandi, aut coquendi cauſa, appellatosq́; à cinere, Lix enim (ut Varro inquit) cinis foci eſt, unde lixiuiũ dicitur aqua, in qua lauandi gratia, decoctus eſt cinis, & elixum, quod cinere ollæ ſuppoſito, decoctum eſt, propter quod & Aulicocium dicitur, hoc eſt olla decoctum. Nam ueteres pro olla Aulam dicebant. A` quo plautina fabula Aulularia uocitata eſt ab aulula, hoc eſt parua olla, in qua repoſitus erat theſaurus. Vnde argumentum eius fabulæ eſt, aulam repertam auri plenam Euclio ui ſumma ſeruat miſeris affectus modis. Huius etiam aliud diminutiuum eſt auxilla. Lixæ ergo dicti, quod & in depuranda ſupellectile, & in cibis decoquendis cinerem agitarent. M. autem Varronis uerba hæc ſunt. Lix cinis eſt foci. Inde enim cinis luxatis potus medetur, ut licet uidere gladiatores, cum deluſerint, hac iuuari potione. lixam uero ubi pro aqua Marcellus legerit, ipſe oſtendat. attuliſſet certe authorem, ut mos eius eſt, ſi uſpiam legiſſet. Nam quod Varronem affert ſcripſiſſe calceos elixos, per metaphoram dictum eſt, quaſi ita madefactos, ut eſt caro, quæ elixatur. A` lixa etiam fit elixo uerbum, & lixabundus uocatus eſt, qui exiguæ mercedis gratia uiliſſimis ſeſe obſequijs immiſcet. Plaut. Qui famam tuam lixabundus, & nomen fœdas. Liguria Italiæ regio eſt inter amnes Varũ, & Macrã, ab altero latere habẽs Apenninum, ab altero Padum, Thuſciam attingens, cuius caput Genua eſt. A` qua liguſtica ora appellatur, & incola eius ligur, & ligus. Virgilius. Vane ligus, fruſtraq́; animis elate ſuperbis. ſed hæc non à Ligurio dicitur, ſed à Ligyſto Phaetontis filio, cui ob ſuauitatem, ac uarietatem uocis nomen inditum fuit. Græci enim λιγυρὸν uocum uarietatem dicunt, unde quidam lyram uocatam exiſtimant inſtrumentum muſicum, in qua quot fides ſunt, tot reſonant uoces, uel ἀπὸ τοῦ λύειν quod canere eſt. hinc poetæ lyrici dicti, quod uarijs carminibus utuntur, & ad lyram canunt, & carmen ipſum lyricum nominatur. Eandem poetæ Chelim uocant ἀπὸ τῆς χελώνης hoc eſt à teſtudine. Tradunt enim, cum aliquando Nilus ſuum egreſſus alueum totam Aegyptum inundaſſet, eo poſtea intra ſuos limites ingreſſo, uarias animantes in cãpis fuiſſe relictas, inter quas remanſiſſe teſtudinem, quam cum Mercurius inueniſſet, conſumpta iam carne, ſed ſuperſtitibus neruis, percuſſu ſonum excitaſſe. Quapropter ad ſimilitudinem illius compoſuiſſe lyram, eam Orpheo tradidiſſe. alij non Orpheo, ſed Apollini traditam memorant, uti ſupra diximus, & ab Apolline Orpheo conceſſam, quod eſſet unius ex muſis, hoc eſt Calliopes filius, & Oeagri. Factam autem lyrã ex cornibus boum Apollinis, & ſeptem in ea chordas appoſitas iuxta numerum ſeptem Atlantidum, quod Maia mater eius ex illarum numero eſſet, deinde ſuperadditas duas, ut repræſentaret numerum nouẽ muſarum. tantæ autem ſuauitatis in mo-

Ob quã cauſam dum paulo poſt Orpheus in Olympo monte, qui Macedoniã à Thracia diuidit, ſiue (ut quidã uolunt) in Pangæo Thraciæ promontorio ſedẽs, cantu oblectaretur, Bacchas ei Liberum obiecſſe, quæ eum lacerarent, atq; diſcerperent. Quo facto muſas collecta membra, ſepulturæ dediſſe, lyrã uero ſtellis figuratam inter ſydera collocaſſe, Apolline id permittente, quod laudatus ab Orpheo fuerat, & Ioue, ut Apollini id petenti obſequeretur. Alij tradunt Venerem cum Proſerpina ante Iouis tribunal de Adoni contendiſſe, quibus Calliopen Orphei matrem à Ioue iudicem datam, quæ, cum iudicaſſet Adonin utriuſque eſſe debere, & utranq; dimidia anni parte eum poſſidere, indignatam Venerem, quæ totum ſibi cõcedi uoluiſſet, Orpheum uniuerſis Thraciæ mulieribus obiecſſe, ut amore illius incenſæ fruſtatim eũ diſcerperent. Sic Orpheo dilaniato, caput eius de monte in mare proiectum in inſulam Leſbon fluctuum agitatione perueniſſe, ſublatumq́; ab incolis, & ſepulturæ traditum fuiſſe, eius beneficij gratia leſbios ad muſicam artem ingenioſiſſimos exiſtimari. Lyram autem à muſis, ut ſupra diximus, in cœlum tranſlatam fuiſſe. Sunt qui putent Orpheum, quod primus puerilem amorem induxerit, mulieribus inuiſum ab eis dilaceratum fuiſſe. hæc lyra poſita eſt contra regionem eius loci, qui eſt inter genu, & manum ſiniſtram Engonaſis. eius teſtudo ſpectat ad arcticum circulum, ſummum cacumen ad polum notium, Virgine ex oriente occidere, cum Sagittario exoriri cernitur. habet in ipſis teſtudinis lateribus ſingulas ſtellas, in ſummis cacuminibus eorum, ubi brachia ſunt collocata, ſingulas. In iiſdem medijs, quos nonnulli humeros uocant, in ſcapulis duas. in una parte lyræ, quæ ut baſis totius uidetur, unam, quæ in ſumma nouem ſunt ſtellæ. Ab huius lyræ ſimilitudine lyrare dicuntur agricolæ, cum crate dentata, uel tabula aratro adnexa, quaſi lyræ teſtudine operiunt ſemina. hic enim ordo in re ruſtica ſeruatur. primo terra aratur, quod dicunt proſcindere. deinde ſecunda aratione excitatæ grãdiores glebæ franguntur, quod uocant effringere. tertia aratione iacto ſemine boues lyrare dicuntur, ideſt cum tabellis, & uomere ſimul & ſatum frumentum operiunt in porcis, & ſulcant in foſſas, quo pluuia aqua dilabatur. Nonnulli poſtea, qui ſegetes non tam lætas habent, per ſarctores occare ſolent, quod dicitur occatio. Ab hoc lyro primo delyratio dicta eſt, cum quis non recto ſulco tegendo ſemen incedebat. Deinde per metaphoram ad inſaniam, hoc eſt uocabulum tranſlatum eſt. unde & delyri inſani dicuntur, & delyrare inſanire, & delyre aduerbiũ inſane, & delyramentũ ipſa delyratio, & foſſa ipſa, in quã uligo terræ deſcendit, lyra à quibuſdam uocatur. quidam tamen exiſtimauerunt delyrare à græco deductum, apud quos ληρεῖν ineptire ſignificat, & λῆρον delyramentum. Ariſtophanes, λῆρον ληρεῖς. Noſtri etiam lyras gerras, et nugas uocitauere. Plautus. Nam tuæ blanditiæ mihi ſunt, quod dici ſolet gerræ, germanæ ædepol lyræ. Liris fluuius eſt Campaniæ interfluens urbem Minturnenſium. Virgilius. & umbroſæ liris per regna miricæ. Horatius. Non rura, quæ liris quieta mordet. Ligyes populi ſunt Aſiatici, qui cum Xerſe aduerſus græcos militauerunt. Lygdamus nomen eſt uiri proprium. Habent præterea ueſtes à coloribus multiplicem differentiam, ſed dum de ijs diſſerimus, operæ precium erit, & colorũ ipſorum quibus inficere ueſtes, aut

Natiuus color albus leucopus dicitur, uilis, atq; uulgaris, nomen trahens à græcis, apud quos λευκὸν dicitur album. Plynius, Iecur rubetæ, uel cor adalligatur in panno leucopo & quartanis prodeſt. hinc leucopeati dicuntur, qui rudiori alba ueſte, ac uili, & natiui coloris induti ſunt. Martialis, Amator ille triſtium lacernarum, & Beticatus, ſimulatque Leucopeatus, natiua laudet, habeat & licet ſemper. Si uero, huic colori ars addita ſit, Candidæ ueſtes dicuntur. Fit & in Creta inſula, & Cyrenis, Adulteraturq́; Romæ Cimolia creta, nullum eſt è candidis coloribus pinguius, aut tectorijs propter liuorem tenacius. Melinum optimum in Melo inſula, unde nomen habet. naſcitur & in Samo, raro eo pictores utuntur, ob nimiam pinguitudinem, linguam tactu ſiccat. pilos mirifice detrahit ceruſa, de qua ſupra diximus, quæ ſi uſta ſit, rufeſcit, nec ſine ea recte fieri umbræ poſſunt. Sandaraca, quæ inuenitur in aurarijs, & in argentarijs metallis adulteratur ex ceruſa in fornace cocta, hæc ſi torreatur, æqua parte rubrica admiſta Sandicem facit. quãquam Virgilius herbam hanc uidetur exiſtimaſſe, dum inquit, Sponte ſua ſandix paſcentes ueſtiet agnos. Hinc ſandicinus color eſt dictus, ſicut, à ſandaraca Sandaracinus. Neuius ſandaracino ore. Albi coloris gemmæ ſunt primo cryſtallus, quæ fit gelu uehementer cõcreto, ut nonnulli putant, quapropter à glacie nomen habet. græci enim κρύσταλλον glaciem nominant. Vas amphorale ex ea uiſum Xenocrates ſcribit. Mittit hanc Aſia, Cyprusq́;, & aliæ diuerſæ regiones, ſed & in Alpium iugis, & in Germania reperitur. ſi quod in ea uitium eſt, cælatura ab artifice occultatur. puræ præſtantiores ſunt, & Aſyntheta nominantur. Inter uitia eſt Rubigo. Scabricies. nubes maculoſa. Centrum, qđ ſal appellatur, & capillamentum rimæ ſimile. Tradunt medici, quæ in corporibus urenda ſunt non aliter melius fieri, quàm cryſtallina pila aduerſus ſolis radios oppoſita. Nero princeps amiſſarum rerum nuntio accepto, duos calices cryſtallinos in ſuprema ira confregit, ne quis ex ijs bibere poſſet, quando ipſe non poterat. Poſtea, quod maximum in rebus humanis pretium obtinet, Adamas, colore ſimili modo tranſlucido. ita incudibus reſpuens ictum, ut ferrum, utrinque diſſultet. duritia ei inenarrabilis eſt, & ignium uictrix, in quibus nunquam incaleſcit. quapropter Adamas, quaſi indomabilis uocitatus eſt, ab α priuatiua particula, & δαμάζειν, qđ eſt domare. Exiſtimatur uanos metus à mente depellere, propter quod nõnulli anchitem uocauere, ἄγχος enim angorem ſignificat. Ab adamante adamantinus fit, ſicut à uitro uitrinus. Eadem ratione herba quoq; Adamantis uocatur, Armeniæ, Cappadociæq́; alumna. qua admota Leones reſupinari cum hiatu laxo prodiderũt. Nominis cauſa eſt, quod conteri nequeat. proximæ ſunt margaritæ. de quibus ſuperius diſſeruimus. deinde Onyx candorem habens ad ſimilitudinem humani unguis, qui græce ὄνυξ uocatur. Item rubus ex genere fruticum aquaticarum quod uirgulta eius rubeant. Spinoſa eſt, & mora producit. genus eius roſæ ſimilitudinem habet, qui uocatur cynoſbatus. Item aliud genus, quod græci à loco appellant ideum. tenuior eſt cæteris, minoribusq́; ſpinis, & minus aduncis. & rubidus, quod modo rubentem ſignificat modo ſcabrum, atque aſperum. unde ſorteæ ampullæ rugoſæ, rubidæ dici ſolent. Rubidus etiam à ſcabricie dicitur panis ſecundo coctus, qui & à nautarum uſu nauticus appellatur. Plautus, Exiguam bucellã rubidi panis. Plyn. Nauticus panis tuſus, atque iterum coctus ſiſtit aluum. & rubeta, quod in uepribus tantum, et inter rubos uiuat, genus ranæ eſt, quã græci φρῦνον uocant, grandiſſima cunctarum, & ueneficiorum

Item rubrica, quã græci μίλτον uocant etiam Homeri tempore nobilitatam, licet nondum picturæ eſſet in uſu. tingebantur duntaxat ea nauigia. Home. τῷ δ᾽ ἅμα νῆες ἕποντο δυώδεκα μιλτοπάρηοι. Naſcitur per ſe rubra, minio proxima præſertim in inſula Lemno, nec niſi ſignata uenundari olim ſolebat, propter quod ſphragidem appellabant, ἀπὸ τοῦ σφραγίζειν, quod ſignare eſt, hac minium adulterant, & à ponto, ubi naſcitur, dicitur pontica. & rubellum, uinum ſubrubeum. Mart. Et ueientani bibitur fex craſſa rubelli. Perſius. Veientanumq; rubellum. Rubellæ etiam uites appellatæ, & rubellæ uineæ, quod uitium ipſarũ materia rubra ſit. Plyn. Proxima dignitas momentanis rubente materia, quapropter quidam rubellas appellauere uineas. Columella, nomentanæ uineæ nobilitate ſequuntur amineas, fœcunditate uero etiam præueniunt. quippe cum ſe frequenter impleant, & id, quod ediderint, optime tueantur. feracior eſt minor, nec ita rubet, ut maior. à quo colore rubellæ nuncupantur eædem, quæ feceneæ, quod plus quã cæteræ fecis afferant. Et Rubi Italiæ oppidum à ruborũ frequentia. Hora. inde Rubi feſſi peruenimus. & à rufus ruſo uerbum. Plyn. Eadem ruſat capillũ, hoc eſt rubefacit. Ab hoc ruſeſco, hoc eſt rufus fio. & Rufus cognomen uiri. hinc rufuli appellati ſunt tribuni militum, non à populo, ſed à conſule facti, quod de eorum iure Rutilius Rufus legem tulerit, hi poſtea mutatione unius literæ Rutuli ſunt appellati rufi, ſeu rutuli coloris. quoniam ſtudioſæ erant ueteres Romanæ mulieres, rutilæ cognominatæ ſunt. Inde etiam uiri rutuli ſunt appellati. Rubeæ ergo ueſtes, & rubræ, & ruſæ ſunt rubei coloris. Martia. Roma magis fuſcis ueſtitur, Gallia rufis. Rutilæ, cum aliquid nigrioris habent admiſtum, quæ & Hyacinthinæ dicuntur, de quibus ſupra diximus & hiſginæ ab Hiſge herba. & ferrugineæ à ferri igniti colore. Virgilius, & ferrugineus hyacinthus. quamuis aliquando ferrugineus pro rubiginoſo accipitur, & ab ipſius rubiginis ſimilitudine pro fuſco. & burræ, quia ueteres burrum rubrum dicebant. unde burranica potio appellatur, lac ſapa miſtum à rufo colore. & ruſtici burram buculam nominabant, quod roſtrũ habeat rufum. Pari modo rubens cibo, ac potione ex prandio burrus appellatur, quæ omnia à græco deducuntur. nam græci πυῤῥὸν rufum dicunt. Color uero, qui eſt inter rufum, & nigrum, qualem in bobus præcipue cernimus, Heluus dicitur, à quo heluacia genus ornamenti lydij à ueteribus uocabatur. Heluella uero uocabant olera minuta. quoniam helus, & heluſa ueteres dicebant pro olus, & olera. Item balauſtinæ à flore mali punici, qui balauſtium dicitur, & non modo medicinis, ſed et ueſtibus tingendis utilis eſt, quæ ſibi concolores fiunt. & color ipſe dicitur balauſtinus. Rubri coloris præter rubricam ſunt miniũ, quod inuenitur in argentarijs metallis, magnæ in-

ter pigmenta authoritatis. & olim apud Romanos religionis. Quippe ſimulachri Iouis facies diebus feſtis minio illini ſolebat. Item triumphantium corpora. ſic enim fertur Camillus triumphaſſe, ob eam (ut arbitror) rationem, ut imperatores horribiliores uiderentur, quemadmodum Cæſar Britãnos ſcribit Glaſto ſe inficere, quo horridiores uideantur in bello. Glaſtum herba eſt plantagini ſimilis, qua Britanorum quoq; coniuges, nuruſq; quibuſdam ſacris, toto corpore oblinuntur, nudæq; incedunt, Aethiopum colorem imitantes. Præterea minium unguentis cœnæ triumphalis ad lauandas manus addebatur, & cenſores Iouem minio inficiendum ſolebant locare. Aethiopum quoq; proceres toti eo tingebantur, eumq; deorum ſimulachris colorem adhibebant. Tradunt minium à Callia Athenienſe primo inuentum fuiſſe, dum ſperaret ex rubente arena in metallis argenti aurum excoqui poſſe. arenam cocci colorem habere, hanc teri. deinde lauari farinam. & quod ſubſidat iterum lauari. Quidam hoc magno errore cinnabarim uocant, cum proprie cinnabaris ſit ſanies draconis, morientiũ elephantorum pondere eliſi, utriuſq; animalis ſanguine permiſto. Conſtat enim elephantis frigidiſſimum eſſe ſanguinem, ob id ſæuiente æſtu à draconibus expeti, quamobrem mergi in amnes, & bibentibus inſidiantes proboſcide inuolui, atq; in aurem morſum defigere, quoniam is tantum locus defendi proboſcide nequeat. Sic à draconibus totos elephantos ebibi, ſiccatos concidere, et dracones ſanguine inebriatos elidere, ac utroſq; pariter commori. Proboſcis eſt porrecta corporis pars inhærens naribus, quæ excepto homine, in alijs ferè animantibus inuenitur. Varro Inueniſſe ſe Erycum cum proboſcide ſcribit. in Elephanto dicitur manus, quod ea tanquam manu utatur. Plynius, Reſoluunt elephanti manu draconum nodos. Eſt & alius dimicationis modus. Ab excelſa ſe arbore Draco in elephantum inijcit. Ille arborum, aut rupium attritum quærit. Draco id ſentiens alligat cauda, ille proboſcide nodos reſoluit, hic in ipſa nare caput condit, & ſpirandi uiam auferens enecat. Interdum petit oculos, ex quo fit, ut cæci plerunque elephanti fame contabeſcant. Proboſcis ideo dicta, quod ante depaſcat. Græci enim προβόσκειν dicunt ante paſcere. Miſtura ergo illa ex duorum animaliũ ſanguine Cinnabaris dicitur. Nec eſt alius color, qui in picturis magis proprie ſanguinem reddat, ex antidotis, & diuerſis alijs medicinis utiliſſima, cum minium (quo pro cinnabari medici quidam utuntur) ſit manifeſte uenenum. A minium fit minio uerbum, quod eſt minio tingo, & paſſiuum eius minior. Plynius, A cenſoribus in primis Iouem miniandum locari. à quo & miniari libri dicuntur, cum literæ maiores uerſicoloribus fiunt. Item miniariæ dicuntur loca, è quibus effoditur minium ſicut argentariæ. & aurariæ. è quibus effoditur argentum, atque aurum, & miniarium metallum uocatur argentum, cum quo effoditur minium. Solebant ueteres minio clariores literas facere, uel in auro, uel in ære, uel in marmore, etiam in ſepulchris. Et ſinopis inuenta primũ in ponto, et à quo nomen habet Sinope urbe. Species eius tres, rubra, & minus rubẽs, et inter has media, Eam, quæ ex Africa uenit Cicerculum appellant. Et Ochra, quæ fit exuſta rubrica in ollis nouis luto circumlitis. Sinopidis ponticæ ſelibra, ſalis lucidi libris decem, & melini græcienſis duabus miſtis, tritiſq; unà per dies duodecim, Leuchophorum fit, hoc eſt Glutinum auri, cum inducitur ligno. Inter gemmas autem rubeo colore ſunt carbunculi, à ſimilitudine ignium appellati, cũ ipſi non timeant ignes, ob id à quibuſdã uocati Apyrotes. Qui ex ijs, languidius lucent, Libycontes appellantur. Carchedonij ſunt minores, & nigrioris aſpectus, quibus ſignandis ceri, uti ſolemus eſt & Anthracites appellata carbonibus ſimilis. Mirum,

quod lacte uelut intermortui extinguntur, contra perfuſi aqua magis exardeſcunt. Cognata carbunculo eſt ſandaſtros, quam aliqui Garamantidem uocant. habet uelut in tranſlucido ſtellantes intus aureas guttas, & ferè hyadum numero. quidã et ſandaſitem nominant. Nicander Sandophorion, alij Sandareſon nuncupauerunt. Ex eodem genere & Lychnites eſt appellata à lucernarum accenſarũ præcipua gratia. probatiſſima in India naſcitur, quã quidam remiſſiorem carbunculũ eſſe dixerunt. Secunda bonitate eſt Ionis appellata à præclaris uiolarum oribus. Nam græci ἴον uiolam nominant, hæc à ſole, aut digitorũ attritu excalfacta paleas, et chartarũ fila ad ſe rapit. Et Charchedonius, quæ idem facere dicitur, quãquã ſit multo uilior. Naſcitur apud Naſamonas in montibus, ut incolæ putant imbre diuino, inueniturq; ad repercuſſum lunæ maxime plenæ. Potoria uaſa ex hoc lapide fieri cõſueuerũt, noſtra quoq; ætate aliquando uſa. Scalpturæ contumaciter reſiſtit, partemq; ceræ retinet ſemper. Et Sarda, quæ è contrario ſignando utiliſſima eſt, gemma uulgaris, et primum Sardibus reperta. Sardis pluratiuo numero urbs Lydiæ eſt, regia olim Crœſi lydorum regis, ſed laudatiſſima in Babylonia. alterum eius genus demium uocatur à pinguedine. Græci enim δημὸν pro pingui accipiunt. Homerus hoc frequenter utitur. à quo δήμιον appellata. Nec fuit in uſu antiquorum gemma ulla frequentior, ut Menandri fabulæ teſtantur. ab hac & onyce, de qua ſupra diximus. alia gemma Sardonix appellata candorem habens in ſarda, quaſi ungue hominis carnibus impoſito, & utroq; tranſlucido. Placere noſtris ob id maxime cœpit, quod ſola propè gemmarũ ſcalpta non auferat cerã. Indi perforatis utuntur in collo. Claudius, Cæſar Smaragdo in primis uti ſolebat, atque Sardonyce, primus autẽ romanorum Sardonyce uſus eſt prior Africanus, deinde Romanis celeberrima fuit. Perſius, & natalitia tandẽ cum Sardonyce albus, Iuue. Ante pedes ideo conducta Paulus agebat ſardonyce. Hinc qui ſardonycem geſtat, dicitur Sardonycatus, ſicut ab annulo annulatus. Marti. Ruſe uides illum ſubſellia prima tenentem Cuius & hinc lucet ſardonycata manus. Hanc gemmã fuiſſe tradunt, quam Polycrates tyrãnus, cum ei omnia in uita, ſecunda ſuccederẽt, nec unquam aliquid aduerſi, quo ſemper fauentis, atque ita inſidiantis fortunæ inuidiã expiaret, annulo ligatam, nauigio in altum mare prouectus, manu ſua deiecit in profundum, ſaltẽ hoc modo in uita aliquãdo doliturus. At fortuna nec flecti, nec mulceri facilis, id paſſa non fuit. Etenim piſce eximiæ magnitudinis eo die capto, regiq; in conuiuio oblato, annulus, quem dum mergeretur, deuorauerat, ſummo omniũ, qui aderant ſtupore reſtitutus eſt, uentriculo piſcis dum ſcinderetur inuentus, Viſa poſtea Romæ hæc gemma fuit in Concordiæ delubro cornu aureo auguſti dono incluſa, Et hyacinthus rubro colore diluto flori à quo nomen habet, oppido quàm ſimilis, & Chryſolampis noctu ignei coloris, licet die palleſcat. Et Eupetalos igneum in primis colorem habens, ſed cœruleo, et minij, ac mali coloribus admiſtis. Et gorgonia, quæ nihil aliud eſt quàm Corallium, ita appellata, quoniam corallium extractum aquis ex ligno dureſcit in lapidem, quomodo Gorgonis capite oſtenſo cuncta lapideſcere ſolebant. Nota eſt Perſei, ac Gorgonis fabula, de qua inferius diſſeremus. Corallium in mari rubro gignitur, & in perſico, quod uocatur iace. Laudatiſſimum in Gallico ſinu circa orchadas inſulas, & in ſiculo circa Drepanũ, & ante Neapolim, & ante Corniculum hoc quoq; tempore. forma ei eſt fruticis, color uiridis, baccæ candidæ ſub aqua, & molles. Exemptæ confeſtim durantur, & rubeſcunt, quaſi corna ſatiua. Aiũt tactu, dum uiuit prorſus lapideſcere, propter quod euelli retibus, ac ferramento præcidi. Hac de cauſa corallium, quaſi che-

Probatiſſimum eximie rubet, et quam ramoſiſſimum eſt, nec ſcabroſum, aut lapideum. religioſum id geſtamen putant, & infantiæ pro amuleto alligatur. baccas quoq; ex eo faciunt, quibus & in numerandis precibus ſacris, quæ ſacræ baccæ, ſiue per diminutionem ſacræ baculæ dicuntur. & in collo pro monili utuntur. & Hepiſthites, quæ ſpeculi naturam habet in reddendis imaginibus, quanquam rutila. Experimentũ eius eſt, ſi feruentem aquam addita ſtatim refrigeret, aut ſi in ſole poſita aridam materiam accendat. Et hæmatites ſanguineo colore in Aethyopia principalis, & meconites, quæ florem ſylueſtris papaueris exprimit. & Nympharena urbis, & gentis perſicæ nomen habens ſimilis hepiſthitæ. & teliardios colore cordis, Perſis maxime grata, quam muculã appellant. & carcinias marini cancri colore. & triglites colore triglæ, hoc eſt muli. Coccinus uero color eſt, qui exuberantiam quandam, ac ſplendorem ruboris oſtendit, dictum à cocco, quod latine granum dicitur. eſt enim coccus ueluti granum, quod uel ex arbuſcula ilici ſimili, uel ex rubenti gramine naſcitur olim in Galatia Africa, ac Luſitania, poſtea & in Gallia tranſalpina, nunc etiam in Peloponneſo, atque alijs Græciæ locis. hic & ſpadicus, & phœniceus uocatur, quod non diſſimilis ſit fructui palmæ arboris nondum ſole incocto. Spadica enim græci nominant auulſum è palma cum fructu ramum φοῖνιξ uero palma appellatur. à quo græci φοινικὸν phœniceum uocant. Hinc coccina, & coccinæ ueſtes dicuntur. Martia. Coccina famoſæ donas, & ianthina mœchæ. Idem color roſeus, à roſarum ſimilitudine dicitur. à quo & roſeus pannus, & roſeæ ueſtes appellantur. Plyn. Germinat primo incluſa granoſo cortice, quo mox intumeſcente, & in uirides alabaſtros faſtigato, paulatim rubeſcens dehiſcit, ac ſeſe pandit in medio calicis ſui complexa luteos apices. Ex hac fit oleum, quod roſaceum dicitur, fuiſſeq; in uſu à Troianis uſque temporibus teſtatur Homerus ῥοδόεντι δὲ χρῖεν ἐλαίῳ, hoc eſt, roſeoq; unxit oleo. Item unguento quoque imponitur, de quo ſuperius diximus & menſarum delitijs. Quæ ardentiſſimi coloris eſt, non excedens duodena folia, meliſia dicitur. proxima minus rubens Trachinia. uilior albicantibus folijs alabandica. Viliſſima pluribus, & minutiſſimis ſicionia. Eſt quæ à foliorum multitudine centifolia uocatur, quæ nec odore, nec ſpecie probabilis habetur, nec coronis à ueteribus adhibebatur, præter, quàm ad extremos uelut cardines. Eſt & quæ græcula appellatur à noſtris, à græcis lycnis, non niſi in humidis proueniens, nec unquam excedens quinque folia, uiolæ magnitudine, colore nullo. Alia græcula funditur è caule malleo laceo, folia oleacia habens, moſcheuton uocant. μοσχεύματα enim propagines uocantur. inter has media magnitudine autumnalis, eſt quam uocant coroneolam, omnes ſine odore. A roſa roſetum, & roſarium deducuntur, hoc eſt copia fruticum uno loco roſas gignentium, & roſeum. unde roſeus color, & roſeus odor, & roſeus pannus. & roſeæ, hoc eſt purpureæ genæ. & roſalia coronæ è roſis factæ. Roſa græce ῥόδον dicitur. Unde Rhodinum unguentum, & crinorhodon lilij genus rubens, quod græci κρίνον uocant. & rhododendros, quod ne nomen quidem apud nos inuenit latinum. A quo & ueſtes, quibus amiciebantur nouæ nuptæ, ſimiliter uocabantur, erantq; Flaminicæ ueſtibus ſimiles, quod boni ominis gratia inſtitutum eſt, quoniã Flaminicæ non licebat facere diuortium. Erat autem Flaminica Flaminis uxor. à flameis Flamearij uocitati, coloris flamei infectores, ſicut uiolarij, qui uiolacea tingunt. Flamen dialis ſacerdos erat Iouis, ſic dictus, quod filo aſſidue uelaretur, quaſi filamen. Erant enim Flamines capite uelato ſemper, caputq; filo cinctum habebant. Dialis autem à δίὸς Ioue, à quo uita dari putabatur hominibus, huic Fabam nec tangere licebat, nec nominare, quod ea putaretur ad mortuos pertinere. nam & lemuribus iacitur, laruiſq;, & parentalibus adhibetur, & in flore eius luctus litera apparere uidetur. Hebetare quoq; ſenſus exiſtimatur, & inſomnia facere, propter quod pythagoricæ ſententia damnatur, uel ſicut alij tradunt, quoniam in ea ſunt mortuorum animæ, propter quod parentando aſſumitur, quod genus libi Fabacia à ueteribus uocabatur. Hinc uxor eius Flaminica uocitata, & ab hoc Flaminia ſacerdotula, quæ

Flaminicæ diali præminiſtrabat, eaq; patrimes, & matrimes erat, ideſt patrem, matremq; adhuc uiuos habebat. Item Flaminia ædes, domus Flaminis dialis, et Flaminius Camillus puer ingenuus, qui Flamini diali ad ſacrificia miniſtrabat. Antiqui enim miniſtros Camillos uocabant, quamuis aliqui putabant omnes pueros à ueteribus Camillos appellatos, quẽadmodum habentur in antiquo carmine, cum pater filio de agricultura præciperet, Hyberno puluere. uerno luto grandia farra Camille metes. Item Flaminius lictor, qui Flamini diali ſacrorum cauſa præſto erat. Flaminius uero circus, & Flaminia uia non à Flamine, ſed à Flaminio conſule dicta ſunt, q ab Annibale interfectus eſt ad lacum Traſimenum. Quippe circus flamineus, Varrone teſte, circum flaminium campum ædificatus eſt. Luteus color è quibuſdam terris fieri à pictoribus ſolet. Item ex auripigmento, quod in Syria foditur in ſumma tellure, auri colore, ſed fragile ad lapidum ſpeculariũ ſimilitudinem. Ex quo Caius princeps, ut aurũ facere tentaret, excoqui iuſſit magnum põdus, & planè excellens aurum fecit, ſed ita parui põderis, ut detrimentum ſentiret, propter qđ nemo poſtea idẽ tentare auſus eſt. hoc colore inter gemmas ſuccini genus reperitur, & topazij. Item chryſolitus aureo nitore trãslucens, et chryſelectrus in colorẽ lutei electri declinans, et leucochryſus, in qua interuenit candida uena, & capnias uelut i croco refulgens, et melichryſis, quæ ex India mittitur, quaſi per aurum ſyncero melle tranſlucente. & xyſtios plebeia gemma, et aromatitis, quæ in Arabia gignitur, ita dicta, quod myrrhæ odorem habeat. Græci enim ἄρωμα odoramentum uocant. A quo aromatopolam dicunt, quem nos aromatarium nominamus, & chryſophis, cui uidetur aurum ineſſe. et Hammonis cornu, quæ inter ſacratiſſimas Aethiopiæ gemmas habetur, aureo colore, Arietini cornu effigiẽ reddens. & hammochryſus, quaſi auro miſtas habens arenas. & crocias à croci ſimilitudine appellata, & milites à colore mali auri, quod melum proprie dicitur. PARS. Portio. Partes enim dicuntur, in quas diuiditur totum. Quidam partem à pari dictam exiſtimant, quod partes ſimul iunctæ pares. hoc eſt æquales ſint toti, alij à pario, ſiue partu, quod pars à toto deducta, & quaſi parta ſit. alij à paruum, quod pars paruum quiddã ſit reſpectu totius. Ab hoc particula diminutiuum. hoc eſt parua pars. A quo particularis, qui ad partem ſpectat, & particulariter, ac particulatim aduerbia, hoc eſt membratim, & per partes. & particulones, hoc eſt cohæredes, & q partem patrimonij ſumunt. Item à parte partim aduerbiũ. quod modo ex parte ſignificat, ut partim ſubticuit crimen, partim confeſſus eſt. modo idem ſignificat, quod ſuum nomen, ut partim hominum uenerunt, hoc eſt pars hominum uenit. Veteres etiam, cum partim dixere. Cato, ibi pro ſcorto fuit in cubiculum ſurrectitauit è conuiuio cum partim illorum, iam ſæpe ad eundẽ modũ erat. Item à pars expers, quaſi ſine parte, ſicut expes ſine ſpe. Expes enim laborum dicitur, qui nullã partem laborum tulit. Aliquando etiam pro ignaro ponitur. Apuleius. homo rudis, & omnium bonarum artium expers. Quidam tamen, cum quibus nos potius ſentimus, expers, non à parte, ſed ab experior uerbo deductum exiſtimant, quẽadmodum experitum quoque ueteres dixerunt pro imperito, atq; ignaro. Item à parte deducitur portio, quaſi partio, quod partem ſignificat, cuius diminutiuum eſt portiuncula. Apuleius, qui cum à me portiunculam poſceret. Ab hoc fit proportio, quæ eſt duarum rerum quatenus ad quantitatem pertinet, inuicem facta comparatio. Item particeps, qui partem capit, dicimuſq; particeps ſum laborũ tuorum, & pticeps tibi in laboribus. Plyn. omnium ſtudiorum meorum, ac laborum particeps. Quinti-

lianus, & in pleriſq; ruris operibus merito particeps. Curtius, Quod fuiſſet illi in periculis particeps. Ab hoc fit participiũ apud grammaticos, quod ea pars orationis partem capiat nominis, partemq́; uerbi. Et participalia nomina, quæ licet non ſint participia, ſimilia tamen ſunt participijs, nam & caſus, et genera ſicut participia habent, & tempora, ac ſignificatiões. Regunt præterea caſum more participiorum poſt, non ante, nam locutio illa, qua ſacrarum literarum interpretes uſi ſunt, In conuertendo dominus captiuitatem Syon, & in deficiendo ex me ſpiritum meum, & in conuertendo populos in unum, et reges, ut ſeruiant domino, inaudita, & planè barbara eſt. Græci enim infinitum hoc loco habent, qđ ante ſe accuſatiuum requirit. poterat autem hoc modo eleganter trãſferri, dum conuerteret dominus captiuitatem Syon. Dum ſpiritus mihi deficeret, & conuertente domino captiuitatem Syon, ac deficiente mihi ſpiritu meo. Item in conuertendis populis in unũ, uel dum populi conuerterentur in unũ. Hoc autem differunt Gerundia à participijs, quod ipſa rei adminiſtrationem ſignificant ſine tempore, ut tenet me occupatio iuris dicendi, gerundium eſt, nec tempus ſignificat futurum, ſed rei adminiſtrationẽ in iure dicendo. Illa uero tempus ſine rei adminiſtratione. Vt tenet me cura dotis numerandæ, hoc enim participium eſt futuri ſignificatiuum ſine rei adminiſtratione. Præterea gerundia duplicem ſignificationem habent, actiuam ſcilicet, atq; paſſiuam. Itemq́; à gerenda duplici ſignificatione, gerundia (ut quidam putant) appellata ſunt. Participia uero unam tantum. Sed illud notandum, quod omnia gerundia, cum ſociata ſunt ſubſtantiuis, paſſiue accipiuntur, diſiuncta uero modo actiue, modo paſſiue, ſed paſſiue cum ſine præpoſitione, & ſine genere in caſu ablatiuo, & quaſi abſolute ponuntur. Virgilius. alitur uitium, creſcitq́; tegendo. Idẽ, ægreſcitq́; medẽdo. Idem, uritq́; uidendo fœmina. ideſt cum tegitur uitium, cum curatur æger, cum uidetur fœmina. Quintilianus, ſed memoria excolendo, ſicut omnia alia augetur, hoc eſt, dum excolitur. Salluſtius, pauca ſupra repetam, quo ad cognoſcendum omnia illuſtria magis, magiſq́; in aperto ſint, hic accuſatiuo cum ad, uſus eſt, & ad cognoſcendum inquit, hoc eſt, ut cognoſcantur. Præterea gerundia etiam cum plurali numero ſingulari uoce iunguntur. Plynius. cum illorum uidendi gratia me in forum contuliſſem. Item à particeps fit uerbum, quo nonnulli utuntur, Participo. Præterea à pars fit Partior uerbum, cuius compoſitum eſt impertio. Partiri eſt parteis facere, & quaſi diſtribuere. Virgi. & ſocios partitur in omneis. Quintilianus. Partire, uel gratis, dum quo reſpiremus afferas. Impertire uero eſt impendere, uel partem dare. Cicero. Huic rei aliquid temporis impertias. hoc eſt impendas. Idem, laboris mei laudem nemini impertio, hoc eſt partem do. Aliquando mutata conſtructione reperitur. Terentius, plurima ſalute Parmenonem ſuum impertit Gnato, eo modo, quo dicitur dono tibi hunc equum, & dono te hoc equo. Virgilius. Sergeſtum Aeneas promiſſo munere donat, huius paſſiuum eſt impertior. Cicero, atque etiam uiro forti collegæ meo laus impertitur. Quidam impertiri quoque pro impertire uſurpant, et partire dicunt pro partiri. licet autem dicere partior laborem multis negotijs, & in multa negotia. ab hoc deducitur partiarius hoc eſt colonus, ſiue alius quiſquis, qui fruges, fructuſq́;, ſiue aliud opus, utputa calcem, lateres, tegulas cum domino æque partitur. Cato. Calcem partiario coquendam qui dant. Calcarius perficit, & coquit, & ex fornace calcem eximit, et ligna conficit ad fornacem. dominus lapidem, & ligna ad fornacem, quod opus ſit. præbet. Idẽ, uineam curãdam partiarius bene curet, fundum, arbuſtum, agrum frumentarium partiario, fœnum, & pabulum, quod

bobus ſatis ſiet, quæ illic fiant, cætera omnia pro indiuiſo. Itẽ ab eodem fiunt compoſita diſpertio, ſiue diſpertior. Nonius. Vt pariter diſpertiãtur bona patris, bipartio, bipartior, tripartior quadripartior, quinquepartior, à qbus bipartita negotia, & tripartita, & quadripartita, & quinquepartita dicimus. Itẽ multipartior, & multipartita, hinc etiam partitio deriuatur, hoc eſt diuiſio in parteis. nonnulli tamen exiſtimant non partem à parum, ſed à parte parum aduerbium deduci, quod ſignificat modicum. à quo paulum, & paululum, & parumper, quod modo ſignificat paruo tempore. Plaut. Expecta hic parumper, modo paulatim. Virgil. pulſuſq́; parumper Corde dolor. & perparum, & pauliſper, & paulatim, & paucum, à quo pauculum, & pauxillũ, & paucitas, & paucies, quod ueteres pro raro uſurpabant. Titinnius, uxorem meam paucies uidebo. Item à parum paruus, cuius diminutiuum eſt paruulus, & ab eo paruitas, & compoſita paruifacio, & paruipendo, hoc eſt ſperno, contemno, & pauper (ut Varro ſentit) à parua pecunia à quo paupertas, & pauperies, quæ proprie dicitur damnum, quod quadrupes fecit, & pro paupertate ponitur. Horatius. Mox reficit rates quaſſas indocilis pauperiem pati. et paupero uerbum, à quo depaupero, quod eſt pauperem facio. Plautus, quæ improba eſt mentis uitio dominum pretio pauperat. Idem, quam ego tanta pauperaui per dolum pecunia. Varro. priuſquã domum depauperaret ſumptu ſuo, & paupertinus, hoc eſt pauper. Idẽ, quod ſi paupertina ſine elegantia, ac cum caſtimonia. antiqui paupertates plurali numero uſurparunt. Idem, quod inter hos Ioues interſit, & eos qui ex marmore, ebore, auro nunc fiunt, potes animo aduertere, & horũ temporum diuitias, & illorum paupertates. paupertatem quidam ab egeſtate ita diſtinguunt, ut egeſtas ſit, quando ad uitam neceſſaria deſunt. paupertas uero quando licet nõ ſint opes, tamen neceſſaria ſuppetunt. Tibullus. Me mea paupertas uitæ traducat inerti. Dum meus aſſiduo luceat igne focus. Idem, ego compoſito ſecurus aceruo dites deſpiciam, deſpiciamq́; famem à paupere per diminutionem pauperculus dicitur. ueteres fœminino genere pauperam dixere. à quo paupercula. Item à parum fit parco uerbum, quaſi parũ tango, abſtineo. proprie enim parcere abſtinere eſt. hinc parco aliquando ponitur pro ueniam do, hoc eſt ab ultione abſtineo. Virgilius. parcere ſubiectis, et debellare ſuperbos. aliquando pro depono, quia ab ijs, quæ deponimus, abſtinemus. Idẽ Parce metu Cytherea manent immota tuorũ Fata tibi. Aliquando pro ſeruo, quia ſimiliter ab his etiã abſtinemus. Idem, argenti, atq; auri memoras, quæ multa talẽta Natis parce tuis. Interdũ pro deſino, nam & deſinere abſtinere eſt. Idem, parce pias ſcelerare manus. ſic parcere errori dicimus, abſtinere à caſtigatiõe erroris, ſiue parum caſtigare errorem. parcere pecuniæ, abſtinere ab expẽdenda pecunia, ſiue parum expendere pecuniam. parcere iniuriæ, abſtinere à uindicanda iniuria, ſiue parum ulciſci iniuriam. parcere labori, abſtinere à labore, ſiue parũ laborare. parcere lachrymis, abſtinere à lachrymãdo, ſiue parũ lachrymari. parcere metui, abſtinere à metu, ſiue parũ metuere, & eodẽ modo de ſimilibus. hinc parcus dicitur, qui frugi eſt, & ſumptibus parcit. nam quod aliqui parcum dictum uolunt, quaſi arcæ par ſit, omniaq́; cuſtodiat, teneatq́;, ut arcat, uel quod pecuniam conſumi, atq; impendi arceat, quaſi pecuniarum, pene ridiculum eſt. à parcus parcitas deriuatur, hoc eſt frugalitas quædam, & parce aduerbium frugaliter, moderate, & parſimonia, quæ ſimiliter pro moderatiõe ſumptuũ, & parcitate, hoc eſt conſeruatione rerũ accipitur, fitq́; à præterito parſi, quod conſeruaui ſignificat, ſiue abſtinui. Nam alterum præteritum peperci, accipitur potius pro ueniam dedi.

quamuis confundi hæc interdum ab authoribus ſolent. & cõparco uerbum. Terentius, ſuum defraudans genium, comparſit miſer. Veteres etiam comperco pro compeſco ſcripſere. ſunt qui à parco parcas quoq; per antiphraſin uocatas exiſtiment, quod nemini parcant. alij tamen, inter quos Varro eſt, à partu potius dictas putant, unius literæ mutatione, quoniam (ut ſcribit Heſiodus) hæ, naſcentibus hominibus, bonum, malũq́; conferre cenſeantur. Vnde Iuuenalis, hæc exempla para felicibus. at mea Clotho, et Lacheſis gaudent, ſi paſcitur inguine uenter. Martianus non ignobilis author, has deorum ſcribas eſſe inquit, et ſententias Iouis ſtudio ueritatis excipere. treis autem eſſe parcas finxerunt, quas latini nonam, decimam, et mortam dixere, nonam, et decimam à tempeſtiui partus tempore, hoc eſt à nono, & decimo menſe, in quibus ſecundum naturã pueri naſcuntur, mortam uero ab eo, quod qui naſcuntur ante hoc tempus, uel poſt, quaſi monſtra habeantur. uolunt enim ſeptimo menſe raro pueros naſci, octauo nunquam. nono ſæpe. decimo ſæpius. Plautus, tum illa, quam compreſſerat decimo poſt menſe exacto, hic peperit filiam. Cicero. Herebi, & noctis has fuiſſe filias ſcribit, & eaſdem fata eſſe exiſtimant. unde eſt illud Cleantis, ducunt uolentem fata, nolentem trahũt. fingunt uitæ hominum præeſſe, & nendo eam ducere. Quapropter lanificas ſorores appellant. Martial. ſi mihi lanificæ ducunt non pulla ſorores Stamina, nec ſurdos uox habet iſta deos. Seneca. Fatis agimur, credite fatis, Non ſollicitæ poſſunt curæ mutare rati ſtamina fuſi. Quicquid patimur mortale genus, quicquid facimus, uenit ex alto, ſeruatq́; ſuæ decreta colus Lacheſis dura reuoluta manu. Apuleius, tres parcæ, tria fata ſunt numero, cum ratione temporis facientia, ſi poteſtatem earũ ad eiuſdẽ ſimilitudinem temporis referas, nam quod in fuſõ perfectum eſt, præteriti temporis habet ſpeciem, & quod torquetur in digitis, momenti præſentis indicat ſpatia, et qđ nondum ex colo tractum eſt, ſubactumq́; curæ digitorum, id futuri, et conſequentis ſeculi poſteriora uidetur oſtendere. hæc illi conditio ex nominum eius proprietate contingit, ut Atropos præteriti temporis fatum, qđ ne deus quidẽ faceret infectum, et futuri temporis Lacheſis, à fine cognominata, quod etiam ijs, quæ futura ſunt, finem ſuum Deus dederit. Clotho præſentis temporis habet curam, ut ipſius adiectionibus ſuadeat, ne cauſa ſolers rebus omnibus deſit. Lacheſim dictam uolunt ἀπὸ τοῦ λαγχάνειν, quod ſortiri eſt. ipſa enim net, ac filum ducit. Clothon, quod fuſum torquendo, ſuper eo filum trahit, ac colligit, græci enim κλώθειν torquere dicunt. Atropon ab immutabilitate, quod ſcilicet inexorabilis ſit, flecti enim non poteſt, quin filum truncet, & humanã finiat uitam, græci ἄτροπον immutabilem dicunt. Martialis, Lanificas nulli treis exorare puellas Contigit, obſeruant quem ſtatuere diẽ. VLTIMA. Extrema, nouiſſima, ultimum aliquando primum ſignificat. Virgilius. tu ſanguinis ultimus author. aliquando poſtremum. Cicero, ut turpi ambitione magis delectatur, qui in prima cauea ſpectat, delectatur tamen etiam qui in ultima. ab ultra autem, ultimũ dictum, quod ultra omnia ſit, ſiue ante reſpicias, ſiue retro. ultra autem (ut ſupra diximus) ab uls deducitur, quo ueteres utebãtur, ſicut citra à cis. ab ultra deriuatur ultro, quod modo eiuſdem cum primitiuo ſuo ſignificationis eſt. Virgilius. et miſereſcimus ultro, ideſt ultra id, quod rogauit, præſtitimus. Idem, & ultro ipſe grauis, grauiterq́; ad terram pondere uaſto Concidit. modo ſignificat ſine requiſitione, ut ultro ad te ueni, hoc eſt ueni ad te non requiſitus. cuius ſignificationis eſt ſponte, quamuis ſponte pro naturaliter ponatur ut multæ arbores ſpõte naſcuntur, hoc eſt naturaliter, & non ab homine ſatæ. ab ultro, quando ultra ſigni-

Cicero, multiſq́; uerbis ultro, citroq́; habitis, ille nobis conſumptus eſt dies. Quidã in hac ſignificatione ſurſum, & deorſum utuntur. Terẽtius, ſex ego te totos Parmeno hos menſeis quietum reddam, ne ſurſum, deorſum ue curſites. Tractũ ab Athenis, cuius portus in imo, urbs uero in æditiori loco ſita eſt. À ſponte uero ſpondeo uerbum deducitur, quod ueteres uſurpabant pro dico. nam qui ſpondet, ſponte, ideſt uoluntate dicit, unde reſpondeo factum eſt, quod eſt poſteriore loco dico. à quo reſpõſum, & reſponſio deducuntur. Poſtea uero ſpondere uſurpari cœptum pro ſpõte promittere, unde qui puellam ſpondet ſponſor, quæ ſpondetur puella, ſponſa, cui ſpondetur, ſponſus, & qua rogatur pecunia dotis à ſponſo, ſponſio, hoc eſt promiſſio appellatur, & dies, qua puella promittitur, ſponſalis, & ſponſalia (ut Florentinus ait) nuntio, & repromiſſio futurarum nuptiarũ, & ſponſus quartæ declinationis pro ſponſione. Seruius Sulp. qui uxorem ducturus erat ab eo, unde ducenda erat, ſtipulabatur eum in matrimonium ductum iri, qui daturus erat, itidem ſpondebat daturum. Is contractus ſtipulationum, ſponſionumq́; dicebatur ſponſalia. Tum quæ promiſſa erat, ſponſa appellabatur, q ſpoponderat ducturum, ſponſus. ſed ſi poſt eas ſtipulationes uxor nõ dabatur, aut non ducebatur, q ſtipulabatur, ex ſponſu agebat, iudices cognoſcebant. Inter ſpondere, ac deſpondere quidam hanc differentiam faciunt, ut ſpondere ſit patris puellæ, deſpondere patris adoleſcentis. Terentius, placuit, deſpondi, hic nuptijs dictus eſt dies. Paulus iuriſconſultus ſponſionem dici affirmat, non ſolum quæ per ſponſi interrogationẽ fit, ſed etiam omnem ſtipulationem, promiſſionemq́;. & ſponſor aliquando ponitur pro fideiuſſore, ſponte etiam nominaliter capitur, habetq́; dũtaxat ablatiui caſum, unde ſponte mea ſponte tua, & ſponte ſua dicimus. à quo ſpontaneus pro uoluntario deriuatur. reſpondeo autem licet proprie ſit ſecundo loco dico (ut ſupra diximus) ponitur tamen aliquando pro conſentio. Virgilius. dictis reſpondent cætera matris, interdum pro reſpicio. Idem, reſpondet Gnoſia tellus, hoc eſt Athenas reſpicit, & contra poſita eſt. nonnunquam pro ſatiſfacio. Idẽ, illa Seges demum uotis reſpondet auari Agricolæ, bis quæ ſolem, bis frigora ſentit. dicimuſq́; reſpõdeo tibi, & ad te. Plyn. cum ad eos breuiſſime reſpondiſſem. Item à ſpondeo conſpõdeo, unde ueteres conſponſos dicebant fide mutua obligatos, & conſponſores coniuratores, quaſi ſibi inuicem ſpondentes. AVLAE regiæ. neque enim hoc loco pro atrio capitur, cum ſuperius dixerit, inuidioſa feri radiabant atria regis. DEFICIENTIS. Finientis, terminantis. ſenſus eſt, ubi nũc Thermæ ſunt, ibi erat ultima pars domus Neronianæ. deficio aliquando ſignificat deſum, & hoc ſolum ab eo differt, qđ deficio exigit accuſatiuum, deſum uero datiuum. Cicero. Quod ea me ſolatia deficiunt, quæ cæteris, quorum mihi exempla propono, ſimili in fortuna non defuerunt. Idẽ, dies me deficeret. ab hoc deriuatur defectus, cum pro priuatione capitur, ut multi defectu medicorum perierunt, hoc eſt, quia defuerunt medici, modo deſciſco, ac recedo à ductu, atq; imperio alterius, & quaſi rebello. Quintus Curtius, iam duæ legiones ab eo defecerant. Hinc defectio dicitur receſſus uel militum ab imperatore, uel ciuitatis à domino. aliquãdo debilior, et uiribus exhauſtior, unde defecti appellantur debilitati, atq; exhauſti. Martialis, dulcia defecta modulatur carmina lingua, Cantator Cygnus funeris ipſe ſui. Plynius. genus uini, quod Bion uocamus, prodeſt ſtomacho diſſoluto, aut cibos non perficienti, prægnantibuſq́;, & defectis. hi à græcis Synthetici dicuntur, quo uocat-

Idem, tali ſorbitionis genere emendantur Syntheſes, hoc eſt defectiones ex longis morbis ſumptæ. hæc autem emendatio proprie recreatio dicitur. Idem, aqua mulſa præclaram utilitatem habet uiribus recreandis. Item, hæc & defectos mirũ in modum recreat. Item, deficio aliquando uſurpant pro finio, deſino. Martianus. tum demum id agere cõſilium erat, cũ uita defecit. Eſt autem deficio à de, & facio compoſitum. facere (ut Papinianus inquit) omnino faciendi cauſam complectitur, dandi, ſoluendi, numerandi, iudicandi, ambulandi, reddendi, unde qui otioſus ſedet, ſi rogetur quid faciat, recte reſpondere poterit, ſe nihil facere, quando quidem otioſus eſt. recte etiã ſe ſedere, quoniam & ſedere ipſum aliquid facere eſt, ut iacere, nauigare, quieſcere. Varro tamen facere, agere, et gerere diuerſa eſſe ſcribit. nam aliquis facit, qui non agit, & aliquis agit, q non facit, ut poëta facit fabulã, non agit, contra actor agit, non facit. Imperator res gerit, hoc eſt ſuſtinet, non agit, aut facit. unde res geſtæ, non actæ, aut factæ dicuntur. proprie facere is dicitur, qui rei, quam facit, faciem quandam imponit, unde à faciendo facies uocitata. qui ergo uas facit, uaſis faciem illi imponit, qui ueſtimentum, faciem ueſtimenti. agere uero exiſtimatur, qui aliquid ita operatur, ut nullum extet opus, qđ ſub ſenſum ueniat. hinc qui aliquid animo moliuntur agere proprie, nõ facere dicuntur. confunduntur tamen ſæpe hæc uerba, & facere ad omnia trãſfertur, nam & facere uerba dicimus, ideſt loqui. & facere uiã, ſiue iter ire. et facere alicui timorẽ, terrere. & facere aliquem certiorem, reddere alicuius rei in dubium. facere gratum, facere ludos, facere rem diuinam, facere ſolennitatem, exhibere. facere copiã, facere poteſtatem, præbere. facere lucrum, lucrari. facere urinam, meiere. facere ſcreatus, excreſcere. facere ſordes, ſordeſcere. facere pediculos, emittere, & quod mirabilius eſt, cum facere, et pati contraria ſint, facere tamen pro pati accipitur, ut feci iacturam, feci damnũ. naufragium facere, ueteres pro ſacrificare poſuerunt. Virgil. Cum faciam uitulam pro frugibus ipſe uenito. Vitulam. n. non uitula ablatiui caſus legendum eſt, ut Macrobius ſentit, & eſt ſenſus, cum ſacrificabo uitulam. Plautus, plenam faciã tibi fideliam. Item pro coire. Martialis, cum dicis propero, fac, ſi facis, Hedyle languet. Plautus, Mauult ancillæ facere, quàm liberæ, hoc eſt mauult cum ancilla coire, quàm cum libera. Item pro conuenire. Martialis, Nõ facit ad ſæuos ceruix, niſi prima leones. & pro conducere, prodeſſe. Plynius, hoc & tuſſi facit, hoc eſt ad tuſſim prodeſt, & pro æſtimo, unde plurimi facio hãc rẽ dicimus, ideſt magno æſtimo. Eodẽ modo multifacio, magnifacio, & econtrario, paruifacio, nihilifacio, flocifacio, hoc eſt contemno, & in nulla æſtimatione habeo. flocifacio, nõ à flocibus (ut quidam rudes exiſtimant) deducitur, ſed à flocco. flocci enim proprie dicuntur lanarum particulæ diuiſæ à uelleribus inutiliter euolantes, & per diminutionem appellãtur flocculi. Plynius, naſcuntur in robore pilulæ nucibus non abſimiles, intus habentes flocculos molles lucernarũ luminibus aptos. nam & ſine oleo flagrant. Idẽ, alij pira ſeruant in flocis, et pſisq;, quas luto paleato illinunt. floces autem uinarum purgamenta ſunt, hoc eſt uinaceæ, ſicut flaces oliuarum. Plynius, in amurca, et flacibus hæ ſunt carnes, et illæ feces. Item pluris facio, minoris facio, minimifacio, nihilifacio. Plautus, deos quidem, quod maxime æquũ eſt, metuere eos, minimi facit. ſunt præterea à facio cõpoſita ſumptifacio, quod eſt emo, ſeu in aliqua re emenda ſumptum facio. Plautus. ſi nunc me ſuſpenſam, meam operam luſerim, & præter operã reſtim ſumptifecerim, &

Idē, nec te tua funera mater Protexi, preſſiue oculos, aut uulnera laui, et funebre, quod ad funus pertinet. Vnde funebris pompa dicitur. Quintilianus. Quid ſibi uelit ille funebrium longus ordo pomparum. Nam pompa græca uox eſt, ſignificatq; apparatum ſolēne cum oſtentatione, & ſpecie quadam

triumphi, unde & πομπεύειν græci triumphare dicunt. Hinc & funerum, & ludorum, ac ſpectaculorum pompæ dicuntur. Cicero. ſed iam è pompa in ueram aciem deſcendamus. & funeraria, quicquid ad exequias pertinet, et funebres tibiæ, quibus in funere canebatur, quas flamini audire putabatur illicitum. & funeſtum, funere inquinatum. à quo fit funeſto uerbum, cuius paſſiuum eſt funeſtor. & funeſtata domus dicitur, quæ aliquo funere affecta eſt. Plautus. paternam funeſtati domum. funeſtare etiam quandoq; pro cruentare accipitur, & funeſtum pro mortifero, et cruento. Seneca, uox illa funeſta reipublicæ, hoc eſt cruenta, mortifera. Fungor quoq; nonnulli quaſi funus ago dictum exiſtimant, proprie enim fungi finire eſt, unde uita functus dicitur, qui finiuit uitam, hoc eſt mortem obijt. cuius ſignificationis & ab hoc compoſitum eſt defunctus, Virgilius. O tandem magnis pelagi defunctæ periclis, hoc eſt qui finiſti, et euaſiſti pericula. Titus Liuius. Defuncta morbis corpora ſalubriora eſſe incipere, hoc eſt, corpora, quæ finierunt, & euaſerunt morbos. Legitur & defunctus per ſe, hoc eſt mortuus, & defunctus morte, hoc eſt qui mortem obijt. Accipimus tamen frequenter fungor pro eo, qđ eſt officium, ac munus ago. ut fungor magiſtratu. fungor præturæ. fungor legatione. fungor officio mihi delegato. fungor munere iudicis, & ſimilia. Fungum etiam, ſunt, qui à funere agendo uocitatum exiſtiment, quod periculoſiſſimum ſit ueſcentibus, tum præſertim, cum uel caligaris clauus, uel calybis rubigo, aut panni aliquis marcor aſſuerit, aut ſi ſerpens primo pateſcentem adhalauerit. Hic uiſus eſt totas aliquando familias perimere. Sic extinctum tradunt Anneum Serenum præfectum Neronis uigilum, & Tribunos, ac Centuriones quoſq;, qui cum eo in conuiuio fuere, ut mirum ſit tantam ancipitis cibi eſſe uoluptatem. Plura autem fungorum genera memorantur. In primis Boletus, ob id maxime toto orbe notiſſimus, quod eo extinctus eſt Tiberius Claudius, dato in eo ueneno à coniuge Agrippina (ut quidam uolunt) quod eius cibi auidiſſimus eſſet, ut alij ab Aloto ſpadone prægustatore, dum in arce epularetur cum ſacerdotibus, iuſſu eiuſdem Agrippinæ, conſilio Locuſtæ maleficæ, auxilio Xenophontis medici. Plynius. optimus quidem cibus eſt Boletus, ſed immenſo exemplo in crimen adductus, ueneno Claudio principi per hanc occaſionem à coniuge dato Agrippina. Quo facto, illa terris uenenum alterum, ſibiq; ante omneis Neronem ſuum dedit. Optimus hic eſſe inter fungos à ueteribus putabatur. Iuuenalis, Vilibus ancipites fungi ponentur amicis, Boletus domino, ſed qualem Claudius edit, ante illum uxoris, poſt quem nil amplius edit. Martialis. Dic mihi quis furor eſt turba ſpectante uocata Solus Boletos Cæciliane uoras. Quid dignum tanto, uentriq; gulæq; precabor. Boletum, qualem Claudius edit, edas. Hic ita naſcitur, uolua prius in terra gignitur, ipſe poſtea in uolua, ceu in ouo luteum, & tunicæ eius in cibo par gratia, dum infans eſt Boletus, rumpitur illa hoc naſcente, mox in pediculo totum corpus abſumitur. oritur, occiditq; intra ſeptimum diem. Cæteris fungis lentior natura. origo ferè omnibus ex pituita arborum. tutiſſimi olim exiſtimati ſunt Rufi, & minus diluto rubore, quàm Boleti. proximi qui candidi ſunt, & in pediculo uelut apicem flaminis habent. Poſt hos qui in inferiori, & concaua parte Rufeſcunt, ſuperiori parte candorem habentes, uulgo, quod in pratis naſcantur, pratenſes appellati. ſequuntur deinde ſuilli, genus uenenis accommodatiſſimum, & qui tota ſæpe conuiuia interemerunt. Tutiores aridi. in pleriſq; enim Italiæ partibus ſiccantur. Sunt præterea, & ab oui figura, ouati dicti, & à ſpongiæ ſimilitudine, ſpongioli, & à digitis, digitelli, & à porrigine, porriginoſi, &

qui ſine pediculo naſcuntur, quaſi tuberibus ſimiles, niſi quod ſunt candidiſſimi, peʒicæ. multarum præterea arborum fungi ſunt, non ita pernitioſi, præſertim qui fiunt ex fico. ferula. fago. robore. cupreſſo. ſambuco. caſtanea in primis præſtanteis gignit, & omnium maximos, ut fungus unus pluribus ſufficiat conuiuis, lacinias uocant, quod lacinioſi ſint, & uiſu quoq; uoluptatem afferant. Sed omnes odore ſimul ac ſapore, & innocentia ſuperant, qui è ſpinarum radicibus uere naſcuntur, ſpineoli propterea, à pleriſq; etiam pruneoli uocitati, ignoti prorſus ueteribus, quod certe inter tot gulæ irritamenta mirandum eſt. Commendantur etiam qui ex cardorum radicibus autumno naſcuntur, Cardeoli ex argumento nominati, ipſi quoq; inter primos innocui. Tutiores putant fieri quoſcunq; fungos, ſi cum carne coquantur, aut cum pediculo piri. Item ſi pira confeſtim ſumantur, uel ſi coquantur in aceto. Eſt et aliud mirabile fungi genus, quod ex lapide naſcitur, quem lyncæum uocant. Eſt inter animalia ex luporum ceruariorum genere, quod Lynx uocatur, maculoſo tergore, de quo Virgilius. Et maculoſæ tegmine lyncis, huius animalis urinam coire in duriciem calculi manifeſtum eſt, quod lynx præſentiens inuidia humani generis, ne ea egeries in noſtrum tranſeat uſum, egeſtum liquorem ſtatim arenarū tumulis contegit. Inuentus hic lapis, ſub terra, quaſi planta occulitur. In ſiccitate aqua rigatur. naſcuntur ex eo fungi paulatim creſcentes plures ſimul, et in cibo ſapidiſſimi, et dolori renum, ac frangendo, educendoq; calculo mirifice utiles. Dum fungi ſcinduntur, pars pediculi, quæ fixa in lapide remanet, ſpatio temporis lapideſcit. Sic augetur continue lapis, et plures quotannis fungos germinat. Ignorauerunt hoc ueteres. & tantum gigni ex lyncis urina lapillum quendam ſcripſere utilem dolori renum, quē lyncurium uocant. Theophraſtus lapidem hunc ſuccino ſimilē eſſe colore, & appropinquantia ſimiliter attrahere magno errore affirmat. Agaricon quoq; fungus eſt in arboribus naſcens circa Boſphorū, colore candido, & in Gallia, ſed quod in Gallia naſcitur, infirmius habetur. Sunt etiam quarundam arborum fungi magnitudine, duritia, et æqualitate quadā inſignes, quibus pro ſtrigilibus utuntur præſertim, qui caluam crinibus nudā gerunt. item alij, quibus utuntur aridis pro fomitibus, ignem in ijs uel attritu lignorum, uel excuſſu lapidum, quos ob id ignarios uocant, concipientes. in lucernis quoq;, atq; candelis oriri ſæpenumero fungos cernimus, quos futuri imbris indices eſſe commemorant. Virgilius. Nec nocturna quidem carpentes penſa puellæ. Neſciuere hyemem, teſta cum ardente uiderent Scintillare oleum, et putres concreſcere fungos. Item fungi ſæpe in ano naſcuntur, hoc eſt ulcera quædā quamſimillima fungis, humida ſemper, & odore admodum fœdo, quæ ſi hyems ſit gelida, ſi aliud tempus, frigida aqua fouentur, deinde ſquama æris cum fuligine, & calce inſpergitur, & ſi hac ratione non tolluntur, ſcinduntur prius, deinde candenti ferro aduruntur. À fungo fit fungoſus adiectiuum, quemadmodum à ſpongia ſpongioſus, ſignificatq; rarum, & leuem ad ſimilitudinem fungi. Plynius. Eſt calamus craſſiore, longo, & tenui foramine, hunc totum fungoſa replet medulla. ab hoc Fungoſitas dicitur. idem, tota fungoſitas deraſa. REDDITA ROMA SIBI EST. Reſtituta eſt Roma in libertatem, nam quæ prius Neroni ſubiecta erat, te præſide ſua facta ē, hoc eſt libera, nec alteri parens, quā ſibi. ROMA. Roma urbs Italiæ regna urbium, totius mundi caput. hæc paruum ab initio oppidum fuit. à iuuentute latina Valentia appellatum, quod cum Euander ad ea ueniens loca extendiſſet, ſeruata impoſiti prius nominis ſignificatione, Romam nuncupauit, ſiquidem græci ῥώμην robur appellant. Alij uolunt Tro-

a captæ quoſdam ex Achiuis in ea loca, ubi nūc Roma eſt deueniſſe per Tyberim, deinde ſuadente nobiliſſima captiuarum, cui Rome nomen erat, incenſis nauibus poſuiſſe ſedes, & ſtructo oppido, Romam ab ea uocaſſe. Nōnulli tradunt Romem non captiuam fuiſſe, ſed Aſcanio natam. Aeneæ neptem, hanc appellationis cauſam extitiſſe. Sunt qui à Romulo conditore uocitatam Romam exiſtimant, ideo autem Romam potius, quàm Romulam appellari hunc uoluiſſe, ut ampliori uocabulo proſperiora patriæ ſuæ ominaretur. fuit & aliud huic urbi latinum nomen, ſed exprimere id arcanis cerimoniarum nefas habitum eſt. Quapropter cum Valerius Soranus contra interdictum id eloqui auſus fuiſſet, mox peremptus dedit pœnas. Cauſam autem, cur & urbis, & eius dei in cuius tutela urbs erat, ignorari nomen Romani uoluerunt, hanc tradunt. quod ipſi arcanum hunc morem habebant, ut cum obſiderent urbem aliquam hoſtium, iamq; ipſam capi poſſe confiderent, certo carmine euocarent tutelares deos, uel quod aliter capi urbem poſſe nō crederent, uel quod, ſi poſſet, nefas, exiſtimarent deos habere captiuos. Ideo igitur occulta eſſe & deorum, & urbis nomina uoluere, ne quod ipſi faciebant, ab alijs paterentur. Carmen autem, quo ipſi utebantur, erat huiuſmodi. Si Deus, ſi dea eſt, cui populus, ciuitasq; Carthaginenſis eſt in tutela, teq; maxime ille, qui huius urbis, populiq; tutelā recepiſti, precor, uenerorq;, ueniamq; à uobis peto, ut uos populum, ciuitatemq; Carthaginenſem deſeratis. loca. templa. ſacra, urbemq; eorum relinquatis. abſq; his abeatis, eiq;, populoq;, & ciuitati metum, formidinem iniiciatis, proditiq; Romam ad me, meoſq; ueniatis, noſtraq; uobis loca. templa. ſacra. urbs acceptior, probatiorq; ſit. mihi quoq;, populoq; Romano, militibusq; meis præpoſiti ſitis, ut ſciamus, intelligamusq;, ſi ita feceritis, uoueo uobis templa, ludoſq; facturum. Tutelarem Romanorum alij Iouem eſſe crediderunt alij lunam, alij opem conſiuiam. alij Angeronam, cui ſacrificatur ad xij. Calen. Ianuarij, cuius ſimulachrum ob hoc maxime ſilentium, obligato, obſignatoq; ore fingebatur. Huius urbis ambitum diuerſis temporibus uarium fuiſſe authores prodiderunt. ſcribit Plynius diui Veſpaſiani temporibus millia paſſuum tredecim, & ducentos urbis ambitum fuiſſe. Flauius autem Vopiſcus tradit Aurelium imperatorem ambitum urbis, ad triginta millia paſſuum ampliaſſe. Romulus autem à Romula arbore appellatus eſt, ſub qua Romulus, & Remus pueri inuenti ſunt, quemadmodum ſuperius oſtendimus. Alij utrunq; à robore, hoc eſt ἀπὸ τῆς ῥώμης appellatos uolunt. A Romulo Romulia tribus dicta, quod ex eo agro cenſebatur, quem Romulus ex Veientibus ceperat. A Roma uero Romanus dicitur, qui & à Romulo appellatur Romulida. et Romulea urbs ab eodem Roma uocatur. Item Romulea aliquando pro Romana accipitur. Romana porta à Sabinis apud Romam appellata eſt, quod per eam proximus eis aditus eſſet.

REDDITA. Reſtituta. Proprie enim reddere eſt acceptum, uel ablatum reſtituere. Terentius. Siquis quid reddit, magna eſt habenda gratia. Interdum tamen Reddo pro do accipitur. Plautus, tibi ego rationem reddam. Virgilius. regnorum reddita ceſſit pars Heleno. Quintilianus. Si uerum eſt poſt innumerabiles annos reddi rurſus alias corporibus animas. rurſus reddi hoc eſt iterum dari. Hinc Celſus iuriſconſultus reddendi uerbum inquit, quanquam ſignificationem habet retrodandi, accipit tamen & per ſe dandi ſignificationem. Nam quod aliqui dicunt reddo literas idem eſſe, quod do literas, falſum eſt. etenim cum reddo literas dicimus, non do literas ſignificamus, ſed reſtituo. quoniam is, cui damus literas, quaſi reſtituere illi uidetur, ad quem damus. Reddo etiam uer-

bum ſacerdotale ē. Reddi enim exta dicebantur, cum probata, & electa aræ ſuperponebantur. Virgilius, Lancibus, & pandis fumantia reddimus exta. Aliquando reddo capitur pro repono. Plautus. Tempeſtas uenit, conſtringit tegulas, imbricesq;, ibi dominus indiligens reddere alias neuolt. A reddo redditus dicuntur, qui proprie ſunt prouentus agrorum, quamuis per translationem pro omni prouentu ponatur. Reddo à do uerbo declinatur. Dare proprie tribuere eſt. Virgilius, da propriam Timbræe domum. Aliquando pro exhibere ponitur. Terentius. nanq; ei unam cœnam, atq; eius comitibus dedi. Nonnunquam facere. Virgilius. tu das epulis accumbere diuûm. Interdum dicere. Idem. Sed tamen iſte deus qui ſit da Tityre nobis. Quādoq; aſcribere. Cicero. Ego quæ tu ſine Verre commiſiſti, Verri crimini daturus ſum. Sæpe etiam proſtituere. Martialis. Caſta igitur nulla eſt? caſtæ ſunt mille, quid ergo caſta facit? non dat, non tamen illa negat. Illud notandum, quod damus alicui literas tanquam tabellario per cū ad alium perferendas. damus ad aliquem, cum ad eum perferri uolumus. Aliquando utrūq; coniungitur. Salluſtius. Vulturtio literas ad Catilinam dat. is cui literæ dātur, ſi perfert, reddere literas dicitur, ut paulo ante oſtendimus. Is uero, ad quē dantur, accipere. Item dare poteſtatem plus eſt, quàm facere poteſtatem. Etenim facere poteſtatem, eſt aliquid permittere. Cicero. fecit ei poteſtatem legendi literas, quas à Trebatio acceperat, hoc eſt permiſit, ut legeret literas. Dare uero poteſtatem, eſt rem prorſus alterius arbitrio permittere. Plynius. Vt qui ſuarum omnium rerum poteſtatem auunculo dederat. Paulus iuriſconſultus cum quoq; dediſſe affirmat, qui aliquid compenſauit, aut permutauit. dare fidem non eſt credere, ut pleriq; indocti exiſtimant. Hoc enim habere fidem dicimus, hoc eſt credulitatem. Sed dare fidem eſt aliquid ſancte promittere. Terētius, grauidaq; facta fidem dat ſibi uxorem fore hanc. Virgilius. accipe, daq; fidem, hoc eſt accipe promiſſionem à me, & tu ſimiliter mihi ſancte promitte. Aliquando tamen Accipere fidem, eſt accipere credulitatem hoc eſt mereri, ut credatur. Martialis. Iunctam Paſiphaen dictæo credite Tauro Vidimus, accepit fabula priſca fidem. ſuperioris uero exemplum ponit Quintilianus. fidem habes hominibus, quos mentiri alius affirmat, id eſt credulitatē præſtas. Plynius. cur enim uerbis eius non ſit fides habenda. Ab aliquo uero habere fidem eſt habere promiſſionem alicuius rei fide firmatam. Terētius. ait, ſi fidem habeat, ſe iri præpoſitum tibi apud me. Si fidem habeat inquit, hoc eſt, ſi fidem accipiat à me, & ſi ei fidem dem, ac ſancte promittam. Alia quoq; à do compoſita fiunt addo. quod eſt adiicio adiungo. A quo ſuperaddo. Additus tamen apud ueteres capiebatur pro inimico. Virgilius. nec Teucris addita iuno Vſquam aberit, Circundo, cingo Salluſtius, circundatos militibus ſaltus mox occupauit. obdo, claudo, Terentius. Peſſulo hoſtium obdo. Perdo, amitto. Per enim præpoſitio, cum per ſe eſt, localem & temporalem ſignificationem habet, ut per medium forum. & per medium diem. & per fortitudinem adeptus eſt præmium, ubi fortitudo, quaſi locus præmij oſtenditur. Aliquando eſt iurandi, ut per Iouē, & per Pol, quod per pollucem ſignificat. interdum obteſtandi. Virgilius. Per te, per qui te talem genuere parentes. Idem, Per ego has lachrymas, dextramq; tuam te, Per connubia noſtra, per inceptos hymenæos. Nonnunquam medium quendam, & quaſi interceſſorem ſignificat, ut per amicos meos obtinui, per memetipſum feci, quaſi meipſo medio. In compoſitione uero aliquādo abnegat, ut pfidus, piurus, q fidē et iuſiurādū fregit. Aliquādo ſignificat in totū, & uſq; ad finē. Lactātius, nō inuiſte petere, ut ſiquis erit, qui inciderit in hæc, ſi legit perlegat,

hoc eſt, uſq; ad finem legat. Cicero, nuntius ille, qui literas accepit, non pertulit. Seneca, Leue eſt miſerias ferre, pferre eſt graue, hoc eſt aliquo tpe i miſerijs eſſe, leue eſt. ſed in his uſq; ad finem uitæ perſeuerare, eſt graue. Martia. Nam uigilare leue eſt, peruigilare graue. Hinc agere reum, eſt in aliquem inquirere, & accuſare. Peragere reum, eſt uſq; ad finem agere, hoc eſt condemnare. Quandoq; ſignificat per medium. unde Pellucidum dicimus, per cuius mediū fulgor emanat. Perſpicuum per cuius medium uidemus, ut aqua, glacies, cryſtallus. ſed pellucidum magis ad corporalia pertinet. Perſpicuum ad icorporalia. Plau. ita is pellucet, quaſi laterna pūica. Plyn. Tam claras, perſpicuaſq; ſententias. Hæc tamen apud authores confunduntur. plerunq; pro ualde accipitur, ut pergraue, permagnum. Cicero, pergraue mihi uiſum eſt. &, ſi addatur, quàm, ſignificat maxime, ut perquam bonus, id eſt optimus, perquam magnus, id eſt maximus. Eſt etiam quando per pro nimis uehementer accipitur, facitq; ſignificationē uocabuli penè à ſimplici ſuo diuerſam, et in malam partem accipitur, ut pertinax, nimis tenax, quod ſignificat durum, & inexorabilem, atq; obſtinatum. Pernix, qui nimium nititur. unde aliquādo accipitur pro celeri. Vir. talis & ipſe iubam ceruice effundit equina Coniugis aduentu pernix Saturnus. Aliquando nimis perſeuerans. Differtq; pernicitas à uelocitate, quod alterū ſit celeritatis, alterum patiētiſſimæ perſeuerantiæ. Idem, & inter dura iacet pernix inſtrato ſaxa cubili. Perfuga, q nimium fugit, hoc eſt qui ad hoſtes fugit. Peruerſus, qui nimis uerſatur in malo. Percitus nimis incitatus, qui ira, ac furore accenſus eſt. Perpeſſus, qui nimis, & cum labore, ac dolore paſſus eſt. Perdo ergo dictum, quaſi nimis do. Nam qui nimis dat, quicquid habebat amittit. Capitur etiam aliquando pdo pro perimo, quoniam quæ amittuntur, quaſi mortua nobis eſſe uidentur. Teren. dij te perdant. Ab hoc perditus dictus, qui interijt uitijs, & recuperari non poteſt, ſicut perdita res, quæ amiſſa ē. Idē, dij ueſtrā fidē hominē pditū, miſerumq;. Cicero, ſæuū crudelitate. perditum, luxuria, uitijs omnibus contaminatum. Veteres pro perdo perduo dixere, A quo perduaxo. Plau. Dij te, deæq; omnes perduaxint cum iſtoc homine. A perdo fit deperdo, unde Caius iuriſconſultus ſcribit deperditū dici, quod in natura rerum eſſe deſijt. Diminutum uero, quod uſu raptū eſt. Item à do componitur trado eiuſdem ferè cum ſuo ſimplici ſignificationis. Abdo, quod eſt recondo. Apuleius, atris abdita nubibus. Abditiuos ueteres abortiuos appellabant. Abdomē ſumē dicitur, quod abditum ſit. A poētis tamen aliquando pro larido ponitur, hoc ē pingui duro. Iuue. Montani quoq; uenter adeſt abdomine tardus. Item dedo, quod eſt imperpetuum do, & ita differt à do, quod proprie damus animo repetendi dedimus autem quæ in perpetuum damus, unde dedere ſe hoſtibus dicimus, qui ſeſe in hoſtium poteſtatē tradūt, & traditio ipſa, deditio dicitur, & qui ſe ita tradunt, uocantur dedititij. Aliquando tamen dedo accipitur pro do. Teren. Verberibus te cæſum in piſtrinum Daue dedam. & dedita opera dicimus pro eo, qđ eſt data opera, hoc eſt de induſtria. Pompeius Feſtus, deditum interpretatur ualde datū. Item Antidoſis, quod proprie ſignificat quicquid alicui ex aduerſo datur. Nam ἀντὶ græca præpoſitio in compoſitione, pro, uel contra ſignificat, unde Antictones dicti, & Antilogia, quaſi contraria oratio, & Antiphraſis, quod ſit ſenſus ſermoni contrarius, ut cum bellum dicimus, quia minime bonum et Antiptoſis, quando caſus ponitur pro caſu. & Antitheſis, quod nonnulli obiectum interpretati ſunt, et Antitheton contra ſe poſitum, & Antonomaſia, quando nomen pro nomine ponitur, ut Maia genitus, pro Mercurius. Antidoſis ergo, quod con-

tra aliquid datum eſt. ſed hoc à græco potius, hoc eſt à δῶσι deriuatum uideri poteſt. de quo paulopoſt dicemus. Item ædo cum primam ſyllabam producit, quod eſt emitto, quaſi extra do. Vnde ædere libros dicimus, ædere opus publicum, à quo æditio, hoc eſt publicatio. Aliquando tamen authores edo uſurpant pro produco, & pario. Vir. Nec noſtri generis puerum, nec ſanguinis ædunt. Ab hoc ædita loca, uocantur alta, & ſeſe ædentia, hoc eſt oſtendētia, ſcribiturq; cū diphthongo ad differentiam alterius edo, quod eſt comedo dictum à græco ἔδω, quod eſt uescor, huius ſupinum eſt eſum, à quo eſito frequentatiuum. Gellius, uidetur autē de Cyamo non ceſſato cauſa erroris fuiſſe. & eſurio, quod eſt cupio edere. Quintil. Pater filios eſurit. Martianus. Eſurit magis, quo magis eſt domi. Hinc eſuries edendi auiditas appellatur, & minus eſt, q̄ fames, quæ ex defectu annonæ prouenit. Plyn. iuſtum Nili incrementum eſt cubitorū ſexdecim. in duodecim cubitis prouincia famem ſentit. In tredecim etiamnum eſurit. quatuordecim cubita hilaritatem afferunt. quindecim ſecuritatem, ſexdecim delitias. Ecce quomodo famē ex ſumma ſterilitate oſtendit prouenire, quæ ex inedia ſequitur. ex mediocri uero ſterilitate eſuriē, quæ oritur ex parcitate, quæ & eſuritio dicitur. Martia. illam, quam facit eſuritionem. et eſurigo. Varro, quodlibet ire licet accubitum acredo, quod eſurigo fieret, edebat coſtas. Verba in rio deſyderium quoddam ſignificare uidentur, ut parturio cupio parere. Cœnaturio cupio cœnare. Cice. ut aliquando dolor Populi Romani pariat, quod iam diu parturit. Martialis, in omnibus Vacerra, quod conclauibus conſumit horas, & die tota ſedet, cœnaturit Vacerra, non cacaturit. Aliquando tamen huiuſmodi uerba à ſuis primitiuis non differunt, ut Scaturio, idem eſt, quod ſcateo, & non modo de aquis dicitur, ſed etiā de herbis, cæteriſq; ſua ſponte ubertim naſcentibus, quamuis ſcatebra, & ſcaturitio, & ſcaturies, tantum dicatur, ſitq; ebullitio aquæ ſurgentis, unde etiam uaſa æſtuantia ſcaturire dicuntur. Scaturies etiam modus matulæ eſt, ut Varro teſtatur. ab eodem edo Adedo deducatur, quod ſignificat cōſumo. Virgilius. Nam ſæpe fauos ignotus adedit ſtellio. nam edo quoq; pro conſumo accipitur. Et adeſt conſumptū dicimus. Item edacitas, quod ſignificat ingluuiem, edax pro manducone, hoc eſt uorace. & conſumptore. huiuſmodi enim homines à ueteribus manducones, & manduci, à manducādo, & à mandendo mandones, qui & manſutij, hoc eſt edaces, à ueteribus dicebantur. Manduci effigies in pompa antiquorum inter cæteras ridiculas, & formidoloſas imagines ire ſolebat, magnis malis, ac late dehiſcens. & ingentem dentibus ſonitum faciens. Plautus, quid ſi ad ludos me pro manduco locem. edones quoque ab edendo uocantur, ſicut ἀπὸ τοῦ φάγω, quod eſt edo, dicuntur Phagones, utroq; utitur Plautus. Item ab edo ador, quaſi edor, farri genus, edor quondam appellatum, de quo inferius dicemus. Item peredo uehementer edo, à quo fit peredia ipſa comeſatio, ſicut bibeſia ipſa bibitio, prādium, quaſi peredium, de quo inferius dicemus, quibus frequēter utitur Plautus. Item exedo, quod eſt conſumo. Item obedo, quod ſimiliter modo pro conſumo accipitur. unde Obeſum dicitur gracile, exile. Neuius, corpore, pectoreq; undiq; obeſo, ac merito exeſo, tardi igenio ſenis. modo pro comedo, à quo Obeſum pro uberi, & craſſo accipimus. Virgilius, Argutumq; caput, breuis aluus, obeſaq; terga. Cato, Eduſam et Pontinā uocauit deas præſides puerorū. has n. nutrices iuocare ſolebāt, cū pueri lac dimittere icipiebāt. Itē comedo eiuſdē cū ſuo ſimplici ſignificatiōis. In quo notādū, qđ ueteres comeſt pro comedit, et comedim pro comedā ſcripſere. Varro, nā in humanis oīa ſunt paria. Quippe te maior plus urget. piſces ut ſæpe mi-

nutos magnus comeſt, ut aueis enecat accipiter. Lucil. cum manducatur totum complexa, comeſtq́; Cicero, Sed ad extremum pollicetur prolaturum ſe, quæ ipſe comeſt. Idem, cura, ſi me amas, ut ualeas, ne ego iacente te, tua bona comedim. ſtatui enim tibi ne ægroto quidem parcere. Pomponius, Ego quæro quod edim, has quærere cui paratt certum eſt. Item comeſatio à uicis, quos græci κώμας uocant, & eſum ſupino. Veteres olim in uicis habitantes, prius quàm oppida conderentur, alij alios conuictus gratia inuitabant. Nec recte Seruius comeſationem à comeſſe infinitiuo deriuatum exiſtimauit, nec recte interpretatus eſt comeſationem conuiuium eſſe factum cum luxu. Licet enim aliquando uſurpetur comeſatio pro cibo quacunq; hora extraordinarie ſumpto, interdum etiam pro crapula. proprie tamen comeſatio eſt cibus, qui poſt cœnam ſumitur, ſicut merenda cibus, qui ſumitur ante cœnam. & ientaculum cibus, qui ſumitur ante prandium. Sueto. Sed præcipue luxuriæ, ſæuitiæq; deditus, epulas trifariã ſemper, interdum quadrifariam diſpartiebat in ientacula, & prandia. & cœnas, comeſationesq́;, facile omnibus ſufficiens uomitandi conſuetudine. idem, conuiuabatur frequẽter et large, ſed penè raptim. Cœnæ uero ultra ſolis occaſum, nec ut poſtea comeſaretur. Ientaculum cibus eſt matutinus, qui ſumi ſolet ante, quàm homines opera aggrediantur, quidam Prandiolum, ſiue prandiculum, quaſi paruum prandium uocant, fitq́; à iento uerbo. Afra. Dicimus autem & in quarta coniugatione, cio cis. à quo accire deducitur, hoc eſt aduocare. ab hoc uero accerſire eiuſdem ſignificationis, & Deaccire idem, quod accire. A` cio cito fit, quod proprie eſt uoco. Cicero, citat eum, non reſpondet, citat accuſatorem. Idem, citetur Salamis clariſſimæ teſtis uictoriæ, hoc eſt uocentur Salaminij, ut teſtimonium uictoriæ perhibeant. per metaphoram tamen ponitur pro incito. prouoco. commoueo. Idem, quorum ſtudium legendo, non ſcribendo uehementius in dies citat. ab hoc citatio deriuatur notæ ſignificationis. Et uerbum oſcito, quaſi cito, hoc eſt commoueo os. Vnde oſcitatio oris extenſio dicitur, & uitium eius, qui frequenti oſcitatione tenetur. oſcedo, quod cum toto corpore fit, pandiculatio dicitur. & qui toto corpore extenditur, dicitur pandiculari. Item citus, hoc eſt celer quaſi citatus, nam qui uocati ſunt celerius uenire conſueuerunt, & citatus quoque pro celer uſurpatur. Apule. citato non teſtudineo greſſu. Salluſtius. modo citus, modo tardus ingreſſus. Ab hoc fit comparatiuum citior, & ſuperlatiuum citiſſimus. Plautus, nullam ego rem citiorem apud homines eſſe, quã famam reor. Afranius. Citior abijt ancilla, citiſſima omnium redijt. Item cito aduerbium, à quo citius, & citiſſime. Item à cito alia quoque compoſita fiunt, recito quod ſignificat repeto. Martialis, Fama refert noſtros te Fidentine libellos, Nõ aliter populo, quàm recitare tuos. Excito quod proprie ſignificat expergefacio. Ponitur tamen pro ſolicito. Seneca, ut otioſum excitarem. ab hoc excitatio. excitamen. excitabulum. excitamentum. excitator. excitabundus deriuantur. Incito, prouoco. irrito. incẽdo. A` quo incitatio. incitamen incitabulum. incitamentum. pro eo, quod incitatur. Au. Gellius, fomes, atq; incitabulum uirtutis. Item incitator, atq; incitabundus pro eo qui incitat. ſuſcito, interdum excito, interdum uiuifico. Seneca. Nec eam ſanare languentem uiſus eſt, quàm mortuum ſuſcitare. Ab hoc fit ſuſcitabulum, quod pro incitamento accipitur. Varro, ſymphonia uocis ſuſcitabulum. concito. commoueo, ad iram prouoco. à quo cõcitatus iratus dicitur. Gellius, erat enim aliquanto concitatior. percito, quod meminerim, non legi. inuenitur Percitus, hoc eſt commotus, concitatus. ſolicitus quoq; à cito componitur, quaſi ſolo citatus, hoc eſt permotus, quemadmodum inferius dicemus. Præterea à cio concio dicitur, quod modo eſt perturbo, commoueo. Afranius, Dij ſunt irati tibi, qui conciere cogites tantũ mali. Accius, niſi quaſi terreſtris pontus ſtrages conciet. modo conuoco, à quo concionem uocamus multitudinem populi congregatam ad audiendum aliquem orantem pro utilitate communi. propter quod & locus ipſe concio appellatur, et ipſa oratio. et is qui orat, dicitur concionari. Item à concio, concilium, multitudo populi conſulendi gratia congregata. à quo conciliabulum locus in quo concilium congregatur, & concilio uerbum, quod eſt comparo, contraho. capiturq; in bonam & in malam partem. Nam & concilio mihi amorem alicuius, ac beneuolentiam

dicimus & concilio odium, concilio inimicitias, hoc eſt emo, cõparo. Hinc conciliatus pro empto accipitur. Terẽtius, prodi male conciliate, hoc eſt magno pretio emptæ, et conciliatio pro cõuentione uſurpatur. Plau. Extat conciliatio, ſeruanda promiſſa. Quando autem non cum re ſed cum deo ſiue homine iungitur concilio, ſignificat placo, & amicum facio. Virgilius, tu ſceptra, Iouemq; concilias. A` quo cõciliatrix dicitur, mulier, quæ uiris comparat & conuenire facit uxores, & uxoribus uiros. & conciliabundus, qui conciliat. & reconciliare eſt in gratiã reſtituere, quoties ſcilicet amici, qui interpoſita aliqua offenſa aliquandiu fuerint inimici, in priſtinam redeũt beneuolentiã, ac familiaritatem. à quo reconciliatio dicta. Dicimus præterea concilio mihi laudem, famam, & honorem, & ſimiliter reconcilio, hoc eſt comparo, & acquiro. Quintilianus, nam & plus authoritatis afferunt ea, quæ non præſentis gratia litis ſunt comparata, & laudem ſæpe maiorem, quàm ſi noſtra ſint, reconciliant. Cis autem à quo cieo deduci diximus, licet proprie citra ſignificet, aliquando tamen pro ultra ponitur. Salluſtius, cis Rhenum atque inter mare noſtrũ, & Oceanum. à quo citimus dicitur extremus, & citima uocantur, quæ cœlo proxima ſunt. Cicero. Quibus erat ea minima, quæ ultima cœlo, citima terris luce lucebat aliena. Et citra, quod præter notam ſignificationem ponitur aliquando pro ſine. Vt cum dicimus plus uſus ſine doctrina, quàm citra uſum doctrina ualet. & ciſterna, de qua inferius dicemus. Ciſſium uehiculi birotigenus eſt. Cicero, in quadam caupona ſe occultans per potum ciſſio domum uenit. Ciſſeus rex Thraciæ fuit pater Hecubæ uxoris Priami, à quo Ciſſeis patronimicum fœmininum. Citeria appellabatur effigies quædam arguta, & loquax ridiculi gratia, quæ in pompa uehi Romæ ſolebat. Varro reciprocum à recipiendo deriuatum ſcribit, & id eſſe, quod aliunde profectum redit eò, unde profectum eſt. Accius, reciproca tendens neruo equino concita tela. Hinc reciprocatio dicitur retrogradatio ſiue circumactio. Plynius, ſolertiam caprarum Mutianus uiſam ſibi ſcribit in ponte prætenui duabus obuijs è diuerſo, cum circumactum anguſtiæ non caperent, nec reciprocationem longitudo in exilitate cæca, torrente rapido minaciter ſubterfluente, alteram decubuiſſe, atque ita alteram proculcatæ ſupergreſſam. Hinc reciprocari eſt retrogredi, ita ut non uertaris. & reciprocum argumentum dicimus, quod græci uocant Antiſtrephon, in quo quicquid conſtituitur uerum, eſſe falſum reperitur, & quod in aduerſarium dicitur, reflectitur in dicentem. Dialectici quod ſenſum in diuerſa trahat, tractum appellant, quale eſt illud. Viro forti præmium, quod optauerit, detur. Qui fortiter fecerat, uxorem alterius in matrimonium petijt, & accepit, is deinde cuius uxor fuerat fortiter fecit, repetit eam, contradicitur. Secundus qui fortiter fecit. Si placet lex (inquit) redde, Si non placet redde. alter ſi placet lex, non reddo, quia ſecundum legem mea eſt, ſi non placet, non reddo. quia repetere eam non potes ex lege quam improbas. Tale eſt apud Africanum iuriſconſultum, qui quadringenta (inquit) habebat, trecenta legauit. deinde fundum tibi dignum centum aureis ſub hac conditione, ſi legi falcidiæ in teſtamento ſuo locus non eſſet, quicquid hic conſtitueris uerum eſſe, falſum reperietur. Nam ſi legatum tibi datum ualere dicamus, legi falcidiæ locus non erit. Ideoq; deficiente conditione non debebitur. Rurſus ſi legatum non ualet, legi falcidiæ locus non erit, & ſic legatum tibi debebitur. Hoc quidam tractum uocitauere. icirco igitur ſui, & deriuatiuum eius ſuus dicta ſunt reciproca, quod ſicut reciprocatur ſpiritus cum recipitur, & unda uiciſſim alluens litus. Et euripus

ad priſtinum ſubinde curſum rediens reciprocus eſt, ita hæc pronomina, ad id unde prodierant reuertuntur, quod græci ἰδιοπαθῆ, & ἰδιοπάθειαν. uocant. Neq; enim dicere fas eſt. Ego dixi ſibi. Non eſt ſibi curæ res publica. Tu fuiſti ſecum (ut uulgus indoctorum loquitur) quia nulla in ijs reciprocatio eſt. Ideo ita dicendum, ego dixi ei. Non eſt ei cura res publica. Tu fuiſti cum eo. ſimili modo non eſt fas dicere, uidi Ciceronem et fratrem ſuum. Sed uidi Ciceronem & fratrem eius. E contrario uero barbare dicitur in ſacris literis, Oĩa a te expectãt, ut des illis cibum in tempore, ubi proculdubio reciprocatio eſt, ideoq; non illis, ſed ſibi eſt ſcribendum. Sicut enim recte dicimus. Omnes expectamus, ut det nobis eſcam in tempore, omnes expectatis, ut det nobis eſcam in tempore, ita dicendum eſt, omnes expectant, ut det ſibi eſcam in tempore. item parum latine tranſlatum eſt. A` gloria eorum repulſi ſunt, pro à gloria ſua, & perierunt propter iniquitatem eorum, pro ſuam. Recte ergo Poeta inquit. Reddita Roma ſibi eſt. Nam ſi ſcriberetur, reddita ei, de altero intelligeretur, ut puta reddita Neroni, aut cuipiã alteri. etenim ſi ita dicamus. Dum Cicero cum Trebatio loqueretur, pluribus uerbis negligentiam eius accuſauit. Profecto Trebatij negligentiam à Cicerone accuſatam intelligimus. Si uero negligentiam ſuam dicamus Ciceronem, ſignificamus negligentiam propriam, dũ cum Trebatio loqueretur, accuſaſſe. Eſt tamen quando indifferenter & ſe pro ipſum, pro ut ad illius, de quo loquimur, uel ad noſtram perſonam ſermonem referemus, in quorum altero reciprocatio eſt, alter nullam habet reciprocationem. Verbi cauſa, omnes optant, quod ſibi utile eſt, & omnes optant, quod ipſis utile eſt, illud ad perſonam eius, de quo loquimur refertur, & manifeſtam habet reciprocationem. Hoc ad perſonam noſtram, ideoq; nulla eſt in eo reciprocatio. Cicero. multi dubitabant, quid optimum eſſet, multi quid ſibi expediret. Idem legatus in pace prefectus in prouincia pacatiſſima ita ſe geſſit, ut ei pacem eſſe expediret. Idem, qui erranti comiter monſtrat uiam, quaſi de ſuo lumine lumen accendit, facit, ut nihilo minus ipſi luceat cũ illi accenderit. Hic notandũ eſt, quod aliquando pro ſui ſiue ſuus, ponitur, is aut ipſe aut ille duntaxat ad uitandam amphibologiã, hoc eſt ſermonis ambiguitatem. Cicero in Bruto ſic ſcribit. is ſoceri inſtituto, quem quia cooptatus in augurum collegium non erat, non admodum diligebat, præſertim cum ille. Q. Scæuolam ſibi minorem natu generum prætuliſſet. Notat hunc locũ Quintilianus, & id ſibi tam ad ſocerum, quàm ad Fannium referri poſſe teſtatur. Quod ſi dixiſſet ei, de Fannio, utiq; locutus intelligeretur. Item notandum, qđ ſuus aliquando pro proprius accipitur. Perſius, Velle ſuũ cuiq; eſt, nec uoto uiuitur uno, Catullus, ſuus cuiq; innatus eſt error. Et interdum huic pronomini additur ſibi, nulla neceſſitate, ſed ueluti cuiuſdam feſtiuitatis gratia. Terentius, ſuo ſibi hunc gladio iugulo. Cice. ſuo ſibi uiſtitant ſucco. Columella, ſuo ſibi iure abluuntur, utimur etiam frequenter hoc dicendi modo. Suus eſt illius mos. Sua eſt iſtius natura. Suus eſt Ariſtotelis modus. Suum Platonis genus, ſua diſcentis diligentia, ſua docentis. Nec illud contemnendum eſt. Hoc pronomen ſuus non carere uocatiuo. Nam quod in ſacris literis legitur. Laudate dominum omnes angeli eius, profecto angeli ſui legendum eſt, qui eſt uocatiui caſus. Præterea qs neget ita dici eleganter poſſe Defendite. adiuuate. protegite Cæſarem uita periclitantem o' amici ſui. ó milites ſui. o' ciues ſui. Mouere me aliquando ſolet, quod Virgilius ſcripſit, Viuite felices, quibus eſt fortuna peracta Iam ſua, ubi proculdubio nõ ſua, ſed ueſtra dicendum erat, nec mihi abſimile ueri uidetur, emendaturum hunc locum poetam omnium maximum fuiſſe, ſi opus perfeciſſet. Nã qđ alibi ait. Quiſq; ſuos patimur ma-

nes, non refertur id ſuos ad primam perſonam, quia ſic reſoluenda oratio eſt. Nos patimur manes, ſed quiſq; noſtrum ſuos. Præterea illud quoq; ſciendum, quod hæc tria pronomina, ego. tu. ſui. binos genitiuos ſortita ſunt, mei. tui. ſui. & mis. tis. ſis. Sed alteri hoc eſt mis. tis. ſis. actiue capiebantur, in quorum locum ſucceſſere meus. tuus. ſuus. quæ poſſeſſiua pronomina uocitantur, Ennius, ingens cura mis concordibus æquiparare, mis pro meis poſuit. non pro mei. At mei, tui. ſui, nunquã niſi paſſiue accipiuntur, Quintilianus, & quod inter iſta difficillimum fuit, amore mei uicit etiam matrem ſuam. Cicero, qđ deſyderiũ tui ferre nõ poſſet. Virgilius, Quiq; ſui memores alios fecere merendo. Terentius, hoc unum ſcio hanc meritam, ut memor eſſes ſui. Non ſignificatur hic amor meus, quẽ in alterũ habeo, ſed quem alter erga me habet. Item non deſyderiũ tuum ſed alterius de te, & non memoria ſua, ſed de ſe. Similiter in plurali duorum, nam ſui uocem genitiui pluralis, ac ſingularis non uariat, noſtrum & ueſtrum, reſpõdent ad illa mis, & tis, ut nemo noſtrum. nemo ueſtrum. non autem nemo noſtri. nemo ueſtri. Veteres certe maiores noſtrum, pro maiores noſtri ſcripſere. Vnde importuniſſime feciſſe Au. Gellius ſcripſit, qui in pleriſque Saluſtij exemplarijs ſcripturam iſtam ſynceriſſimam corruperunt. Nam cum in Catilinario ſcriptũ foret. Sæpe maiores noſtrum miſerti plebis Romanæ. Noſtrum aboleuerunt, & noſtri ſcripſerunt. Rurſus habete curam noſtri, ſicut habemus curam ueſtri, non autem noſtrum, & ueſtrum. quia hæc reſpondent ad illa mei. tui. aliquando tamen hæc confunduntur, ſed perraro, ut cauſa mea, & cauſa mei, et apud Terentium, ut apparet deſyderio id fieri tuo, uidelicet quo tu deſyderaris, non quo deſyderas. Proprie autem memoria mea actiue accipitur, qđ ſcilicet ego recordor. memoria mei paſſiue, quod alij de me recordantur. Dolor meus, quo ſolicitor. dolor mei, quo alij ſolicitantur, copia mea, quã ego poſſideo, copia mei, qua poſſideor. Vt meretrix faciat omnibus copiã ſui, non ſuam, poteſtas mea quam habeo, poteſtas mei qua habeor. Vtilitas mea, quam ſuſcipio, utilitas mei quam ſuſcipit alius, hoc eſt, quæ à me ſuſcipitur. Quintilianus, ſed ut aliqđ præſtaret patriæ utilitatis mei, ideſt de me. Sic faſtidium meum, quo ego alios faſtidio, faſtidiũ mei, quo ab alijs faſtidior. Idem, ſeu mulier omnibus expoſita mortalibus uanitatẽ faſtidio mei, deſpectuq; captauit. Sunt tamen quædam ancipitem habentia ſignificationem, ſed quæ facile diſcerni poſſit, ut cum dico. Hæc eſt pars mea, non de parte corporis intellige, ſed hæreditatis. & rurſus, hæc eſt pars mei, non de hæreditate, ſed de corpore. Manus pars mei eſt, non mea, fundus pars mea, non pars mei. Nam, quod Cice. inquit, ex quo uereor nihil ſim tui, niſi ſupploſionem pedum imitatus, hic tui de tuo ſignificat, non de te, eſtq; à tuũ in genere neutrali, non à tu pronomine primitiuo. Adeo autem dare actiuam ſignificationem his tribus genitiuis mei. tui. ſui refugerunt authores linguæ latinæ, ut eos mutauerint in aliam uocem, genitiuis aliarum dictionum, cum quibus coniunguntur, minime mutatis. Cice. dico mea unius opera rempublicam eſſe liberatam. Idem, ſolius enim meum peccatum corrigi non poteſt. Idem, ex tuo ipſius animo coniecturam ceperis. Non dixit, quia non licuit, mei unius opera mei ſolius peccatum. tuipſius animus. & in plurali Quintilianus, deinde cum ſatis uires eorum explorauerint, ſuæ ipſorum fiduciæ permittunt. non dixit ſui ipſorum fiduciæ. Noſtræ quoque religionis homines, qui ſacras literas interpretati ſunt, hoc diligentiſſime obſeruarunt. Domine exaudi uocem meam clamantis ad te. & alibi. Domine memorabor iuſtitiæ tuæ ſolius. Item alibi. Suſtulit de latere meo ancillæ tuæ dormientis, & tuam ipſius animam

pertranſibit gladius. Nec alia cauſa Teren. ita ſcripſit. Saluus ſum meo præſidio, atq; hoſpitis, & non præſidio mei, atq; hoſpitis. Idem, hem tot mea ſolius ſoliciti ſunt cauſa, ut me expleãt. Gaudent autem maxime hæc pronomina ſiue in primitiuorum genitiuorum, ſiue in poſſeſſiua uoce illis tribus, ſolius, ipſius, unius. poſſumus tamen & trium, & quatuor eleganter dicere. Item omnium. plurium. cuiuſcunq;. & ſiqua ſunt huiuſmodi. Cicero, ſed uoluntati ueſtræ omnium parui. Brutus, qui ueſtris paucorum reſpondeat laudibus. Veteres ſas pro ſuas uſurpauere. Ennius, uirgines, nam ſibi quiſq; domi Romanus habet ſas. Item ſam pro eam. Idem, nec qſquam philoſophiã in ſomnis uidit priuſquam ſam dicere cœpit. DELITIAE. Oblectamenta. Delitiæ proprie dicuntur, quæ maxime nobis uoluptati, à deliciendo, hoc eſt alliciẽdo nos ad uoluptatem. Delicere enim elicere eſt. Plau. qui illum ſciat delicere, & noctẽ facere poſſit de die. Veteres licere implicare dicebãt, à licio qđ eſt filum, quo in tela textrices implicant ſtamen, unde Trilicem dicimus ueſtem, quæ ex tribus licijs conſtat. A` licere, hoc eſt implicare lenones appellati, & per diminutionem Lenunculi, & fœminino genere lenæ, quod adoleſcentulos alliciant, ſignificat tamen aliquando Lenunculus etiã nauigium piſcatorium. Lenas appellat Vlpianus, quæ mulieres quæſtuarias proſtituunt. Itẽ eas, quæ alterius nomine hoc uitæ genus exercent, ut ſiqua Cauponam exercens, in ea corpora quæſtuaria habeat, ut multæ ſolent ſub prætextu inſtrumẽti cauponi proſtitutas mulieres habere, dicendum eſt hanc quoq; lenæ appellatione contineri. Hinc Lenocinari, ſeu lenocinium facere dicitur, qui quacunq; ratione hunc quæſtum exercet, ſiue principaliter hoc negotium gerat, ſiue alterius negotiationis aſſertione utatur. Per metaphoram tamen Lenocinari aliquando pro blãdiri accipitur, ſiue allicere. Cicero, tibi ſeruiet, tibi lenocinabitur, minus aliquanto cõtendet, q̃ poteſt. A` licio uerbo fit etiam ſecundum quoſdam lectus, quod fatigatos ad quieſcendũ alliciat, quemadmodũ inferius dicemus. Item à delicio dulce, hoc eſt ſuaue, quod dulcia maxime alliciant. Ab hoc fit dulciculus diminutiuum, & dulcitas. Neuius, O' ſuauis linguæ ſonitus. O' dulcitas animæ. & dulcitudo. Accius, tanta hinc in corda dulcitudo inuaſit. & dulcedo. Cice. quinetiã guſtatus, qui eſt ſenſus ex omnibus maxime uoluptarius, quippe dulcedine præter cæteros ſenſus commouetur. & dulcor. Plynius, contractata dulcorem amittit, & dulceo uerbum. A` quo dulceſco, Idem, paulatimq; matureſcentia dulceſcunt. Item dulcior, dulciſſimus, & aduerbia dulciter. dulcius. dulciſſime, & dulce pro dulciter, prædulce ualde dulce, & ſubdulce aliquantulum dulce, & edulco uerbum, qđ eſt dulcius facio. Cn. Martius, quapropter edulcare conuenit uitam, curaſq; acerbas ſenſibus gubernare. & dulciloquus, dulciter loquens. & dulcifluus, dulciter fluens. & dulciſonus dulciter ſonans. Item à licio fit compoſitum allicio, quod eſt attraho, induco. A` quo allecto frequentatiuũ. Cicero, ad quem fruendum non modo non retardat, uerumetiã inuitat, atq; allectat ſenectus. & alliciefacio, à quo allicefio. Suetonius de Vitellio. Pronus uero ad cuiuſcunq;, et quacunq; de cauſa necem, atq; ſupplicium, nobiles uiros condiſcipulos, & æquales ſuos omnibus blanditijs tantummodo ad ſocietatẽ imperij alliciefactos uario genere fraudis occidit. Pellicio, qđ eſt blãdiendo decipio. A` quo pellicator, qui ad fraudẽ pelliciat, & pelliculatio, quo Cato utitur pro blãda, & fraudulẽta inductione, et pellax, fallax. à quo pellacia, fallacia. Virg. uerũ ubi nulla fugam reperit pellacia, Lucretius, Subdola cũ ridet penitus pellacia põti Item à pellicio pellex, quia blandiendo uirũ ab uxore ſeducit. Eſt. n. pellex, quæ cum eo corpus miſcet, qui habet uxorem, ſicut concubina, quæ cum cœlibe ui-

ro ſine nuptijs locum tenet uxoris, quã græco uocabulo παλλακὴν hoc eſt pallacen appellamus. Suetonius de Veſpaſiano. inde quieti uacabant accubante aliqua pallacarũ, quas in locum defunctæ Cenidis plurimas conſtituerat. Iuſtinus quoque Cyri pallacem nominat. Sed hæc loca uitio ferè librariorũ corrupta ſunt, ut alia pleraq; quippe pro pallacem pellicem ſcripſere. Cum pellex latinũ ſit, nec uiri pellex dicatur, ſed uxoris. Nemo. n. latine loqueretur pellex mea, ſed pellex uxoris meæ. Pallace uero ſit græcũ, & cõcubinã ſignificet, recteq; uiro iũgatur hoc mõ, hæc eſt pallace mea, hæc eſt pallace Veſpaſiani, quemadmodum hæc eſt cõcubina mea, cõcubina Veſpaſiani. ubicunq; ergo repertum fuerit pellicem ad maſculum referri, ſciendum eſt errorẽ ibi eſſe librarij, et pro pellicẽ pallacem eſſe ſcribendũ. Nõ ſine errore Maſurius iuriſconſultus ſcripſit pellicem eam habitam, quæ cũ uxor nõ eſſet, cum aliquo tamen uiuebat, quã uero nomine Amicã, paulo honeſtiori concubinam appellamus. hinc Caius Flaccus emendauit Pellicem uocari ſcribens, quæ cum eo, cui uxor ſit, corpus miſcet. A` pellex fit Pellicatus ſicut à concubina concubinatus. A` delicio delecto, quod proprie ſignificat attraho, duco. Ennius, & me Apollo ipſe delectat, ac ductat Delphicus. Quadrigarius. Fabius de nocte cœpit hoſtium caſtra oppugnare, hoſtem delectare, dum collega id caperet, qđ captabat. Et quoniã quæ grata, ac iucunda ſunt, nos attrahere, atq; allicere ſolent, factum eſt, ut delectare ſit gratum eſſe, ac iucunditate afficere. A` quo delectatio. & delectamentum. & delectamen. Itẽ delitiũ in ſingulari, & in plurali delitiæ. Mar. ſtellæ delitiũ mei columba, Verona licet audiente dicam, uicit maxime paſſerem Catulli. Suetonius. Titus amor, ac delitiæ generis humani, tantũ illi ad promerendum omnium uoluntatem uel ingenij uel artis, uel fortunæ ſuperfuit. Ab hoc delicatus plenus delitijs, ſiue in delitijs uiuere aſſuetus, & per metaphorã mollis, ac tener. A` quo aduerbium delicate. delicia uero lignum eſt, quod à culmine ad tegulas angulares infirmas uerſus faſtigatum collocatur. unde tectum ipſum deliciatum, & tegulæ deliciares appellatæ. Delicare autem ueteres dicebãt explanare. indicare. aperire. Accius. quare alia ex crimine inimicorum effugere poſſis, delica. Teren. quid iſtuc eſt, aut iſte uult ſermo mater delica, hoc eſt indica. oſtende. explana. Item à licio fit oblicio, idem ſignificans, quod delicio, à quo oblecto, & ab eo oblectatio. oblectamen. oblectamentum. Veteres etiam delicare aliquando pro dedicare uſurparunt. Sunt tamen qui delecto, & oblecto non à delicio & oblicio uerbis deduci exiſtimant, ſed à lacto uerbo. Lactare enim eſt non ſolum lac præbere, ſed dulcedine aliqua retinere, & ad perſuaſionem inducere. Terentius, niſi me lactaſſes amantem, & falſa ſpe produceres. Idem, eorum animos lactas. Hoc à lacte deriuatur, quod ſignificat ſuccum maternum, quo animalia nutriuntur. Virg. & lac ſubducitur agnis. dictum ſimiliter, à liciendo, quia admotis mammis infantes alliciuntur. Hinc fit etiam lacteo, quod eſt lac ſugo. Lactans enim eſt, quod lac præbet, lactens cui præbetur. & lacteus candidus. ſuauis. ſuculentus. & lacteſco, in lac conuertor. & lactuca à lacte dicta, quod id genus oleris lacte abundet, præſertim ea quã meconim uocant, à copia lactis ſoporiferi. quippe apud græcos μήκων papauer dicitur, quæ herba ſoporem inducit. A` lactuca lactucinorum familia appellata. Lactes quoque à liciendo dicuntur, quod cibum alliciant. Sunt enim lactes in oue, & homine, per quas labitur cibus. In cæteris hæ ilia, quibus capaciora ſunt inteſtina ad aluum. Plau. ita tibi uacuitate uenio laxis lactibus. Item à lacte lacticinia, hoc eſt cibi ex lacte facti, et Lactiphagi Scythiæ populi, qui et Galactophagi dicũtur. et lactaria her-

ba, quæ & tithymallus dicitur. & lactuca caprina, de qua inferius dicemus. & lactaria columna, quæ erat in foro boario, dicta quod ad eam infantes lacte alendos deferebant. Item elicio, quod eſt eduxo. extraho. à quo elecebræ argentariæ dictæ ſunt meretrices ab eliciendo argento, et elices ſulci aquarij, per quos aqua collecta educitur, & electo frequẽtatiuum. Plautus, electabo adoleſcentem muneribus. & elicius Iupiter. etenim Numa Pompilius regnum urbis Romæ adeptus, pontificem elegit, cui ſacra omnia exſcripſit, atq; exſignauit, qbus hoſtijs, qbus diebus, ad quæ templa ſacra fierent, cæteraq; omnia publica, priuataq; ſacra pontificis ſcitis ſubiecit, ut eſſet, quò conſultum plebs ueniret, nequid diuini iuris negligendo patrios ritus, peregrinosq; aſciſcendo turbaretur. Nec cœleſtes modo cerimonias, ſed iuſta quoq; funebria, placãdosq; manes, ut idem pontifex edoceret, quæq; prodigia fulminibus, aliòue quouis modo miſſa ſuſciperentur, atq; curarentur. Ad ea elicienda è mentibus diuinis, Ioui Elicio aram in Auentino dicauit. Pontifex uero appellatus eſt uel à poſſe, et facio (ut Scæuolæ placet) uel (ut Varro affirmat) à ponte. nam à pontificibus pons ſublicius primum eſt factus, & poſtea ſæpe reſtitutus, necnon cæterorum pontium cura eis data. Illicio attraho, illaqueo, à quo illecebræ dictæ blanditiæ, quibus illicimur. À quo illecebroſus, qui inanibus blandimentis hominem allicit, & illix, qui allicit ſicut illex, qui ſine lege, & ſine iure uiuit, & illecto pro allecto. & illicium, de quo inferius dicemus, cum populus illiciet. illico uero nõ ab illicio declinatur, ſed à loco, quaſi in loco. Proprie. n. illico ſignificat in eo loco. Neuius, ſeptimumdecimum annum illico ſedent. Ennius, & quia quò irent neſciebant, illico manſerunt. Ponitur tamen frequentiſſime pro ſtatim. Plautus, illico hic ante hoſtium eramus. Locus proprie dicitur quicquid aliquid continet. Virgilius. hic locus urbis erit. Poniturq; à dialecticis inter accidentia ſubſtantiæ, & eſt una de ſeptem circunſtantijs, quæ ita numerantur, perſona, qualitas. negotium. facultas. cauſa. modus. tempus, quæ hoc uerſu clauduntur. Quis. quid. ubi. quibus auxilijs. cur. quomodo. quando. Aliquando locus ponitur pro genere. Salluſtius, natus haud obſcuro loco. Eſt & locus argumenti ſedes. Ab hoc fit aduerbium imperioſe, hoc eſt acriter. ſeuere, & cum oſtentatione imperij. item ab impero imperito frequẽtatiuum & quod apud Plynium reperitur, imperitabũdus pro imperitans. Poetæ aliquando induperatorem pro Imperatore uſurparunt. Iuuena. Quales tunc epulas ipſum glutiſſe putamus Induperatorem.
